

2 ft Hummerbar Model #HUMBAR200

Instructions:

1. Remove sticker.
2. Remove end cap.
3. Using your index finger, bring cord eyelet through open side of bar. Once inside the bar, slide the eyelet, loop side up, through the bottom of hole. Once you hear the click, twist adapter 180 degrees to secure into position.
4. Repeat step three on opposite end.
5. Replace end caps.
6. Take the loose end of an adjustable hanging cord and put it through the eyelet's loop hole. Then, squeeze the cord lock to create an opening. Feed the loose end of the cord through the opening and once the loose end of the cord is through the cord lock, release your grip. This action will secure the hanging cord to the bar.
7. Repeat step six on the opposite end.
8. Select an outdoor location to hang the Hummerbar®. The Hummerbar® must be hung from two points, 90 degrees above cord eyelets. We recommend hanging from two shepard's hooks or from two hooks on a porch awning. Place in a shaded area with low winds.

Disassembly and cleaning instructions:

1. Remove Hummerbar® by carefully removing hanging cords from hooks. Keep feeder level.
2. Remove end caps and rinse with warm soapy water. We recommend using the Perky-Pet® Cleaning Mop to clean individual ports and the tube.
3. We recommend washing your Hummerbar® twice a week.
