

A HISTORY OF EXCELLENCE.

IMPROVING THE ART OF FLUID MOTION™ FOR OVER 80 YEARS.

Ever since our modest beginnings, Danner Manufacturing, a family owned and operated business, has developed and produced innovative products for hobbyists and professionals alike.

Eugene Danner Sr. started planting the seeds for Danner Manufacturing in 1934 while working in the cellar of his home on Seneca Avenue in the Ridgewood district of Brooklyn, New York. While holding a full-time job as a factory manager, Eugene found great pride creating the Danner business on his time off from his regular full-time job duties. Eugene's first product was a small waterfall toy, which was used as a component in a toy sold by the world famous F•A•O Schwarz® toy store in New York City. Eugene Danner Sr. along with his children, Eugene and Renate, would travel from Brooklyn to Canal Street in Manhattan where they would purchase scrap metal for these waterfall toys.

Eugene Danner Sr. Summerfield St. Brooklyn, NY Factory. Circa 1968

Around that time, the aquatics hobby began to grow and people who kept fish as pets were known as "Fish Fanciers." Eugene was often asked if he could make water and air pumps for this new-found hobby. From there, the "Supreme Aquarium" brand was born and the original Supreme Dynamaster® Air Pumps were introduced, which quickly became the standard to which others aspired.

At the end of World War II, Eugene's son came home from active duty and opened the first official Danner Manufacturing factory on Woodbine Street in Brooklyn. He took on his father's growing hobby as a full time business. At this time, Eugene Danner Sr. quit his job as a factory manager and started working full-time with his son to formulate what is now known as Danner Manufacturing. As the years progressed, Eugene and his son upgraded and opened up a new state-of-the-art factory in 1960 on Summerfield Street in Brooklyn.

In the 1960's, all three of Eugene Danner Sr's grandchildren started helping in the factory and in 1974 the Danner family moved its operations to a new facility in Islandia, NY. In 1987, Eugene passed the torch onto his son, Michael who ran the business until 2005. During this time, Michael's sister, Catherine Danner designed and developed many award-winning package designs throughout the 1980's. Their sister, Rosemarie is the current CEO of Danner Manufacturing and continues to carry on the great Danner legacy and tradition.

Over 80 years later, continuing with Eugene Danner Sr's vision, Danner Manufacturing still employs and manufactures within the United States. Our sophisticated and energy-efficient magnetically driven and hybrid pumps continue to be popular products with thousands of satisfied and loyal customers all over North America.

The brands which we manufacture and market are: Supreme Aquarium, Pondmaster, ProLine, Supreme Hydro, Pool-Care and Pondmaster ECO. These brands can be found in the Aquarium, Water Gardening, Pond, Pool & Spa, Hydroponic and OEM industries throughout North America and the offshore markets. We are committed to providing our customers with high quality and reasonably priced products, creating the best value.

PONDMASTER FILTRATION SYSTEMS

PONDMASTER

THESE INNOVATIVE LOW PROFILE FILTERS are designed to be unobtrusive in the bottom of the pond and its large surface area means less frequent cleaning. More than one filter can be connected to a pump using a tee fitting and offer mechanical, chemical and biological filtration. Dual filter elements offer particle filtering and chemical filtration of certain harmful compounds. The filter media is easily rinsed or changed and less time consuming than many similar filters of its kind.

Supreme AQUARIUM

SUPREME® AQUA-MAG® MAGNETIC DRIVE WATER PUMPS

SUPREME® AQUA-MAG 2 TO 36 SERIES PUMPS have been designed to handle virtually any application where water has to be moved. They have been fulfilling the needs of professionals and hobbyists for over 20 years with efficient, quiet and reliable 24/7 performance. Aqua-Mags are ideal in either saltwater or freshwater environments and operate equally well in-line or submerged. With only one moving part, a magnetically driven impeller and an epoxy-encased power unit, there's never a fear that they will contaminate the water with harmful oils or chemicals.

SUPREME® AQUA-MAG® AIR FRACTIONATING WATER PUMPS

Supreme **AQUARIUM**

SUPREME® AQUA-MAG AIR FRACTIONATING WATER PUMPS are the ideal pump choice for the aquarium hobbyist looking to maximize dissolved oxygen levels in their freshwater or saltwater aquarium. The pumps' uniquely designed shaft and impeller design breaks up the in-flowing water and creates tiny bubbles that add vital oxygen to the aquarium water. The pump is equipped with a reusable debris pre-filter and a 18" vinyl aerating tube with Noise-Suppressing muffler that allows for reliable and quiet use in aquariums of all sizes. The Aqua-Mag Air-Fractionating Water pumps will operate efficiently submerged or in-line and are particularly ideal for saltwater / reef aquariums with their ceramic shaft design and adjustable, front-mounted venturi.

FEATURES

- Front-Mount Adjustable Venturi
- Unique Ceramic Shaft Fractionating Impeller Design
- 18" Vinyl Aerating Tube with Noise-Suppressing Muffler

SUPREME® SKILTER™ PROTEIN SKIMMERS

FOR SALTWATER AQUARIUMS

THE PATENTED SUPREME SKILTER™ IS A UNIQUE COMBINATION of a protein skimmer and an aerating power filter for use in saltwater aquariums. It's an effective primary or supplemental filter along with its operation as a skimmer.

The advanced venturi-type protein skimmer reflects the latest technology. Air is injected into the water creating millions of very fine bubbles. Potentially dangerous protein compounds and toxins adhere to the bubbles creating a froth. This frothy waste pushes its way up into the collection tray where it can be harmlessly disposed of.

The Skilter is built on a basic power filter platform. It features a large filter box, which can accommodate supplemental filter media in conjunction with the unique Bio-Matrix filter cartridge. It is powered by a powerful state-of-the-art motor using a single moving part. It is energy-efficient and economical to operate. Manufactured from high impact plastic, the Skilter will give years of trouble-free operation, even in the adverse conditions which are common to saltwater aquariums.

SKILTER 250

ITEM# 01031

This unit is ideal as a primary filter for aquariums from 10-55 gallons and can be used as a supplemental filter on larger aquariums. The protein skimmer will operate effectively on aquariums up to 125 gallons. The Skilter 250 has an effective flow rate of up to 250 gallons per hour. It is packaged complete and ready-to-go including a Bio-Matrix dual-media filter cartridge. Made in the USA. Packed 6 Per Master Carton.

SKILTER 400

ITEM# 01033

The Skilter 400 is the largest Skilter offered. It is ideal as a primary filter for aquariums up to 30 to 100 gallons and can be used as a supplemental filter on larger aquariums. The protein skimmer is effective for aquariums up to 125 gallons. The larger, powerful motor is rated for a flow of up to 400 gallons per hour. The Skilter 400 is packed with two dual-media Bio-Matrix cartridges. Made in the USA. Packed 6 Per Master Carton.

SUPREME® OVATION

SUBMERSIBLE POWER JET FILTERS

FOR AQUARIUMS AND TERRARIUMS

Supreme AQUARIUM

THE OVATION FILTRATION PUMPS have been designed for hobbyists looking for powerful, quiet and effective filtration for their home aquariums and terrariums. They can be used for installations from 10 to 80 gallons if used singly, or larger installations if more than one pump is employed. They offer the right combination of mechanical, biological and chemical filtration to assure a clean habitat for aquatic pets.

Each Ovation Series pump includes an adjustable spray bar, an airflow regulator and two filtration elements (a sponge and a carbon filter). Units can be mounted vertically or, for terrariums, in a low-profile horizontal position using the included suction cups.

FEATURES

- Innovative Design Filters up to 265 GPH
- Dual Filter Elements Provide Excellent Filtration
- Adjustable Air Regulator Allows Aeration Flow Control
- Includes Spray Bar for Enhanced Aeration
- Mounts Easily for Submersed use in any Terrarium or Aquarium
- Can be Operated in any Position, Horizontal or Vertical

In determining the correct size of Air Pump for your Aquarium, the simple rule of thumb would be 0.03 L/min (Liters Per Minute) of air flow for each gallon of water in your Aquarium. This is only an estimate. Your actual volume may need to be higher based on your fish & plant load.

HYDRO-AIR® SUBMERSIBLE WATER & AIR PUMP

THE HYDRO-AIR SUBMERSIBLE WATER & AIR PUMP is a unique patented design that allows water flow and aeration to be produced by one pump. With a dual-ended impeller design, this energy efficient design fulfills two functions with one product. The pump is completely epoxy-encased so there's never a fear that it will contaminate the water with harmful oils or chemicals.
