

Picquic =

Since 1988, we've been attempting to improve upon the Picquic bit storage system. Despite these efforts and our consultations with the world's preeminent authorities on astro-physics, we've concluded that improvement is simply not possible.

You see, because the process of storing a bit & ejecting the newly selected bit occur simultaneously and with the same motion, there is just no way to make bit changes faster or more convenient.

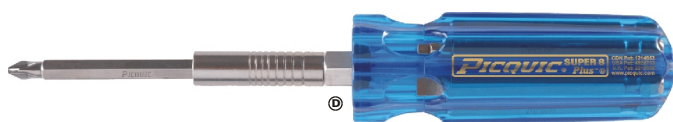

In view of this "setback", we decided our best approach would be to improve the Picquic line by adding more useful products.

POWERBITS

The "Teeny" is perfect for servicing eyeglasses & today's electronic devices. Bright, fun colours are especially appealing to the younger generation. Fast becoming the most sought - after Picquic. Cookie jar & price make it a great impulse item.

With 7 (3/16" Hex):

Item #	Colours	Packaging	Ctn/MC
06002	Assorted	Blister pack	12/120
06001B	Assorted	Cookie jar	36/360

3/16" short bits are ideal for tight spots

MICRO BITS

Picquic combination packs are a great choice for promotions. All are priced below the aggregate cost of individual products they are comprised of. The combinations also make excellent gifts and all offer extra value and higher dollars per sale.

Item #	Ref	Ctn/MC	Description
05060	1	12/120	Multique and Teeny Turner
05880	2	12/72	SIXPAC Plus and Multique
88561	3	12/72	SIXPAC Plus, Multique, Teeny Turner
88080	4	6/36	SIXPAC Plus and Dash 7

All combination packs come in assorted colours. Note: each unit includes "matched" colour handles.

In addition to our bulk counter displays, available for most products, our freestanding floor displays are a great choice for promotion. We have two standardized formats that are designed to house several different carded versions of individual Picquic drivers and many of the combination packs.

All displays are provided free of charge when ordered with the appropriate quantity of product. (Unit quantity varies by product - please inquire).

Genuine Picquic Accessory products:

BITPAC™

Picquic "Bitpacs" are colour coded Bit storage units. They link together with dovetails, enabling users to keep bits organized and reduce loss of bits.

Bitpacs come in sets of varying sizes and bit styles - Torx for automotive, Allen keys for machinists and bikers, Robertson and Phillips for contractors and special bits like tamper proof, pozi, and clutch for specialized user groups.
