

HUMIDIFIERS

Whether you live in a naturally dry climate, or you're feeling the effects of running your heater in winter, humidifiers are a must-have to improve your home's air quality. Humidifiers come in three different varieties: **ultrasonic**, **warm mist**, and **evaporative** - all of which will help increase the humidity in your space.

Perfect Aire humidifiers offer useful features like top-fill tanks, night lights, and aroma diffusing functions. Just add water and enjoy a more comfortable environment.
