Installing 3 D Batteries

- 1 Unscrew tail cap. Remove batteries
- 2 Insert 3 D batteries with the positive polarity (+) facing in
- 3 Replace tail cap once all batteries are in the battery compartment

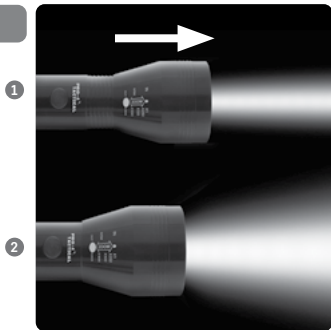

NEW ALKALINE BATTERIES STRONGLY RECOMMENDED
DO NOT MIX OLD BATTERIES WITH NEW BATTERIES

Switching Modes / 5 Power Settings

- 1 High Power Light
- 2 Medium Power Light
- 3 Low Power Light
- 4 Strobe Flashing Light
- 5 S.O.S. (Save our souls)

Zoom In / Out

- 1 **Zoom In**
For a long, narrow, focused light beam: Pull OUT Flashlight head as shown
- 2 **Zoom Out**
For a broader light beam: Push IN Flashlight head as shown

Maintenance

- Remove and store batteries when not in use for 90 days or longer
- Clean Flashlight with a clean, dry cloth as needed; dry after use
- Lubricate screw threads and moving parts with standard consumer lubricant as needed

Warning

- High Intensity Beam. Extremely bright 450 lumen light
- Do not look directly into light; may cause vision damage
- Follow City Ordinance Guidelines for proper disposal of dry cell batteries
- Do not allow children to use this work light without adult supervision
- **Keep out of reach of children**

Troubleshooting

If the Flashlight does not turn on; works intermittently; or has a weak light:

- Remove and replace batteries
- Be sure tail cap is screwed on tightly
- Be sure batteries are properly inserted. If problem persists, contact Pro-4 Tactical for technical advice
- Visit www.Pro-4Tactical.com for warranty registration & replacement information

WARNING: This product can expose you to chemicals including Benzene and Ethylbenzene which are known to the State of California to cause cancer. For more information, go to www.p65Warnings.ca.gov
