WE KNOW WHAT **PERMANENT** MEANS!®

POR
PRODUCTS

Use the **POR-15® 3-Step System to Stop Rust Permanently!**

POR-15® products are designed to work as a complete system. When used together, they provide a coating that not only stops rust, but prevents it from returning. POR-15® products are available individually, and many are available in money saving kits geared to your specific restoration need. Here is how the POR-15® 3-Step system works:

CLEAN IT!

STEP 1 - Clean & Degrease Surface

Clean metal surfaces with water-based **POR-15® Cleaner Degreaser**. It removes dirt, grease, wax and other contaminants that interfere with restoration.

See **page 4** for more information.

PREP IT!

STEP 2 - Neutralize Rust; Etch Metal

Use **POR-15® Metal Prep** on the surface to remove rust or prepare it for **POR-15® Rust Preventive Coating**. Metal Prep neutralizes rust, etches metal, and coats it with zinc phosphate for better adhesion. See **page 5** for more information.

COAT IT!

STEP 3 - Apply Rust Preventive Coating to Surface

Apply 2 thin coats of **POR-15® Rust Preventive Coating**. You'll get an unbelievably tough, hard finish that won't crack, chip, or peel. It's so tough you can pound it with a hammer and not damage it! That's **REAL** protection! See **page 6-7** for more information.

Then Topcoat the Surface

Finish your job with a **POR-15® Top Coat** or any other **POR-15®** coating that suits your needs.

ORDER PRODUCTS ONLINE OR BY PHONE
WWW.POR15.COM (800) 457-6715

POR-15® high performance coatings revolutionized rust protection. These state of the art products form an impenetrable barrier that protects a variety of surfaces from water, chemicals, salt, UV rays, corrosive contaminants, and every day wear and tear. POR-15® products have been applied to thousands of vehicles around the world from celebrated restoration shops to antique car museums and classic car shows.

P.O.R. Products, the makers of POR-15®, is a ninety-nine-year-old company headquartered in New Rochelle, New York complete with our own team of chemists and a state-of-the-art manufacturing facility on-site. For nearly a century, we have been committed to innovation and quality control with an emphasis on personal and professional customer service. P.O.R. Products continues to evolve through research and development to grow our achievements in the industry.

Clean It!

Cleaner Degreaser

Cleans and Degreases in One Application

POR-15® Cleaner Degreaser cleans and degreases in one application without leaving residues, noxious fumes or flammable solvents. No other cleaner works as fast or as well. It makes petroleum-based cleaners almost obsolete because it can be diluted with water to 4, 5, and even 10 times its volume while remaining even more potent than other cleaners. POR-15® Cleaner Degreaser removes grease, oil, mildew, algae, musty odors, soap films and wax. Use it to clean canvas, vinyl, nylon, holding tanks, grease traps, auto parts and more. Before applying ANY rust preventive coating or paint, you MUST remove all oily film or residue to be absolutely certain of good adhesion.

APPLICATIONS:

- Engines
- Suspension Components
- Transmissions
- Grease Traps
- Floor Pans
- Fuel Tanks
- Frames
- Rubber, Nylon, Vinyl
- Water Line Scum

PRODUCT	SIZE	CODE
Cleaner Degreaser	Gal.	40101

Metal Prep

Etches Metal and Leaves a Zinc Phosphate Coating

Now that you've degreased and cleaned your metal, use POR-15® Metal Prep to guarantee the best paint adhesion on ANY metal surface, including aluminum and shiny polished metal surfaces. POR-15® Metal Prep etches metal, leaves a zinc phosphate coating, and creates the perfect anchor pattern for any topcoat, especially our incredible POR-15® Rust Preventive Coating.

PRODUCT	SIZE	CODE
Metal Prep	Gal.	40201
Metal Prep	Qt.	40204

FEATURES:

- Easy-to-Use, One-Step Process Coats Metal with Zinc Phosphate
- No Harmful Residues
- Insures Perfect Paint Adhesion
- Reusable
- Provides Perfect Base for All Paints
- Removes Surface Rust in Minutes!
- Gives Better Welding Conductivity

“...we located the rustiest car we could find and performed a complete floor pan replacement. The key to the repairs is etching the new metal with Metal Prep and sealing it with POR-15® and paint... This ensures rust will not be a problem in the future.”

– Muscle Car Review Magazine.

Coat It!

POR-15® Rust Preventive Coating

No Need to Remove Rust First!

The secret lies in POR-15® Rust Preventive Coating's curing process. Most paints dry through evaporation, but POR-15® Rust Preventive Coating dries faster when moisture is present. It has the opposite chemistry of ordinary paints. Now add to that POR-15® Rust Preventive Coating's incredible hardness, toughness, and flexibility, and you have a coating that is practically indestructible. POR-15® is great for auto restoration and this incredible product is now sold in 52 countries around the world.

Use POR-15® to protect expensive and valuable equipment against rust and abrasion. POR-15® also has excellent "surface tolerance," which means it works very well on porous surfaces.

FEATURES:

- 1 Qt. covers 96 sq. ft. / 1 liter covers 9.2 m²
- Double the solid content of most paints
- Compatible with all paint systems
- Tested to over 450°F / 232°C
- Exceeds 2000 hours salt spray test
- Dries faster in humid conditions
- Self-leveling
- Hammer tough
- Single Component
- Repels all fuels and oils
- Resistant to most acids and alkalis

Follow on Instagram @ktlrestorations

APPLICATIONS:

- Automotive – chassis, doors, floors, trunk areas, suspension, engines & fuel tank exteriors
- Industrial – heavy equipment, truck components, trailers, fuel storage, rebar, steel forms, concrete, storm grates, transformers
- Marine – decks, bilges, hulls, pipes, chain lockers, masts
- Also excellent for sealing and repairing fiberglass

POR-15® Dry Time Accelerator

Additive for POR-15® Rust Preventive Coating

POR-15® Dry Time Accelerator is an additive specially formulated to accelerate the cure time of POR-15® Rust Preventive Coating by 30-50% without affecting the ultimate physical properties. Developed to allow for a more efficient production environment, Dry Time Accelerator reduces recoat and dry time and enables you to move on to the next phase faster, without compromising product performance.

The accelerator is added to POR-15® Rust Preventive Coating by volume and should be thoroughly mixed. Once mixed, the cure time is reduced by 30-50%. One 8 oz. bottle is enough for 32 quarts or 8 gallons of POR-15® Rust Preventive Coating.

PRODUCT	SIZE	CODE
Dry Time Accelerator	8 oz.	40616

Prime It!

Weld-Thru Primer

Weldable Zinc Enriched Primer

POR-15® Weld-Thru Primer can be applied over cured POR-15® Rust Preventive Coating and all POR-15® topcoats to enable quick refinishing and recoating of these products. POR-15® Weld-Thru Primer also adheres well to steel, aluminum, stainless steel, brass, and other primed and painted surfaces.

PRODUCT	SIZE	CODE

POR-15® Rust
Preventive Coating

High Build Primer

Buildable & Sandable

For years we've worked on a primer to paint over well-cured POR-15® Rust Preventive Coating. We wanted one that was buildable, sandable, and easy to apply. POR-15® High Build Primer is the answer. It has great interlocking adhesion qualities and very little preparation is necessary to get a top-notch bond. With a solids content of 60%, High Build Primer has all the body it needs to do the job right with great leveling as well as to overcome surface irregularities.

Prime It!

Self Etch Primer

POR-15® Self Etch Primer is the perfect solution for painting over top of cured POR-15® Rust Preventive Coating. This terrific, high-tech coating will gently etch cured POR-15® Rust Preventive Coating, making the perfect surface for bonding with the paint of your choice. Now you can use POR-15® Rust Preventive Coating for the ultimate protective coating, while also finishing with any of our single or two part topcoating paint!

You'll love the way it bonds to cured POR-15® Rust Preventive Coating, and the way other paints bond to it.

Note that very old, cured POR-15® Rust Preventive Coating finishes may still require light attention with some coarse sandpaper.

Detail Paint

Replicate the look of metals on original cast parts.

POR-15® Detail Paint provides professional grade finishes that reproduce the original look of cast parts. POR-15® Detail Paint is perfect for water pumps, intake manifolds, and master cylinders. Designed to protect against rust, all the colors are developed to have a low sheen, and will not yellow to keep your restored component looking factory new.

POR-15® Detail Paint is formulated to provide maximum corrosion resistance and protect metal substrates against weather, sunlight, oil, and water.

Try Stop Rust Kit (40909)

Use the Stop Rust Kit before Painting with Engine Enamel for permanent protection!

Restore, brighten or customize your engine with **POR-15® Engine Enamel**. This durable direct to metal coating creates a smooth, high-gloss finish that withstands the rigors of the engine compartment while improving the look and preventing corrosion of the metal components. **POR-15® Engine Enamel** withstands temperatures up to 300°F (148.8°C). In addition to its exceptional long-term gloss and color retention it resists damage from oil, gas, grease, salt, humidity, solvents and of course rust.

POR-15® Engine Enamel is formulated to match O.E.M. standards and to keep engine surfaces from pitting and rusting and deliver the look and performance expected from **POR-15®**.

- Trailers
- Tractor beds
- Running boards
- Work van floors

Rubberized Under Coating

POR-15® Rubberized Under Coating is a flexible, paintable, black coating. It will protect against moisture, dust, heat and cold. It is an excellent moisture barrier and creates an effective sound barrier that reduces vibration and deadens sound in wheel wells, quarter panels, fenders, frames and under carriages. Provides superior adhesion to both painted and unpainted surfaces. **POR-15® Rubberized Under Coating** has superior resistance to road salt and will resist chipping and abrasions.

PRODUCT	SIZE	CODE
Rubberized Under Coating	Spray 22 oz.	49308

Apply directly over **POR-15® Rust Preventive Coating** for the toughest rust, corrosion, and moisture barrier possible along with excellent sound and vibration deadening.

Topcoat It!

**Fill It!**

Patch

Filler and Seam Sealer

For years our customers have asked us for a thicker version of our world-famous **POR-15® Rust Preventive Coating**, to use for filling seams or holes. Here it is! **POR-15® Patch** is, quite literally, **POR-15® Rust Preventive Coating**, in a tube, and like **POR-15® Rust Preventive Coating**, it dries as hard as a rock, remains flexible, and once dry is totally impervious to fuels and solvents. It's so tough it may actually add strength to weakened metal. And it won't absorb moisture and swell like conventional body fillers.

PRODUCT	SIZE	CODE
Black	4 oz.	49013
White	4 oz.	49023

USE IT TO:

- Permanently seal seams
- Patch holes in steel, wood, or plastic
- Fix holes in fuel tanks
- Bond steel to plastic, wood, or concrete
- Repair concrete and cinder blocks

Epoxy Putty

Industrial Pliable Filler

This incredible epoxy putty product is so strong you can drill and tap it, yet malleable enough that you can apply it with your fingers. Since it is water-based, you can simply wet your fingers, and work it until it is almost perfectly smooth before it dries – eliminating most sanding! But when it cures, it's rock hard, making it perfect for repairing steel, plastics, concrete, etc. Amazingly, it even sticks to damp surfaces, and will cure under water.

Gloves are recommended for mixing and molding POR-15 products.

PRODUCT	SIZE	CODE
Epoxy Putty	1 lb.	49033

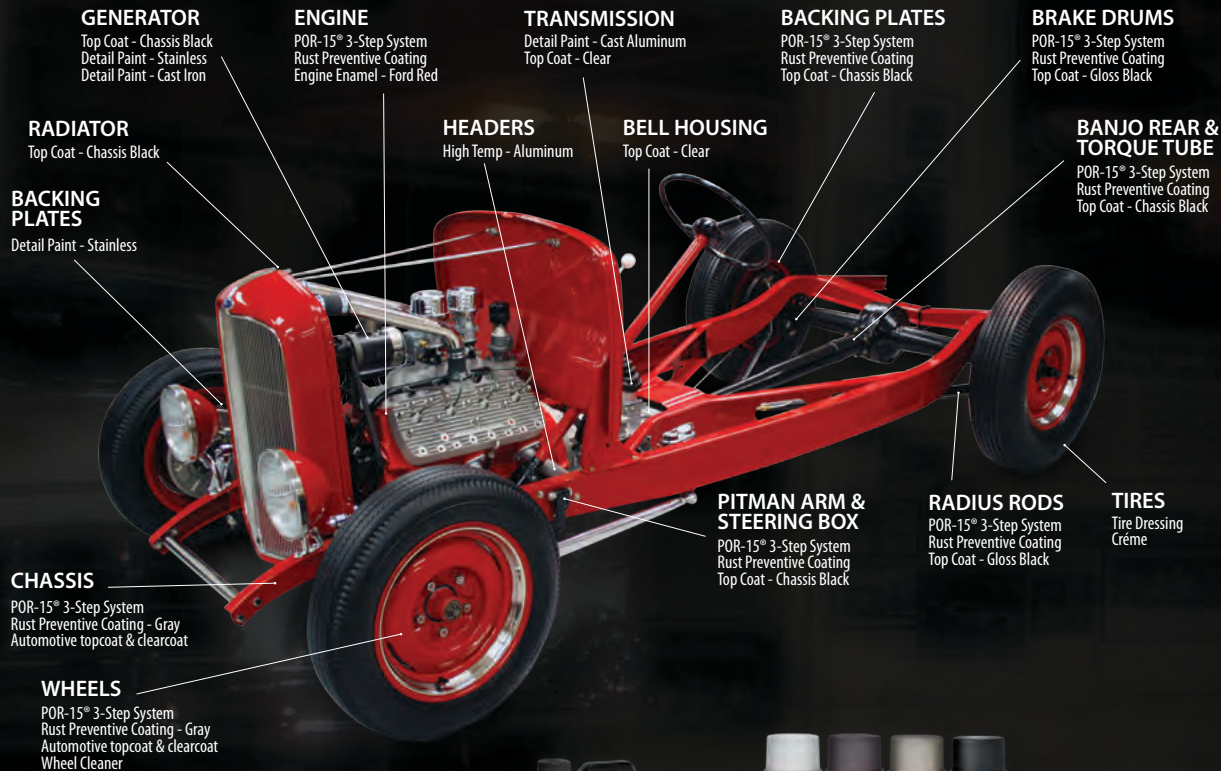

FEATURES:

- Malleable consistency, fill in anywhere
- Hardens like steel
- Mixes like clay & Cures in water
- No measuring or weighing
- Stays in place, doesn't slump or sag
- Can be sanded, drilled, machined, sawed & painted

'32 Roadster Build PRODUCT REFERENCE

The POR-15 brand stands for high-quality products, excellent customer service, and innovation. Our products are formulated to result in superior durability and consistency, making POR-15 the brand you can trust time after time. Our extensive line of products will have your project covered, and our team is available to help if you have questions

about our products. With our own chemists on staff and the POR-15 team working on in-house builds and restorations, our company has the well-rounded experience it takes to excel in customer support. From formula to function, POR-15 is all in.

See more builds with POR-15 products @weavercustoms

Built by

Weaver Customs, from West Jordan, Utah is known for their ability to take cars from ordinary to extraordinary.

Past custom builds include "FMJ", "TorC", Vortex and most recently a 1975 Jeep, "Chief" which not only pushed the envelope of the custom industry but tore it apart. Their builds know no boundaries as they all stun and impress. We suggest you buckle up because you are in for one hell of a ride.

Chief

Randy Weaver
Weaver Customs
BUILDER

Let us introduce you,

"Chief" a 1975 Jeep Wagoneer built by Weaver Customs. It is a great example of the radical builds we expect to see from them. Powered by a twin-turbo LS and backed by 4L80E trans, this Jeep sounds and runs as aggressive as it looks. The custom chassis is coated in Gloss Black POR-15 Rust Preventive, and the big calipers are shown off in Silver POR-15 Caliper Paint. After you get past the impressive stance and sheer grit of this Wagoneer, you will notice the unique exterior appearance of the clear coat. It was achieved with POR-15 Matte Clear over a Pepper Grey base.

Weaver Customs utilized a 1965 Gladiator front end with inner pie pans transformed into turbo inlets dressed in POR-15 Rust Preventive Coating and POR-15 TopCoat Gloss Black along with the grill. The extreme metal fabrication didn't stop there. The front splitter, rockers, and rear-end restyling, along with the custom metalwork to create the wider body, all play a role in making people want to stare at it, and other cars want to race it!

Stop Rust Kit

A super starter kit complete with our 3-Step System!

This kit contains everything you need to use our 3-step rust-stopping system. The POR-15® 3-Step System is designed to stop and/or prevent rust on metal surfaces and ensures the best results when applying POR-15® Rust Preventive Coating. The clear-cut process allows for the proper cleaning, prepping, and coating of metal to create a non-porous surface that seals and protects from water, chemicals, and salt, and other corrosive contaminants.

PRODUCT	COLOR	CODE
Stop Rust Kit	Gloss Black	40909

KIT CONTAINS:

- 8 oz bottle POR-15 Cleaner Degreaser
- 8 oz bottle POR-15 Metal Prep
- 4 oz can POR-15 Rust Preventive Coating
- Paint Brushes, Latex Gloves
- Detailed Instructions

FEATURES:

- Covers a 6 sq. ft. area with two coats
- Ideal for small projects such as small subframes, axle replacements, control arms, brake shields, and more
- Results in a hammer-tough finish resistant to most acids and alkalis, and repels all fuels and oils

Step-by-Step System Use

Step 1: Remove dirt, grease, wax, and other contaminants with Cleaner Degreaser

Step 2: Neutralize rust, etch metal, and coat with a zinc phosphate surface with Metal Prep

Step 3: After washing and drying, coat with POR-15® Rust Preventive Coating.

Floor Pan & Trunk Restoration Kit

You'll save hundreds of dollars over replacement... and your restoration will be better than replacement because you'll never see rust again, whether it's a daily driver or a show car. You can maintain the integrity of the structure with no ugly welded seams. Our easy step-by-step instructions make it simple to restore floor pans, trunk pans, pickup truck beds, etc. You'll be amazed how complete it is... Everything you need is at your fingertips! Order your kit today!

Not for sale in California

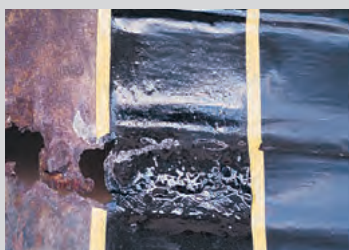

PRODUCT	CODE
Floor Pan & Trunk Restoration Kit	49519

KIT CONTAINS:

- 1 Qt Cleaner Degreaser
- 8 oz Metal Prep
- 8 oz Solvent
- PowerMesh Reinforcing Fabric
- 2 Pts POR-15® Rust Preventive Coating (silver & black)
- 1 Qt Top Coat Chassis Black
- Safety Face Mask
- Dispensing Scoop
- Epoxy Putty
- All Four Brushes Needed
- Latex Gloves

Floor pan holes were repaired with POR-15® Rust Preventive Coating, then pits were filled with Epoxy Putty.

The finish repair looks as good as new.

The floor pan was topcoated with *Top Coat Chassis Black*.

Fuel Tank Sealer

POR-15® Fuel Tank Sealer was formulated and developed in our own laboratories due to the demand for a high-tech sealer impervious to all fuels, including the new Stage II fuels which have a higher alcohol content. It has superior strength and fuel resistance, and does not contain Methyl Ethyl Ketone, a highly flammable and deadly carcinogen (cancer-causing).

FEATURES:

- *Resistant to all fuels, alcohol, additives and solvents*
- *Stops rust, corrosion & leaks*
- *Seals pinholes & seams*
- *Permanently flexible*
- *Chemically bonds to metal surfaces (even rusted)*
- *Light gray color for easier viewing inside the tank*
- *Available in quarts (capable of sealing a 25 gal. tank)*

Fuel Tank Sealer	Pt.	49208
Fuel Tank Sealer	8 oz.	49216

Step-by-Step Fuel Tank Repair

Before: This fuel tank had small pin hole leaks on the end near the seam.

Step 1: Mix 1 quart **Cleaner Degreaser** with one quart of hot water. Use this solution to remove any gum, varnish or sludge from the inside of the tank.

Step 2: Pour in the entire bottle of **Metal Prep** to dissolve rust, coat the tank with zinc phosphate, and etch the metal for better adhesion of the sealer.

Step 3: After the tank is clean, drain the tank and rinse thoroughly with water. Let the tank dry. When totally dry, pour in the can of **Fuel Tank Sealer**.

Step 4: After all surfaces have been coated, drain the tank for about an hour to remove excess sealer from the tank.

Step 5: Once repaired, use a fuel preservative & stabilizer to keep your entire fuel system in proper working order and to avoid "stale gas" problems in your future!

Fuel Tank Repair Kit

Fuel Tank Repair is more than just pouring in a quart of sealer and sloshing it around. If gum, varnish, sludge, or fuel is inside the tank, it must be removed first. Our POR-15® Fuel Tank Sealer, like other sealers, will not work in a contaminated tank. Find out what the pros already know... get our Fuel Tank Repair Kit with everything you need to do the job right.

KIT CONTAINS:

- *Cleaner Degreaser to remove gum and varnish from tank*
- *Metal Prep to remove rust and prepare tank for sealer*
- *Fuel Tank Sealer to permanently seal tank*
- *Detailed instructions*

- *All items included in our standard auto Fuel Tank Repair Kit*
- *Brush for applying patching system to exterior of tank*
- *Fabric for sealing holes or reinforcing weak areas*
- *Proven to effectively seal fiberglass tanks*
- *Safe for use with Ethanol fuel*

Caliper Painting Kit

Dress Up Your Calipers!

Nothing ruins the appearance of a sharp set of wheels like dirty, corroded calipers lurking from behind. Now, dress up those steel or aluminum calipers with a super-tough durable finish.

Our new caliper paint is beautiful in appearance, and strong enough to withstand the punishment of road debris and temperature extremes. And it looks terrific on any car or truck. Then, whenever your calipers get covered with dirt and brake dust, clean them with anything you like; the **POR-15® Caliper Paint** will stand up to just about anything.

Rust Remover

Rust Dissolving Solution

POR-15® Rust Remover will safely remove light to even heavy rust completely from metal surfaces and will not affect plastic, PVC, or most paints. One gallon derusts up to 300 pounds of heavily rusted steel. Rust Remover will not harm unrusted steel and is safe on other metals. Rust Remover has no fumes or bad odors and no VOCs. No sanding or scrubbing required. POR-15® Rust Remover works in as little as 20 minutes for light rust or overnight for heavy rusted metal.

FEATURES:

- *Environmentally safe*
- *Water-based*
- *Safe on delicate metal parts*
- *No Sanding or scrubbing required*
- *No VOCs*
- *Noncorrosive*
- *Odorless*
- *Reusable*
- *Will not harm non-rusted surfaces*

PRODUCT	SIZE	CODE
Rust Remover	Gal.	40701
Rust Remover	Qt.	40704

In a side by side test with the best brands out there, POR-15® Rust Remover performed just like we designed it. It dissolves rust while not harming the non-rusted surface and it works quickly. See our product test video at www.POR15RustRemover.com.

Car Care Products

POR-15 has been passionate about providing products to help restore vehicles. Car Care products are an evolution of our line of thinking; by providing carefully formulated products to restore and protect a vehicle's finish and keep an investment looking fresh and clean, just as the project deserves. Our products are designed to do more than just clean! They are formulated to restore and protect against contaminants that scratch, mar surfaces, and deteriorate vehicle finishes.

Car restoration professionals and enthusiasts trust the POR-15 brand for high-quality professional coatings in their projects. We wanted to add these detailing products to clean and protect the finishes of their cars with the same POR-15 attention to high-quality professional results.

Our Body Shop Safe formulas appeal especially to professionals who are detailing cars in the vicinity of others being painted. Whether extending the life of an existing coating or material to cleaning in preparation of maintenance or touch-up painting, a home enthusiast will also benefit from the same quality formulas.

FORMULATED BY
ADAM'S POLISHES

Car Shampoo

Thick, luxurious suds, and a pH neutral formula make POR-15® Car Shampoo the ultimate way to wash your cars exterior. In addition to excellent detergent performance to remove grit and grime the sudsy formula provides a lubricating film that wards off scratches while washing. The concentrated formula produces more suds with less product and always rinses clean for a spot free finish.

- No Water Spots • pH Neutral
- Does Not Remove Existing Protection

Tire Dressing Crème

POR-15® Tire Dressing Crème is a unique body shop safe, high gloss formula that restores tires, vinyl bumpers and rubber trim. Designed as a thick crème to apply with a foam pad or equivalent giving the user the ultimate control on how much and how clean the applied dressing goes on. A simple, user-friendly tire and rubber dressing, this formula gives tires, plastic bumpers, hood cowl, mirror caps, bed rails, or door seals a rich, glossy appearance without the worry of run-off, sling, or fading when properly applied.

Can be applied directly or with a foam applicator or directly onto the surface of large tires.

- High Gloss • Restores Vinyl, Rubber, & Trim
- Evenly Spreads with a Foam Applicator

Interior Detailer	16 Fl Oz	54020

1-Step Compound & Polish

POR-15® 1-Step Compound & Polish is an all-in-one polishing product that cuts heavy oxidation and finishes to a brilliant shine and removes imperfections, while adding depth and gloss. Utilizing industry leading diminishing abrasive technology, 1-Step Compound & Polish is designed for use with any polishing pads and is suitable for all paint types. Can be applied by machine or by hand, we formulated this product to correct and refine mild to heavy scratches, swirls, paint defects, oxidation, and up to 2000 grit sanding marks.

- **Low Dust Formula**
- **Removes 2000 Grit Scratches**
- **Safe on Clear Coat, Single Stage, and Lacquer Paints**

Detail Spray

POR-15® exterior Detail Spray offers an incredible shine, gloss, and depth while it extends protection. Detail Spray is a streak-free formulation and each wipe down helps extend the life of the wax or sealant coating meaning painted finishes stay protected longer, up to an additional 2 months. POR-15® Detail Spray is safe on paint, glass, chrome, wheels, grilles, and trim to safely clean and shine with just a mist and wipe using a microfiber towel.

Easy to use... just mist your vehicles exterior with Detail Spray and dry off with a clean, dry towel. Can be used Under the hood to dust and clean all top-side surfaces. Use it to wipe down door jams and trunk sills. It never streaks, and it smells like lemon.

- **Silicone Free**
- **All-In-One Formula**
- **Cleans, Shines, and UV Protects**

Wheel Cleaner

POR-15® Wheel Cleaner is the ultimate way to remove stubborn brake contamination and metallic grime from your wheels. Wheel Cleaner cleans effectively designed to make the contaminants water soluble so they can be rinsed away with minimal physical effort, and the color changing formula lets you know it's working, turning to a deep purple as it activates and does the hard work for you.

Simply spray on, allow the cleaner to activate, and then agitate using quality cleaning tools. This thicker, more viscous formula clings to wheel surfaces and allows the European-derived formula to melt away the stubborn brake dust commonly left behind by many of today's high-performance braking systems.

- **For Aluminum, Alloy, Chrome, Powder & Clear Coat Wheels**
- **Safe for Brake Pads & Rotors**
- **Clings to Vertical Surfaces Existing Protection**

Interior Detailer

POR-15® Interior Detailer is an easy spray and wipe off formula. With special UV blocking agents, odor neutralizers, and anti-static additives, POR-15® Interior Detailer is your one step solution for a clean, dressed, and factory looking interior.

Simply spray and wipe with your favorite microfiber cleaning cloth. Our Interior Detailer is safe on all interior surfaces, which includes leather, vinyl, pleather, navigation screens and plastic!

- **Silicone Free**
- **All-In-One Formula**
- **Cleans, Shines, and UV Protects**

Concrete Primer Sealer

2-Part High Solids Epoxy Coating

WATER-BASED

POR-15® Concrete Primer Sealer is a water-based, 2-component high solids epoxy coating that has been developed to function as a primer sealer on properly prepped concrete surfaces and also acts as a foundation for POR-15® Concrete Floor Armor systems. POR-15® Concrete Primer Sealer offers durability to any floor coating project with the convenience of a low VOC water-based formula. It brings the adhesion performance of POR-15® Concrete Floor Armor Systems to the next level.
