

cellhelmet® LIQUID GLASS SCREEN PROTECTOR

HOW IT WORKS

Put glass under a microscope and you'll see that it has a rocky, inconsistent surface. The main ingredient of Liquid Glass, silicon dioxide, fills in these inconsistencies, curing and forming a stronger surface. Liquid Glass offers scratch and break prevention for your mobile device, making it harder and stronger on a molecular level. It's also completely invisible to the naked eye.

cellhelmet® Liquid Glass Screen Protection is specifically formulated for mobile glass

cellhelmet® Liquid Glass Screen Protection may be applied in store. Registration of the Product Performance Guarantee **must NOT** be registered in store, registration is the responsibility of the customer. If applying in store, remember to give retail pack and content to the customer after application.

KEY FEATURES & BENEFITS

Financial Product Guarantee

cellhelmet® Liquid Glass comes with a **Product Performance Guarantee -reimbursing up to \$300**. If a customer's properly coated, eligible and registered device experiences screen breakage, they will receive a monetary contribution towards the replacement of their device screen, up to \$300.

Quick Drying Time

Liquid Glass will dry quickly so that the device can be used immediately after application. Liquid Glass will cure completely after 24 hours.

Hydrophobic / Oleophobic

Increased water/oil resistance means that once cellhelmet® is applied, the screen is **much more resistant to dirt, smearing and fingerprints**.

Scratch Resistant

Often the single biggest complaint from consumers – scratching due to general wear and tear is dramatically reduced with **up to 95% increase in scratch resistance**.

Invisible

Once applied, cellhelmet® is invisible and completely undetectable adding no additional bulk to the device.

Environmentally Friendly

cellhelmet® is environmentally friendly and completely non-toxic.

Easy to Apply & 100% bubble free

cellhelmet® as a DIY application is easily applied by emptying the vial of liquid glass onto the screen, wiping it on, and buffing it off.

Increased Hardness

Creates a 9H protective layer on the screen, an increase of **up to 30% in screen hardness**.

Impact Resistant

cellhelmet® greatly enhances **the impact resistance of the screen by up to 33%** thereby helping to avoid cracked / damaged screens.

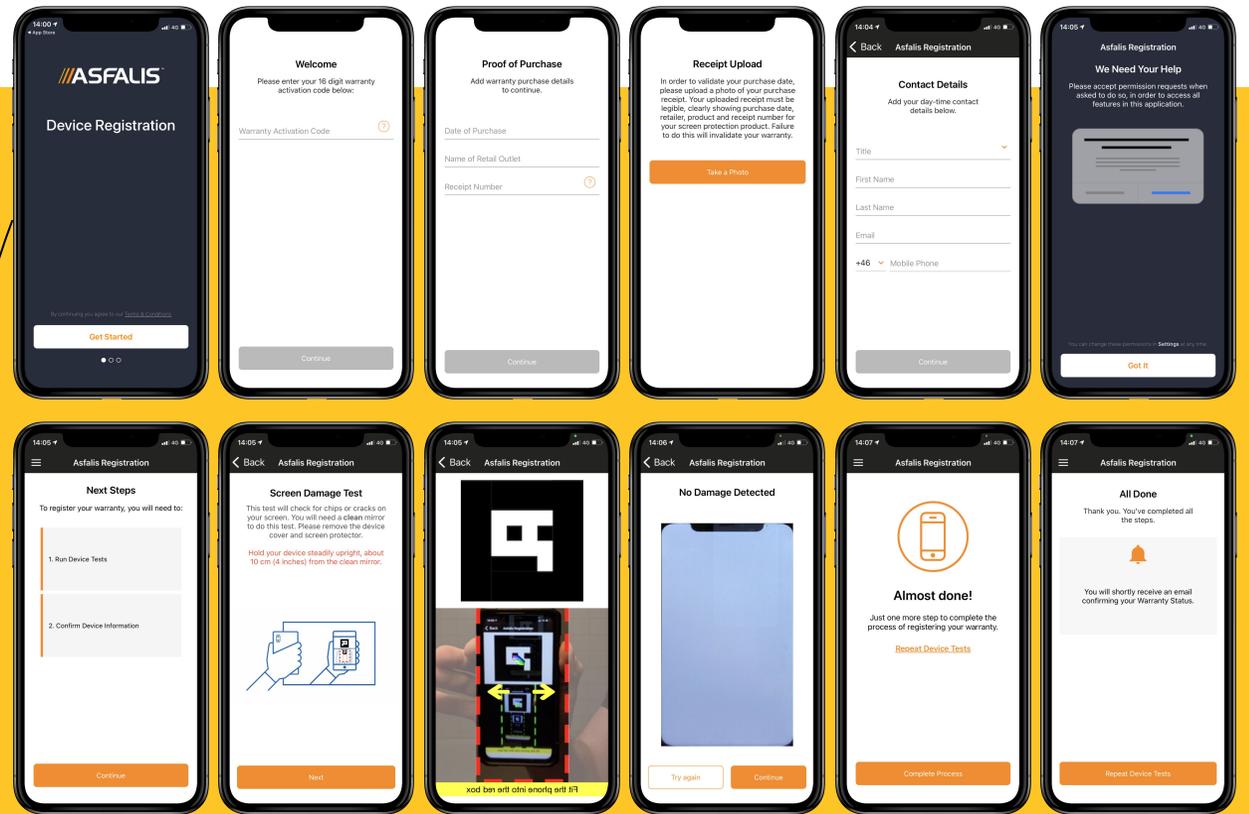

Universal Application

cellhelmet® can be applied to any eligible mobile device with a glass screen, **Phone/Tablet; Flat or Curved**.
