# PREPARE FOR LIFE.

Life+Gear is a brand founded upon the principle of innovating everyday products so they may include features with life saving potential.

At Life+Gear we invent, manufacture, and market only the most durable and high quality products engineered for both practicality and emergency preparedness in everyday life.

Working with disaster preparedness agencies and drawing inspiration from worldwide emergencies we have created a brand name that is synonymous with safety, reliability, and family fun. Our comprehensive collections of innovative products are available at most major retailers, making certain that when life needs gear, we will be there.

## PATENTED TECHNOLOGIES

Life+Gear's intellectual property portfolio is extremely robust with over 200 utility and design patents and trademarks:

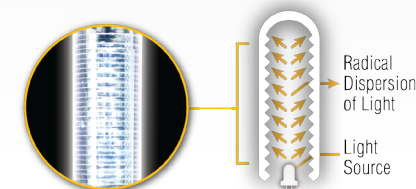

### GRAB & GLOW

This technology is represented by a group of lighting products which operate on our "see and been seen" principle. It encompasses flashlights and lanterns of unique utility which include both directional, area, and signaling illumination.

### ARTech

This technology was invented by Life+Gear to transform the directional nature of light emanating from LED bulbs into a multi-directional light source more suitable for area lighting.

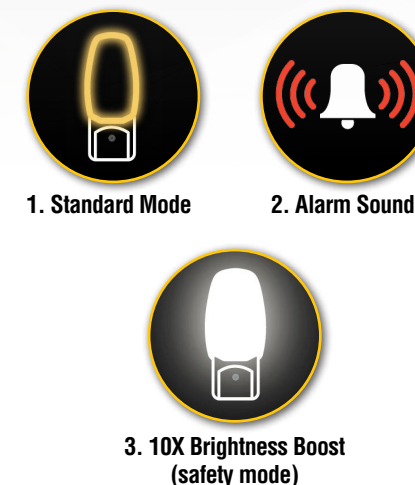

**ADVANCED REFLECTIVE TECHNOLOGY**  
BRIGHTER AREA LIGHTING THAN REGULAR LED BULBS

**MULTI FUNCTION** **LANTERN + FLASHLIGHT**

### FIRETECH

These daily use products are integrated with a smart listening technology which causes them to respond when smoke or fire alarms sound in the vicinity.

A black and white photograph of a person standing on a rocky peak, looking out over a vast mountain range. The person is silhouetted against the sky. The background shows multiple layers of mountain ridges, creating a sense of depth. In the top left and right corners, there are faint, white geometric line patterns consisting of interconnected hexagons and polygons.
