

MAKE YOUR MARK

PRODUCT CATALOG

Our grandfather and Keson's founder, Roy Nosek, often said:

"If a job is worth doing, it's worth doing right."

We know he didn't say it first, but he said it first to our fathers who said it first to us. He showed us what it means through the way he lived his life and the way he treated people.

Be Positive.

Work Hard.

Respect Others.

Have Fun.

Act Ethically.

Do Good.

Make your mark.

We believe in these principles.

We strive to practice them in all that we do.

Keson products are for people who are passionate about their work and getting it done right.

We think this might be just about everyone.

SPECIALTY

LEVELS

MEASURING WHEELS

BEST VALUE AND BIGGEST VARIETY

We work hard to make sure our measuring wheels are **the best in the world**. We are the new standard, leading the industry in the development of wheels with better features and more valuable benefits.

- Our counters are the **sturdiest and the most reliable**. Our wheels are designed to protect the counter, the most valuable component of the wheel.
- With the industry's **strongest frames**, the MP wheels have become the professional's choice.
- **Longest Warranties** — Limited Lifetime Warranty on all but 3 models (2-year limited wheel warranty for MP401E, RRT6 and RRT12).
- **Safety** — All of our large wheels come with a reflector to help keep you safe while you work.

ACCURACY

99.7% accurate on a flat, even track.

VARIETY

MP SERIES Metal Professional Series of high-end durable wheels. We even have Steel Frame Electronic and Decimeter wheels, the only ones of their kind.

RRT SERIES New models with a trigger brake and a counter reset on the pistol grip handle.

RR KESONITE SERIES Our metal/resin compound wheels with the durability and shape memory of molded composite and the weight of metal.

RR SERIES LARGE Original RoadRunner Series of more economically priced wheels.

RR SERIES SMALL Original RoadRunner Series of more economically priced wheels.

PAINT APPLICATORS Various upside down spray paint applicators for any job.

Available in English, 10ths and Metric.

MADE IN THE USA

All of our wheels (except the RRT12 and RRT6) are assembled and tested in Aurora, IL.

DESIGN

We listen. We create new products and improve current models based on your feedback and our own expertise. We're continuously improving our products and processes to provide a better service.

METAL PROFESSIONAL WHEELS

These Metal Professional (MP) wheels are durable enough to stand up to the harshest field conditions. All feature the industry's best counters with the best counter protection.

FEATURES

- Innovative design — simple, center-line functionality. Great balance.
- Huge numbers make for easy reading. Superior protection and placement of the counter — the metal shelf keeps dirt and debris from coming into contact with the critical counter (5 digits, up to 99,999).
- Rugged 3/4 in. steel frame — tough enough to handle any terrain.
- Compact fold-down — easily folds in half for storage and portability.

Limited lifetime warranty / MP401E: 2-year limited wheel warranty.

MODEL	UNITS	DIA.	CIRC.	SPECIAL FEATURES
MP401E	ft. in. & ft. 10ths metric continous in.	15-1/2 in.	4 ft.	Steel frame Electronic brain: area, add radius, memory and more

MP201	ft.	7-1/2 in.	2 ft.	Solid molded wheel

TOP READING, CENTER-LINE WHEELS

These innovative wheels feature a gear shaft driven counter placed above the wheel. This results in better balanced wheels.

FEATURES

- Enhanced grip pistol-type handle increases control and comfort.
- Re-set on the handle AND on the unit housing — no more bending over, lifting the wheel or stepping on it to reset to zero. And the re-set on the housing is reinforced to protect it when re-setting with foot.
- Brake on pistol grip stops counting instantly. Stop adding lengths accidentally by putting the brake on exactly when you need it.
- Collapsing hinge — snaps into extended lock with the flick of the wrist and it disconnects, rather than break, if you forget to press the unlock trigger.

2-year limited wheel warranty.

MODEL	UNITS	DIA.	CIRC.	SPECIAL FEATURES
RRT6	ft. & in.	6 in.	18 in.	Re-set trigger
RRT12	ft. & in.	12 in.	3 ft.	Re-set trigger

ROADRUNNER® LARGE

Measuring is quick and easy with Keson RoadRunner Series Measuring Wheels.

FEATURES

- Time-proven designs with over 20 years of improvement.
- 5-digit, easy-read, magnified counter (9,999 ft., or meters; 11 in., 10ths or dm) subtract in reverse.
- New 3-piece, pistol grip handle with quick-snap cam locks.

RR318N is the Keson Best Seller.

RRPA18	ft. & in.	4 in.	1 ft.	Paint applicator

MP401E

WORLD'S STURDIEST MEASURING WHEEL

The MP401E is Keson's only electronic wheel with a steel frame. It is the world's sturdiest electronic measuring wheel and the easiest and most comfortable to use. It will stand up to the harshest conditions.

SWAN-NECK ERGONOMIC HANDLE

Our patent-pending "thumb-up" grip ensures less wrist strain and superior control.

RELIABLE INPUT SYSTEM: MAGNETIC SENSORS

Dust, dirt and other particles can disrupt a light beam used in competitive units. Our magnetic pick-up avoids these problems.

SEALED COUNTER ENCASEMENT

Designed to NEMA Class II standards, our counter housing ensures that it will not be damaged by rain. What's more, you can safely clean the entire wheel with a damp cloth.

COUNTER SIZE AND PLACEMENT

Our easy-to-read digital counter is in the most protected spot on the wheel. With the handle up, it is nearly impossible for the counter to come into contact with the ground. With the handle down, the roll bar offers solid protection. Counter requires 2 AA batteries (not included).

DISPLAY

Backlit 7 Digit LCD display for low-light usage. Up to 99,999 ft., 11 in. or 99,999.9 in tenths and metric.

2-year limited wheel warranty.

MODEL	UPC (052837)	UNITS	DIA.	CIRC.	SPECIAL FEATURES

MP401E

MP401

MP SERIES SPOKED WHEELS

MP401

Our best selling metal wheel. The 4-foot circumference wheel levels out uneven ground by spanning divets that smaller wheels would dip into. The wheel's size enables it to roll and register feet clicks at the best pace in the industry.

ADVANCED COUNTER TECHNOLOGY

Our geared Mechanical Clicker Counter features easy-to-read numbers.

MP301

Not far behind the MP401 in popularity, this slightly more compact wheel is a little lower in price without compromising any durability.

MP301M

Our 1 meter circumference wheel registers a single meter click per revolution. It's about the same size as the MP301.

MP301DM

This is an industry first — we have 10 evenly spaced pins around the 1 meter circumference of this wheel. The result is a metal wheel that registers in decimeters. It works perfectly fine for a brisk walking pace, however, it cannot be used at higher speeds as the counter does not have time to reset between pins.

MP401P

We mold 4-foot wheels for our RR series and for a less expensive alternative to the spoked wheels, we offer this model.

Limited lifetime warranty.

MODEL	UPC (052837)	UNITS	DIA.	CIRC.	SPECIAL FEATURES
MP301	026128	ft.	11-1/2 in.	3 ft.	Best seller!
MP301M	025763	m	.318 m	1 m	Steel metric wheel
MP301DM	026265	m, dm	.318 m	1 m	Most accurate decimeter wheel
MP401	025756	ft.	15-1/2 in.	4 ft.	Best seller!
MP401P	026128	ft.	5-1/2 in.	4 ft.	Plastic wheel, metal frame

MP SERIES SOLID WHEELS

There are advantages to solid wheels. A sliding tool box or a shovel in the back of a truck has destroyed the precision of many a spoked wheel. Solid plastic wheels are not nearly as susceptible to these impacts. Also, solid Keson wheels do not go "out of round." You cannot bend them or flatten a portion of them. Lastly, twigs, sticks, tall grasses and other brush do not get caught up in the spokes or lock these wheels up. If your job takes you through fields or trails, consider a solid wheel option.

FEATURES

- No spokes to catch grass or sticks.
- No spokes to bend or snap.
- Solid molded wheels do not bend or go "out of round."

ADVANCED COUNTER TECHNOLOGY

Our geared Mechanical Clicker Counter features easy-to-read numbers.

MP415

MP415

The counter measures feet and there are two scales molded into the hub of the wheel itself: inches on one side and 10ths on the other.

MP315M

On our metric version, decimeter graduations are molded into the hub of the wheel.

MP201

Strong, rigid, 1-piece steel handle — strongest in the industry. Without a collapsing point in the handle, there is no weak point on this frame. This solid wheel is two inches wide, giving it better traction on sand, loose gravel and wet ground; a favorite among landscapers.

MP201

Limited lifetime warranty.

MODEL	UPC (052837)	UNITS	DIA.	CIRC.	SPECIAL FEATURES
MP201	008315	ft.	7-1/2 in.	2 ft.	Solid molded wheel
MP315M	027040	m	11-1/2 in.	3 ft.	Solid, metric
MP415	026449	ft., in & ft., 10ths	15-1/2 in.	4 ft.	Solid, two scales wheel

RRT6

RRT12

RRT6 / RRT12

FEATURES

- Enhanced grip pistol-type handle increases control and comfort.
- Re-set on the handle AND on the unit housing — no more bending over, lifting the wheel or stepping on it to reset to zero. Additionally, the re-set on the housing is reinforced to protect it when re-setting the counter with your foot.

Pistol grip handle and center line balance

Folds down to 1/2 its size

- Brake on pistol grip — stops counting instantly. Stop adding lengths accidentally by putting the brake on exactly when you need it.
- Collapsing hinge — snaps into extended lock with the flick of the wrist and it disconnects if you forget to press the unlock trigger.
- Center-line handle design with counter on top of wheel — center of gravity aligned for perfect balance. This makes measuring easier and more accurate. The raised counter makes reading it easier.
- Compact fold-down — easily reduces to 1/2 its size for storage and portability. Storage is a snap.

5-digit, easy-read, magnified counter (measures 9,999 ft., 11 in.). That's almost two miles.

- Flip-down kickstand (**Model RRT12**) — keeps the wheel upright when you need your hands free to perform other tasks and stays out of the way as you measure.
- Gear & shaft transmission for highest measurement accuracy and strength. No belts to stretch or fail.
- Handle lock — lock your handle in place when you're not using the wheel. Our clamp protects the extension hinge from breaking.

2-year limited wheel warranty.

MODEL	UPC (052837)	UNITS	DIA.	CIRC.	SPECIAL FEATURES
RRT6	027415	in. & ft.	4"	1 ft.	Flip-down kickstand
RRT12	027412	in. & ft.	11-1/2"	3 ft.	

KESONITE™ WHEELS

MADE OF KESONITE™

There are inherent vulnerabilities of die cast and metal spoked wheels. Everyday use requires that a wheel handle some rough treatment without dents and without bending.

Not all wheels are up to this. Our solution? Invent a new material. Kesonite is a strong, dense metal/resin composite. It holds its shape better than metal and it's stronger than a spoked or die cast wheel. The weight of the wheel makes it easier to use and more accurate on rough terrain.

Based on the design of the RR Series Large, a model with over 20 years of continuous improvement. Includes a NEW wheel design, material and safety reflector!

EASY-READ, MAGNIFIED COUNTER

5-digit, easy-read, magnified counter measures 9,999 feet, 11 inches (9999.9 ft on engineers' model and 999.9 meters on metric).

NOW WITH A 3-PC. PISTOL GRIP HANDLE!

The same outstanding features, benefits and reliability of our previous 2-piece handle version with the added convenience of our **new 3-piece, pistol grip handle**. **The twist locks have been replaced with quick-snap cam locks**. The new handle telescopes down to a **more compact 23 inches** for ease of transport and more compact storage.

RR30

RR318N

ROADRUNNER INDOOR/SHORT RUN WHEELS

Smaller 1-foot wheels combine Keson quality and reliability with convenient size and light weight. Typically used in short run and indoor applications these products are compact and very reliable. It's easy to measure curved, horizontal and asymmetrical surfaces.

These products are popular with realtors, appraisers, police officers and homeowners. You can measure alone, and you can measure faster than two people with a tape measure. Many of our customers keep one of these wheels as an emergency backup to their regular wheels.

EASY-READ, MAGNIFIED COUNTER

The single wheel and dual wheel both have a 5-digit, easy-read, magnified counter that measures 9,999 feet, 11 inches without resetting. That's almost two miles.

SINGLE WHEEL

FEATURES

- Weighs less than 2 pounds.
- The handle telescopes from 17 inches (fits into a toolbox or briefcase) up to 38 inches.

Limited lifetime warranty.

DUAL WHEEL

Keson has patented a raised reset button that enables you to re-set the counter with your foot. We have improved the supporting structure around the reset so that it can handle foot taps to zero the counter.

The dual wheel provides greater stability when measuring, making it easier to maintain a straight line as you walk.

The handle telescopes from 20 inches (fits into a toolbox or briefcase) up to 42 inches.

Limited lifetime warranty.

PA35

RRPA18

RRPA182

PAINT APPLICATORS

Measure and mark simultaneously with **RRPA18** and **RRPA182**. These lightweight tools feature a trigger just under the pistol grip. Engaging the trigger fires off a burst of upside-down spray paint precisely where it's needed.

You can measure and mark alone, and you can work more quickly than 2 or 3 people with a tape measure and spray gun.

FEATURES

5-digit, easy-read, magnified counter that measures 9,999 feet, 11 inches without resetting. That's almost two miles.

- Pistol grip and trigger to spray paint exactly where you want it.
- Weather resistant housing protects the counter.
- Precision wheels molded from high-grade ABS, providing a lifetime of accurate measuring.
- Paint can sleeve fits all standard US-style inverted aerosol paint cans.

OPEN HOUSE STEEL TAPES

MEASURING TAPES THAT ARE MADE TO LAST

DOUBLE NYLON-COATED STEEL LONG TAPES

For over 40 years, Keson steel tapes have met the highest standards of accuracy for surveyor quality measurements. They resist breakage and damage under the toughest field conditions. We understand that these tapes are critical to your profession. That's something we take very seriously, which is why we supply the best possible tapes we can.

BLADES

Keson nylon-coated steel tapes are constructed with a double layered .2mm nylon, permanently bonded over a center core of 13mm steel. Our multi-layer construction assures corrosion resistance (even to salt water) and provides at least three times the usual tape life.

HOUSINGS

We have designed a variety of housing types for our customers: Stainless Steel (SNR), 3X High-Speed Rewind (NRS) and standard 1X rewind (NR). Double riveted or screwed cases, metal reinforced handles and shovel-style, rubber grips are standard on all of our offerings.

BLADE WIDTH

3/8-inch wide blades are about 10-20% lighter than 1/2-inch wide blades, without sacrificing durability. The thinner blades are also less likely to drift if the wind kicks up.

PRODUCT SELECTION

Keson offers the widest product selection of double nylon-coated blades. Units, attachments and zero points vary because of the precise needs of our many customers.

ZERO POINTS Where do the numbers start?

- ▼ Hook End, most common
- ▼ Tape End, typical with ring attachment
- Dead Foot — on the tape about 1-ft. from ring end

SNR18200

SNR SERIES STAINLESS STEEL HOUSING, NYLON-REINFORCED STEEL BLADE

The world's best steel long tape in a housing that's built to last!

FEATURES

- The strongest housing (stainless steel) on the market!
- Tough, double nylon-coated steel blade assures long life under field abuse.
- Rubber-grip shovel handle for comfortable, rapid reeling.
- Metal crank handle for durability.
- Housing reinforced with rivets for superior strength.

CLOSED HOUSE STEEL TAPES

NR SERIES NYLON-REINFORCED STEEL BLADE

A Keson best seller! Since 1968 this style of Keson steel tape has been providing customers with accurate measurements. They are used in the harshest conditions in which people measure, and they stand to the only test that matters: field performance.

We have made modifications to the housing over the years:

- Better plastic and molding shapes for increased durability.
- Double screws to hold the housing together in the event of a drop.
- Better blade axle to reduce breakage due to the weight of the tape if dropped.

For years we've been honoring warranty dates long past a single year, so we are now proud to offer a limited lifetime warranty on these products.

FEATURES

- Tough, double nylon-coated steel blades.
- Break-resistant under severe use in the field.
- 3/8-inch wide blade reduces wind drift and tape weight.
- Metal-reinforced crank handle for durability.

ST181003X

ST18503X

ST_3X & ST_Y SERIES

This Steel Tape (ST_3X and ST_Y) series is great for those who need a longer tape but like the blade protection that a closed house offers. They slip easily into a pocket, purse, tool pouch or tool belt. The ST_Y versions come with a belt clip. The cases are protected by an impact reducing rubber grip that makes it easier to hang on to them.

FEATURES

- Nylon-coated blade for superior durability and rust resistance.
- 3X gearing for quick rewind (part numbers that end in 3X).
- High-impact resistant case with full-rubber, non-slip grip.
- Ideal for real estate agents, general surveying, civil engineering, building construction, highway and road construction, home building, mining, etc.
- 3/8-inch wide blade — bends easily but not affected by wind like wider tapes.

Limited lifetime warranty.

ST SERIES

Our standard Steel Tape (ST) series tapes come in the industry's most durable metal housing. These long, steel tapes have a compact, closed, metal case that fits nicely in your hand. The flush-folding crank pops up for easy rewinding. If you're measuring alone, the metal catch hook is set at zero, so there's no need for a correction. The graduations are painted black on a durable, bright-yellow steel blade.

FEATURES

- Closed, metal housing protects the tape.
- Compact, fits easily into briefcase or even a pocket.
- Rewind handle folds flush.

Limited lifetime warranty.

OPEN HOUSE FIBERGLASS TAPES

HEAVY-DUTY FIBERGLASS LONG TAPES

For over 40 years, Keson fiberglass tapes have met the highest standards of accuracy for quality measurements. They resist breakage and damage under the toughest field conditions. We understand that these tapes are critical to your profession. That's something we take very seriously, and that is why we supply the best possible tapes we can. We cover each blade with two coats of PVC, one to bind the fiberglass strands and a second over the printed units, so the numbers don't wear away.

"This product is used by many cavers as the number one measuring tool for underground survey of caves. We have taken these tapes well over 500ft underground and have dragged them through some of the worst mud, grit and grime you can imagine. We have gone to the point of completely covering the tape with mud—so much mud you cannot even see the numbers. We just washed the tape in water and it's like new again. Nowhere above ground are you ever going to encounter conditions like what we put these tapes through. You get what you pay for and Keson tapes are just that indestructible!"
Cave Surveyor, Kelly

BLADES

Keson fiberglass reinforced tapes are designed to withstand more wear and tear than any other type of fiberglass measuring tape. They contain 40,000 fiberglass strands for greater tensile strength and superior accuracy when tension is applied. Two coats of PVC protect the tapes from breaking, and a blade shield adds strength to the attachment (the point at which most fiberglass tapes break). These tapes have proven dielectric strength of 200,000 V/M to assure your safety from electrical hazards.

FIBER COUNT & TAPE WEIGHT

The weight of a tape is a factor to consider if you do a great deal of measuring. With our heavy-duty fiberglass tapes, we pack the strongest possible fibers—and the greatest number—into the thinnest possible tapes to keep the weights down while keeping the blades strong.

ELONGATION

Tapes elongate (stretch) when excessive pulling force is applied. Keson heavy-duty fiberglass always returns to its proper length after the pulling stops. The reason is our high fiberglass strand count. To keep your fiberglass measurements as accurate as possible, don't pull too hard when making your measurements.

HOUSINGS

We have designed a variety of housing types for our customers: Freewheeling Long Tape (FLT), 3X High-Speed Rewind (OTRS) and Standard 1X Rewind (OTR). Double riveted or screwed cases, metal reinforced handles and shovel-style, rubber grips are standard on all of our offerings.

PRODUCT SELECTION

Keson offers the widest product selection of fiberglass blades. Units, attachments and zero points vary because of the precise needs of our many customers.

FLT18165

FLT SERIES

FEATURES

- Ergonomically designed housing handle with tactile rubber grip for balance and comfort.
- Freewheeling hub for fast pay out of blade without spinning crank. No more busted knuckles! Re-engage with the push of a button.
- Massive crank arm with large, easy-grip knob for comfort and reliability. Knob folds down for storage.
- Locking pawl enables proper blade tension during measurement.
- Rubber no-slip foot for steady placement during measurement.

Limited lifetime warranty.

OTRS18200

OTRS SERIES 3X HIGH-SPEED REWIND

Our best offering in the fiberglass housings. The OTRS series pairs an incredibly durable housing with our excellent blades. The housing features double rivets that provide added strength. End caps on the arms further protect the housing. The shovel handle with rubber over-mold keeps your grip sure and comfortable.

The 3X high-speed rewind gearing is made up of metal, strip-proof gearing.

FEATURES

- Metal, strip-proof, gearing.
- Blade and housing are rust & break-resistant.
- Rubber shovel handle for a comfortable, "no-slip" grip.
- Metal-reinforced crank handle lasts longer.
- Double-throat rollers guide the blade return and prevent the tape from twisting.
- Double-riveted housing for durability.

Limited lifetime warranty.

CLOSED HOUSE FIBERGLASS TAPES

OTR SERIES OPEN-TYPE REEL, ULTRA-GLASS BLADE

THE WORLD'S PREMIER FIBERGLASS LONG TAPE IN A BUILT-FOR-DURABILITY HOUSING!

A Keson best seller! Since 1968 this style of Keson fiberglass tape has been providing customers with accurate measurements. They are used in the harshest conditions in which people measure, and they stand to the only test that matters: field performance.

We have made modifications to the housing over the years:

- Better plastic and molding shapes for increased durability.
- Double screws to hold the housing together in the event of a drop.
- Better blade axle to reduce breakage due to the weight of the tape if dropped.

We've been honoring warranty dates long past a single year and we are now proud to offer a limited lifetime warranty on these products.

FEATURES

- Tough, molded handle is easy to grasp.
- The crank handle is reinforced with metal to provide years of rugged use.
- Double-throat rollers guide the blade return and prevent the tape from twisting.
- The shovel handle is ideal for rapid reeling.

MC18100

MC SERIES

"This is it! If you work with a tape measure every day, this is the tape. It's accurate and reliable. I have been working with one for the past 12 years."
Appraiser, Scott

We know that blade protection is key to a long tape life. Our metal case (MC) keeps the blades safe. These long, fiberglass tapes have a compact, closed metal case that fits nicely in your hand. The flush-folding crank pops up for easy rewinding. If you're measuring alone, the metal catch hook is set at zero, so there's no need for a correction. These are very popular with users that primarily do interior measurements.

FEATURES

- Heavy-duty blades with 40,000 strands of fiberglass ensures a long life under the most demanding field use.
- Stretch-resistant, extremely resilient.
- Closed, metal housing protects the tape.
- Blade is 1/2-inch.
- The crank handle is metal to provide years of rugged use.
- Double-throat rollers guide the blade return and prevent the tape from twisting.

Limited lifetime warranty.

MEASURING TAPES

PRO SERIES

Keson PG Pro Series tapes are built to last. They feature a stainless-steel housing for increased durability, high-impact resistance and better blade protection. The nylon-coated blades provide extended blade life. These blades are white for increased readability. The true-zero, 4-riveted hook offers superior strength. The positive blade lock and reverse button are standard. All have a handy belt-clip. Tapes are printed with 16 inch center and 19.3 inch rafter markings. All 18 series tapes feature continuous inches.

FEATURES

- Stainless Steel Housing adds strength.
- Nylon-coated, no-glare white blade.
- Rubber grip prevents slips and protects the tape if it does happen to fall.
- Belt clip.
- Positive lock and reverse—the most common and practical lock mechanism.
- “Bumper” blade return cushions the impact of the hook upon return.
- Blade width is a standard 1 inch.
- Continuous inches.

Limited warranty.

PG25

RUBBER GRIP SERIES

Our Rubber Grip tapes offer a different feel from our Standard and Pro offering. The rubber boot protects the tape blade and housing from accidental drops. The RG series comes with lacquer-coated blades.

FEATURES

- Rubber boot provides high impact resistance and comfortable grip.
- Belt clip.
- Positive lock and reverse — the most common and practical lock mechanism.
- “Bumper” blade return cushions the impact of the hook upon return.
- Blade width is a standard 1 inch.
- Continuous inches.
- 16 inch studs labeled.
- 19.2 inch truss labeled.

Limited warranty.

SPECIALTY MEASURES

POCKET RODS

This unique grading rod is compact like a tape measure. Simply remove the nylon-coated steel blade from the case and you have a convenient 6-1/2 foot vertical-reading leveling rod. Each case has a built-in target. When finished, just slide back into the case. It's ideal for checking a grade without having to carry a full-size rod.

The Pocket Rod is ideal for foundation work, grading, swimming pools and construction photo records. The nylon-coated blade protects the graduations from moisture and wear. Easy-to-read numbers are printed on both sides, and the blade also features a built-in target for sighting. Also, it has a heavy-duty end hook. When you're through, the blade stores in its own sturdy case. Perfect for photographs that require scale. A police and insurance adjuster favorite!

FEATURES

- Built-in target on 2 sides.
- Nylon coated facing not affected by moisture.
- Non-glare surface.
- Convenient surveyors pole.
- Heavy-duty end hook.

"Markings are clearly visible for photographing. I use it for appraisal work for damaged vehicles. No other product can be seen clearly in pictures while capturing the object behind it."

Damage Appraiser, David

DIAMETER TAPES

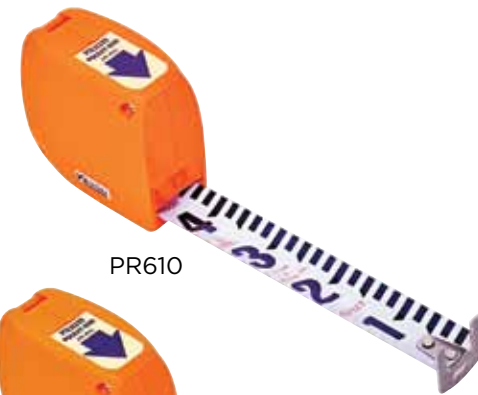

The diameter of a circular object, like a tree or a pipe, is easily measured using a Keson diameter tape. The tape is calibrated in units of 3.14(pi) inches. The tape is actually measuring the tree or pipe's circumference, but the units on the tape are adjusted by pi enabling you to get a diameter by wrapping this tape around a circular object.

FEATURES

- Automatic rewind.
- Lacquer-coated white blades with black printing.

Limited warranty.

DEPTH GAUGES

Developed for seismographic measuring, these tough fiberglass tapes are used by a variety of industries to measure depth. Attach any weight to the snap ring and lower to measure depth. The depth gauges are incredibly durable, flexible and lightweight with graduations printed on both sides.

FEATURES

- Numbers are graduated from the weighted end of the tape strap.
- Tough, flexible and lightweight with graduations printed on both sides.
- White with black and red markings.
- Coating: Clear Coat.
- Tensile Strength: 100kg / 200 lbs.

Limited warranty.

WOOD RULERS

Keson wood rulers have long been an essential tool for carpenters, mason's, plumbers and all types of tradespeople. They extend to over 6 feet (2m). They enable you to draw straight lines up to these lengths without the use of a chalk line or mason's line. Folds up to 9-1/2 inches.

FEATURES

- Steel springs have a precision lock action for extra strength when extended.
- Cleanly machined edges allow the rule to be snapped together easily and hold it stiff while measuring.
- Weather resistant markings have tough, clear protective coating.

TALLY METERS

Record and count instantly with this precision counter. Keep an accurate count whether it's of traffic counts, livestock counts or headcounts.

Easy action lever changes count with slight thumb pressure and a single side knob turn resets counter to zero. Features a 4-digit register that records up to 9999.

Keson's high-quality tally meters are built to last.

LVL_P PROFESSIONAL, ORANGE

- Aluminum alloy reinforced frame.
- Three, fixed, unbreakable, plumb, magnified, fog-proof acrylic vials.
- Guaranteed to 0.5 mm/m in the standard position, and 0.75 mm/m inverted.
- Cushioned end caps to guard against shocks in the job site environment.
- Comfortable, cushioned grips for a firm grasp and steady level placement.

Available in four sizes: 24", 36", 48" and 78".

LVL_HH HAND HOLD SERIES

- Lightweight, top-reading, aluminum box beam levels can stand up to any job.
- Solid-set acrylic, barrel-shaped vials enable an accurate level reading, regardless of the horizontal orientation of the level — a full 360° read.
- Shock-absorbing end caps and ribbed-wall design, along with large easy-grip hand holds that provide reliable, professional results every time.

Available in five sizes: 24", 36", 48", 72" and 78".

SPECIALTY

LVL3

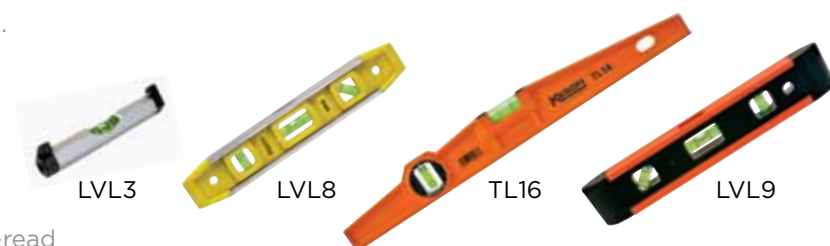

Professional accuracy line level with an easy-to-read bubble housed in a sturdy aluminum body.

LVL8

Small profile, magnetic base, lightweight torpedo level. Great for home projects.

TL16 & TL24

These tile levels are cast for strength and durability. The low profile design can be used as a straight edge and screed. The waterproof body is easy to clean and fits under toe kicks and behind fixtures.

LVL_FV PROFESSIONAL, ALUMINUM

Superior strength — profile weight is 890 g/m and no hand holes to compromise integrity.

- Unbreakable magnified acrylic vials. Shock-absorbing end caps. Machined edges.
- Measuring tolerance is .3 mm per 1 meter in standard position. The period at the end of this sentence is .3 mm tall.
- The inverted measuring tolerance is .75 mm per meter.

Available in four sizes: 24", 36", 48" and 78".

LVL_IB I-BEAM SERIES

- Extruded aluminum with barrel-shaped vials that enable an accurate level reading, regardless of the horizontal orientation of the level — a full 360° read.
- Shock-absorbing, protective end caps.
- Great for the budget minded.

Available in two sizes: 24" and 48".

LVL9 MAGNETIC V-GROOVE 3-VIAL TORPEDO LEVEL

9 inches, 3-vials. Small profile, magnetic base, lightweight torpedo level. Great for home projects. Cushioned end caps protect your level from abuse even in the toughest environments. Glow-in-the-dark reflector base improves reading in low-light areas.

CHALK LINE REELS

GIANT® CHALK LINE REELS

Our GIANT® brand is big — so it can hold a lot of string and a lot of chalk. If you're snapping dozens of lines, or need big bold lines, grab a GIANT® and make your mark.

G3X100

FEATURES

- Ergonomic design to reduce wrist strain.
- Chalk Catcher reduces waste and keeps chalk from ending up on your clothes.
- "Glovable" grip for cold weather.
- Huge Big Mouth™ opening to ease fill-up and no-leak stopper to keep it shut.

G130 / G150

FEATURES

- 130 feet or 150 feet, heavy-duty cord and pull ring.
- Holds over a pound of chalk for fewer refills.
- One-piece steel crank for long life.

G100 / G110 / G140FL

FEATURES

- 100 feet or 110 feet, heavy-duty cord and pull ring.
- Hooks easily onto tool belt and holds almost a pound of chalk.
- One-piece steel crank for long life.
- **G140FL** features 140 feet of thinner line — traditionally associated with a small chalk line reel — in a GIANT®.
- **G110D** features two chalk lines reels that share a common string and no pull ring. Hold two reels on opposite sides of a concrete slab or roof and chalk up the line by winding from one box to the other.

*Most reels are available as combos with 3 pounds of Keson Chalk.

Limited warranty.

STANDARD CHALK LINE REELS

They fit in your hand, tool belt, or tool bag. Thin lines wherever and whenever you need them. Geared rewinds are a time saver. Braided lines are stronger and require fewer replacements. These chalk line reels come with thin multi-material (cotton and polyethylene) lines for pinpoint accuracy and increased strength.

RWM1

METAL, 3X HIGH-SPEED REWIND

Great feel, geared rewind, tear-drop shaped, metal reel.

- Rubber grip, tear-drop shape.
- Heavy-duty metal case with rubber side grips for sure hold.
- Metal handle.

P100

UNIQUE SHAPE AND SPECIAL LINE

A great reel for corner work.

- Holds 100 feet of heavy-duty polycord, braided line for superior strength
- Hook end to allow one person operation.
- Heavy-duty steel crank handle for longer life.

GB1* / GB1NEON*

PLASTIC, 3X HIGH-SPEED REWIND

- High-speed, 3X rewind will re-chalk your line quickly.
- Sturdy case will take the abuse any job site can dish out.
- Clutch lets you pull the string out without knuckle-busting on a whirly handle.
- No-Spill grommet keeps refills clean and easy.

FB2*

A standard, cost effective chalk line reel. This reel has been in our line since the beginning.

- Self-sealing grommet for spill-free refills.
- Great little reel at a great price.
- Doubles as a plumb bob.

K1

The basic metal chalk reel. Solid construction, consistent performance at a great price.

- Compact and super light.
- Doubles as a plumb bob.
- Self-sealing grommet for spill-free refills.

Limited warranty.

A LITTLE ABOUT PROCHALK®

ALL MARKING CHALK IS NOT CREATED EQUAL

The color and the amount of the pigment determines the vividness and permanence of the line. The pictures below give a basic idea of how marking chalk works and why Keson chalk is the best marking chalk in the world. It sticks to your line until you decide you want it to stick to something else. Over the years, we've fine tuned our formulas to produce chalk that performs with consistent excellence, batch after batch.

THREE BASIC VARIATIONS OF INTENSITY

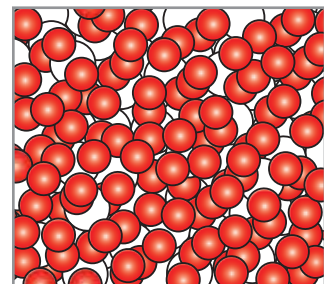

We've engineered a range of colors with three basic variations of intensity. ProChalk for your basic chalk line needs. Glo-Orange and Glo-Lime are highly visible versions of ProChalk that will wear or wash away naturally. ProChalk Plus, for lines that hit and stick for a long, long time; and standard ProChalk Ultimate is chalk dye, almost 100% pigment!

PROCHALK® & PROCHALK® GLO STANDARD MARKING CHALKS

ProChalk is formulated to achieve a perfect line every time. Brilliant color tones provide strong, sharp lines. From the brightest pigments in the industry, we produce standard colors plus our unique, fluorescent Glo-Orange and Glo-Lime for improved visibility.

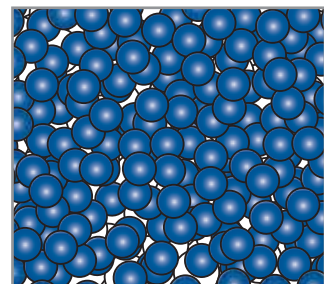

- Standard grade marking chalk.
- Brilliant color.
- 4-5 strikes usual line yield.
- Great flow for easy reel fill-up.

PROCHALK® PLUS PROFESSIONAL MARKING CHALK

There is a delicate balance that needs to be maintained with higher grade chalk: you need enough pigment to slap down a line that's not going anywhere and enough carrier to keep the chalk flowing. ProChalk Plus is formulated to achieve a perfect, lasting line every time.

- Professional grade marking chalk.
- Water-resistant lines hold your mark.
- 8-10 strikes usual line yield.
- Great flow for easy reel fill-up.
- Brilliant weather-proof color.

PROCHALK® ULTIMATE PROFESSIONAL MARKING DYE

Sometimes called chalk dye, this product lays down a mark that stays. Our red and blue dyes are souped up even more than the ProChalk Plus grades.

- Premium grade marking dye.
- Great flow for easy reel fill-up.
- 12-15 strikes usual line yield.
- Eliminates the need for chalk line saver in most environments.
- Brilliant weather-proof color.
- Water-resistant lines hold your mark.

WARNING! These are concentrated marking products. Lines snapped with ProChalk Plus & Ultimate grades may be visible as long as one year after striking. The colors also may bleed through light-colored paint.

BRAIDED MASON TWINE

Braided twine doesn't come apart even when reused. It is perfect for large jobs and everyday use. You can also nick it with a trowel and it won't unwind. Another benefit is that braided twine does not spin as much as a twisted line, bringing plumb bobs to rest sooner.

FEATURES

- 18-gauge line with an approximate tensile strength of 155 pounds.
- 250 feet = 1/4 pound, 500 feet = 1/2 pound, 1000 feet = 1 pound.

MODEL	UPC (052837)	COLOR	LENGTH

TWISTED MASON TWINE

Twisted line is a fine choice for mason line and other marking needs. Choosing twisted line is often an economical choice. You get 10% more line per spool.

FEATURES

- 18-gauge line with an approximate tensile strength of 160 pounds.
- 275 feet = 1/4 pound, 545 feet = 1/2 pound, 1090 feet = 1 pound.

ULTRA-MARK® PAINT

Formulated to generate superior brilliance for long-range visibility. Before marking a dark surface, spray a coat of white to enhance the brightness of the paint. The Ultra-Mark spray paint contains no fluorocarbons, making it non-toxic after drying. Top discharge valve for ease of use. All Keson paint is water based.

Use with **PA14**, **PA35**, **RRPA18** and **RRPA182** applicators (see page 15).

HOW MUCH IS ENOUGH?

A 16-ounce can provides approx. 250 feet of a 4-inch wide line. A 20-ounce can covers approx. 300 feet with the same 4-inch line.

How much Paint is in the can? Compare the Net Weights.

Federal law requires that the cans clearly label the net weight of paint.

20 ounce cans =

Keson: 17 oz. of paint + 3 oz. of propellant (for 16 oz. cans it's 14:2)

Most Competitors: 15 - 16 oz. of paint + 4 or 5 oz. of propellant (for their 16 oz. cans it's 13:3)

100% of Keson paint is made in the USA.

Shelf life of a can of paint is approximately 1 year.

SPECIALTY MARKING

PAINT CRAYONS, VALVE PAINT MARKERS (PAINT PENS) & MARKERS

WHY PAINT CRAYONS?

- Marks through oil and water.
- Lead-free, non-toxic.

WHY VALVE PAINT MARKERS (aka PAINT PENS)?

- Marks on all surfaces: metal, wood, glass, plastic, rubber, cardboard and paper.

WHY POINT MARKERS?

- Smear resistant, water resistant, fast drying.

WHY GIANT MARKERS?

- Water resistant, fade resistant, high intensity ink.
- Mark large on cardboard, ceramic, wood, metal and glass.

TRIANGLE MARKING PENS

WHY TRIANGLE PENS?

- Water-resistant high intensity wax lead
- Perfect for marking different thicknesses
- Always have a sharp tip!

MODEL	UPC (052837)	TYPE
TMP	024803	holder with 4 color inserts: yellow, red, black, white
TMPB	024810	4 black refills
TMPG	025619	4 graphite refills
TMPR	024827	4 red refills
TMPW	024834	4 white refills
TMPY	024841	4 yellow refills

HALF-MOON MARKING CHALK

Used on rail cars, concrete, asphalt, wood and other surfaces, this chalk is ideal for layout work and marking for estimating.

MODEL	UPC (052837)	COLOR	SPECIAL FEATURES
HMBULKB	024209	blue	Half-moon
HMBULKRED	024216	red	Half-moon
HMBULKW	024223	white	Half-moon

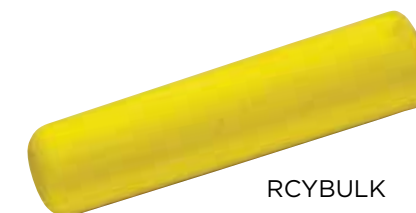

SOAPSTONE

Keson soapstone is primarily used by welders for metal marking or by plumbers for pipe marking.

Use Keson Chalk Line Saver (p. 37) to make the mark last.

MODEL	UPC (052837)	COLOR	SPECIAL FEATURES

FOIL UNDERGROUND DETECTABLE TAPE

PERMANENT MESSAGE

Color band and black ink imprint are encapsulated in the tape. Ink does not extend to edges, giving maximum bond between plies.

ALUMINUM CORE

A solid detectable core makes it the choice for locating nonmetallic lines.

DURABLE

Constructed with prime resin, it's durable. Tolerates -94° F to 200° F. temperature range.

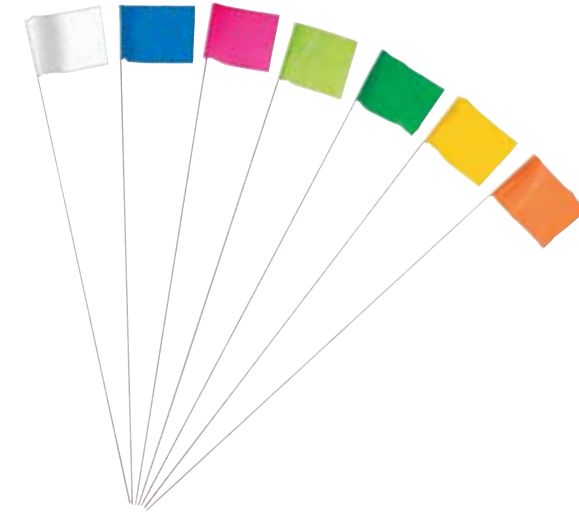

ENDORSED

Meets OSHA regulation 1926-956 (C) (I) covering location of underground utility lines.
