Product Information & Symbols in this Catalog

Part # References contained in the catalog are as follows:
P218FJ 1/2 x 2-1/4 Streamline Base
(Part#) (Dimensions) (Description)

The part number prefix "P-" indicates the item is Pine, the number "218" identifies the pattern, the suffix "FJ" indicates the item is a product of fingerjointed sections of pine instead of solid. The dimensions are expressed width, then height, followed by a description of the product.

Additional Part # Prefixes

"P-"	= Pine	"MDF-"	= Medium Density Fiberboard
"CP-"	= Certified Renewable Wood	"F-"	= Douglas Fir
"PF-"	= Pine Frame	"VG-"	= Vertical Grain Douglas Fir
"PJ-"	= Pine Jamb	"R-"	= Redwood
"PT-"	= Pine Trim	"O-"	= Oak
"OV-"	= Oak Veneer	"POP-"	= Poplar
"ALD-"	= Alder	"WHW-"	= White Wood
"KALD-"	= Knotty Alder	"EX-"	= Exterior Treated

Additional Part # Suffixes

"...PR"	= Primed Mouldings	"…K"	= Kerfed Mouldings
"...PPR"	= Premium Primed Mouldings	"…FJ"	= Fingerjointed Mouldings
"...A"	= Advantage Primed	"…SV"	= Solid Veneer
"...FJK"	= Fingerjointed & Kerfed Mouldings		

Characteristics of Moulding Species

Solid Pine or stain grade pine, can be painted or stained. The grain of this "solid" piece of wood is continuous for stained or natural finishes.

Fingerjointed Pine is a paint grade product that is manufactured by gluing short lengths of clear lumber into longer lengths and then into mouldings. They are less likely to twist or warp. They usually cost less than the stain grade wood mouldings.

Primed Pine is identical to fingerjointed pine except it has a machine primer coat of paint.

Premium Primed mouldings have an extra smooth finish coat of paint requiring less painting.

Solid Oak mouldings are stain grade hardwood that can be stained to match oak cabinetry or furniture. Oak is durable resists wear.

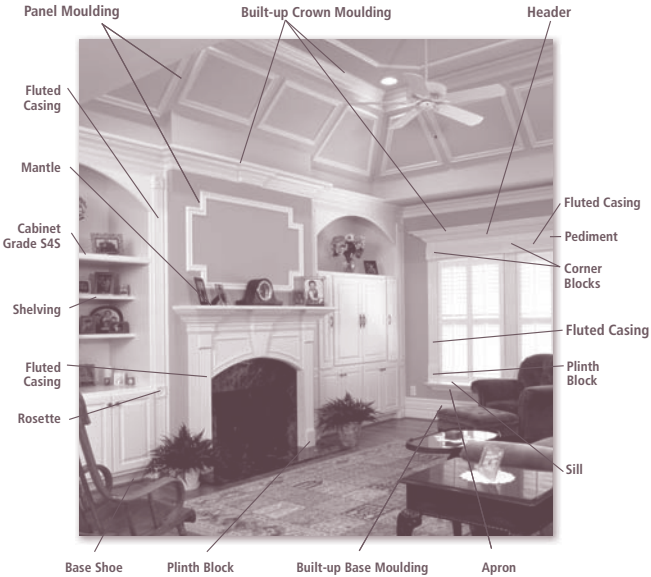

Poplar is used for paint or stain grade moulding applications. Poplar has very sharp detail, and can be stained to match a variety of woods.

Douglas Fir mouldings are used in situations requiring high durability and/or an elegant vertical grain appearance. Douglas fir is also used for closet poles, handrails, and the manufacture of entry doors and door jambs.

Medium Density Fibreboard (MDF) mouldings are manufactured from a fiberboard material and are used in paint grade interior applications. They have uniform consistency and do not warp, split, expand and contract like some natural wood species. MDF mouldings are primed and ready to paint. MDF has a hard surface that will not damage easily or show raised grain when painted. They are less expensive than other wood paint grade mouldings especially in larger architectural profiles.

EX mouldings are pressure treated and used for paint or stain grade moulding.

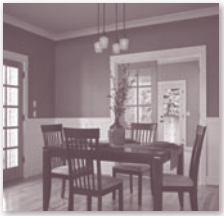

Types of Mouldings

Usage Ideas

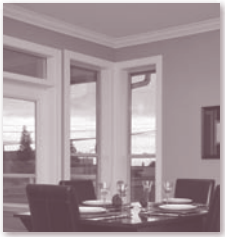

Classic and Colonial Era

Craftsman/Mission

Neoclassical

Contemporary

ADDITIONAL KELLEHER PRODUCTS

Advantage Plus Siding and Primed Boards

Kelleher distributes a wide selection of exterior siding to complement it's line of exterior moulding and trim. Ask your retailer for more information.

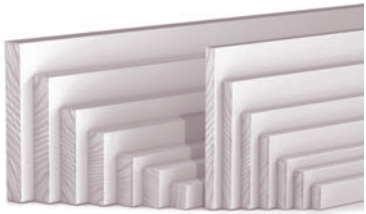

Kelleher Advantage Plus™ is a fully treated, primed Pine product that is strong, versatile, easy and safe to use. Made from a renewable resource, these products withstand a wide range of climates and come with a 30 year warranty. LOSP (Light organic solvent preservatives) are used to treat the wood making them safer to use and handle than other treated products. Kelleher Advantage Plus carries a variety of Green building certifications. Advantage Plus products are paint ready with two factory applied coatings, durable, safe for interior and exterior use, termite resistant, defect free, non-corrosive. Advantage Plus sidings are fire rated. Specially formulated End Sealer, available in spray cans, protects wood where cuts and notches are made. Finish with two coats of quality 100% acrylic paint. Kelleher Advantage Plus products are...

ADVANTAGE PLUS™
TREATED PRIMED PINE

Kelleher Advantage primed siding and boards are a very durable product, and are suited for applications where a 30 year warranty, specifications, and certifications are not required. They are ideal for more moderate climates and may be finished with two coats of quality 100% acrylic paint.

Kelleher Primed Western Red Cedar siding and boards are made from high quality, clear, fingerjointed Western Red Cedar. Cedar is naturally resistant to rot and extreme weather, and with two coats of factory applied priming will last for several generations. Primed Western Red Cedar comes with a **30 year warranty.**

Primed boards are S3S (surfaced three sides) and E2E (eased two edges) for a superb look. Use for general trim, Fascia, and most above ground and non-structural applications. Finish with two coats of quality 100% acrylic paint. Available in Kelleher Advantage Plus with 30 year warranty, Kelleher Advantage primed, and Western Red Cedar.

Trim boards complement other architectural details and add detail to fascias and window casing treatments.

Flexible Mouldings

DURAFLEX™ The Original Flexible Moulding, and Xtra-Flex Wide Profiles

Duraflex™ – The Original Flexible Moulding since 1967, is an exclusive product of ResinArt. They offer 8,000 patterns and styles. Ask a sales representative for a catalog of flexible mouldings. Locate and match your actual wood moulding to the illustrated full scale drawing.

Duraflex™ is the easy economical alternative for radius installations and because of its quality, flexibility and superior longevity it is unequaled by wooden millwork.

- The appearance of real wood.
- Ease of installation using standard woodworking equipment - cut, sand, shape, and finish like wood.
- Seamless construction without lamination defects.
- Painting: Most standard paints are compatible. Primer coats are often unnecessary.
- Staining: Use a heavily pigmented stain and finish with a clear coat.
- Moisture proof. Insect proof.
- Xtra-Flex is recommended for profiles 6" or wider due to a 0% shrinkage factor.

Please see the ResinArt catalog for more information about flex limitations, ranges of movement, and how to create templates.

Doors

ROGUE VALLEY Door

www.roguevalleydoor.com

One of America's largest builders of wood doors. FSC Certified.

Rogue Valley Door is one of America's largest builder of wood doors. Located in Southern Oregon among the towering Douglas firs and Ponderosa pines, they take pride in their modern manufacturing facility, and people that take pride in each and every door they make. Rogue Valley's beaded panel doors demonstrate their handcrafted quality workmanship, and incorporate such details as ornate beaded or true v-groove panels, highlighting the natural luster of these fine wood doors and adding style and dimension to your home's interior design.
