

Skip Tooth Scroll Saw Blades

Product Features:

- King scroll saw blades will easily handle the precise internal and external cutting of all shapes and applications
- These blades are for use with most standard scroll saws on the market
- The universal numbering system will help you quickly cross-reference with blades you are used to using
- These **SWISS-made** blades are of the finest quality and produce superior results
- For faster cutting and a smoother edge while providing efficient chip removal
- Works well on both hard and soft woods and plastics 3/32 -2" thick
- Always requires some sanding
