DISCOVER THE INNOVATIONS THAT SET US APART

A REPUTATION FOR INNOVATION AND A COMMITMENT TO EXCELLENCE

Krylon® didn't become the category leader by following the competition or reacting to trends. We have built our brand, our business and our reputation with innovative thinking.

- Our ideas keep us at the forefront of the industry.
- Consumer testing helps us define new product opportunities.
- Our Color & Design team experts help us stay ahead of the trend curve.
- Our packaging pros continue to find ways to make painting easier, faster and simpler.

In fact, Krylon has numerous patents which protect our innovative products and packaging — as well as our position in the market.

Krylon experts combine the science of paints and polymers with the art of color theory and design. We know what customers want. And whether it's a unique product, a packaging innovation or an exciting color palette, we have the team to deliver.

And this means that Krylon consistently delivers the category's highest brand recognition and preference, plus the sales and profit numbers our partners and retailers expect. In fact, our commitment to excellence and success may be the only thing from Krylon that *isn't* new.

KRYLON® INNOVATIONS

- EZ Touch 360° Dial spray tip
- Pinch N' Pull Cap™
- Fusion Paint for Plastic®
- H₂O™ Latex
- Aerosol Wood Stain

INTEGRATED MARKETING

Again in 2010, Krylon will deliver advertising, public relations, merchandising and online programs that work together to build awareness, drive sales and grow your business.

- TV commercials that air during key home improvement and project season
- Targeted print advertising in consumer magazines
- Extensive national public relations efforts
- Merchandising designed to provide incremental sales
- An enhanced krylon.com website filled with product information, project ideas and color tools

CORPORATE CITIZENSHIP

Krylon® has a history of helping the world be a better, more beautiful place. That commitment is part of our brand personality and can be seen in our products and our people.

- For more than 30 years, Krylon products have been formulated without chlorofluorocarbon (CFC) propellants.
- Krylon actively participates in developing aerosol regulations that impact the environment.
- Every Krylon product follows strict compliance guidelines.
- Our aerosol cans are made from more than 25% recycled steel and are designed for recycling when empty.
- Packaging components like the Pinch N' Pull™ cap are designed to use fewer resources to produce and to be recyclable.
- We are aligned with groups like Keep America Beautiful®, Graffiti Hurts® and the National Council to Prevent Delinquency.
- Our employees participate in and support community service projects and programs.

Packed 6 units per case, net weight 12 oz. each.

TIPS & TECHNIQUES

WHEN AND WHY TO USE A PRIMER/SEALER

A primer, sometimes referred to as a sealer, is a specially formulated paint designed for use on bare metal, wood or other surfaces. Using a primer can mean the difference between a successful and a not-so-successful finished project. The reasons a primer is often recommended are:

- To ensure that your true paint color is achieved
- To increase paint adhesion
- For better paint coverage and penetration, particularly on wood surfaces
- For increased corrosion resistance on metal surfaces
- To smooth uneven surfaces for a better topcoat finish
- Use Gesso Spray to prime canvas and other art surfaces

Note: Krylon Stain Fix, a specialty primer, blocks out stains. See page 51.

KRYLON® OUTDOOR SPACES®

- Superior protection
- Prevents rust, UV color fade and weather damage
- Spray directly to metal, wood, wicker, pottery and more
- Easy to apply with Comfort Touch™ spray tip
- Coordinated color palettes

TIPS & TECHNIQUES

SPRAY PAINT CLEANUP

Cleanup is a snap when you start your project by masking off exposed areas where you don't want any paint. Tape, newspaper and a drop cloth will help protect your work area. Just like any painting project, be sure to wear old clothes and gloves. To clean up overspray from unprotected areas, follow these simple directions for removal:

WHEN PAINT/FINISH IS WET:	WHEN PAINT/FINISH IS DRY:	FOR PAINT/FINISH ON YOUR SKIN:
<ul style="list-style-type: none"> • Use mineral spirits for most oil-based paints • Soap and water works well on latex and water-based paints for the first 15–20 minutes. (ex. H₂O™ Latex, Make It Stonel®, Low Odor Clears) • Use lacquer thinner to remove Webbing Spray 	<ul style="list-style-type: none"> • Adhesive remover or lacquer thinner should be used to remove paint overspray 	<ul style="list-style-type: none"> • Use soap and water or hand cleaner first to remove as much paint as possible • If you still have paint on your skin, isopropyl alcohol (ordinary rubbing alcohol) is gentle enough for your skin and tough enough to remove many paints and finishes

GENERAL PURPOSE UTILITY AEROSOL

Made for everyday projects in and out of the house, Krylon® General Purpose Utility Aerosol is value priced.

TIPS & TECHNIQUES

UNDERSTANDING AND CHOOSING CLEAR COAT FINISHES

Use clear coats for protection or enhancement of your finished project. Your product choice will be determined by the type of project you have, as well as the gloss level that you prefer. Your decision could also be affected by the need for UV protection or the ability to spray indoors. The good news is that whatever you choose, all Krylon® clear coatings are non-yellowing and dry in minutes.

Desired Finish/Attributes	Recommended Product

TECHNIQUES

TIPS & TECHNIQUES

HINTS FOR USING METALLIC FINISHES

Most metallic spray finishes are not actual metal finishes but contain dyed metal particles that give the illusion of a metal finish. When shopping for or using a metallic, remember these helpful hints:

Better quality metallic coatings contain smaller metal particles.

Metallics containing finer particles:

- have a smoother finish
- are higher gloss
- more closely resemble actual plating, not painting

Most metallics are not known for exterior durability. If you will be using the paint on an outdoor project, a clear topcoat must be used unless you use a metallic from the Outdoor Spaces® line. It is important to note, however, that some clear coats may somewhat diminish the metal-like finish.

Most metallic spray finishes will not work on Styrofoam® or florals without damaging the material. Krylon® Short Cuts® metallic paints are safe for both Styrofoam and florals, as well as wood, metal and other surfaces.

KRYLON® BRIGHTS

- Brilliant fluorescent paint
- Unique chiseled tip makes both thin and thick lines
- Great for wood, metal, paper, fabric and more

TREAD AND GRIP:

7-24504-05846-5 5846 Black

Packed 6 units per case, net weight 16 oz. each.

TIPS FOR SUCCESSFUL APPLICATION

Following these simple guidelines will help to ensure a successful finished project.

- 1** A clean, dry surface is important. Ordinary household detergent or mineral spirits usually does the job. Be sure to sand or scrape, if necessary, and use a primer whenever possible. Rusted, glossy or hard surfaces should be sanded to improve adhesion.
- 2** Use aerosol paints and coatings in good weather, ideally when temperatures are 55°F to 90°F, and less than 85% relative humidity. Avoid painting in direct sunlight and hot, humid weather.
- 3** When applying more than one coat of paint, be aware of recoat times stated in the directions on the can.
- 4** It's a good idea to test your paint or spraying techniques on a scrap piece before beginning your project. A smooth, even application is important.
- 5** Always begin and finish spraying off the object, using an even side-to-side motion with each pass overlapping your spray pattern by about one-third.
- 6** Take your time. Use two to three light coats instead of one thick coat.
- 7** Avoid overspray by masking exposed areas with tape or using a drop cloth.
- 8** When painting indoors, always ventilate your room well by opening windows and doors. A fan may also help to keep air circulating.
- 9** Clean spray valve after use by turning can upside down and spraying for 5 seconds. This helps prevent the spray tip from clogging before next use.
- 10** Read directions thoroughly!
