Ash not more than .....	9.0%

## Ingredients

Gray stripe sunflower, safflower, corn, peanuts in shell, oats, oat groats, dundy peppers, kibble corn, wheat, grain products, plant protein products, processed grain by-products, monocalcium phosphate, dicalcium phosphate, calcium carbonate, soybean oil, salt, magnesium sulfate, potassium sulfate, dl-methionine, choline chloride, marigold extract, l-lysine, thiamin, riboflavin, vitamin E supplement, calcium pantothenate, vitamin B<sub>12</sub> supplement, niacin, biotin, vitamin A supplement, folic acid, pyridoxine hydrochloride, vitamin D<sub>3</sub> supplement, manganous oxide, zinc oxide, copper sulfate, calcium iodate, sodium selenite, ground corn, ground whole wheat, ground oat groats, dehulled soybean meal, dried molasses, dried whole egg, dried brewers yeast, wheat bran, menadione sodium bisulfite complex (source of vitamin K), ascorbic acid (vitamin C), ethoxyquin (a preservative), natural flavors, ferrous carbonate, copper oxide, magnesium chloride, cobalt carbonate, wheat middlings, corn gluten meal, animal fat (stabilized with BHT), ferrous sulfate, mineral oil, ethylenediamine dihydroiodide, red #3, red #40, blue #1, purple, blue, yellow #5, yellow #6, green and anise oil.

## Feeding Directions

- This blend is designed to be fed in combination with a nutritionally complete pellet, such as Mazuri® Parrot Maintenance (56A8) or Parrot Breeder (56A9), or as the primary diet item when all components are consumed.
- To successfully transition birds from their currently diet to COLORFUL COMPANIONS® Parrot Blend, do a gradual changeover. Start with 90% current diet and 10% Parrot. On each succeeding day, reduce the amount of seeds by 10% while increasing the amount of Parrot by 10%. On the 10th day, the diet should consist only of COLORFUL COMPANIONS® Parrot Blend.
  - Monitor the bird's weight and behavior carefully during the conversion period. Be especially attentive during the 10th to 12th day. If the bird is losing weight, or if the bird is not consuming the product, offer the bird a mix of 50% original diet and 50% Parrot and restart the conversion process from this point. If the bird is not eating, the excreta color will become dark green and the volume will decrease.
- Supplemental calcium should also be provided in the form of cuttlebone to ensure birds can meet their needs for the mineral at all times.
- Always provide animal with plenty of fresh, clean water.

## Storage Conditions

COLORFUL COMPANIONS® Parrot Blend has a 1 year shelf life when stored in a dry environment. For best results, ensure container is fully closed during storage, or store contents of open bag in container with sealing lid. Store in a cool (75°F or colder), dry (approximately 50% RH) location.
