Lincomix Soluble Powder Zoetis

LINCOMIX Soluble Powder is indicated for the treatment of swine dysentery (bloody scours). Use for 5-10 consecutive days.

WARNING: Caution: 48 hour slaughter withdrawal.
8401453 480 g 12/case

Lincomycin-Spectinomycin Soluble Powder Agri-Labs

For use in chickens up to 7 days of age as an aid in the control of: Airsacculitis caused by either Mycoplasma synoviae or Mycoplasma gallisepticum susceptible to lincomycin-spectinomycin.

703319 75 g 12/case

Lincosol (Lincomed) Soluble Powder Bimeda

Lincomycin for the treatment of swine dysentery. Use for 5-10 consecutive days. One packet will medicate 64 gallons of water.

WARNING: 48 hour meat withdrawal.
6806213 40 g pack

Aureomycin Manna Pro

This product is perfect for the lifestyle farmer, as the 5 pound size will feed 10 calves for 5 days. In addition, Aureomycin has benefits not only for cattle, but for swine, lambs, and poultry as well.

1593324 4 gram 5 lb. bag 6/case

LS-50 Soluble Powder Zoetis

A Lincomycin antibiotic for use in chickens up to 7 days of age as an aid in the control of Air sacculitis caused by either Mycoplasma synoviae or Mycoplasma gallisepticum. For also control of Complicated Chronic Respiratory Disease caused by Escherichia coli and M. gallisepticum susceptible to lincomycin-spectinomycin. One packet makes 25 gallons of medicated water and provides 2 gm of antibiotic activity per gallon of water. Use as sole water source for the first 5 to 7 days of life.

8410806 75 g bottle 24/case

BMD Soluble Powder Alpharma

6800359 4.1 oz. 1/Case

Chloronex SP Boehringer Ingelheim

Chickens: control of infectious synovitis caused by Mycoplasma synoviae susceptible to chlortetracycline. Control of Chronic Respiratory Disease (CRD) and air-sac infections caused by Mycoplasma gallisepticum and Escherichia coli susceptible to chlortetracycline. Control of mortality due to fowl cholera caused by Pasteurella multocoda susceptible to chlortetracycline. **Turkeys:** Control of infectious synovitis caused by Mycoplasma synoviae susceptible to Chlortetracycline. Control of complicating bacterial organisms associated with blue comb (transmissible enteritis, coronaviral enteritis) susceptible to chlortetracycline. **Swine:** Control and treatment of bacterial enteritis (scours) caused by Escherichia coli and Salmonella spp. And bacterial pneumonia associated with Pasteurella spp., Actinobacillus pleuropneumoniae, and Klebsiella spp. susceptible to chlortetracycline. **Calves, Beef Cattle, and non-**

NeoMed 325 Soluble Powder Bimeda

NeoMed 325 Soluble Powder for the treatment & control of bacterial enteritis caused by E. coli susceptible to neomycin sulfate in cattle (excluding veal calves), swine, sheep & goats. Contains 71.4 grams neomycin sulfate equivalent to 50 grams neomycin. Dosage: 1 level tsp per 160 lbs. body weight per day, mixed with water or milk. Slaughter withdrawal: Cattle - 1 day; Sheep - 2 days; Swine and goats - 3 days.

6802002 100 g 50/case

Neomycin Oral Solution

Agri-Labs

Neomycin Oral Solution for the treatment and control of bacterial enteritis caused by E. coli susceptible to neomycin sulfate in cattle, swine, sheep and goats. Dosage: Mix 5 ml (1 tsp) in water or milk for each 100 lbs. body wt. Administer daily as a drench in divided doses or as the sole source of drinking water to be consumed in 12-24 hrs. May also be given undiluted. Continue treatment for 24-48 hours beyond remission of disease symptoms, but not more than 14 consecutive days. Each ml contains 200 mg neomycin sulfate. 16 oz. will treat 9,464 lbs. of body wt. Do not use in veal calves or female dairy cattle 20 months or older. Slaughter withdrawal: Cattle - 1 day; Sheep - 2 days; Swine and goats - 3 days.

703323 16 oz.

EPRINEX® (eprinomectin)

Want to see how EPRINEX stacks up to other pour-ons?

(What a coincidence - here's a handy chart.)

EPRINEX kills more species and stages than any other brand. Period.²

When cattle are sharing their feed with parasites, they gain less weight, and that means lower profitability for you. EPRINEX kills 39 stages and species of parasites, more than CYDECTIN and DECTOMAX.² With the additional weight gain, at today's market prices it more than pays for itself.

Get the facts at EPRINEXKillsIt.com

Save on your next purchase and take rewards to the MAX. www.max.merial.com

*Based on 2 doses per calf at retail price Jeffers Livestock accessed 7/8/14. ¹Beckett J. Efficacy of pour-on dewormers differing in active ingredient and carrier on weight gain and fecal egg count in stocker beef cattle. College of Agriculture, Cal Poly State University. ²Based on FOI summaries and label claims.

IMPORTANT SAFETY INFORMATION: No meat or milk withdrawal is required when used according to label. Do not use in calves intended for veal or unapproved animal species as severe adverse reaction, including fatalities in dogs, may result.

CATTLE MEDICATIONS ///////////////

CALF SCOURS / ELECTROLYTES -----

Achieve Pro Calf Paste Agri Labs

Achieve Pro with Cryptex helps support calves through periods of stress when they are most vulnerable to disease. Designed to maintain gut health, promote the growth of beneficial bacteria and support intestinal health. Provides a blend of nutrients, beneficial microorganisms, targeted egg proteins and Cryptex, a unique blend of yeast extract and dextran. Highly palatable, extremely digestible paste. For best results, begin feeding Achieve Pro Calf Paste 24 hours after birth. Depending on severity of stress, feed 20-60 g. Repeat as needed.

- 703280 60 gm tube 12/case

Achieve Pro with Cryptex Agri-Labs

Achieve Pro with Cryptex helps support calves through periods of stress, particularly the first 14 days of life when they are most vulnerable to disease. Designed to maintain gut health, promote the growth of beneficial bacteria and decrease the amount of pathogens in the intestine. Provides a blend of nutrients, beneficial microorganisms, targeted proteins and Cryptex, a unique blend of yeast extract and dextran. Achieve Pro is a palatable, easily digested formula. Mixes easily with milk replacer or whole milk. One 800 g pouch will treat 5 calves for 14 days.

- 703278 800 gm 12/case

Arrest Manna Pro

Oral rehydration therapy for young calves, pigs, foals, lambs, kids, llamas and alpacas suffering from conditions associated with scouring and diarrhea. Helps rapidly restore lost fluids. Plus, added microbials promote a healthy gut and enhance the immune system. Forms a liquid gel to slow fluid passage and increase nutrient absorption.

- 703060 Singles 3.5 oz. Pouch 72/case
- 703059 Pro Vance Value Pack 1.2 lb. 12/case

Bluelite C Tech Mix

Unique acidified buffered formula designed to alleviate dehydration in young calves. Creates an acid environment in the gut which represses E. coli growth. Can be added to milk, milk replacer, or water. Mix 4 oz. Bluelite C powder to 2 quarts water or milk 2-4 times daily.

- 8354185 6 lb. pail 4/case

Bounce Back Manna Pro

An electrolyte energy source for dehydrated calves. Soluble powder that is mixed with drinking water. Helps restore hydration in scouring calves.

- 703770 4 lb. 4/case
- 1594130 4 oz. pk. 24/case

Bovine Bluelite Tech Mix

Designed for sheep and cattle to provide electrolytes and vitamins for the stress associated with moving, sorting, or vaccinations. Palatable high potassium formula helps increase water consumption and helps replace the weight loss due to shrink. Can be administered in the water (6 lbs. to 384 gal.) or top dressed on the feed.

- 8373179 1.25 lb. jar 12/case
- 8373187 2 lb. bag 14/case
- 8373184 6 lb. bag 8/case
- 83718372 Pellets 50 lb. bag 1/case

Blue Lite Replenish Tech Mix

- 6800334 Calf Electrolyte 4 oz. 12/Case
- 6800335 Calf Electrolyte Gallon 4/Case

Bovi Care-CP Agri-Labs

Bovi Care-CP is formulated with digested proteins from egg-derived Cryptosporidium parvum organisms from every stage of its life cycle and helps support digestive system health by preparing the gut for the organism. Studies indicate calves treated days 1-7 are hardier and have less diarrhea, better feed utilization and weight gain when facing a crypto challenge. Treated calves are also visibly healthier in terms of reduced oocyst shedding. Can be fed directly via drench syringe or added to milk. Dosage: 2 ml orally twice daily (am and pm) beginning day 1 and continuing for 7 days for a total of 28 ml.

- 6800200 200 ml

Diaque Plus Powder Boehringer Ingelheim

Complete oral diarrhea relief that contains lecithin-coated pectin filler to rid the Intestine of E. Coli and replenish body fluids. This properly balanced electrolyte helps calves rehydrate quickly.

- 1043422 100 gm packet 24/case
- 1043423 6.6 lb.-30 dose pail 4/case

Hydra-Lyte Agri-Labs

An energy-rich electrolyte replacement and nutritional supplement for young calves, lambs and foals. Restores normal body fluid and electrolyte balance to help reverse loss of body weight. Contains: potassium, sodium acetate, sodium chloride, sodium citrate, dextrose, glycine and glucose.

- 703294 5.76 oz. pouch 48/case

Kick Start Imu-Tek

Daily nutritional calf supplement of a blend of whole milk, proteins, live viable microbials, electrolytes and vitamins. Mix one pack in 1 pint or more of warm water and administer orally by bottle.

- 3640002 400g pk 24/case

MaxiBac American Farm Product

Maxibac Calf Gel is a concentrated gel containing billions of specialized lactic acid bacteria and yeast culture specially formulated for monogastric animals. It is used at birth to populate the gut with beneficial bacteria that can protect the animal from the overgrowth of harmful organisms. The yeast helps protect the animal from harmful organisms and makes the gut environment more "friendly" for the digestive bacteria. Give Maxibac at birth and when calves face environmental stresses such as transporting, environmental changes and change in feeding. When a calf scours, Maxibac will restore the level of beneficial bacteria in the gut and restore gut pH to levels that will inhibit harmful organisms.

- 3817001 80 cc Tube 12/case
- 3817000 300 cc 12/case

BLUELITE®

by TechMix

BlueLite® products and programs have optimized livestock hydration health for more than 30 years.

As a nutrient-rich electrolyte product, BlueLite® facilitates livestock hydration health at the cellular level and in the pen. Trusted for more than 30 years, BlueLite is the year round hydration enrichment product of choice during any stress event and is an ideal nutritional solution with or without other interventions. BlueLite from TechMix, *your hydration health authority.*

Approved with the highest approved level of neomycin and Oxytetracycline medications for optimal treatment of both bacterial enteritis caused by E. Coli and bacterial pneumonia caused by Pasteurella multocida.

703812 20 lb. pail **1/case**
703872 4.34 lb. bag **4/case**

Milk Products

Source E American Farm Products

Source E is an extremely aggressive electrolyte supplement for the rehydration of calves who are scouring or have insufficient water intake. In conjunction with Source E, use Maxibac or Stand Up to return gut pH and digestive bacteria to normal. Source E contains a "plasma specific buffer" that corrects acid conditions in the blood without raising gut pH or interfering with milk absorption. Source E contains no sodium bicarbonate, therefore milk and milk replacer feedings can continue as normal. It is extremely high in both energy content and electrolyte concentration for quick results.

3817006 10 lb. pail **4/case**
3817007 4 oz. pack **4/case**

COLOSTRUM / MILK REPLACERS

Calf Medic Concentrate Manna Pro

A blend of electrolytes, vitamins and minerals with the highest concentration of Oxytetracycline and neomycin available. Ideal for multiple calves at one time. This product is designed to mix with non-medicated milk replacers for the prevention of scours and pneumonia in calves.

703293 500 ml bottle 12/case

CMPK Oral Gel Vet's Plus Inc.

An oral gel for use as a nutritional supplement for dairy cattle during calving. Each tube contains 47.25 gs of calcium, 2.93 gs of magnesium, 6.18 gs of phosphorous, and 1.01 gs of potassium. One 300 ml tube is administered as one dose.

8610202 300 ml tube 12/case

CMPK Oral Gel Agri-Labs

An oral gel for use as a nutritional supplement for dairy cattle during calving. Each tube contains 47.25 gs of calcium, 2.93 gs of magnesium, 6.18 gs of phosphorous, and 1.01 gs of potassium. One 300 ml tube is administered as one dose.

703303 300 ml tube 12/case

CMPK SR Bolus Neogen

Nutritional supplement supplying additional calcium, magnesium and phosphorus for cattle, sheep, swine and horses.

8700130 50/jar 12 case

CMPK Oral Solution Agri-Labs

For use as a supplemental nutritive source of calcium, phosphorus, magnesium, potassium and dextrose in adult beef and dairy cattle. Dosage and administration: administer orally as a drench. The usual dose for adult cattle is 500 ml.

1500096 500 ml bottle 12/case

CMT Test Kit Jorgenson

California Mastitis Test kit measures somatic cell counts through a special reagent in a four-chambered paddle. Kit contains 1 paddle, 0.5 empty pump bottle, complete directions and color charts, 1 pint concentrated CMT liquid. Each pint of concentrate makes 1 gallon of solution.

8247002 Kit complete 12/case

8247001 Concentrate refill pint 12/case

8247100 Test paddle 12/case

Dr. Larsen's Teat Tube Card Jorgenson

Designed to maintain milk flow in injured teats. Retaining fingers hold tube gently in place. Screw-off cap. Packaged individually to maintain sterility.

6800336 36/card

Fresh Cow YMCP Plus Tech Mix LLC

A specially designed fresh cow formula specifically intended for use in high producing dairy cows immediately after calving. It contains a readily digestible combination of yeast, magnesium, calcium potassium, betaine and niacin.

8346185 2 lb. 4/case

8346186 25 lb. pail 1/case

703163 Capsules 48/jar 6/case

703164 Paste 375 g tube 12/case

Go-Dry G C Hanford

Go-Dry is used for the treatment of bovine mastitis in dry cows.

Go-Dry is effective against udder infections caused by Streptococcus agalactiae. Each 10 ml syringe contains 100,000 units Penicillin G Procaine in sesame oil. Administer Go-Dry at the time of drying-off by infusing all four quarters, one time only, with a single 10 ml syringe.

WARNING: Discard all milk for 72 hours (6 milkings) following calving, or later as indicated by the marketable quality of the milk.

703506 12 tubes/box 12/case

Ken Ag Milk Filter Ken-Ag
3510470 4 7/8 in. x 17in. Tube Ultraclean 50/box
3510770 2 1/4 x 24 in. Sock Ultraclean 100/box

Keto Plus Gel Agri-Labs
 High energy gel for dairy cattle, packed with vitamins (including Vitamins A, B12, D3, & E), amino acids & trace minerals to be used as an aid to help maintain normal nutritional levels before, during, and after calving. Give 1 tube after calving and additional tubes as needed. Administer near the back of the mouth & empty contents, allowing the cow to swallow. Do not give to cows that are unable to swallow. Requires 3-tab dosing gun for administration.
703289 300 ml 12/case

Keto-Nia Fresh Vet's Plus Inc.
 A concentrated source of energy for fresh cows and heifers. Helps maintain normal blood-glucose levels. Ideal for use when first signs of ketosis appears. Dosage: Give one tube at freshening and repeat as necessary.
8610400 300 ml tube 12/case

Ketostix 100's Jorgenson
 Test strips to test for Ketones.
1600509 100's

Mastitis Indicators Dr. Naylor
 A quick test that indicates mastitis in cow's milk.
5594502 30/box 12/case

Milk Socks and Tubes Ken-Ag
3565546 milk socks break proof 4 7/8 in. x 17 in. 50/box 10/case
3565103 milk socks break proof 2 1/4 in. x 24 in. 100/box 6/case
3565110 milk socks break proof 4 7/8 in. x 36 in. 50/ box
4108100 milk tubes adjustable 3.5 3 pk 12/case Neogen
4108105 milk tubes fixed 3 3 pk 12/case Neogen

Milking Tubes Dr. Naylor
 Adjustable tubes used to aid in the removing milk from teats that cannot be milked naturally. Fits all teats, reuseable.
5599503 Adjustable 3 pk

Orbeseal Zoetis
 An antibiotic free paste that is used to lock out bacteria at dry off time. This replaces the keratin plug that would naturally seal the teat. The paste seals out bacteria to help prevent mastitis. No withdrawal time for this product.
6008169 144 syringe/pail

Trophy Super Calcium Gel PBI Gordon
 Fast absorbing calcium chloride gel may be given before and after caving. Aids in maintaining constant calcium blood serum levels, lessening occurrences of milk fever in dairy cattle.
8711036 300 cc tube 12/case

Trophy Super High Energy Gel PBI Gordon
 Can be used to increase energy levels in animals recovering from illness, travel stress & as a preventative measure to ward off acetonemia (ketosis). Also helps stressed animals regain their appetite and stamina. Dosage: Cattle and horses - give 1/2 to 1 tube twice daily (depending on severity of condition). No withdrawal when used on lactating dairy cattle.
8700437 300 ml tube 12/case

Trophy Super Magnesium Gel PBI Gordon
 Contains 60 gm magnesium chloride and 1 gm calcium chloride in a special base of glycerin, water and potassium sorbate. No withdrawal when used on lactating dairy cattle. Dosage: 2 tubes orally as needed each day.
8700436 300 ml tube 12/case

Teat Cannulas Jorgenson
 Plastic disposable cannula individually packed in handy tear-off strips. Designed to fit any syringe for infusing medication into the udder.
4312000 100/pk

Teat Dilators Dr. Naylor
 For sore, bruised, and scabbed teats. Medicated surgical dressing for the teat canal-designed to promote natural milking and speed healing. They keep teat open and milking. Contains no antibiotics.
5594500 40/can 6/case

Today Boehringer Ingelheim
 Cephapirin Sodium, mastitis treatment for lactating cows. 96 hour milk out. **WARNING: 4-day slaughter withdrawal.**
3044149 12 syringe/box 12 box/case
3044142 144 syringe/pail

Tomorrow Boehringer Ingelheim
 Cephaperin Benzathine, mastitis treatment for dry cows. Milk from cows cannot be used for food for 72 hours after calving. **WARNING: 42-day slaughter withdrawal.**
3044169 12 syringe/box 12 box/case
3044162 144 syringe/pail

GENERAL USE -----

Advance 1st-in-Show Manna Pro
 Advance 1st-N-Show is a dry, vegetable, prilled fat supplement that is beneficial for multiple species. It is creamy white in color and is prilled to form a free flowing beadlet with outstanding handling characteristics. 1st-N-Show is highly palatable and is a great source of energy for all types of young and adult animals, including show animals. 1st-N-Show contains the calories to improve weight gain, hair coat and body condition. The creamy white prilled 1st-N-Show is non-dusty and has a pleasant aroma. It is ideal for top dressing your animal's grain mix.
703054 4.5 lb. bag 6/case
703055 8 lb. bag 4/case

Amino Acid Oral Solution Agri-Labs
 For use as a supplemental source of amino acids, electrolytes, B complex vitamins, and dextrose in cattle and horses. Administer as a drench.
1650000 Oral Concentrate 500 ml 12/case
1600068 500 ml bottle 12/case

Anti-Diarrheal Bolus Agri-Labs
 To be used as an aid in checking simple, noninfectious diarrhea in horses, cattle, colts and calves. Dosage for cattle is 1 to 1 1/4 boluses.
703317 50/jar 12/case

Bag Balm Vermont's Original

Antiseptic ointment for the use on teats and udders on dairy cattle and horses.

- 703748 1 oz. tin 12/case**
- 703750 4.5 lb. pail 12/case**
- 703751 8 oz. tin 12/case**
- 703749 Dilators - 58/tin 12/case**

Bismusol First Priority

Bismusol Anti-Diarrheal Liquid palatable oral suspension for use as an aid in controlling simple diarrhea in cattle, horses, dogs and cats. Contains 1.75% bismuth subsalicylate. Do not administer with other salicylate containing products, such as aspirin. Dosage: Cattle and horses - 6-10 oz. every 2-3 hrs. Calves and foals - 3-4 oz. every 2-3 hrs. Dogs and cats - 1-3 Tbsp. every 1-3 hrs.

- 6800199 Gallon 4/case**

Bloat Release Agri-Labs

Emulsified treatment for frothy bloat in cattle and sheep. Administer entire contents of 12-ounce special dosing container orally to relieve bloated conditions in average size mature cattle. Young cattle and sheep receive 6 to 12 fluid ounces according to severity of condition.

- 703318 12 oz. 12/case**

Blood Stop Powder Agri-Labs

Stops bleeding on minor cuts, wounds and dehorning.

- 703302 16 oz. bottle 12/case**

Buffer Gel Vet's Plus Inc.

Sodium Bicarbonate, Magnesium Oxide and Vitamin B complex to help maintain normal rumen pH and appetite.

- 8610600 300 cc tube 12/case**

Calf Manna Manna Pro

A 75-year-old product still going strong. The ultimate performance pelleted supplement for cattle, horse, swine, sheep, goats, rabbits, and poultry. Easily digested, highly palatable, and high quality proteins essential for growth and reproduction. Ideal for horse owners with 1-2 horses.

- 1594001 10 lb. bag 5/case**
- 1500212 25 lb. bag 1/case**

Calf Restart One-4 Tech Mix LLC

A supplemental blend of acidified milk sugars, electrolytes, bovine animal plasma and animal fat specifically intended to provide essential nutrients for the energy deficient young calf. Dose like a drench.

- 8312176 25 lb. pail 1/case**
- 8312177 5 oz. bottle 30/case**
- 6800348 10 lb.. pail 1/case**

Chap Guard Plus Agri-Labs

Contains humectants which assist in frost protection and in maintaining the moisture balance of skin on the udder and teats. Apply daily or as needed after milking to help reduce dryness and aid in soothing and softening.

- 703287 16 oz. jar 6/case**
- 703288 5 lb. pail 2/case**

CIDR Eazi-Breed Cattle Insert Zoetis

Indicated for the use in synchronization of estrus in suckled beef cows and replacement beef and dairy heifers. The CIDR cattle insert provides an exogenous source of the hormone progesterone during the 7-day use period. Removal of the insert on day 7 results in a rapid drop of progesterone levels which results in synchronization of estrus in those animals responding to treatment. Always read and follow label directions before use.

- 8447058 10/bag**
- 8472326 Applicator Blue Dairy**
- 8471421 Applicator Green Beef**

Copasure Bolus for Cattle Animax

Surveys in U.S. and Canada show most grazing animals are affected by some degree of copper deficiency. Effects range from depressed immunity, poor reproductive performance, anemia, diarrhea, joint disorders, reduced fertility and more. Even on high performance feedlot rations, deficient range calves are slow to pick up. Copasure is retained in the ruminant stomachs, elevating copper levels for 8 months or more. Good copper reserves in the mother at calving will ensure that calves will be born with sufficient copper reserves. One Copasure 25g bolus for cattle over 500 lbs.

- 6800278 25gm Bolus 24ct 1/case**

Dehorn Paste Dr. Naylor

For use of destruction of horn forming tissue in baby calves up to 8 weeks of age.

- 5594505 4 oz. bottle 12/case**

Dextrose 50% Agri-Labs

For use in the treatment of ketosis in cattle and as a source of carbohydrates in debilitated cattle, horses, sheep and swine. IV use only.

- 703477 500 ml bottle 12/case**

Divine Bovine Calm & Cool Pellets Oralx Corp

A blend of herbs and contains Vitamin B-1 Administer for a natural, calming effect 2-4 hours prior to competition. Test free ingredients.

- 1504471 6 lb. Pail Pellets 4/case**
- 1504410 34 g (Calf calm) past syringe 12/case**

Entrolyte HE Zoetis

Nutritional supplement for young calves that is high in calories, a high energy source that supplies electrolytes and also has a buffer in the mixture.

- 6001344 178 gm pack 40/case**

Estrotech Heat Patches Estrotech

Estrotech Heat Detectors are an economic, easy-to-use and highly effective heat detection aid.

- 6800179 50 Red/Orange**

Foot Rot & Ringworm Spray Agri-Labs

For use on cattle, sheep, horses, dogs and cats as an aid in the control of Summer Itch, Girth Itch, Foot Rot, Ringworm and other fungal problems.

- 703316 32 oz. 12/case**

Formula 911 Kaeco Group
 Formula 911 Suspendable Broth for Livestock is a high energy source that is released in a timely manner; gentle fiber, vitamins, trace mineral and enzymes; naturally occurring microorganisms and other helpful ingredients to provide nutrients to immature animals. Formula 911 can be fed by bottle feeding, pail feeding, and drenching.
703984 100 g pk 20/box 80/case

General Lube Neogen
 A viscous lubricant which is non-spermicidal for obstetrical and rectal exams.
4179212 8 oz. 12/case

Glycerin 99% First Priority
 Glycerin is useful as an emollient for burns and ear problems; also used to reconstitute some teat dips and to condition leather. Product is 99.5 percent glycerin.
703759 Gallon 4/case

Intrauterine Bolus Agri-Labs
 A non-medicated urea bolus for use as an antiseptic and proteolytic aid at infection sites and wounds. Boluses may be used as is for intrauterine application or dissolved in water for flushing open wounds in beef and dairy cattle and sheep.
703311 50/jar 12/case

Jump Start Plus Manna Pro
 Oral microbial gel. Provides a healthier microbial balance in multiple species. Helps keep animals on feed during stress. Aids in digestion of nutrients for maximum feed efficiency.
1594099 60 g multi-species 12/case

Kao-Pec Agri-Labs
 Aids in the relief of non-infectious diarrhea in horses, dogs and cattle.
703286 Gallon 4/case

Magna-Poultice First Priority
 Magna-Poultice from First Priority is a poultice paste for use on horses and cattle. Apply Magna Poultice to strains, sprains, bruises, swellings, acute mastitis and swollen glands. Repeat within 24 hours, as needed. Contains 60% Epsom salt in a water soluble base.
6800197 20 oz. 12/case

Mineral Oil Agri-Labs
 Aids in normal intestinal evacuation and is not absorbed, is nonfattening and will not increase body temperature. Also useful for diluting insecticide.
703299 Gallon 4/case

Mineral Oil Neogen
 Mineral Oil provides an excellent internal lubricant and laxative. Also useful for diluting insecticide concentrates.
6800346 Gallon 4/Case

Multi-Vitamin Oral Gel Agri-Labs
 Oral Vitamin Gels are suggested as a supplemental source of vitamins for incoming cattle, hospital pens, newborn calves, sheep, goats, and swine.
703275 300 ml 12/case

Natural E-AD Neogen
 For use as a supplemental source of vitamins A, D, and E in cattle, sheep, and swine. Natural E-AD injectable d-alpha-tocopherol with AD is a clear, sterile water emulsifiable solution of vitamin A, vitamin D3, and vitamin E.
4109063 250 ml bottle 12/case

Nutri-Drench Beef/Dairy Bovidr Labs
 A fast reliable source of energy & vitamins A, D, and E, trace minerals, amino acids, and glucose that enters the bloodstream rapidly. Use during a highly stressful time or when trauma has occurred.
1327868 Quart (32 oz.) 6/case
1327501 Gallon 4/case

OB Lube (non-germicidal) Agri-Labs
 Non-sterile lubricant.
703274 Gallon 4/case

O-NO-MO Springer Magrath
 Calf claimer powder for those orphaned calves. A proven aid in assuring calf adoption by natural or foster mothers. Enough for approx. 6 calves.
703830 12 oz. bottle 12/case

Opti-Zyme Probiotic Supplement Manna Pro
 Opti-Zyme is a source of naturally occurring viable yeast, enzymes and beneficial bacteria that helps promote optimal digestion. Contains Manna E and yeast culture. In meal form is easy to feed. Also great for cattle, pigs, sheep, and goats. Top dress for horses, beef and dairy cattle at the rate of 1-2 oz./head/day. Pigs, sheep, and goats at the rate of .25 - .5 oz./head/day. Can also be added to your grain mix at 10-15 lbs. per ton of feed.
1599491 3 lb. bag 6/case

Organic Iodide International Nutrition
 A sugar-based iodine blend for routine iodine supplementation in animal feeds.
703993 40 Gr 1 lb. pack 25/case
703994 40 Gr 25 lb. pail 1/case

Power Punch Energy Drench Vets Plus Inc.
 All-natural, high potency, high energy, balanced drench for all animals. Use at any time an animal is under stress due to birth, weaning, shipping, changing feed, heat or cold stress, diarrhea/scours, or following antibiotic treatment. Absorbs quickly, requires no withholding period.
8620600 32 oz. bottle 12/case
8620602 Gallon 4/case

Probios Bovine One Oral Gel Vet's Plus Inc.
 A source of live, naturally occurring microorganisms to help maintain the balance between beneficial and potentially pathogenic bacteria. Use 5 g at birth; under 400 lb., 10 gr. over 400 lb., 15 g. For dairy, beef cattle, sheep and goats.
6208600 60 gm tube 72/case
6202276 60 gm tube w/Natural E 72/case
6208601 300 gm tube 24/case
6202277 300 gm w/Natural E 24/case

Probios Dispersible Powder Vet's Plus Inc.

A source of live, naturally occurring microorganisms to help maintain the balance between beneficial and potentially pathogenic bacteria. Dissolve in water or milk replacer, or mix in feed. For dairy, beef cattle, swine, horses, sheep and goats.

- 6208619 240 gm jar 12/case**
- 6208604 5 lb. jar 6/case**
- 6208605 25 lb. pail**

Probios Feed Granules Vet's Plus Inc.

A source of live, naturally occurring microorganisms to help maintain the balance between beneficial and potentially pathogenic bacteria. Top dress or mix in feed. For dairy, beef cattle, swine, horses, sheep and goats.

- 6208606 5 lb. canister 6/case**

Probiotic Plus Paste Vet's Plus Inc.

Provides 10 billion CFU of lactic acid bacteria per 10 cc dose. Stimulates appetite and restores friendly bacteria in the intestines following stress from weather and diet change or before and after shipping. Can be used as a follow up after antibiotic treatment.

- 703344 300 cc tube 12/case**
- 703343 80 cc tube 12/case**

Promax Multi Microbial Paste Tech Mix LLC

Provides a boost of good bacteria to help restore better digestion during metabolic or digestive upset. Jumpstart animal health with live (viable) lactic acid and bacteria and vitamins. Contains 14 billion live bacterial cells and active enzymes in every 10cc dose.

- 703162 80 cc tube 12/case**

Probios Oral Bolus Vet's Plus Inc.

A source of live, naturally occurring microorganisms to help maintain the balance between beneficial and potentially pathogenic bacteria. For dairy, beef cattle, sheep and goats.

- 6208612 1/4 oz. 50 per jar 12/case**
- 6208609 1/2 oz. 50 per jar 12/case**

Propylene Advantage TechMix

Propylene Advantage is superior nutrition technology that combines propylene glycol with glycerine. Glycerine is proven to enter the cow's metabolic pathway much closer to glucose than other glucose precursors. This metabolic efficiency can help more quickly ease demands on the liver for glucose production. This effect makes Propylene Advantage a very effective prevention and recovery product for cows that are either potentially, or are clinically, ketotic.

- 6800280 Gallon 4/case**

Propylene Glycol Agri-Labs

As an aid in the prevention of ketosis in dairy cattle, feed at the rate of 4 oz. per head daily at calving and continue for 6 weeks. Mix with feed or drench.

- 703300 Gallon 4/case**

ProVance Manna Pro

Microbial supplement for calves. Each bolus contains a source of 40 billion live (viable) naturally occurring microorganisms that help support a healthy gut. Quick colonizing microorganisms populate to crowd out undesirable microorganisms in the gut. Easy to feed bolus or can be dissolved in milk or drinking water. Calves under 400 lb. - 1 bolus per day.

- 703011 30 bolus jar 6/case**

Respond Paste Agri-Labs

Contains Zymace, an Aspergillus oryzae fermentation product, plus a comprehensive blend of vitamins, amino acids and minerals to support animals through stress. See increased appetite and dry matter intake with improved feed conversion. Increases essential microbials, improves rumen processes and capacity, delivers high levels of energy and protein and improves weight gain.

- 703328 300 ml 12/case**
- 703327 80 ml 12/case**

Rumen Yeast Caps Plus Tech Mix LLC

Yeast cultures help reestablish the rumen microbes that help break down and digest energy sources. By enhancing the breakdown of various energy sources, the high producing Cow can better utilize alternative and conventional ingredients. One Rumen Yeast Cap is recommended daily for three days in a row whenever Cows are off feed or after calving.

- 8318189 25/jar 12/case**

Septi-Lube Boehringer Ingelheim

A non-greasy, ready to use lubricant to aid in minimizing irritation to skin and membranes.

- 1043821 Gallon 4/case**

Shut Eye Cement American Animal Health

A rubber-base, waterproof cement for use when applying shut-eye patches for Pinkeye and all-weather livestock Tagging.

- 703989 5 oz. Tube 12/case**

Shut Eye Pinkeye Patches American Animal Health

A protective eye patch that covers the infected eye. Adheres with an adhesive that is included in the 10 pack box. The patch will fall off in 7-10 days and decomposes.

- 703990 Calf 10/box plus cement 10/case**
- 703991 Cow 10/box plus cement 10/case**
- 703989 cement 5 oz. tube 12/case**

Stand Up American Farm Products

Stand Up Calf Gel is a more aggressive culture of lactic acid bacteria that can live in more hostile environments. Stand Up contains a nutrient rich media that supports the growth of beneficial bacteria in the face of adverse conditions. It is given when extreme environmental or physical problems exist and the animal is in danger of imminent death.

- 3817002 30 cc syringe 4/case**

Therabloat Zoetis

A concentrated bloat treatment that when mixed with water treats frothy bloat administered as a drench.

- 6001400 2 oz. bottle 12/case**

Udder Cream Ken-Ag

Absorbs into skin and is effective for chapped teats, udders, superficial cuts, abrasions, minor burns and bruises. Also inhibits germ growth. For use in warm or cold weather.

- 3503000 4.5 lb. 6/case**

GET TO THE POINT

GET TO THE PROFIT.

We'll keep this short. Your cattle are worth more than ever, which means protecting your profit potential is more important than ever. Make sure your investment reaches that potential, with the only implant that offers the added value of Tylan's abscess defense to ensure you're helping maximize your implant ROI.

The label contains complete use information, including cautions and warnings. Always read, understand and follow label and use directions. Administer one dose in the ear subcutaneously according to label directions.

IMPLANTS

Component Elanco
 Implant for steers weighing 400 lbs. or more. Contains 200 mg progesterone and 20 mg estradiol. No slaughter withdrawal.
6800313 E-S w/ Tylan 100ds 1/Case

Component Elanco
 Implant for heifers weighing 400 lbs. or more. Not for use in dairy or beef replacement heifers. Contains 200 mg testosterone plus 20 mg estradiol. No slaughter withdrawal.
6800332 E-H w/ Tylan 100ds 1/Case

Ralgro Merck
 Ralgro reliably stimulates weaning weights to maximize your pasture and bottom line. It's the only implant containing zeranol – a safe and effective anabolic agent that contributes to sustainable beef production by improving weight gains without additional natural resources.

Advantages

- Can increase weaning weight by as much as 20-35 pounds in calves
- Using Ralgro® is like selling an extra calf for every wheel (24 doses) used
- Stimulates natural growth system in suckling beef calves, growing beef cattle and feedlot heifers and steers
- Easy-to-use, durable design

**“Seven generations
of cattlemen,
and not one of
them ever
considered cattle
health *optional*.”**

— **Dennis Carlton,**
Carlton & Carlton Ranch

PREVENTION WORKS.

Coming from a long line of cattlemen, Dennis Carlton knows he needs a vaccine he can trust with his herd, his business and his very livelihood. “Keep the cattle healthy, and the whole operation thrives,” he says. With its long-standing reputation for reliability and proven performance against key respiratory and reproductive diseases, Carlton trusts Triangle® to be the lead vaccine for his herd. Put trust in TRIANGLE for your herd, too.

A fast acting vaccine that provides protection against Calf pneumonia.

703925 10 dose 12/case

703926 50 dose 12/case

Ocu-Guard MB-1 Boehringer Ingelheim

Moraxella bovis Bacterin
Bacterin for extra protection and broadest protection against Pinkeye causing organisms. Single 2ml dose SQ. Healthy cattle and calves at 60 days of age or older prior to fly season. **WARNING: Do not vaccinate 21 days before slaughter.**

1005211 10 dose 10/case
1005231 50 dose 10/case

Once PMH Merck

Protection against Pasteurella (shipping fever) caused by Mannheimia haemolytica and Pasteurella multocida in cattle 3 months of age or older. Give 2 ml SQ. A booster is recommended whenever subsequent stress is likely and once annually. A virulent live culture, requires mixing.

5206337 SQ 10 dose
5206338 SQ 50 dose

Once PMH IN Merck

Once PMH IN is an intranasal vaccine for protection against Pasteurella (respiratory disease) caused by Mannheimia haemolytica and Pasteurella multocida in beef and dairy cattle 1 week of age or older. Give 2 ml intranasal by administering 1 ml into each nostril or 2 ml into only one nostril. Booster is recommended annually, or more frequently based upon risk or epidemic conditions. A virulent live culture. Requires mixing. Transfer needle included.

6800192 IN 10 dose 24/case

The One Shot Family Zoetis

The One shot Family offers combinations to protect against Pasteurella, Clostridial, and respiratory diseases, including BVD Types 1 and 2, IBR, PI3, BRSV, Blackleg(7 strains) and Pasteurella haemolytica.

One Shot Zoetis

Pasteurella haemolytica Bacterin toxoid
6001650 5 dose 200/case
6000904 10 dose 100/case
6000906 50 dose 20/case

One Shot BVD Zoetis

One Shot BVD protects against bovine virus diarrhea (BVD) Types 1 and 2 and Pasteurella (bovine pneumonia, respiratory infection, shipping fever) caused by Mannheimia haemolytica type A1 in cattle. Give 1 ml SQ. May be administered to pregnant Cows, or calves nursing pregnant Cows, provided Cows were vaccinated according to label directions with any Bovi-Shield GOLD FP or PregGuard GOLD FP vaccine within the past 12 months. Heifers must receive at least 2 doses of any Bovi-Shield GOLD FP or PregGuard GOLD FP product, with the second dose administered approximately 30 days pre-breeding. Calves vaccinated before 6 months of age should be revaccinated after 6 months of age or at weaning. Booster is recommended annually or whenever subsequent stress or exposure is likely. One Shot BVD is a modified live vaccine and requires mixing.

7086506 50 dose

Piliquard Pinkeye Triview Merck

Contains three Moraxella bovis strains to provide a broader spectrum of protection.
7029501 10 dose
7029502 50 dose

Pinkeye Shield XT4 Elanco

Pinkeye vaccine for cattle that contains multiple strains of Moraxella bovis. Animals require only a single, 2 ml dose given each year prior to the start of Pinkeye season.
703889 10 dose 12/case
703890 50 dose 12/case

Pinkeye-1 Trivalent Merck

Single dose protection against Pinkeye caused by Moraxella bovis in cattle. Give 2 ml SQ or IM in the neck 3-6 weeks prior to the onset of Pinkeye season. Annual booster is recommended.
7096901 10 dose
7096902 50 dose

Preguard Gold FP 10 Zoetis

IBR-BVD Type I & II- PI3 Vaccine Campylobacter-5-way Leptospira Bacterin. A single dose should be given to all breeding Cows and heifers at 30-60 days prior to be added to the herd. A second dose of Vibrio/Leptoform 5 may be needed in 2-4 weeks. Annual revaccination of Preguard Gold FP 10 is recommended. Dose 2 ml IM. **WARNING: 21 day meat withdrawal.**
6005117 10 dose
6005118 50 dose

Preponse HM Boehringer Ingelheim

Single dose protection against pasteurella (shipping fever) caused by Mannheimia haemolytica and Pasteurella multocida in cattle 7 months of age or older. Give 2 ml IM. A booster is recommended whenever subsequent stress is likely.
3013765 10 dose 12/case
3013767 50 dose 12/case

Prism 5 Boehringer Ingelheim

Prism vaccine provide protection against the common virus that cause respiratory and reproductive failures. Prism vaccines also include a safe killed type I & II BVD for broad protection and enhanced safety in stressed cattle. Vaccinate and booster dose in 14-21 days. Revaccinate annually. Dose 2ml SQ or IM. **WARNING: 21 day meat withdrawal.** This product contains modified live IBR, PI3 and BRSV and inactivated BVD (types I & II). For vaccination of healthy cattle as an aid in the prevention of disease caused by bovine Rhinotracheitis, bovine virus diarrhea (types I & II), bovine parainfluenza 3 and bovine respiratory syncytial viruses.
3013725 10 dose 24/case

Pulmo-Guard PH-M Agri-Labs

Pulmo-Guard PH-M is recommended for the vaccination of healthy cattle 60 days of age or older as an aid in prevention of respiratory disease associated with M. haemolytica and P. multocoda. Made with low-reactive, water-soluble adjuvant. Vaccinate with 2mL Sub-Q or IM in the middle of the neck. Repeat in 14-28 days. Annual revaccination is recommended.

703329 10 dose 24/case
703330 50 dose 12/case

Pulmo-Guard PHM-1 Agri-Labs

Helps reduce disease caused by M haemolytica and P. multocida in two ways. It stimulates the calf's immune system to make antibodies that attack the bacteria plus it stimulates the production of antibodies that neutralize the leukotoxins produced by M. haemolytica. Single 2 mL Sub Q dose. Proven efficacy and performance in challenge studies and side-by-side comparisons. Sustained duration of immunity against M. haemolytica and P. multocoda.

1040541 10 dose 24/case
1040543 50 dose 12/case

Pyramid 10 Boehringer Ingelheim

IBR, BVD Types I and II, PI3, BVD, and 5 strains of Lepto. Give 2 ml SQ. Safe for pregnant cows, or calves nursing pregnant cows, provided they were vaccinated pre-breeding, according to label directions, with Pyramid 5 or Pyramid 10. Calves vaccinated before 6 months of age should be revaccinated at 6 months of age. Annual booster is recommended. Modified live, requires mixing.

6800011 5 dose
3034026 10 dose

Pyramid 5 + Presponse SQ Boehringer Ingelheim

Pyramid 5+ Presponse SQ is for the vaccination of healthy dairy or beef cattle seven months of age or older as an aid in the prevention of disease caused by bovine rhinotracheitis, bovine virus diarrhea, bovine parainfluenza 3, bovine respiratory syncytial virus and pneumoibuc pasteruellaosis caused by P. multocoda. This product aids in the prevention of persistent BVD Type I and II infection of the fetal Calf when it is used SQ in the Cow or heifer 30 to 60 days pre-breeding. Dose 2ml SQ or IM. Annual vaccination recommended. Calves vaccinated under 6 months of age should be revaccinated at 6 months or at weaning. **WARNING: Do not vaccinate within 21 days before slaughter.**

3014756 10 dose 48/case
3014757 50 dose 24/case

Pyramid 5 Boehringer Ingelheim

IBR, BVD Types I and II, PI3 and BRSV. Give 2 ml SQ. Safe for pregnant cows, or calves nursing pregnant cows, provided they were vaccinated pre-breeding, according to label directions, with Pyramid 5 or Pyramid 10. Calves vaccinated before 6 months of age should be revaccinated at 6 months of age. Annual booster is recommended. Modified live, requires mixing.

3013745 10 dose
3013747 50 dose

Reprostar L5 HB Elanco

L. hardjo-ovis and 5 strains of Lepto. Give 2 ml SQ. Repeat in 4-6 weeks. Annual booster is recommended. Safe for pregnant Cows.

703921 50 dose 12/case

Reprostar VL5 HB Elanco

L. hardjo-ovis, Vibrio and 5 strains of Lepto. Give 2 ml IM, 2-4 weeks prior to breeding. Booster with ReproSTAR L5 HB in 4-6 weeks. Annual booster is recommended. Safe for pregnant Cows.

703907 10 dose 12/case
703908 50 dose 12/case

Respishield HM Merial

Respishield HM Pasteurella vaccine from Merial is recommended for vaccination of healthy cattle to aid in the prevention of respiratory disease caused by M. haemolytica and P. multocoda. Dosage: 2 ml SQ. Revaccinate annually. 60 day slaughter withdrawal. No milk withholding. U.S. Lic. No. 298.

Trichomonas foetus

For vaccination in healthy cattle in the aid of preventing the disease caused by Trichomonas foetus. An initial injection should be followed 2-4 weeks later that precedes the breeding season by 4 weeks.

Revaccinate annually. Dose 2ml SQ. **WARNING: 60 day slaughter withdrawal.**

3051797 50 dose

IT TAKES MORE THAN A LITTLE LUCK TO KEEP CALVES HEALTHY.

It takes the power of **Pyramid® 5 + Presponse® SQ**, the only approved combination vaccine that protects for at least 217 days against BVD Type 1b — the most common subtype of BVD in infected calves. Vaccination provides a protective effect against the development of post-challenge viremia and leukopenia. Choose the viral and bacterial protection of PYRAMID 5 + PRESPONSE SQ, and realize that luck has nothing to do with raising healthy, high-returning calves. Talk with your Boehringer Ingelheim Vetmedica, Inc. representative today.

Learn more at bi-vetmedica.com/cattle.

AniFlex GL Joint Care Powder Animed

AniFlex GL Joint Care Powder is a 100% natural chondro protective nutritional feed supplement. Effective chondro protection is based on providing nutrients (glucosamine and anti-oxidants) which are the building block for healthy joints and controlling inflammation. Glucosamine has a high affinity and is readily incorporated into the cartilage, promoting the natural formation of GAG's and hyaluronic acid by the body. As a result of its nutritional components, AniFlex GL aids in protecting joints against cartilage and joint damage. AniFlex GL's nutrients also aids in the control and treatment of osteoarthritis caused by joint overloading, abnormal joint forces, poor circulation, over exercise and trauma.

1990310 16 oz. jar
1990311 2.5 lb. jar

Equine Fat Supplement

Manna Pro

Your horse works hard to please you, day in and day out. But in doing so, he may be burning up calories and nutrients at a rate that feed alone cannot replace. That's where Manna Pro's Equine Fat Supplement comes in. Our concentrated energy source helps horses at all life stages recover quickly from exertion, renew lost energy reserves, and - most importantly - maintain the kind of high health and overall vigor you want for your performance horse. Feed foals at the rate of 1-2 oz. per day. Feed mares and breeding horses at the rate of 2-8 oz. per day. Feed maintenance horses at the rate of 2-6 oz. per day, and performance horses at the rate of 6-12 oz. per day.

Effortless HA

Animed

With 300 mg of Hyaluronic Acid per ounce, Effortless HA has the highest concentration of HA available, 33% more than competing products, in a readily absorbed liquid. HA is a major element of both cartilage and synovial fluid, is associated with joint lubrication and flexibility. High molecular weight HA, the only kind AniMed uses, is absorbed from the intestines and localizes in the joints. Effortless HA offers an effortless way for supporting your horse's normal joint health.

6800248 Gallon

Equinyl Glucosamine w/ Hyaluronic Joint Formula

Central Life Sciences

Equinyl Glucosamine with Hyaluronic Acid may help ease inflammation associated with training and competition without causing gastrointestinal side effects. ComfortX ingredient may reduce inflammation associated with training and competition, provides joint health support, increases flexibility and shortens recovery time by reducing the emigration of neutrophils to the site of the inflammation. There are two types of glucosamine in Equinyl Glucosamine with Hyaluronic Acid. The first is regular glucosamine, which provides an immediate supply of glucosamine HCl, while the second form, Patent Pending Time Release Glucosamine, releases over 24 hours. This is more than 24X longer than normal glucosamine*. Glucosamine and Hyaluronic Acid help maintain synovial fluid that lubricates the joints all day. Hyaluronic Acid has been added to provide additional joint support for flexibility and healthy joints.

4102007 Bands 100 per bag 150/case

Band Castrator Pliers Stone Mfg. Co.

Multi-purpose plier designed for use on sheep, goats, small calves. Also useful for docking and dehorning. Durable precise operation; 9-3/8" long, easy to fit in pocket.

7829804 Pliers

California Bander Inosol Co LLC
 Quick and easy bloodless castration. To use, insert the T-clip that is affixed to each band into the bander's slotted end, stretch the band around the scrotal sac and lock band onto the T-clip. Tilt bander back to release tool. The sac dries up in approximately 7 to 10 days.
5831874 Bands Only **25/pk**
5831875 Bander Tool

Callicrate Castrator No Bull
 A ratchet style bander to castrate larger animals with minimal stress. The bander uses latex bands. The scrotum drops off in about 21-31 days. Each kit contains: 1 bander, 5 latex bands, and a band cutting knife. A tetanus toxoid vaccine is recommended. The Smart Bander will tell you when you have put the correct tension on the band.

Newberry Knife Stone Mfg. Co.
 Safe and easy way to incise the scrotum. Operator forces testicles up, placing knife below testicles. Knife is closed and pulled downward, incising bag from side to side. Testicles may then be removed using emasculator or Henderson Castrating Tool.
4337901 Knife
7829705 Replacement Blade

T1 Bander Wadsworth Mfg.
 Applies a latex band around the scrotum and pulls it tight, cutting off the blood supply. An aluminum clip secures the ring. Once excess band has been cut, you're ready to re-load for the next animal. Within about 30 seconds, the scrotum is completely numb and the animal feels nothing.
703179 T1 25 Count Replacement Bands and Clips
1300003 T1 50 Count Replacement Bands
703180 T1 50 Count Replacement Clips
703178 T1 Bander Kit with 25 clips and rings

Tri Bander Wadsworth Mfg.
 The bigger, stronger, "better" bander. Bands are two times the strength of standard bands and they open bigger. Banding causes less stress, resulting in bigger gains. Recommended for calves up to 400 lbs. or 3-4 months of age. The bands are flat so they will not roll off of the applicator. The scrotum should fall off in approximately 20-40 days.
703182 Tri-Bander 25 Count Bands
703181 Tri-Bander Applicator and 10 Bands

XL Bander Wadsworth Mfg. Co.
 The Bloodless Castrators applies a latex ring/band around the scrotum, cutting off the blood supply. The scrotum should fall off in 20-40 days. Works best on calves 350 lbs. and up.
703183 XL Bander
1300008 XL Bander bands **25 ct**

SHAMPOOS & GROOMING SUPPLIES

Nitrile Gloves Powder Free Ammex

High performance medical grade nitrile gloves are powder free and latex free. What's more is that each glove features a micro-roughened grip. A secure grip that you can count on in wet or dry conditions. The preferRed choice for latex sensitive individuals in the medical profession. Nitrile gloves have three times the puncture resistance of comparable latex or vinyl gloves, making these gloves an excellent choice. 4 sizes (S-XL). 100 gloves per box, 10 boxes per case.

Quietwean Agri-Pro

QuietWear Calf weaners reduce the stress associated with weaning. Flexible, lightweight QuietWear nose flaps prevent calves from nursing, but allow them to graze and maintain physical contact with Cow. Gradually breaks the Cow-Calf bond over just a few days, while the pair is still together. Lightweight, non-invasive QuietWear nose flaps are made from a very flexible plastic, making them easier to apply. QuietWear Calf weaners are typically left in calves for 4-7 days before separating the calves from their mothers. Washable and reusable.

Cylence Ultra Insecticide Ear Tag Bayer

For use on beef and dairy cattle (including lactating) to control of horn flies, face flies, Gulf Coast ticks and spinose ticks. Effective against face flies and pyrethroid susceptible horn flies for up to 5 months. Kills and repels face flies, the mechanical vector of Moraxella bovis bacteria that causes Pink eye in cattle. Active ingredients from the pyrethroid family include 8% betacyfluthrin (5th generation) and 20% piperonyl butoxide.

5262099 20/box 12/case

Dominator Ear Tag Merck

Contains organophosphate primiphos methyl for up to 5 month control of horn flies, including synthetic pyrethroid-resistant horn-flies. For use in beef cattle and non-lactating dairy cattle and calves. Use 2 Tags per head. Apply with Allflex Total Tagger Applicator.

4902402 20/box 15/case

Double Barrel VP Tags Merck

Contains organophosphate and synthetic pyrethroid lambdacyhalothrin for up to 5 months control of horn flies and face flies. For use in beef cattle non-lactating dairy cattle and calves. Use 2 Tags per head. Apply with Allflex Total Tagger Applicator.

4926660 20/box 15/case

Extinguish PLUS Professional Fire Ant Bait Central Life Sciences

Extinguish Plus Fire Ant Bait is highly attractive to fire ants. It combines the knock down of an adulticide (Hydramethylnon) and the long-lasting control of an Insect Growth Regulator (IGR) (S-Methoprene). The IGR sterilizes the queen and prevents rebound, while the adulticide kills problem worker ants. This two-way action ensures complete control of fire ants.

6800250 1.5 lb. 8/case

Extinguish Plus Fire Ant Bait Central Life Sciences

For complete control of Fire Ant colonies. With no withdrawal period or grazing restrictions on treated areas, Extinguish can be used around sensitive plants, including fruits, vegetables, flowers and trees. It is also approved for use on pastures (no grazing restrictions), cropland, school yards and food crops. Extinguish® can be broadcast applied using hand held spreaders or motorized equipment, including aerial applicators.

Python Insecticide Cattle Strip

Y-TEX Corp.

The Y-TEX Python Insecticide Cattle Strip is attached to an existing ID tag in the ear. Provides the protection of an insecticide tag without the need to apply a separate tag through the ear. Python Strip has a key hole slit through which existing button can be manually fed, allowing strip to lie flat between ear and button. Synergized pyrethroid formula contains zetacypermethrin and piperonyl butoxide. Python Strip provides the same amount of insecticide as the traditional Python Insecticide Ear Tag. Approved for use on beef and dairy cattle, including calves and lactating dairy cows. Strip should not be used until the ID tag application site has completely healed. Preferably, use with ID tags that were applied the previous season or earlier. When using in calves, consider the weight of ID Tag plus Python Strip. Ear damage may result in young calves. 9.5 grams.

- 6800234 Python Strips 20/bag
- 6800235 Python Strips 50/bag

Vet Gun Agri-Labs
 The VetGun Insecticide Delivery System is a unique system for delivering insecticide-filled gel capsules (AiM-L VetCaps, sold separately) to control horn flies and lice on cattle. AiM-L VetCaps burst upon contact to deliver the insecticide. The VetGun is powered by CO2 and can be utilized from 15' - 30' away. Simply aim, shoot, and treat. It's easy to operate, accurate, and reliable. Cattle are easily treated while milling around or feeding, without added stress or labor. Allows one person to easily apply insecticide from horseback, pickup, ATV, or while on foot. Saves time and puts you in control of when and where you treat your cattle. Includes two adaptors, allowing use with both 25 gm and 90 gm CO2 propellant cartridges (CO2 propellant cartridges or refillable CO2 tank sold separately).

D-Worm Tablets and Liquid Central Life Sciences

Contain pyrantel pamoate, proven to be highly effective in removing large roundworms (ascarids), and hookworms in puppies and dogs. Also helps prevent reinfection of roundworms in puppies and adult dogs and in lactating bitches after whelping. D-Worm provides a wide margin of safety. One dose works within 24 hours. Regular treatments prevent re-infestations of roundworms. No fasting or laxatives are required. D-Worm comes in different forms. A push tablet; which needs to be pushed down the throat, and a chewable tablet; palatable tablet, which the dog will chew and swallow. 12 Box/case.

One Company, Many Solutions

Neogen is there, no matter where you look, from behind the farm gate — all the way to the dinner plate.

Neogen is on farms and ranches, using genomics to help select only the best breeding livestock animals, and then providing quality products and services for animal health, biosecurity, productivity and safety. Once food products leave their producers, Neogen is at food processing facilities, distributors, retailers, and food service providers, ensuring food safety every step of the way with cutting-edge test kits to identify pathogens, allergens, drug residues and more.

With solutions for safety and health, from farm to plate, Neogen helps make food safe.

Mealworm Medley Manna Pro

Mealworm Medley is a nutritious treat for adult poultry and fowl. For best results, place Mealworm Medley in the feeding area where it is protected from the elements. Because of the larger particle size, Mealworm Medley is not recommended for birds less than eight weeks of age or very small birds. Offer grit to birds fed Mealworm Medley to help with breakdown and digestion of larger grain particles. Provide your birds with a complete feed formulated for the appropriate species. Provide fresh, clean water at all times.

703999 6/case

Mealworm Munchies Treat Manna Pro

Manna Pro Mealworm Munchies are designed to provide a nutritional treat or reward for growing and adult poultry and fowl. Feed ½ to 2 tablespoons of Mealworm Munchies per bird daily depending on their size. When feeding coarse grains, always provide a source of natural stones or free choice access to Manna Pro Poultry Grit.

1510214 7.5 oz. 6/case
703998 20 oz. 6/case

Merrick Poultry Electrolyte Merrick

Blue Ribbon Poultry Electrolyte Pack is specifically designed for poultry to provide a supplemental source of electrolytes/nutrients and direct-fed microbials through the drinking water.

6800142 4 oz. 30/case

Nutri-Drench Poultry Bovidr Labs

A rapid energy source that passes directly into the bloodstream within minutes. Provides the essential nutrients lost due to stress or illness. Give directly into mouth at the rate of 1 ml per 3 lbs. body weight.

1324630 32 oz. 6/case
1324629 4 oz. 12/case

Omega Egg Maker Manna Pro

Omega Egg Maker is the perfect supplement for your flock of laying hens. Vitamins and minerals support the overall health and vitality of your flock while added ingredients provide Omega-3 fatty acids, rich-colored egg yolks and a healthy digestive system. Supplement your birds with Omega Egg Maker and enjoy having a happy, healthy flock and gathering nutritious, delicious eggs.

1520043 5 lb. bag 6/case

Organic Chick Starter Crumbles Manna Pro

Use Manna Pro Chick Starter as the sole ration for chicks from 0 to 8 weeks of age. For improved feed efficiency, development of active immunity, fortified with vitamins and minerals for healthy growth and sound development. Contains 18% protein for weight gain and muscle development and medicated with Amprolium and Bacitracin Methylene Disalicylate (BMD), to aid in the prevention of coccidiosis.

703995 30 lb. 1/case
1593236 5 lb. 6/case

Organic Layer Pellet Manna Pro

Manna Pro Organic Layer 16% Pellets are generally recommended for feeding to mature laying chickens beginning at about 16 weeks of age (prior to onset of laying), through the laying period. Give laying chickens free access to Organic Layer 16% Pellets, allowing them to consume all they want. Provide fresh, clean water at all times.

1592232 10 lb. 5/case
703997 30 lb. 1/case

Organic Scratch Manna Pro

Feed daily from a feeder or scatter on the ground. Organic Scratch is not fortified and generally should not comprise more than 10% of the diet. Provide your birds with a complete feed, like Manna Pro Organic Starter Crumbles for chicks or Manna Pro Organic Layer Pellets for laying hens. Because of the larger particle size, Organic Scratch is generally not recommended for birds less than 8 weeks of age.

703996 30 lb. 1/case

Triple Action Multi-Wormer is used to control round worms, cecal worms, and capillary worms in poultry. Contains Hygromycin B in a nutrition-rich base containing essential amino acids, vitamins, minerals, and direct-fed microbials. For broilers or laying hens, mix 1.25 lbs. Multi-Wormer crumbles with 50 lbs. feed. Provides 0.005 gs of Hygromycin B per pound of medicated feed. Multi-Wormer is recommended for continuous use until 3 days prior to slaughter. The eggs produced from hens fed Multi-Wormer are safe for human consumption.

6800800 1.25 lb. 12/case

Rooster Booster Pick No More Lotion TDL Industries Inc.

Pick-No-More Lotion for Poultry will help eliminate picking and cannibalism in your flock. Pick-No-More Lotion includes aloe vera gel, marigold, cresylic acid, coal tar distillate, and tea tree oil. Natural ingredients deter birds from the feather pecking, plucking, and excessive preening that can lead to unattractive feather patterns or injury. Shake well, remove cap, and invert squeeze bottle to apply lotion to wounded area.

6800806 4 oz. 12/case

Rooster Booster Poultry Booster TDL Industries Inc.

Sav-A-Chick Combo Pack Milk Products

The Sav-A-Chick® Combo Pack envelope contains one 3-strip each of the Sav-A-Chick® Electrolyte and Sav-A-Chick® Probiotic to help maintain hydration and support digestive health. Feed both products during times of stress or for three days each month to reduce pathogens in the birds' environment.

6800226 pack 28/Case

Sav-A-Chick Electrolyte & Vitamin Supplement Milk Products

Designed for small flocks. Poultry (chickens; ducks; turkeys, and other domestic fowl) electrolyte & vitamin supplement for use in drinking water during stress. Pre-measured to be mixed into 1 gallon of water. Can be mixed with Sav-A-Chick Probiotic Supplement in the same gallon of water. Great for adult birds, too.

703817 3 pk. 20/case

Sav-A-Chick Probiotic Supplement Milk Products

Poultry (chickens, ducks, turkeys and other domestic fowl) probiotic supplement for use in drinking water for newly arrived, moved, stress or after antibiotic treatment. Contains a source of live (viable) naturally occurring micro-organisms. Pre-measured to be mixed into 1 gallon of water. Can be mixed with Sav-A-Chick Electrolyte & Vitamin Supplement in the same gallon of water. Great for adult birds too.

703818 3 pk. 60/case

Scatter Snacks Manna Pro

Scatter Snacks are designed as a treat for adult poultry and fowl. Use the following amounts as a guideline, adjusting as necessary for the individual being fed. Scatter Snacks are not a complete feed and are intended for intermittent feeding only. Because of the larger particle size, Scatter Snacks are generally not recommended for birds less than 8 weeks of age. When feeding coarse grains, always provide a source of natural stones or free choice access to Manna Pro Poultry Grit.

704000 1.68 lb. 6/case

Scratch Grains Manna Pro

Great source of energy. Helps birds maintain body heat during the winter and adds diversity to the feeding regimen.

1500210 10 lb. bag 2/case

Havoc Twin Pack Neogen

Contains .005% Brodifacoum to kill warfarin-resistant Norway rats and mice. Single feeding lethal dose will kill rodents in 4-5 days. There is enough bait in 2 packets to kill 1-3 rats.

3516372 50 g/pk

Havoc XT Blok Neogen

Second generation anticoagulant contains 0.005% brodifacoum to kill warfarin-resistant Norway rats, roof rats and house mice. Kills in a single feeding; death occurs 4-5 days later, so rodents don't associate fatal symptoms with the bait. Contains bitrexM to help prevent accidental ingestion by humans and pets. For use in and around homes and buildings. Weather resistant blocks in easy to eat shape; Second generation - anticoagulant, single feed bait; 8 lbs. of bait sold in a re-sealable pouch designed to maintain freshness.

3516368 10 lb. /pail 1/case
5316362 8 lb. /pouch 1/case

Hawk Motomco

Hawk can kill rats and mice in a single feeding with its powerful anticoagulant Bromadiolone. Use Hawk with confidence for proven control, even against warfarin resistant "super rats." Rats and mice may die in 4 or 5 days after eating just a single feeding of Hawk. A unique formulation makes Hawk highly palatable to rats and mice. Comes in pelleted place packs or an all-weather bait chunx. Use indoors or outdoors.

SMALL RUMINANTS ////////////////

Achieve Pro W/ Cryptex Paste (kids and lambs) Agri-Labs

Achieve Pro with Cryptex provides a scientifically formulated blend of nutrients, beneficial microorganisms, and specific targeted proteins, along with a proprietary matrix of polysaccharides and yeast extract to help calves through periods of stress, particularly during the first 14 days of life when they are most vulnerable to disease.

Key Healthy Difference Benefits

1. High quality targeted proteins to maintain gut health.
2. Supplies glycine and beneficial bacteria that help promote optimal intestinal health.
3. Supplies pre-biotic inulin – a fructooligosaccharide that has been shown to promote growth of beneficial bacteria and decrease the amount of pathogens such as E. coli and Clostridium in the intestine.
4. Cryptex is a unique proprietary blend of yeast extract, and dextran to maintain gut health and integrity.
5. Mixes and cleans up easily
6. Flavored. Highly Palatable.

Positive Pellet Goat Wormer

The pelleted wormer contains Morantel Tartrate 880 g/ton. This pellet will kill and control mature gastrointestinal nematode infections of goats including Haemonchus contortus, Ostertagia (Teladorsagia) circumcincta and Trichostrongylus axei. Kills stomach worms as well as worms of the small and large intestine. Feed at the rate of 1 lb. per 100 lbs. of body weight. The feed should be consumed in 6 hours. May be fed as the sole ration or mixed with 1 or 2 parts of complete feed or as a top dress. Re-treatment may be needed in 2-4 weeks.

1500202 6 lb. box
1500200 25 lb. bag

Manna Pro

Hog Rings Hill's Hump Decker Mfg.

Rings - pig, shoat and hog sizes are made with a slight bend or hump in the center so they close easily. Close with product #R1 or R2 hog ringers. 100 per box, 10 per case.

2230110 **Hill's Hump #1 pig rings**
2230130 **Hill's Hump #2 shoat rings**
2230150 **Hill's Hump #3 Hog rings**

Iron Injectable Agri-Labs

Iron supplement for piglets that promotes better health and faster growth. With a full 200 mg of Iron In each 1 ml Injection, will help keep your piglets healthy, Reduce the risk of Iron deficiency anemia, and support a faster growth rate right up to slaughter - and it does this all with Just one dose.

703331 **100 mg 100 ml** **12/case**

LevaMed Soluble Pig Wormer Bimeda

LevaMed™ Soluble Pig Wormer, a broad spectrum anthelmintic for oral use in swine that is effective against a variety of nematodes.

6800328 **20.17g** **12/Case**

Litterguard, LTC Zoetis

E. coli [K99, K88, 987P, and F41] Clostridium Perfringens Type C Bacterin Toxoid. For the vaccination of healthy pregnant sows and gilts to protect their pigs against neonatal colibacillosis, E. coli, plus Litterguard LTC provides protection against scours caused by Clostridium. The genetically engineered toxoid stimulates antibodies against heat labile toxin (LT) thus preventing E. coli from attachment to the intestinal lining. Vaccinate pregnant sows and gilts 2 doses at least 3 weeks apart with the last dose given at least 2 weeks before farrowing. Revaccinate 2 weeks prior to each subsequent farrowing. Dose 2 ml IM or SQ. **WARNING: 21 day meat withdrawal.**

6000423 **50 dose**

Mo' Milk Feed Mix Tech Mix LLC

Provides essential nutrient fortification in combination with a gentle, natural laxative agent. Add to the sow's ration 14 days before farrowing to help with constipation in the gestating sow or gilt. 8 lb. per ton of feed.

8353184 8 lb. bag **6/case**

Small Hog Holder Agri-Pro

This is specially designed for handling small swine. Made of heavy cable with rubber grip handle. Overall length is 16 inches.

703188

Parvo Shield LSE Novartis Animal Health

For use in healthy swine as an aid in the prevention of disease caused by porcine parvovirus. Provides solid protection against parvovirus. 5 strains of leptospirosis and erysipelas. Gilts and sows should be vaccinated 4-6 weeks later. Revaccinate 4-6 weeks prior to breeding subsequent breeding. First dose should be given no earlier than 4-6 weeks prior to breeding. Boars should be vaccinated semi-annually. Safe for pregnant or nursing animals. Inject 5 ml IM.

703880 10 dose **12/case**
6800221 50 dose **12/case**

Sweet Iron Oral Iron-Prep International Nutrition

Sweet Iron is a moist oral iron supplement with trace minerals for nursing pigs. Highly palatable and helps control anemia. Sprinkle 1/2 to 1-1/2 oz. Sweet Iron on a clean place on the floor or over the starter feed. A small amount can be used to increase starter feed consumption immediately after weaning by mixing 12.5 lbs. of Sweet Iron per ton of complete starter feed. Acceptance will be improved if weaned pigs had access to sweet iron while nursing.

703489 12.5 lb.

White Hog Catcher Agri-Pro

This heavy duty hog catcher is self-locking and allows for quick, easy restraint of animal. Operates easily and holds securely. 24" rod length.

703187 Self-locking

Pig Swig Goodwinol

Pig Swig swine dewormer from Goodwinol Products provides a one-day liquid treatment for the removal of large roundworms and nodular worms. Fruit flavored. Each 3.33 oz dose contains 17 gm piperazine.

6800386 8 oz. **2/Case**

Pig Tooth Nipper with Spring Stone Mfg. Co.

Surgical quality nipper lets you clip needle teeth precisely and quickly. Precisely ground undercut leaves clean edges. Chrome-plated, high quality steel holds edge longer than stainless steel. Features spring-operated action.

7827435

Prefarrow Strepshield Novartis Animal Health

The only strep Suis bacterin to claim passive immunity to newborn piglets. Give a 2 ml IM dose to sows and gilts 5 and 2 weeks prior to each farrowing. Give 2 ml IM to piglets at 3 and 5 weeks of age for active immunization.

703881 50 dose **12/case**

Respiure Zoetis

Respiure is for vaccination of healthy swine as an aid in the prevention of chronic pneumonia caused by Mycoplasma hyopneumoniae.

Time in Transit Map

This map is used to estimate delivery time from the Alliance warehouse in Bowling Green, KY. These transit times are estimated on UPS Ground delivery. Orders that are large enough to ship LTL may have different transit times than the ones estimated on this map. If you have any questions about when your order will arrive, please feel free to contact our customer service at 615-793-1619.

DO MORE WITH LESS

You Only Have One Shot at Stopping BRD, Pinkeye & Footrot

Hit them hard with **Noromycin[®] 300 LA** - the industry's most economical, broad-spectrum 300 mg oxtet available without a prescription.

Delivers the same dose of oxytetracycline as Liquamycin[®] LA 200 and Bio-Mycin[®] 200 in a lower dose volume.

Observe label directions and withdrawal times. Not for use in lactating dairy animals. Adverse reactions, including injection site swelling, restlessness, ataxia, trembling, respiratory abnormalities (labored breathing), collapse and possibly death have been reported. See product labeling for full product information.

HAPPY JACK® TONEKOTE®

ToneKote® is a liquid food supplement for dogs & puppies to improve dry skin, dull coat & excessive shedding. For Dogs & Puppies.

HAPPY JACK® ITCHNOMORE®

Itch No More® Shampoo is formulated to promote healing and hair growth to areas denuded by scratching & gnawing due to grass or flea allergies, eczemas, or just plain old "Itchamacallits".

HAPPY JACK® SKIN BALM®

Skin Balm® affords relief to certain common skin problems sometimes referred to as summer eczema, kennel itch or hot spots. For Dogs, Cats & Horses.

Dear **Happy Jack®**

After two months and considerable expense, we had tried everything known to help our new pup. We came across your products and in two years have never had to turn to anything else.

We use your many products, primarily the **Happy Jack® Skin Balm®**. Within a week it changes rash covered, rough skin into smooth, clear, supple skin with new hair growth. I will recommend your products to all my pet owning friends and family.

Thank you! - D.T.

Dear **Happy Jack®**

I spent hundreds of dollars to clear my dog's rash but nothing seemed to work. **Happy Jack® ToneKote®** seemed to be the right fit for our needs. Within 2 weeks her rash was gone and her coat was soft and silky - I was Amazed!

Thank you for helping take care of my girl - A.J.
