Reality™

The Reality pattern is the perfect blend of fashion, sophistication, elegance and durability. The nicely proportioned stylish design brings an upscale look to the handsome piece, and helps eliminate the rim-to-rim contact. The substantial base delivers a cut crystal look typical of high-end glassware and adds stability to the table. Rim-tempered for added durability, the controlled bead gives an elegant upscale look to the finely crafted piece. The Reality tumbler makes a great addition to any table setting.

Table Service

Medium-sized capacity glasses allows for an establishment to provide an upscale service presentation when serving increasingly popular craft beers that are often served in bottles.

Draft Service

Larger capacity glasses are essential for today's beer service, especially for establishments offering a large assortment of draft beers.

Metal Drinkware

The traditional copper mug is said to enhance the temperature, the aroma, and the overall experience of the Moscow mule. But in modern bars and restaurants, you will find gold, stainless steel, and a variety of colors to not only serve the mixologists' latest crafted cocktails, but appetizers, side dishes, and desserts as well.

Care & Handling

Mechanical Shock: When glassware comes in sudden contact with any hard surface or object, whether it's another glass, the countertop, or a beer tap, small abrasions are created which weaken the surface and increase the chance of breakage and chipping.

Never stack glasses. Avoid glass to glass contact in all instances

Do not use glassware for storage of flatware.

Separate glassware, flatware and china in bus trays.

Never pick up glasses in bouquets.

Never pour cold liquid into a hot glass, such as one just out of the dishwasher, or hot liquid into a cold glass.

Never scoop ice with a glass. Use a plastic scoop.

Empty ice from glass before sorting bus tray, this allows more time for the glass to reach room temperature before washing.

Keep an adequate backup supply of glasses. A recently washed glass should be allowed to reach room temperature before being placed back in service.

Utilize the correct rack system for tumblers and stems. A divided rack is always recommended.

Thermal Shock: The result of a rapid temperature change in the glassware which can create stress and/or cracking.

Tools of the Trade

Service Setting

An adequate inventory of glassware in a foodservice operation or bar will help decrease breakage, because if supplies are short, workers must handle glasses faster and less carefully. These charts offer not hard-and-fast rules, but only suggested requirements.

Custom Capabilities

In addition to our expansive foodservice product line, Anchor Hocking offers a full range of value-added solutions to meet your individual needs. Choose from customized products that are unique to your company or special packaging that can help build your brand name. Our goal is to provide not only quality glassware to our customers, but quality solutions.

Silk Screen Decorating Product Modifications

Promote your company logo through a durable lead-free silk-screen decoration. Available in one to five colors.

Create new, unique items built around your company name or logo.

Unique Decorating

Add color to any existing glassware item to create a bold impression.

Custom Packaging

Develop unique cartons to fit your specific pack, material, and label requirements.

Our Promise to You

Longer Life, Lower Replacement Costs

Anchor Hocking foodservice products are made stronger, more durable by special manufacturing processes:

RIM-TEMPERED products (sometimes referred to as heat treated) are similar to fully-tempered, except that the heat is concentrated on the rim area, followed by the cooling process, allowing for a stronger more durable product.

SureGuard™ Guarantee

Most Extensive Guarantee in the Industry

Anchor Hocking guarantees its entire foodservice line against chipping. If the rim of a tumbler or the foot or rim of a piece of stemware chips in normal use, Anchor Hocking will replace the item or refund the purchase price when returned to the dealer or distributor from whom it was purchased. Products in the foodservice line are defined as all active products in the foodservice price list. Naturally, this guarantee does not cover breakage.
