

NUVO IRON

RECOMMENDED MAINTENANCE Railings & Handrails

KEEPING YOUR RAILING IN GREAT SHAPE IS SIMPLE WITH JUST A FEW REGULAR CHECKS AND TOUCH-UPS:

VISUAL CHECK

Inspect your railing for any signs of rust, chipped paint, or physical damage.

CLEANING

Wash the railing using mild soap, water, and a soft brush to remove dirt, dust, and organic buildup. Avoid harsh chemical cleaners or abrasive materials, as they can damage the protective coating.

RUST SPOT TOUCH-UP

If you find any rust spots, lightly sand the affected area, apply a rust-inhibiting primer, and follow up with matching exterior paint to help prevent corrosion.

TIGHTEN COMPONENTS

Check all screws, bolts, and fasteners. Tighten anything that may have come loose over time.

DRAINAGE AWARENESS

Examine the posts, pickets, and rails to confirm everything is solid and secure.

Repair or replace any damaged components as needed.

Ensure there is proper drainage around posts to avoid standing water, which can contribute to rust or decay.

PREVENTATIVE CLEANUP AFTER METALWORK

After cutting, drilling, or screwing metal, thoroughly remove all metal shavings and debris to prevent premature rusting and protect both the product and surrounding surfaces such as decks, railings, and concrete.
