WHEN & WHERE TO USE SPACE HEATERS

When gas heating or tons of blankets just aren't cutting it – space heaters are a convenient way to quickly heat a space. Portable space heaters are a great solution for adding supplemental heat to an area and come in multiple capacities to serve however big your space is. Portable heaters typically come in six varieties: ceramic, ceramic PTC, fan-forced, infrared or radiant, oil-filled and convection.

All Perfect Aire® space heaters come with safety features ranging from tip-over switches, over-heat protection and automatic shut-off. It is important to remember that due to the high volume of electricity

needed to support a space heater, the unit must be plugged directly into a wall – without the use of an extension cord – to avoid fire hazards.

IDEAL FOR:

- Bedrooms, Living Room, Bedroom, Basement, Garage
- Offices and Workshops
- Restaurants and Retail Stores
- Dorms

RADIANT HEAT FEELS LIKE THE SUN

NEVER USE AN
EXTENSION
CORD

NEVER USE A
POWER STRIP

ALWAYS PLUG
DIRECTLY INTO
THE OUTLET

IMPORTANT

DUE TO THE HIGH VOLUME OF ELECTRICITY NEEDED TO SUPPORT A SPACE HEATER, HEATERS CANNOT BE PLUGGED INTO AN EXTENSION CORD OR A POWER STRIP, AND MUST BE PLUGGED DIRECTLY INTO A WALL. WHEN SPACE HEATERS ARE PLUGGED INTO AN EXTENSION CORD OR A POWER STRIP, THEY CAN OVERHEAT, CAUSING A SHORT-CIRCUIT OR FIRE. TO ENSURE YOUR SAFETY, REMEMBER TO ALWAYS PLUG YOUR HEATER DIRECTLY INTO THE WALL AND SUPERVISE—ESPECIALLY IF CHILDREN ARE PRESENT.
