MFC FLY TYING MATERIALS

MFC is proud to announce our new partnership with **Ibrahim Mesinovic**, also known as the Crazy Swede. Ibrahim is known for producing some of the most advanced, realistic, and durable fly tying products in the European Fly Fishing market. MFC's partnership with Ibrahim is now bringing this technology to the US market for innovative fly tyers and fly fishers to enjoy on and off the water.

WIGGLE STONE BODY 6 Pieces per Package

MFC's Wiggle Stone Body's have been refined and perfected by Ibrahim. Prior to his involvement, the Wiggle Stone bodies were made using a different process and material. The new material is extremely durable and UV resistant. The new colors and improved look make it even easier than before to make flies that not only look realistic, but move in the water to make your flies appear "alive". This new material accepts Pantone and other permanent markers extremely well.

MFC WIGGLE STONE NYMPH BACK

These Stonefly Nymph Backs are designed to fit perfectly onto our Wiggle Stone Bodies. Just a small drop of superglue and you're all set.

MFC CRAB BACKS 0-5-192

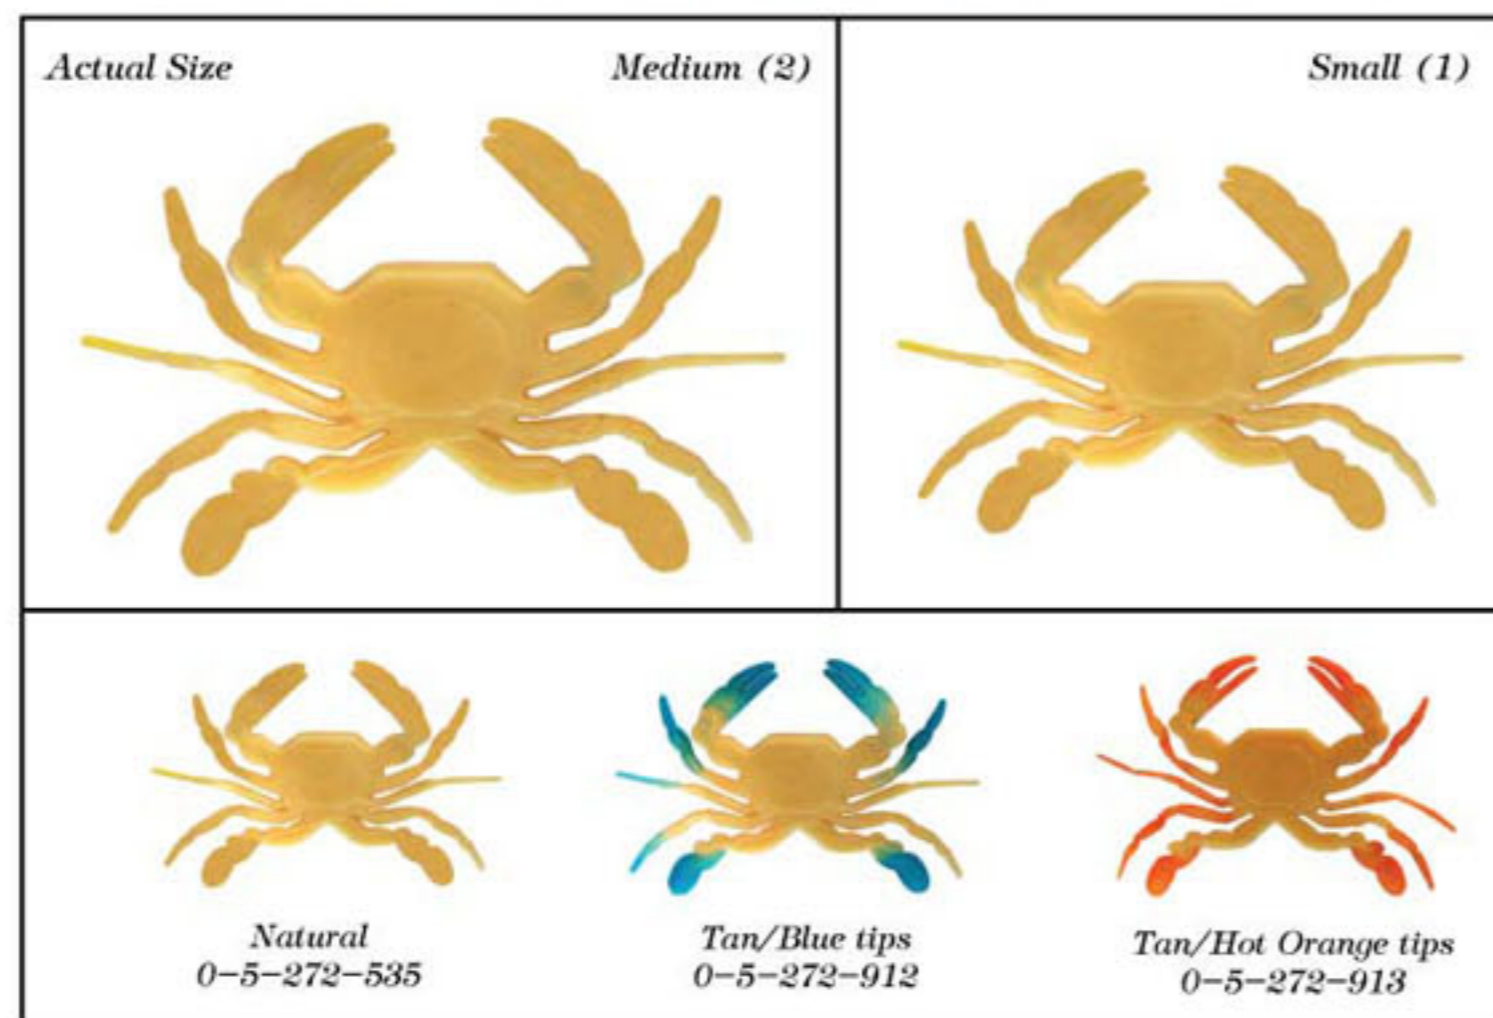

5 Pieces per Package

Available in Small & Medium

MFC Crab Backs' soft, pliable, clear resin is designed perfectly for our Crabby Patty bodies. They can be added to the back of virtually any crab pattern offering amazing realism. These backs are clear, so we recommend supergluing them to a lighter colored opaque surface. Light tan felt works very well.

MFC CRABBY PATTY BODIES 5 Pieces per Package

Our Crabby Patty Bodies make the perfect base for creating a wide variety of ultra-realistic crab patterns. Combine these with our Crab Backs and Stalk Eyes and you're all set to catch more permit than ever before.

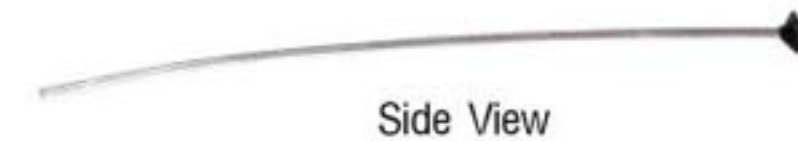

**Note: You still need to be able to cast 80 feet into a 30 Mph wind.

MFC FLY TYING MATERIALS

MFC STALK EYES 0-5-194 10 Pieces per Package

Our Stalk Eyes are 3-D resin eyes, permanently adhered to thick nylon monofilament. They allow tyers to create fish-catching crabs and shrimp like never before! The long stem allows you to easily secure the eyes onto the fly in any position.

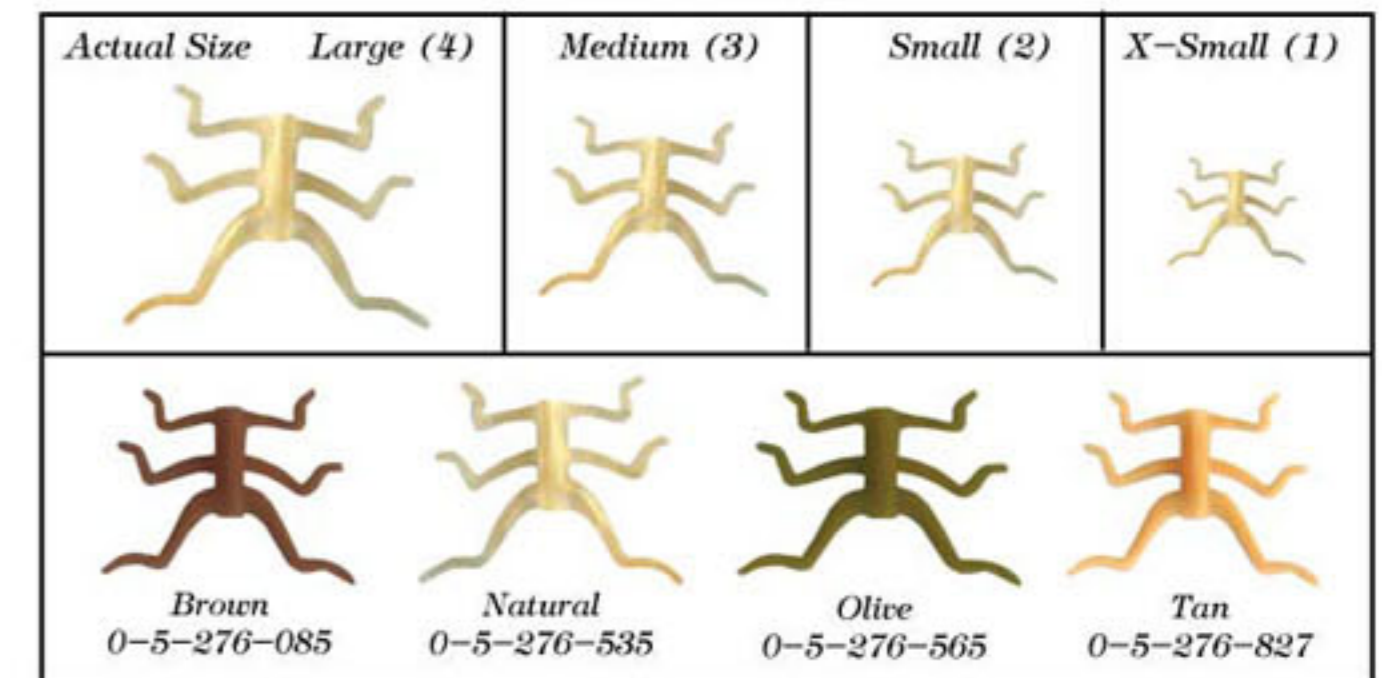

MFC DRAGONFLY NYMPH LEGS 6 Pieces per Package

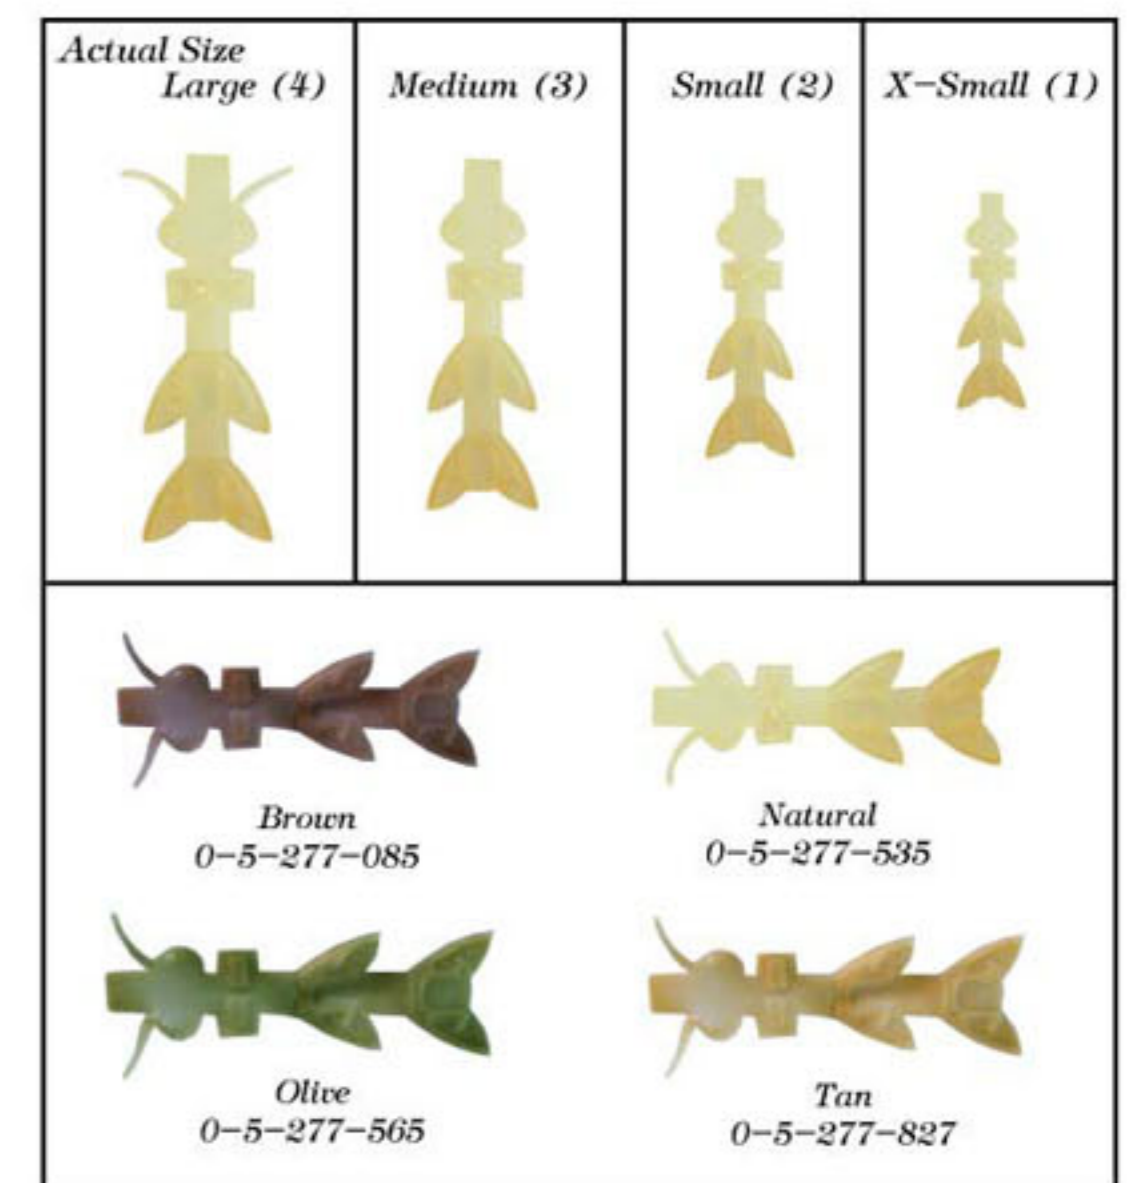

These perfectly shaped Dragonfly Nymph legs, combined with our Dragonfly Nymph Bodies (below) make a deadly nymph pattern. Just add your favorite dubbing and chain/mono-eyes. These work well as stonefly legs or even large mayfly legs...don't limit yourself.

MFC STONEFLY LEGS 6 Pieces per Package

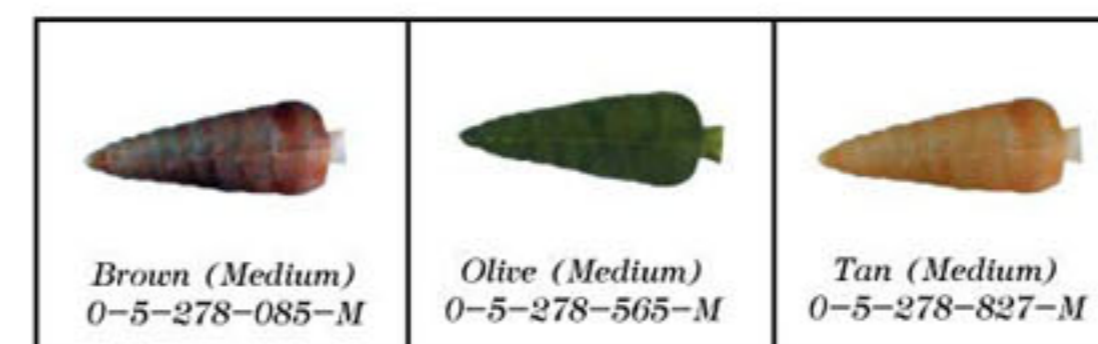

MFC STONEFLY WINGBUDS 6 Pieces per Package

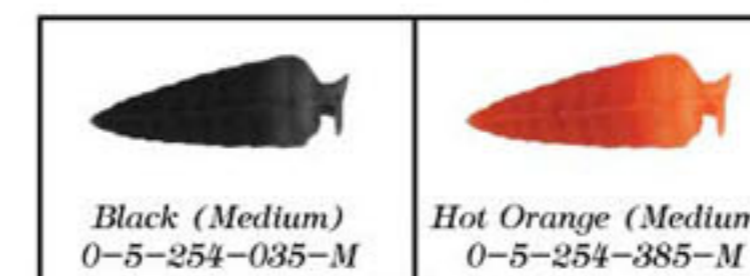

Our Stonefly Legs (top) and Wingbuds (above) combine to make very realistic, yet soft and flexible stonefly patterns. They can be used separately or together, and like all of Ibrahim's products, they are UV resistant, durable and take permanent markers very well.

MFC DRAGONFLY NYMPH BODY 6 Pieces per Package

Our Dragonfly Nymph Bodies capture that hard to mimic, yet familiar shape of a Dragonfly nymph, in a soft, pliable form. They accept permanent markers very well and can be mottled to match your local flavors.

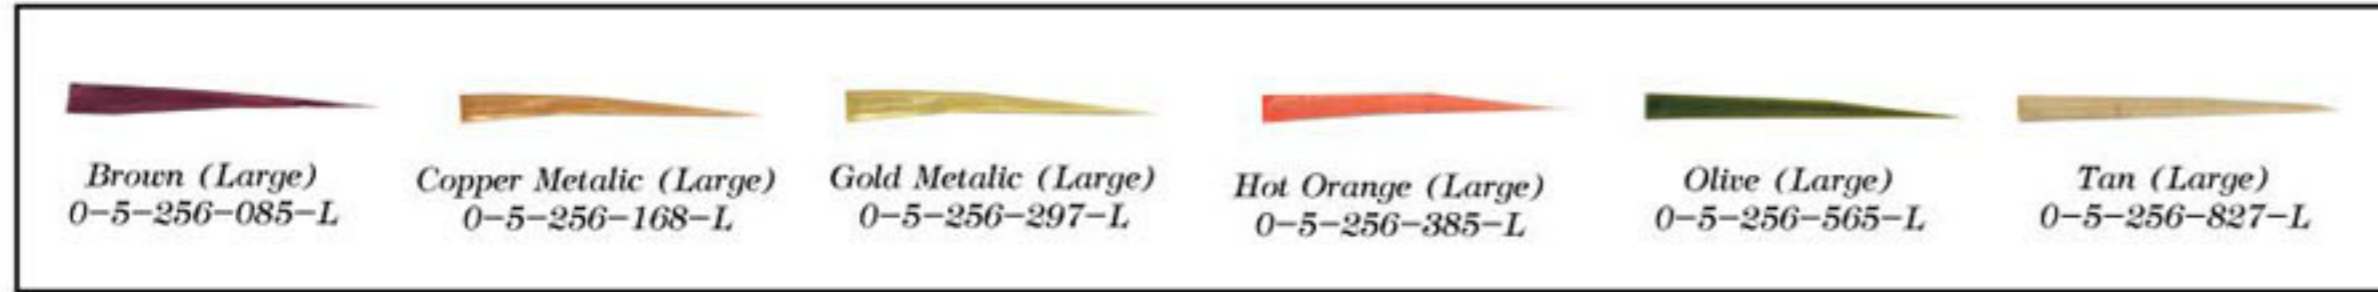

MFC CICADA ADULT AIR BODY 6 Pieces per Package

Our Cicada adult Air- Bodies are hollow, soft bodies pre-formed to the perfect shape and segmentation of adult cicadas. As the name suggests, they are hollow and after you tie them in the air is trapped and creates a great "balloon" body that will float just about any fly.

MFC FLEXI BIOT LEGS

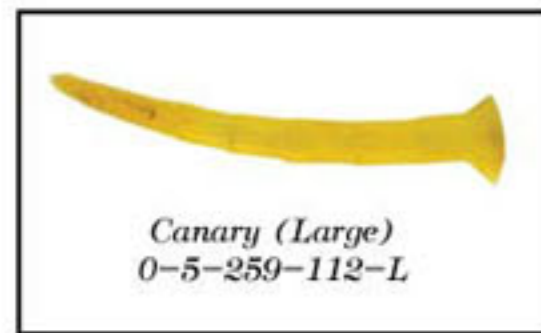

12 Pieces per Package

Our Flexi-Biot Legs are long, tapered, flexible "biots" that you can use as tails, legs, or antennae on any fly that you would normally use biots on, except you get the added advantage of great wiggle and movement. Add one or two knots like normal rubber legs for an even different effect.

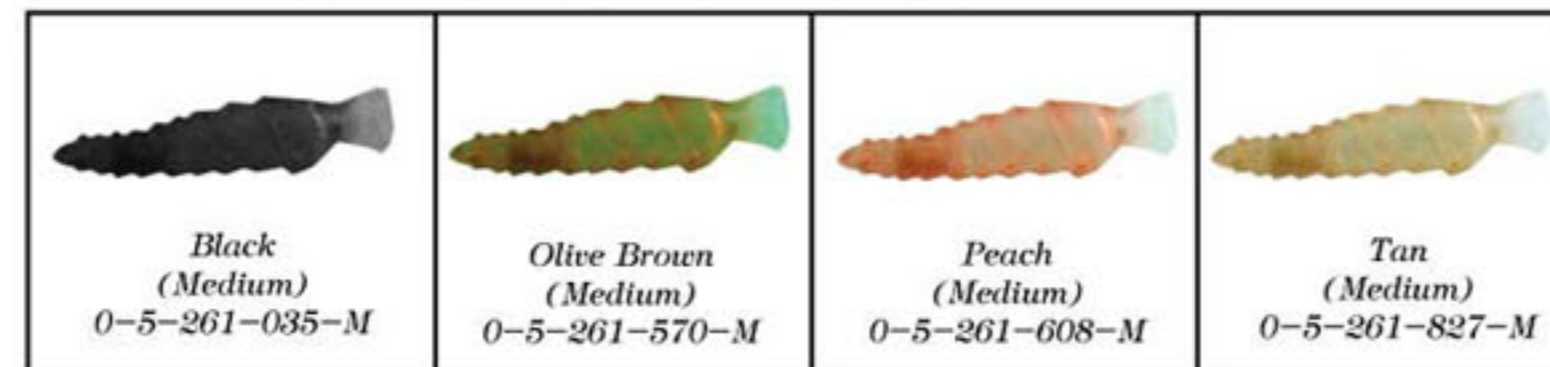

HEX / DRAKE MAYFLY AIR BODY

6 Pieces per Package

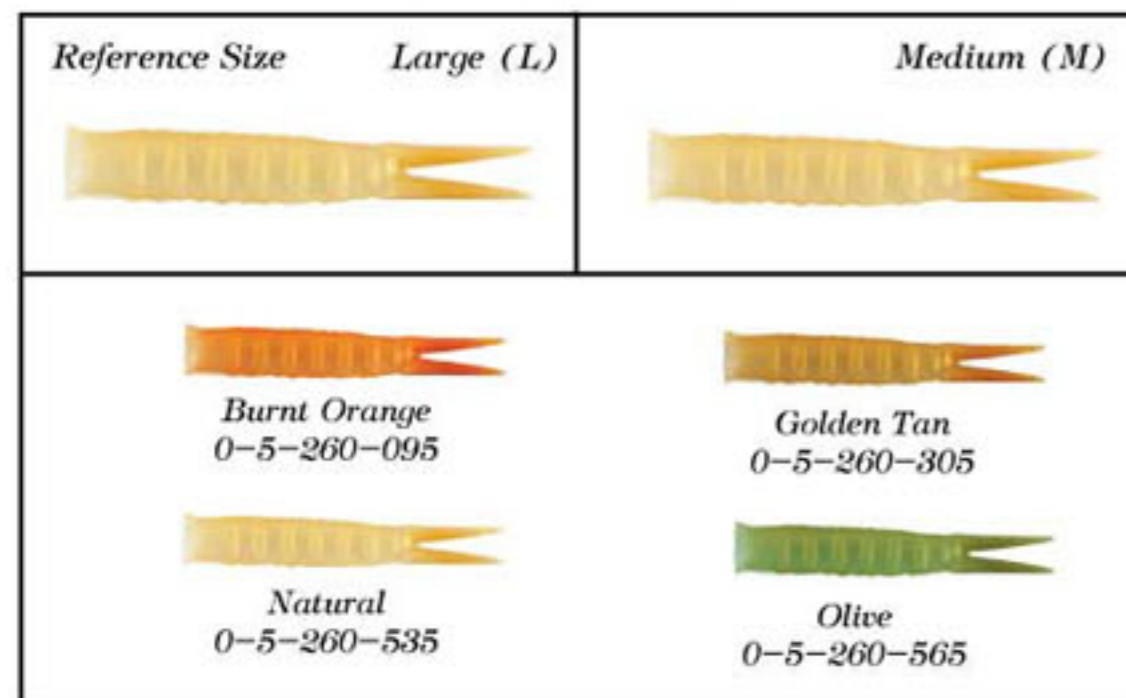

MFC HOPPER AIR BODY

6 Pieces per Package

MFC STONEFLY AIR BODY

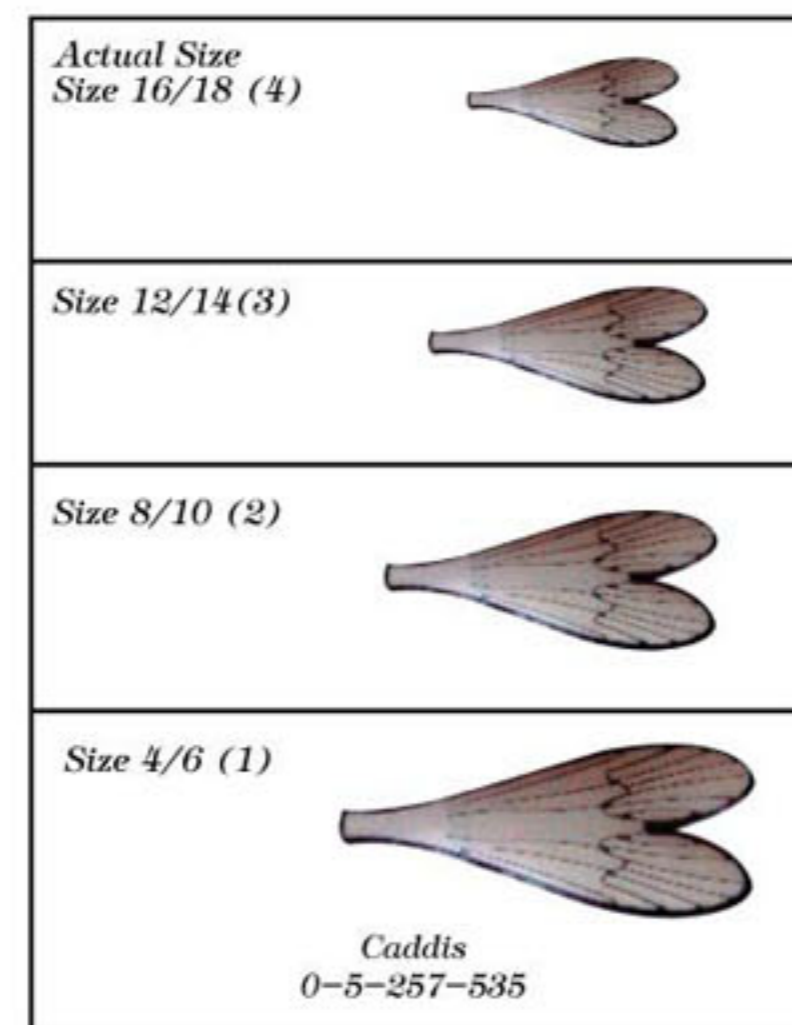

6 Pieces per Package

MFC's Air Bodies are hollow, soft, flexible bodies, shaped with incredible detail and realism. They are made to imitate hex and drake mayflies, hoppers, crickets, and stoneflies. After they're tied in, the trapped air creates a "balloon" effect, creating a durable, realistic, flexible, and highly bouyant fly.

WONDER WINGS - CADDIS

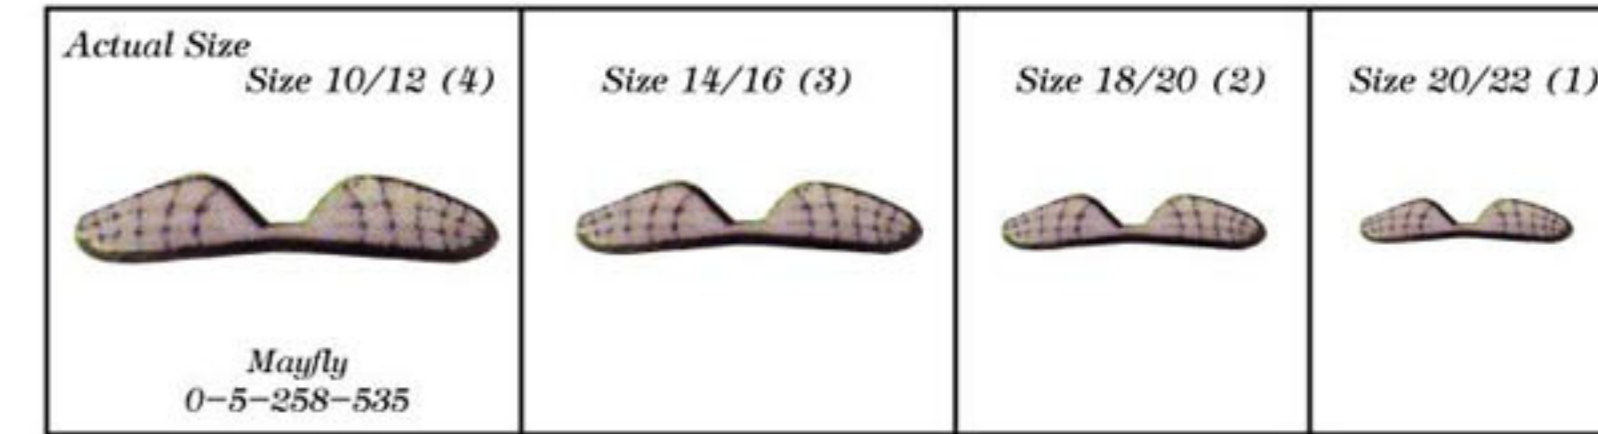

12 Pieces per Package

MFC's Wonder Wings, designed and manufactured by Ibrahim Mesinovic, are made from an ultra-fine screening material that is fine enough to allow realistic, long-lasting printing, but also is "open" enough to allow air to pass through minimizing leader and tippet spinning. See our Mayfly Wonder Wings on the next page.

WONDER WINGS - MAYFLY

12 Pieces per Package

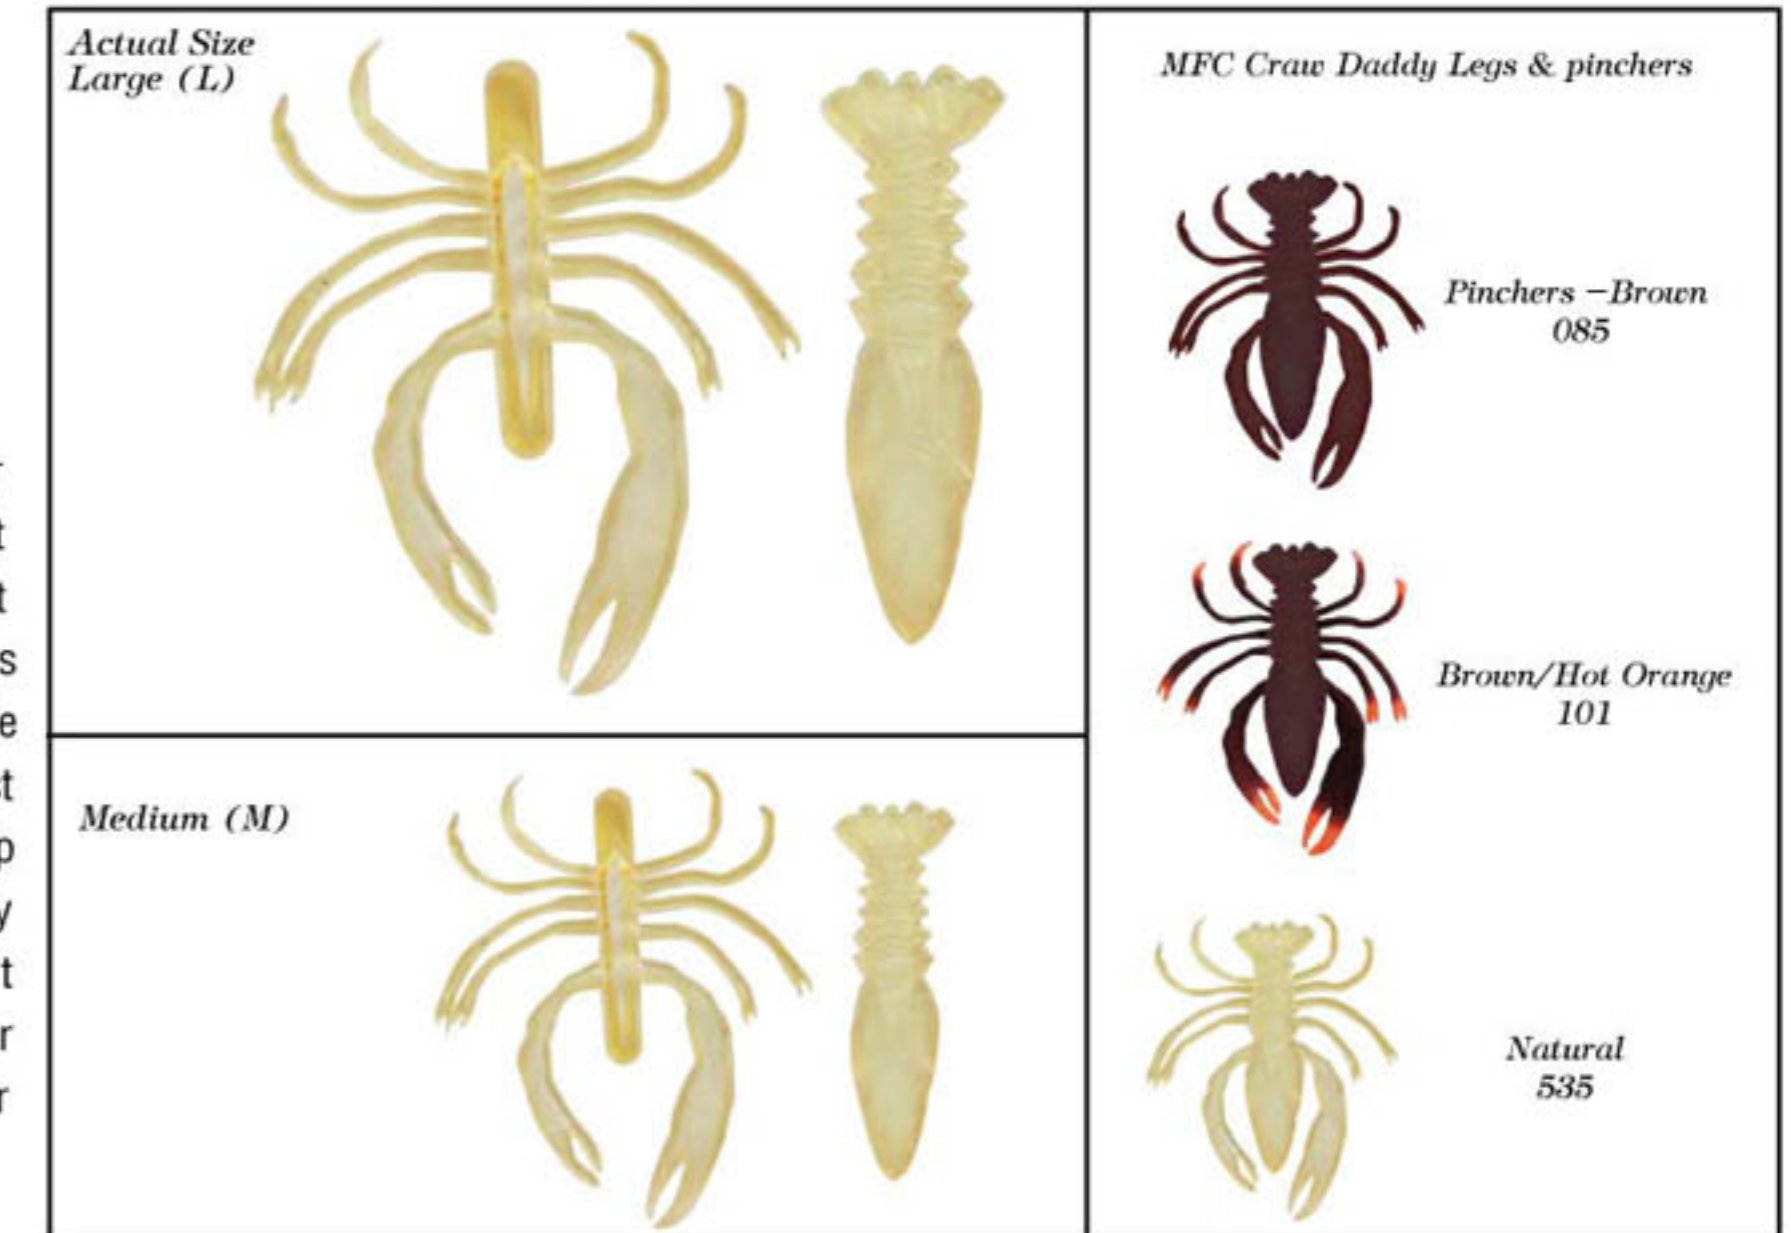

MFC CRAW DADDY KIT 0-5-273

3 Pieces per Package

Ibrahim has out-done himself with our Craw-Daddy kits. These are the most realistic crayfish bodies every made....what more can we say? The two-part kit allows you to center the legs/claws perfectly inside a dubbed or yarn/chenille body. Then just simply super-glue the back onto the top and you're finished. The legs/claws are very soft and flexible, which mimic movement and life in the water. The Natural color can be marked and mottled to any color with permanent markers.

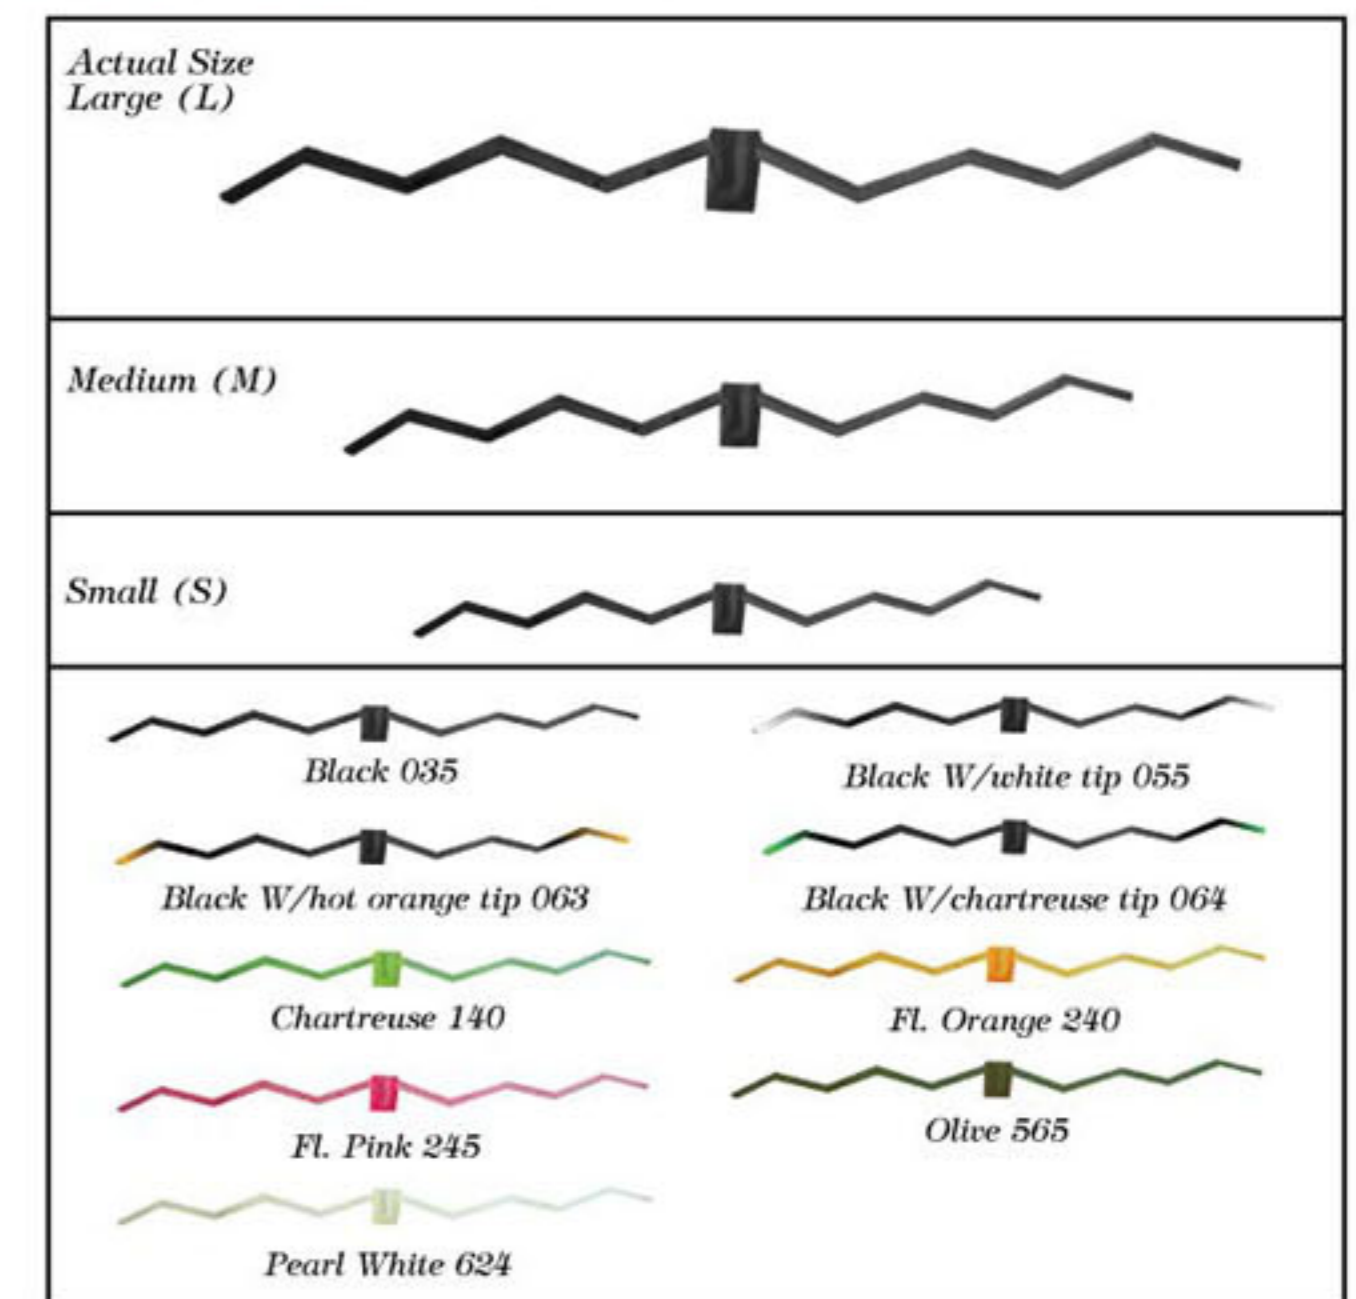

MFC STREAMER LEGS 0-2-255

12 Pieces per Package

Our Streamer Legs are the greatest thing since sliced rubber. If you like rubber legs on your streamers you'll love these. Streamer Legs are a great advancement in rubber legs for many reasons:

- 1.) They are not rubber. (They will not degrade in the sunlight like rubber.)
- 2.) They have a zig-zag shape, creating the illusion of movement without even moving, although these are very soft and flexible, so they do move very well.
- 3.) We are able to offer vibrant colors like Chartreuse, Fl. Pink, and Fl. Orange, as well as add a "hot tips" to the ends, which provide amazing contrast and can trigger aggressive grabs.

MFC FLY TYING MATERIALS

MFC BARRED OSTRICH PLUME O-1-492

Size Large (3)

Color	No.
Blue/Black	074
Chart/Black	139
Fuchsia/Black	261
Fuchsia/Purple	262
Kingfisher Blue/Royal blue	416
Kingfisher Blue/Black	417
Olive/Black	506
Orange/Black	591
Purple/Black	694
Red/Black	706
White/Black	861
Yellow/Black	877

MFC has taken bar dying to the next level. It took us 3 years of R&D to attain this level of barring quality on an ostrich plume. If you are a fan of MFC's very fine, ultra-select "rhea quality" ostrich you won't be able to get enough of our 12 barred colors.

MFC BUGGERBOU LOOSE 2" O-1-407

Color	No.
Black	035
Brown	085
Chartreuse	140
Olive	565
Olive Brown	569
Orange	590
Purple	695
Red	705
Tan	827
White	860
Yellow	875

Are you looking for the perfect bugger marabou.... nice and fluffy without all the straight "hair-like" fibers on blood quill marabou? Blood quill marabou has it's place and is great for many purposes, but for a tail on a streamer you need movement, and that comes from soft, fluffy feathers, which is what you will get with MFC's Buggerbou.

MFC BUNNY BRUSH O-2-545

If you are tired of casting all that heavy, wet leather around, or want a cleaner bunny head on your fly check out these innovative bunny fur brushes where we have removed the leather and left you with pure wabbit fur on a fine stainless steel core.

MFC BUGGERBOU MINI BARRED 2" O-1-408

Color	No.
Black/White	055
Orange/Black	096
Olive/Black	566
Olive/Brown	582
Brown/Black	583
Orange/Brown	593
Tan/Brown	830
Tan/Black	832
Yellow/Black	877
Yellow/Brown	878

With our "Mini-Barring" process we cram 30% more barring per inch into our Buggerbou than we do on our other barred products. This gives a perfect mottling effect, and looks even better than grizzly chickabou.

MFC FLY TYING MATERIALS

MFC FLY SHANKS O-7WAD-770

10 Pieces per Package

Silver

Available in 15mm., 20mm., 25mm., 30mm., 35mm., 40mm., 45mm., 50mm. & 55mm.

MFC FLY SHANKS OFF SET O-7WADOS-770

10 Pieces per Package

Silver

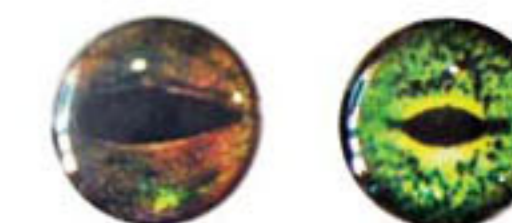

Available in 15mm., 20mm., 25mm., 30mm., 35mm., 40mm., 45mm., 50mm. & 55mm.

Articulation has never been easier. With our MFC Fly Shanks you can maximize your wiggle and your jiggle and really make your creations swim. Try tying 2, 3, or even 4 together for the ultimate in fly movement. If you want to slide the hook eye into the Fly Shank to help your fly swim "true", try using our "off set" Fly Shanks.

MFC Fly Shanks are also excellent for building steelhead flies and attaching stinger hooks with a loop (Fireline, etc.) without having to worry about filing down the back end of the hook you clipped off.

MFC FROG EYES O-5-191

6 Pieces per Package

Brown 085

Green 320

Available in 6 mm., 8mm. & 10 mm.

You can create the ultimate Bass and popper flies with MFC's Frog Eyes. Why spend all that time tying the perfect deer-hair popper only to put craft store doll eyes on it? That would be like launching your drift boat without the plugs in.... we've all done it, but it's not a good idea.

MFC WEIGHTLESS DUMBELLS O-5-193

6 Pieces per Package

Blood Shot
066

Blue Steel
073

Blue Radiance
078

Dark Iridescent
192

Spotted rainbow
701

Available in 8 mm. & 10 mm.

Yes, zero gravity. Our weightless dumbbells have a monofilament core and hi-res 3-D resin eyes permanently adhered to achieve the most durable and lightweight eyes for any salt, warm, or freshwater applications where you do not want to add weight.

MFC FLY TYING HOOKS

MFC FLY TYING HOOKS

The use of recent advances in hook technology makes MFC Hooks the fly-tyer's and fly-fisherman's most dependable hook. MFC Hooks are carefully manufactured from H80C high-carbon steel wire. The chemically sharpened needle point offers the best possible penetration. After they are chemically sharpened they are coated with an anti-corrosive finish to prevent rusting.

We at Montana Fly Company have been using these hooks since the founding of our company and have had excellent success. We are confident that you will share the same success at the vise and on the river with MFC Tying Hooks.

(Hooks shown actual size.)

HENRY'S FORK HACKLE ULTRA-LIGHT™

Ultra-light Henry's Fork Hackle is manufactured in a completely different manner than our original HFH, eliminating the bulky core, but shortening the fibers just slightly. So for any CDC flies from # 14-24, this is the best product available.

HENRY'S FORK HACKLE™

The scientists at MFC have developed a half-rooster/half-duck hybrid, that has produced a CDC hackle that we call Henry's Fork Hackle™. Well, not really. Actually, we manufacture Henry's Fork Hackle™ so that fly tyers can use CDC in ways never thought of before. You can use Henry's Fork Hackle™ as a substitute for regular rooster hackle on almost any fly. Imagine the possibilities...

MFC FLY TYING MATERIALS

LEGS ON A STICK™

Legs on a Stick™ is a great way to increase your efficiency at the tying bench. They are also great for reducing your frustration. You can use them on all of your Hopper and Cricket imitations. Try putting them on Stimulators or Parachute Madam-X's for a different Hopper look.

Parachute Hopper

BARRED ZONKER STRIPS

Barred Zonker Strips are the perfect addition to any Streamer, Leech, Flesh Fly or Double Bunny pattern. The barring imitates the mottling found on Sculpins and Baitfish, and these strips can be wrapped or tied in as Zonker wings. Try wrapping 2 different colored strips simultaneously for a great variegated effect. They come in either 1/4 inch or 1/8 inch wide strips.

Available in 1/4 and 1/8 inch wide strips.

SKINNY SKIN™

Skinny Skin is a transparent, flexible material offered in mottled and plain colors. It is great for wrapping bodies on caddis pupa's, stonefly nymphs, and mayfly nymphs. It is also great for scud backs. Try using it for wingcases on stonefly and mayfly nymphs.

WOOLLY CHENILLE - 0-4-812-0

FIBBETT TAILING FIBERS

MFC Fibbett Tailing Fibers are very fine nylon fibers with natural tapered ends. They are more durable and stiffer than hackle fibers and are perfect for tailing comparaduns, thoraxes, or any other mayfly imitation.

MFC FOAM CYLINDERS- 0-5-270

12 Pieces
per Package

* MFC Foam Cylinders can be used for bodies and posts *

SCULPIN WOOL

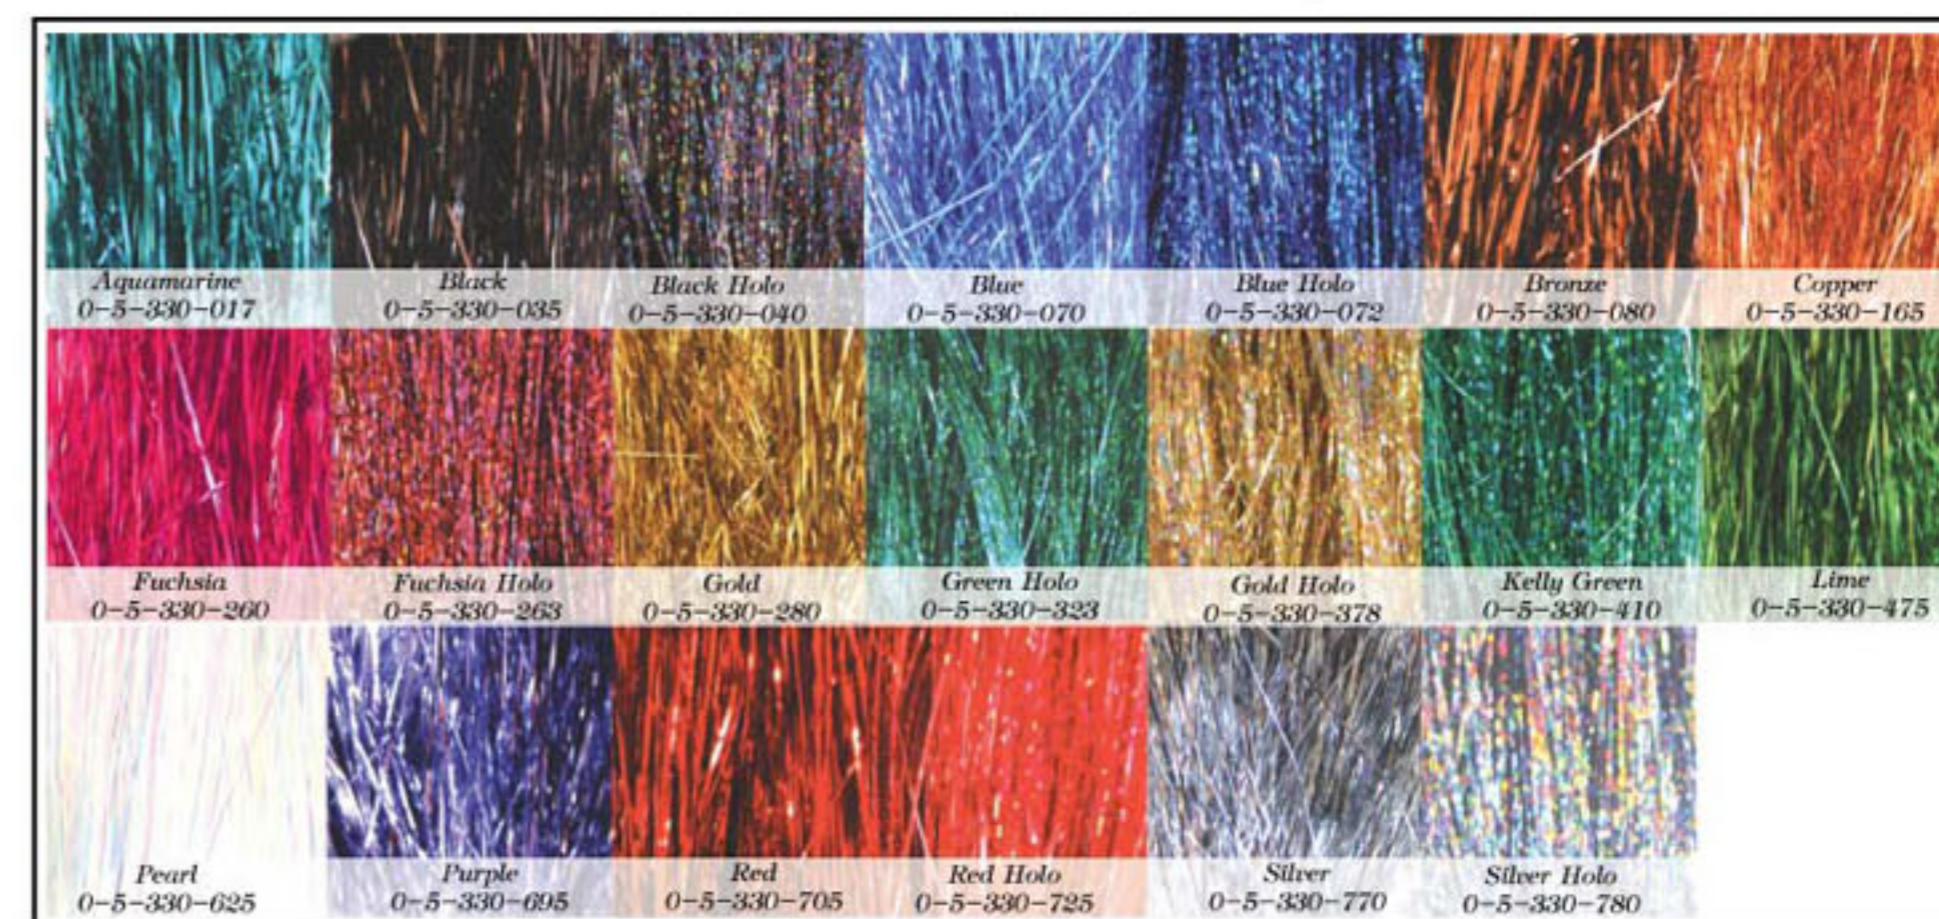

Spin Sculpin Wool as you would deer hair to make great heads on muddler minnows and woolhead sculpins. Try spinning 2 or 3 different colors at once for a mottled head appearance.

MFC FLY TYING MATERIALS

HIGH VOLTAGE AND HOLOGRAPHIC HIGH VOLTAGE

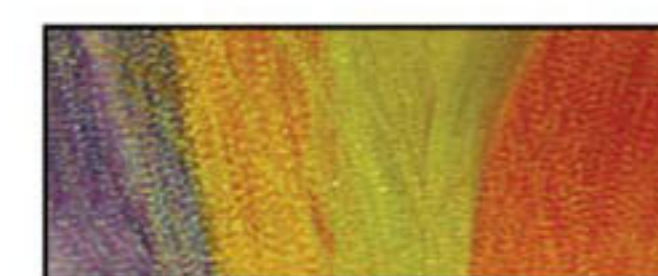

Great for tails on Flash-Buggers, bodies on Lightning Bugs, and wing cases on Flashback nymphs.

FURRY FOAM BODIES

FROG'S HAIR DUBBING™

This 100% all natural material dubs on easily, and is the best we have found. We use it on Kyle's BH Yellow Sally Nymphs, Parachute Dries, Comparaduns, Stonefly Dries, Hoppers, Thorax Dries, and many others.

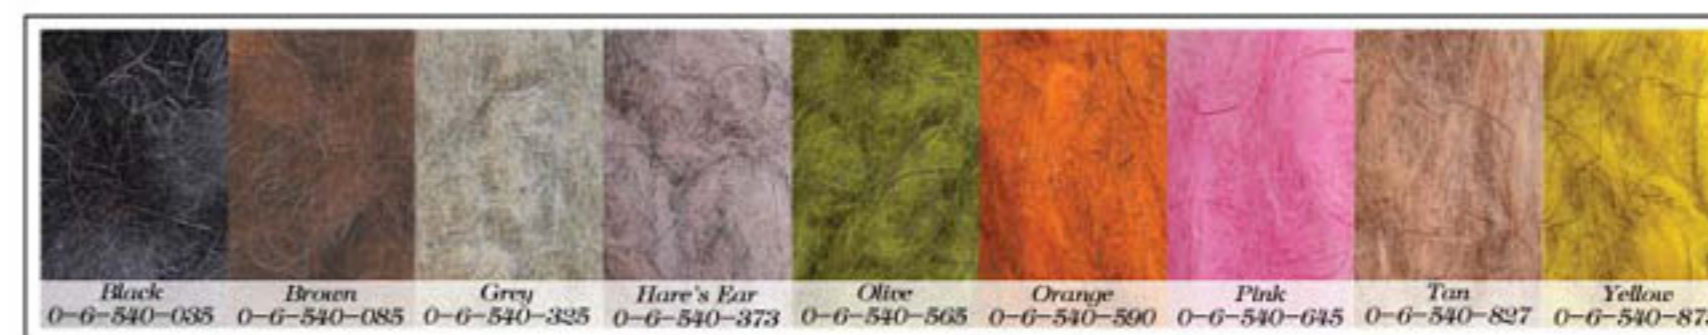

MFC'S UV FROG'S HAIR

MFC's UV Frog's Hair dubbing blends just the right amount of UV flash into our all natural, fine dubbing. Great for medium to large dries and nymphs, this dubbing will add just enough flash to catch the trout's eye.

SWISHER'S RUB-A-DUB™

As seen in Fly Fisherman Magazine
Swisher's Rub-a-Dub™ makes the biggest looking caddis, mayfly, and stonefly nymphs possible. Incorporate it into a dubbing loop and you have created a fly with amazing movement in the water.

WABBIT DUBBING™

Wabbit Dubbing is the perfect blend of waskally wabbits and antron. Use it to get a little extra flash in patterns that call for rabbit.

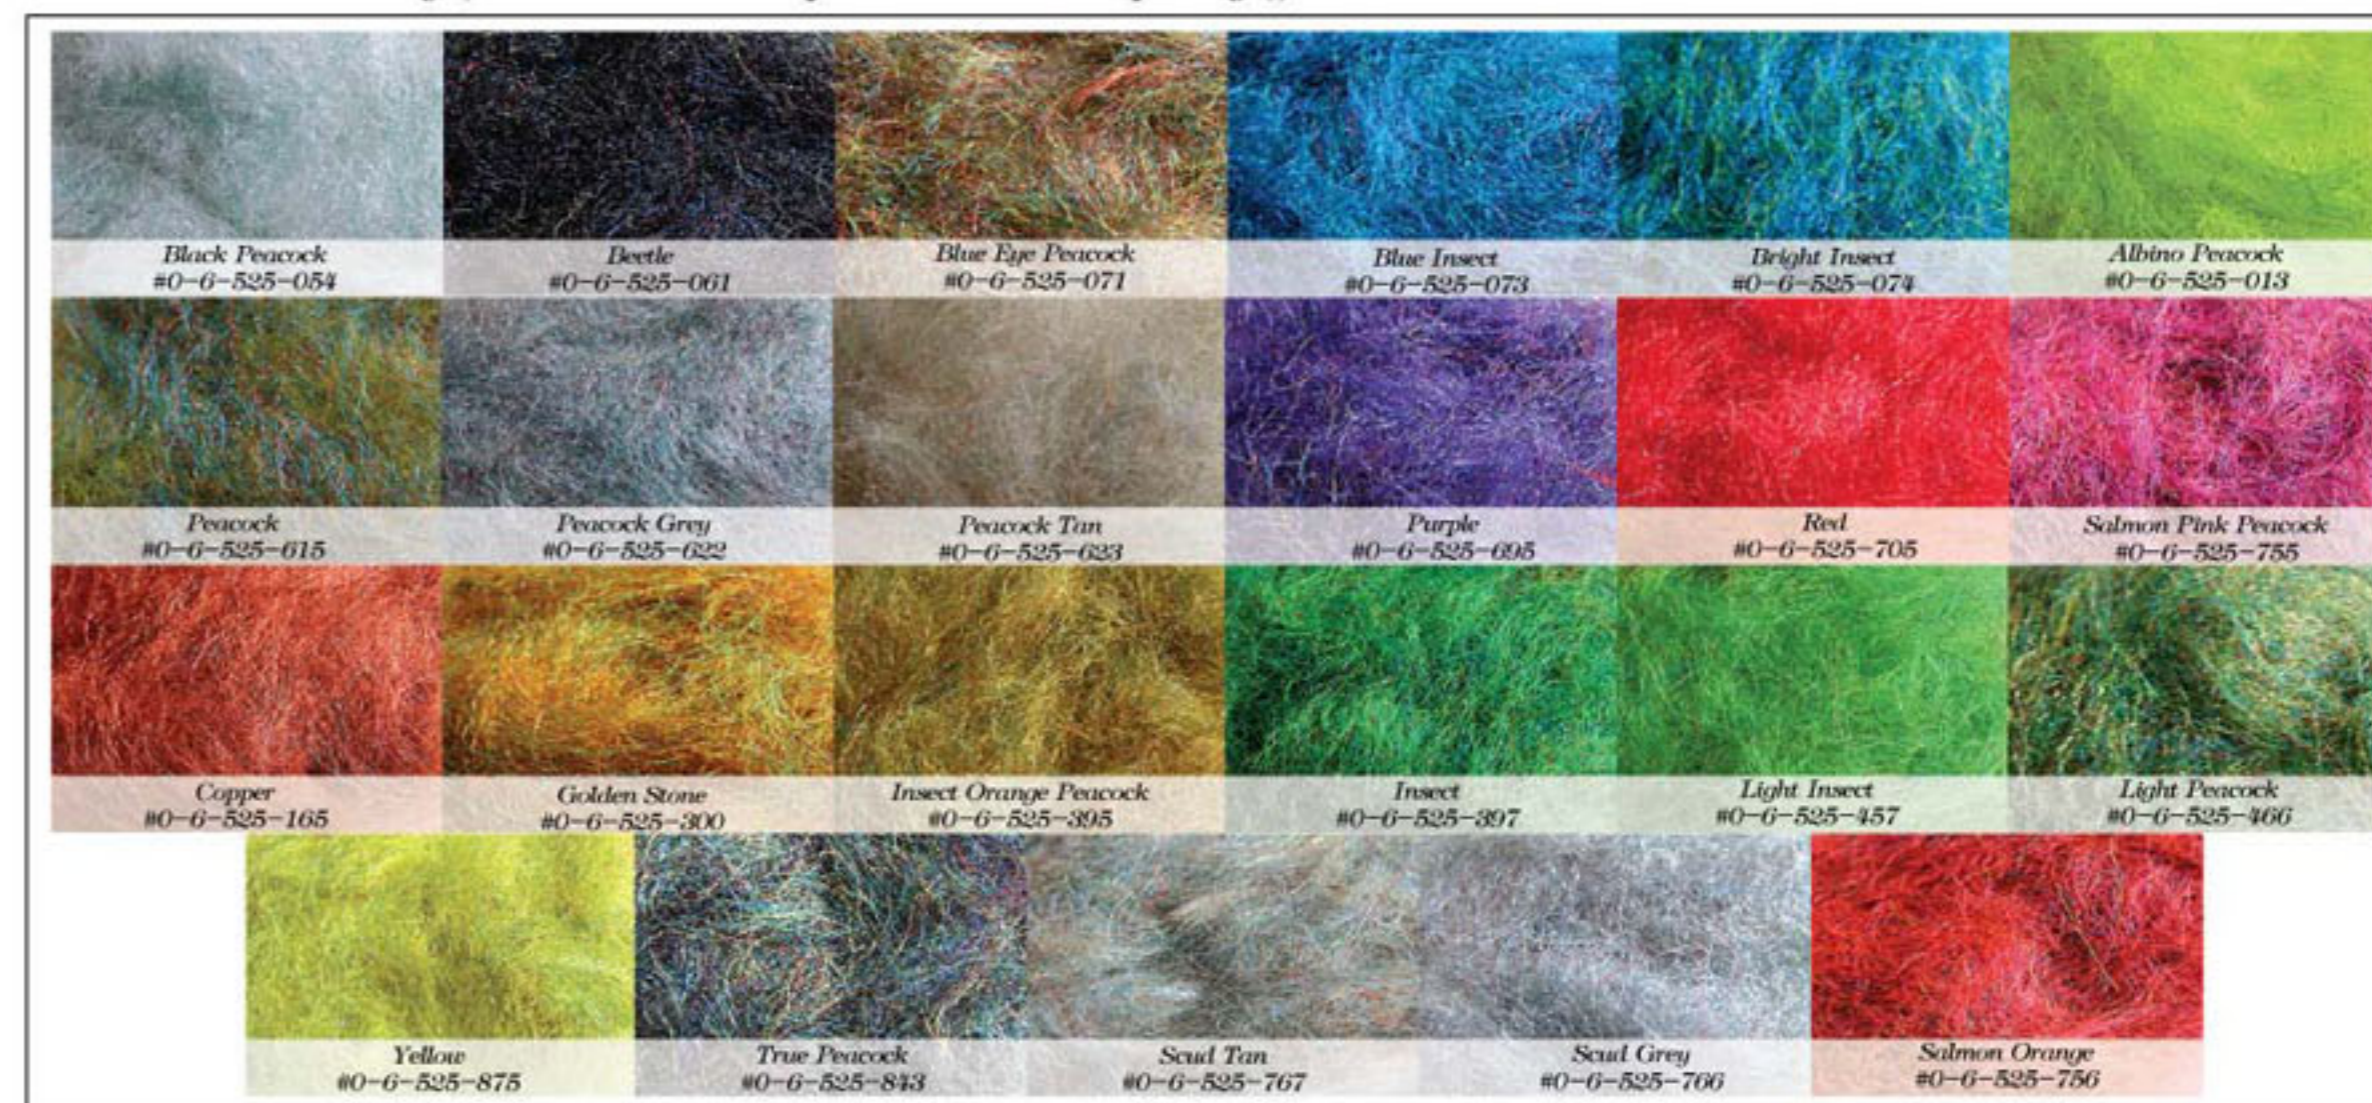

BERRY'S FISH DOPE DUBBING

Designed by Bruce Berry, this dubbing is available in all the essential steelhead colors.

PHOENIX DUBBING™

Phoenix Dubbing™ is a unique blend of antron with the right color for any situation. Because all Phoenix Dubbings are a blend of multiple colors, the end result is very life-like when wet. The peacock blends are especially effective.

SWISHER'S GENERATION X™ DUBBING

Doug Swisher's "Generation X Super-Fine Dubbing" is the newest dubbing designed for fly tying! It is used for tying Nymphs, Pupas, Emergers, Stillborns and tiny dry flies down to size #22. This "Rub-berized" dubbing has incredible action in the water and is sure to get you spectacular results!

BH Gen-X Pupa-Tan

Conehead Rubber Bugger-Brown

TENTACLES™

Tentacles™ make perfect wiggly legs for nymphs and small dries. The variegation on the hot tip tentacles is extremely effective.

Solid Tentacles are available in Large, Medium, and Small size. Hot Tip Tentacles are available in large only.

CENTIPEDE LEGS™

Solid Centipede Legs Speckled Centipede Legs

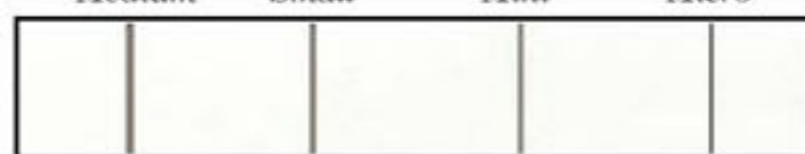

Swisher's Speckled PMX-Royal Yellow

* Denotes colors not available in Small (#1) or Mini (#0).

Centipede Legs™ offer the best selection of colors and sizes of round rubber available to the fly tier. They are packaged in hank form so there are no kinks in the rubber. We use Centipede Legs on our X-Stimulators, Swisher's Parachute Madam X's, and Big Horn Buggers. Our unique Speckled Centipede Legs™ add a new dimension to round rubber. Try them on your favorite patterns for a new look.

Actual Sizes

Medium Small Mini Micro

Solid Sizes: Medium, Small, Mini and Micro.

Speckled Sizes: Medium, Small and Mini

Speckled Sexi-Floss has been worked through a barring machine to give a natural barred and speckled effect to our UV resistant spandex. Try it for a sexier look than rubber.

SPECKLED SEXI FLOSS 0-5-811

Color	No.	Color	No.
Copper Brown	124	Red	705
Golden Yellow	315	Tan	827
Olive	565	White	860
Orange	590	Yellow	875

WONDER WRAP™

Wonder Wrap™ is a stretchy, durable synthetic used for making all kinds of bodies. Try wrapping two colors together for a great segmented look. We use it on our Purple, Grey, Yellow, and Olive Parachute Hazes.

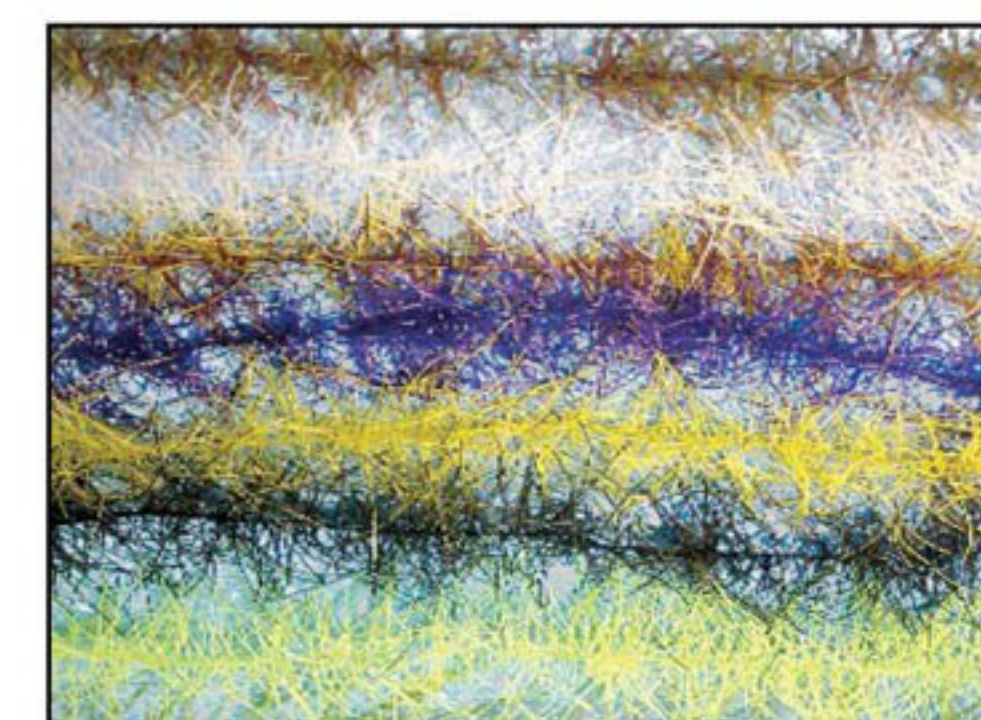

SPIDER LEGS

Spider Legs are a great substitute for standard rubber legs and silicone legs because they have a better resistance to UV. They also are a great substitute for biots on tails, wings, and bodies. We use them on Fast Water Princes, and Etha-wing Emergers, and Brewer's Wiggle Eggs.

SEXI-FLOSS™

MFC's Sexi-Floss is a crinkly spandex custom-dyed to all the popular tying colors. It is great for shiny, durable wrapped bodies, legs, and antennae. It is quickly becoming preferred over Round Rubber because it is more resistant to UV rays and is stronger.

SWISHER'S WIGGLY HACKLE 0-5-613

Color	No.
Black	035
Brown / Yellow	084
Brown / Olive	089
Chartreuse	140
Olive	565

Swisher's Wiggly Hackle is finer and denser than MFC's Rubber Bugger Hackle. It has proven very effective hackling all sorts of flies from Tarpon flies to Woolly Buggers.

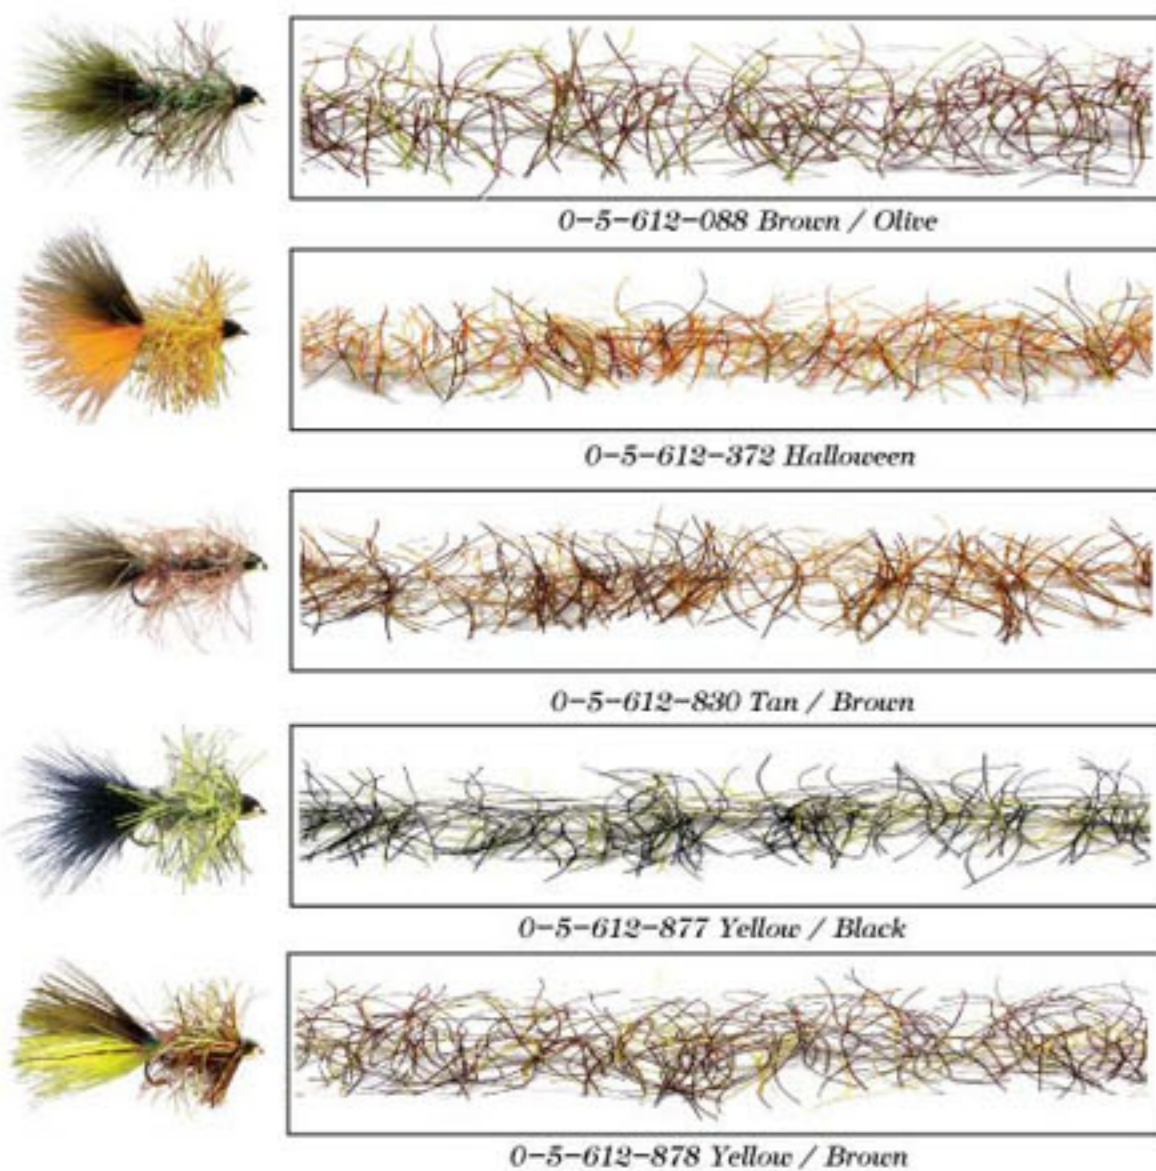

MFC FLY TYING MATERIALS

MFC FLY TYING MATERIALS

MFC RUBBER BUGGER HACKLE

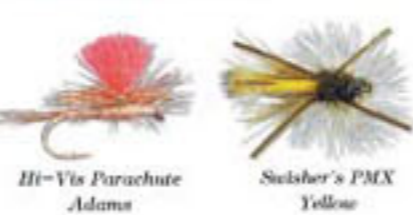

MFC Rubber Bugger Hackle is #2 (Med) Tentacles in a pre-made wire-core dubbing brush. This is what we use in our Rubber Bugger flies. Try it for a new look to any of your favorite woolly buggers or streamers.

DOUG SWISHER'S GATOR HAIR

Doug Swisher's Gator Hair™ is a fine, bright antron yarn. We use it as a wing material on our Slickwater Caddis, as a post material on our HI-Vis Parachutes, and as a body material on our Swisher's Parachute Madam X's.

Z-YARN

Z-Yarn is a very crinkly, curly yarn mainly used for trailing shucks. It also works well as a deer hair substitute on Comparaduns and Sparkleduns. We use it as a trailing shuck on our Cripples, Sparkle Duns, Compara-duns, and X-Caddis.

WIDOW'S WEB

This high volume, low weight synthetic yarn makes great parachute posts on big flies such as Swisher's Parachute Madam X, Rubberleg Parahopper, and Parachute Stimulators. We also use it for wings on smaller parachute mayflies. It is also a great wing material for large pike and saltwater patterns because it is light to cast and doesn't hold water.

OTTER'S EGG VEIL MATERIAL

Combine our Otter's Egg Veil Material with Otter's Soft Milking Eggs® and have the most realistic eggs available on the market! You and your customers will out-fish everyone on the river!

0-6-300-860

WALT MUELLER, JR. a.k.a. "The Otter" (always in the water and usually catching fish) lives on the headwaters of the Blue River in Colorado. Walt's been tying flies for 51 years, and his tying vise is a mere 30 feet from the Blue River, so testing his new patterns is a snap! Walt fishes the Great Lakes tributaries in MI, NY, and PA for Steelhead each spring and fall. His line of Otter's Soft Milking Eggs are a killer on these rivers, as are his other tiny nymph patterns.

OTTER'S SOFT EGG® MATERIAL

We are pleased to offer Otter's Soft Milking Eggs® to the fly fishing industry. These are the most realistic eggs available, and the trout, steelhead, and salmon agree. These eggs have the same consistency and texture as real eggs. When fish eat these, they just don't want to let go. You and your customers will outfish everyone on the river with these soft, chewy, realistic eggs. They are available in 3mm, 4mm, 6mm, 10mm, and Cluster (3-6mm eggs).

(Soft Eggs shown slightly larger than actual size.)

MFC FLY TYING MATERIALS

LUCENT BEADS

Metallic iridescence has long been known to attract trout and instinctively trigger them to eat. MFC's Lucent Beads are tungsten beads with a metallic finish that have provided additional support for this theory. Equally as important, the metallic look also attracts fisherman.

TRINA'S SCULPIN HEADS 3 Pieces per Package

Large (3) Medium (2) Small (1)

Sculpin Heads are realistic, resin-molded heads that mimic the shape and mottling of a real sculpin. They come pre-mounted on a hook, so all you need to do is tie up your favorite streamer pattern on one, and you are ready to fish.

Large = Hook Size #2
Medium = Hook Size #4
Small = Hook Size #6

TRINA'S BULLET SCULPIN HEADS 3 pieces per Package

Reference Size Large (3) Medium (2) Small (1)

Trina's Bullet Sculpin Heads are resin-molded heads designed to allow for an easy and secure attachment of a trailing hook for articulated patterns. The Resin impregnates the lead core so the lead can not get out in the water-system. These are heavy and very effective!

MFC FLY TYING MATERIALS

TRINA'S BELLY DANCER BODIES 3 Bodies per Package

Trina's Belly Dancer Bodies are resin molded bodies designed for zonker style fly patterns. The resin impregnates the lead core so the lead can not get out in the water system. The heavy belly makes them ride "keel-style" (hook up) consistently for a smooth swim through the water.

FISHIZE 20 Pieces per Package

As printing technology gets more hi-tech, so do the applications for the fly tyer. MFC's new FishIze are a perfect example of this. These are the absolute most realistic eyes for tying flies ever created. We worked hard to get good photos to capture the true images, but you really need to see these in person so appreciate their appeal.

SOFT-SHELL STONES

6 Pieces
per Package

Reference Size	Large (3)	Medium (2)
Natural 0-5-268-535 Size #2 (Med) or #3 (Large)		
Golden 0-5-268-300 Size #2 (Med) or #3 (Large)		
Dark 0-5-268-186 Size #2 (Med) or #3 (Large)		
Brown 0-5-268-085 Size #2 (Med) or #3 (Large)		

MFC's Soft-Shell Stone Bodies are absolutely the most realistic stonefly wingcase and legs available. Unlike other realistic stonefly patterns, flies created with Soft-Shell Stone bodies are soft and "chewy". trout will not spit them out like stiff hackle-stem and biot-legged flies. Just create your body and superglue on the wing-case for the deadliest stonefly patterns yet.

NYMPH BACKS

MFC AK-HOPPER LEGS

More-or-Less Hopper

Yes, "AK" stands for Ass-Kickin'. And these legs are just that. Say goodbye to knotting pheasant tail for good. Why spend all that time for a result that is not realistic or flexible. AK hopper legs come in 4 sizes to fit every possible fly you can design. They are made from the same "lighter-than-water" material as our Wiggle Stone bodies, and they move and flex with every tiny disturbance on the water.
