SPECIFICATIONS

Description

Liteline's RCH507 is a rigid structure hanger bar kit for use with housings in new construction applications. The RCH507 enables ease of installation, maintenance and removal.

Features

- Rigid structure that allows ease of installation without warping or moving.
- Male / Female channel design, that will slide easily through the housing to ensure smooth installation.
- Maximum extension up to 25", accommodates excess distance between joists.
- Housing can be positioned at any point within 25" joist span.
- Break-off score lines feature, allows "tool-less" shortening for 12" joist span.
- Pre-installed nail prevents the nail from going on an angle and causing the hanger bars to shift.
- Nail slots for adjustable height, allows slight vertical adjustment after half-nailing on wood joists.
- Bottom of joist tab guide located below the nail for perfect alignment on the joist.
- Drop down feature allows for easy access to the wiring compartment during installation.
- Double headed 1 $\frac{3}{4}$ " nail to allow easy removal of housing.
- Integrated groove allows fixture to snap on T-bars in suspended ceiling applications.
