Morcrop Tomato & Vegetable FOOD

It's easy to grow lots of great tasting vegetables with Lilly Miller MORCROP TOMATO & VEGETABLE FOOD – juicy tomatoes, hot peppers, sweet carrots, and more. Lilly Miller blends natural ingredients with traditional plant foods to produce a unique fertilizer that provides nitrogen from five different sources. We've added a mix of nutrients that are available to the plants quickly to help get them off to a great start. We've added others that last longer to keep on feeding your vegetable garden steadily for up to six weeks. Morcrop also adds extra minerals, so vegetable plants are never hungry for these essential elements.

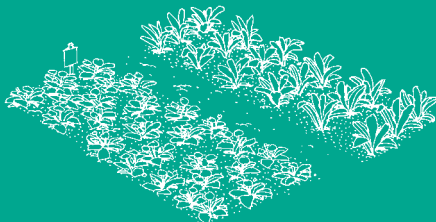

For a great vegetable garden, use Morcrop Tomato & Vegetable Food at planting time and every 4 – 6 weeks throughout the growing season. Morcrop is ready to use and does not need to be mixed with water.

HOW DO I USE THIS PRODUCT?

AT PLANTING TIME:

Sprinkle 2-3/4 cups of Morcrop Tomato & Vegetable Food evenly over each 50 sq. ft. (5' x 10') of vegetable garden area. Mix it into the soil to a depth of 3 – 6 inches along with any compost or other soil amendments you are adding.

For a single plant – tomato, pepper, artichoke – or for vegetables in containers: Mix 1/4 cup of Morcrop into the soil before you set in the vegetable plant.

DURING THE SEASON (about every six weeks):

For established vegetable gardens: Sprinkle 2/3 cup of Morcrop Tomato & Vegetable Food alongside every 25 feet of row. Keep the fertilizer at least 3 inches away from the plants and mix it lightly into surface of the soil. Do not disturb shallow plant roots.

For single plants or plants in containers:

Sprinkle 2 tablespoons in a circle around the plant. Keep plant food at least 3 inches away from the plants and mix it lightly into surface of the soil. Do not disturb plant roots.

Over-feeding tomatoes, peppers, melons, and squash can mean smaller fruit with less flavor. Don't be tempted to "give it a little extra."

Always water garden well after adding fertilizer.

OUR COMMITMENT TO YOUR SATISFACTION: If you are not happy with the way this product works in your garden, please let us know. We will be happy to replace the product, refund your money, or substitute another Lilly Miller product. Simply send your name, address and proof of purchase to the address shown.

ABOUT OUR SPECIAL FORMULA...

5% N Nitrogen

We use several types of nitrogen to give your garden fast response and lush growth. Slow release nitrogen keeps feeding for up to 2 months.

10% P_2O_5 Available Phosphate

We add extra phosphorus for strong roots, where great tasting vegetables start.

10% K_2O Soluble Potash

Potassium (potash) helps plants resist drought and effects from excessive temperatures.

The other minerals in this premium formula improve plant color, vigor, and strength to give you the garden you want.

PROTECT YOURSELF, PROTECT YOUR PETS

This product contains animal manures and/or byproducts that may attract dogs or other pets. Consumption of this product may make animals sick. To minimize potential problems: 1) Store away from pets, 2) Thoroughly mix into soil to eliminate large clods or surface exposure of product, 3) Do not apply this product along with pesticides.

Please wash hands and exposed skin with soap and water after using this product.
