

PRODUCT INFORMATION

Colostrum Bolus Forte, Colostrum Oral Gel and Colostrum Powder for Goats

Profile:

Colostrum Powder, Colostrum Oral Gel and Colostrum Bolus Forte for Goats are nutritional products for newborn goats, which contain a source of live (viable) naturally-occurring microorganisms, dried colostrum milk and vitamins.

About the Products:

The colostrum provided in Colostrum Bolus Forte, Colostrum Oral Gel and Colostrum Powder supplies a source of maternal antibodies and protein. Lactobacillus organisms contained in these products assist in the establishment of beneficial microflora in the newborn. L. acid excreted by these organisms will influence pH reduction in the small intestine. This action removes the environment needed by certain coliform bacteria to proliferate and perhaps cause disease. The newborn receives a generous supply of highly absorbable, essential vitamins and trace minerals, which are necessary for the establishment of good health.

Ingredients:

Colostrum Bolus Forte: Dried Colostrum, Lactobacillus, Vitamins A, D, E and B12 and Minerals

Colostrum Oral Gel: Dried Colostrum, Lactobacillus, Vitamins A, D3, E and B12

Colostrum Powder: Dried Colostrum, Lactobacillus, Vitamins A, D, and E

How Supplied:

Colostrum Bolus Forte: 25 boluses per jar, 12 jars per case

Colostrum Oral Gel: 30ml dial-a-dose tube, 3 doses per tube, 12 tubes per case

Colostrum Powder: 9 oz. jar, 75 doses per jar, measuring scoop enclosed
12 jars per case

Directions for Use:

Colostrum Bolus Forte: One bolus after birth, one bolus twice daily as needed.

Colostrum Oral Gel: Administer 10ml to newborn goats, sheep or calves as soon as possible after birth. Administer 10ml on the second day and 10ml on the third day.

Colostrum Powder: One teaspoonful in each feeding of milk or milk replacer. Continue administration of product as long as goats are on milk replacer or milk.
