5ft. Wide x 10ft. Long x 4ft./6ft. High or 8ft. Wide x 6.5ft. Long x 4ft./6ft. High
5ft. Wide x 15ft. Long x 6ft. High or 10ft. x 10ft. x 6ft. High

5ft. x 10ft.

8ft. x 6.5ft.

5ft. x 15ft.

10ft. x 10ft.

IMPORTANT NOTICE!

PLEASE READ INSTRUCTIONS COMPLETELY PRIOR TO ASSEMBLING YOUR
LUCKY DOG™ CHAIN LINK OUTDOOR KENNEL.

Watch for helpful “HINTS” when following these instructions.

Approximate assembly time with 2 people: 1-2 hours

STEP 1 PARTS LIST

Separate and identify all
parts A-K, as shown below

TOOLS NEEDED

STEP 2 SITE PREPARATION

Choosing your kennel location is very
important to the well being and safety
of your pet companion. The site
should be flat and clear of foreign
objects and should be protected from
sun and other weather elements that
may be harmful to your pet.

PARTS IDENTIFIER, A - K

Parts A1-A5 combine to make Part A - SWINGING GATE

- A1:** Gate Stand - Swinging side (1)
- A2:** Upper & Lower Spreader bars (2)
- A3:** Gate Stand - Latch side (1)
- A4:** Chain Link piece for Gate (1)
- A5:** Round Tension Rods (for gate, shorter ones) (2)

B: Lockable Gate Latch

C: Corner Stands NO Rod Clips

D: Corner Stand WITH Rod Clips

E: Upper & Lower END Railings

F: Center Stands

G: Upper & Lower SIDE Railings

H: Round Tension Rods (for kennel)

I: Steel Wire Ties

J: Pole Caps

K: Chain link Roll for kennel

	5 x10	5x15
	8x6.5	10x10
B	1	1
C	3	3
D	1	1
E	4	4
F	4	4
G	12	12
H	2	2
I	49	64
J	9	9
K	1	1

STEP 3 ASSEMBLING THE SWINGING GATE

HINT! Assemble the gate first and set it aside before assembling the kennel frame.

A1: Gate Stand - Swinging side (1)
A2: Upper & Lower Spreader bars (2)
A3: Gate Stand - Latch side (1)

A4: Chain Link piece for Gate (1)
A5: Round Tension Rods (for gate, shorter ones) (2)

HINT! It is easier to assemble the gate with the parts laying flat on the ground

1. Begin by laying out the parts **A1-A5** as shown in the diagram above.

NOTE: Part **A1** has a 1 inch extended leg piece at the bottom, make sure you position this as the bottom.

2. Insert parts **A2 (UPPER & LOWER SPREADER BARS)** into the receiving tube pieces on part **A1**. Make sure tubes are fully inserted, then tighten set screws.
3. Now attach part **A3 (GATE STAND, LATCH SIDE)** to the upper and lower spreader bars, make sure it is fully inserted, tighten set screws.
4. Attaching the chain link mesh - Run **TENSION RODS, Part A5** through the sides of the **CHAIN LINK MESH, Part A4**. Now attach the tension rods to the clips on the gate stands, as shown.
5. Secure the chain link to the gate frame with **STEEL WIRE TIES, Part I**.
2-3 on the top, 2-3 on the bottom.

HINT! Ensure the ends of the steel wire ties are pointing away from the inside of the kennel, to avoid injury to your pet.

STEP 4A ASSEMBLING THE KENNEL FRAMEWORK - 5ft.x10ft. or 5ft.x15ft. ONLY (see page 6 for 10ft. x 10ft. or 8ft. x 6.5ft.)

Begin by laying your assembled gate (A) mesh side (face) down. Loosen the set-screws on the top and bottom of the **RECEIVER TUBES** of the gate (see illustration below) and slide top and bottom **END RAILS (E)** through the receiver tubes. **DO NOT TIGHTEN THE SET SCREWS YET**, they will need to be loose in a later step to adjust the gate.

STEP 5A

(Still laying face down) Attach **CORNER STAND WITH ROD CLIPS (D)** to the upper and lower end rails, on the latch side of the gate (figure 1). Tighten set screws. *Be careful not to over-tighten, as this may cause damage to the welded nut.*

STEP 6A

Attach **CORNER STAND WITHOUT ROD CLIPS (C)** to the other side of the upper and lower end rails. Tighten set screws. Do not over-tighten.

STEP 7A

Now insert **2 BOTTOM SIDE RAILS (G)** into the bottoms of the corner stands. Tighten set screws. You can now carefully stand this side upright.

STEP 8

Now insert **2 SIDE RAILS (G)** into the tops of the corner stands. Tighten set screws.

STEP 9

Attach **CENTER STANDS (F)** to the top and bottom side rails on each side of the kennel, tighten set screws. Remember to keep the 1 inch leg extensions on the bottom.

HINT! Larger kennels have more than one **CENTER STAND** per side.

STEP 10

Continue installation with top and bottom side rails **(G)** on each side, then **CORNER STANDS WITHOUT ROD CLIPS (C)**, finish with **END RAILS (E)** along the back of the kennel. Tightening set screws as you go. Your frame should now be complete.

STEP 11 - CHAIN LINK MESH INSTALLATION

For ease of shipping, the roll of chain link is folded versus rolled. The recommended handling of this mesh is to unfold it onto a flat surface, checking along the top and bottom for any pickets that may have come unhooked, from each other or that need to be twisted back into place.

After checking, roll the chain link back up like you would a carpet. This will allow ease of handling when you attach it to the frame.

STEP 12

Working on the **OUTSIDE** of the kennel, stand the chain link next to the **CORNER STAND WITH ROD CLIPS (D)**, insert a **ROUND TENSION ROD (H)** through the edge of the chain link, hook the tension rod onto the clips. (figure 2)

Figure 2

STEP 13

Unroll the chain link mesh around the outside of the kennel frame, pull the chain link tight at each **CENTER AND CORNER STAND**, as you work your way around the kennel and secure the chain link to the top and bottom rails, Using **STEEL WIRE TIES (I)** to keep it from sliding back and becoming loose. (figure 3)

Figure 3

STEP 14 - GATE LATCH

Attach **LOCKABLE GATE LATCH (B)** to the latch side of the gate frame, at the desired height. Tighten bolts until latch is firmly attached to frame. Slide the gate into position leaving approximately 2 inches between the gate and the corner stand, (figure 4)

Figure 4

Make sure the latch opens and closes easily.

Now you can tighten the set screws on the gate, that were left loose in step 4. (figure 5)

Figure 5

STEP 15

Once you have completely unrolled the chain link mesh around the entire kennel frame, install the remaining **TENSION ROD (H)** through the edge of the chain link and clip it to the rod clips on the gate frame. (figure 6)

Figure 6

HINT! The chain link mesh is pre-cut to easily fit the kennel size, however exact length is not always possible. Therefore, one or more chain link pickets may need to be removed to insure proper tension on the mesh. If pickets need to be removed, straighten out the ends of as many pickets as necessary at top and bottom and twist out the picket. (figure 7)

Figure 7

STEP 16

Using the remaining wire ties **(I)**, secure the mesh to the top and bottom rails (figure 3). The top wire ties should be approximately 18 inches apart, the bottoms 12 inches. If you have any wire ties left over, use them at the center and corner stands.

HINT! Remember to keep the tail ends of the wire ties pointing toward the outside of the kennel to keep your pet from coming in contact with them.

CONGRATULATIONS! You now have a quality kennel product for your pet companion, that will provide you with many years of use when cared for properly.

HINT! Optional kennel covers for the protection of your pet are available. Please visit www.jewettcameron.com for more details.

STEP 4B ASSEMBLING THE KENNEL FRAMEWORK - 8ft.x6.5ft. or 10ft.x10ft. ONLY (see page 4 for 5ft. x 10ft. or 5ft. x 15ft.)

Begin by laying your assembled gate **(A)** mesh side (face) down. Loosen the set-screws on the top and bottom of the **RECEIVER TUBES** of the gate (see illustration below) and slide top and bottom **END RAILS (E)** through the receiver tubes. **DO NOT TIGHTEN THE SET SCREWS YET**, they will need to be loose in a later step to adjust the gate.

STEP 5B

(Still laying face down) Attach **CORNER STAND WITH ROD CLIPS (D)** to the upper and lower end rails, on the latch side of the gate (figure 1). Tighten set screws. *Be careful not to over-tighten, as this may cause damage to the welded nut.*

STEP 6B

Attach **CENTER STAND (F)** to the other side of the upper and lower end rails. Next, attach **UPPER & LOWER SIDE RAILS (G)** to the open end of **CENTER STAND (F)**. Tighten set screws. Do not over tighten.

STEP 7B

Attach **CORNER STAND WITHOUT ROD CLIPS (C)** to the other side of the upper & lower side rails. Tighten set screws. Do not over tighten. You can now carefully stand this side upright.

HINT! Illustration above shows kennel fully assembled.

Keep in mind that in steps 4-7, when pieces are laying face down, you are viewing the kennel from the inside, and parts will be opposite of what you see here, until you stand the panel upright and begin working on the outside of the kennel.

STEP 8

Now insert **2 SIDE RAILS (G)** into the tops of the corner stands. Tighten set screws.

STEP 9

Attach **CENTER STANDS (F)** to the top and bottom side rails on each side of the kennel, tighten set screws. Remember to keep the 1 inch leg extensions on the bottom.

HINT! Larger kennels have more than one **CENTER STAND** per side.

STEP 10

Continue installation with top and bottom side rails (**G**) on each side, then **CORNER STANDS WITHOUT ROD CLIPS (C)**, finish with **END RAILS (E)** along the back of the kennel. Tightening set screws as you go. Your frame should now be complete.

STEP 11 - CHAIN LINK MESH INSTALLATION

For ease of shipping, the roll of chain link is folded versus rolled. The recommended handling of this mesh is to unfold it onto a flat surface, checking along the top and bottom for any pickets that may have come unhooked, from each other or that need to be twisted back into place.

After checking, roll the chain link back up like you would a carpet. This will allow ease of handling when you attach it to the frame.

STEP 12

Working on the **OUTSIDE** of the kennel, stand the chain link next to the **CORNER STAND WITH ROD CLIPS (D)**, insert a **ROUND TENSION ROD (H)** through the edge of the chain link, hook the tension rod onto the clips. (figure 2)

Figure 2

STEP 13

Unroll the chain link mesh around the outside of the kennel frame, pull the chain link tight at each **CENTER AND CORNER STAND**, as you work your way around the kennel and secure the chain link to the top and bottom rails, Using **STEEL WIRE TIES (I)** to keep it from sliding back and becoming loose. (figure 3)

Figure 3

STEP 14 - GATE LATCH

Attach **LOCKABLE GATE LATCH (B)** to the latch side of the gate frame, at the desired height. Tighten bolts until latch is firmly attached to frame. Slide the gate into position leaving approximately 2 inches between the gate and the corner stand, (figure 4)

Figure 4

Make sure the latch opens and closes easily.

Now you can tighten the set screws on the gate, that were left loose in step 4. (figure 5)

Figure 5

STEP 15

Once you have completely unrolled the chain link mesh around the entire kennel frame, install the remaining **TENSION ROD (H)** through the edge of the chain link and clip it to the rod clips on the gate frame. (figure 6)

Figure 6

HINT! The chain link mesh is pre-cut to easily fit the kennel size, however exact length is not always possible. Therefore, one or more chain link pickets may need to be removed to insure proper tension on the mesh. If pickets need to be removed, straighten out the ends of as many pickets as necessary at top and bottom and twist out the picket. (figure 7)

Figure 7

STEP 16

Using the remaining wire ties (**I**), secure the mesh to the top and bottom rails (figure 3). The top wire ties should be approximately 18 inches apart, the bottoms 12 inches. If you have any wire ties left over, use them at the center and corner stands.

HINT! Remember to keep the tail ends of the wire ties pointing toward the outside of the kennel to keep your pet from coming in contact with them.

CONGRATULATIONS! You now have a quality kennel product for your pet companion, that will provide you with many years of use when cared for properly.

HINT! Optional kennel covers for the protection of your pet are available. Please visit www.jewettcameron.com for more details.

EXTREMELY IMPORTANT!

Pet companions are very comfortable in the safety enclosure: however, it is suggested that there be a brief introduction period to acclimate your pet companion. To begin this process, place your pet in the kennel for short periods of time (10-20 minutes) throughout the day while you are able to observe their behavior. If your pet begins to show signs of discomfort or nervousness (e.g., barking or whining) administer verbal correction from a distance. As the training continues, gradually increase the duration of stays inside the kennel until the pet has become completely comfortable with their new surroundings. Providing play things for your pet companion will also comfort them. Also, insure that clean and adequate water and food is available at all times.

REMEMBER, verbal and physical affection will aid your pet companion to be completely satisfied with their new safety enclosure.

EXTRÊMEMENT IMPORTANT !

Les animaux de compagnie sont très confortables dans leur enclos de sécurité : toutefois, nous vous suggérons une brève période d'acclimatation de votre animal. Pour débiter ce processus, placez votre animal dans le chenil durant de courtes périodes (10 à 20 minutes) durant la journée lorsque vous êtes en mesure d'observer son comportement. Si votre animal commence à montrer des signes d'inconfort ou de nervosité (ex. jappement ou plainte), corrigez-le verbalement, à distance. Au fur et à mesure que l'entraînement se poursuit, augmentez graduellement la durée des séjours dans le chenil jusqu'à ce que l'animal soit totalement confortable dans son nouvel environnement. Offrir des jouets à votre animal le reconfortera davantage. De plus, assurez-vous que de l'eau propre et des aliments sont à portée de l'animal en tout temps.

N'OUBLIEZ PAS, les marques d'affection verbales et physiques aideront votre animal à se sentir totalement à l'aise dans son nouvel enclos de sécurité.

MUY IMPORTANTE!

Las mascotas son muy cómodo en el recinto de seguridad: sin embargo, se sugiere que haya un período breve introducción a acclamate su mascota. Para comenzar este proceso, el lugar de su mascota en la perrera por períodos cortos de tiempo (10-20 minutos) durante todo el día mientras usted es capaz de observar su comportamiento. Si su mascota empieza a mostrar signos de malestar o nerviosismo (por ejemplo, ladridos o silbidos) administrar corrección verbal a distancia. Como la formación continua, aumentar gradualmente la duración de las estancias dentro de la jaula hasta que la mascota se ha convertido en completamente cómodo con su nuevo entorno. Desempeñar aportando cosas para su mascota ayudará a consolarlos. También aseguran que la limpieza y adecuada agua y los alimentos están disponibles en todo momento.

RECUERDE, verbales y físicas de afecto, ayuda a tu mascota compañero esté completamente satisfecho con su nuevo recinto de seguridad.
