KUUL COMFORT™ EVAPORATIVE MEDIA

Kuul Comfort™ evaporative media is designed and made exclusively to meet the exact performance requirements of Portacool portable evaporative coolers. Our media features an exclusive mix of superior raw materials and a proprietary application of geometrical, intelligent design to create the optimal cooling experience. Kuul Comfort evaporative media is the driving force behind our superior cooling performance.

For best results:

- Follow instructions for Kuul Comfort evaporative media as specified in the Owner's Manual of your Portacool® evaporative cooler.
- In areas where hard water is present, consider using Portacool Hard Water Treatment™ to help reduce calcium-scale deposit buildup to extend the life of your evaporative media.
- For cleaning and maintenance purposes, remove the Kuul® evaporative media periodically and spray or wipe down thoroughly to maintain performance and longevity.

TheKuulEffect.com

HOW THE KUUL EFFECT FEELS

	Temperature	Humidity	Drop in temp*	City**
Hot/Dry	105 °	20%	30 °	Phoenix, AZ
Hot/Humid	95 °	55%	13 °	Houston, TX
Warm/Dry	90 °	20%	24 °	Albuquerque, NM
Warm/Humid	80 °	60%	11 °	San Jose, CA

*The temperature drop provided only reflects the performance of Portacool's Kuul Comfort™ evaporative media. The drop does not factor in the velocity or volume of the air provided by our high-performance fans (wind chill). The "real-feel" or perceived temperature will be cooler. Results will vary based on your current conditions.

**The examples shown represent average July conditions of the listed cities.

PORTACOOOL CYCLONE™ FEATURES

POWERFUL, AFFORDABLE COOLING TECHNOLOGY

DIRECTIONAL LOUVERS
VENTILAS DIRECCIONALES

COMPACT DESIGN
DISEÑO COMPACTO

WATER LEVEL INDICATOR
INDICADOR DEL NIVEL DE AGUA

WATER ADJUSTMENT VALVE
VÁLVULA DE AJUSTE DE AGUA

DUAL WATER FILL
LLENADO DE AGUA DUAL

EASY ROLL CASTERS
RUEDAS DE RODADO FÁCIL

WATER LEVEL INDICATOR/ PUMP SHUT-OFF

The water level indicator in your Cyclone evaporative cooler provides high-reliability monitoring of the water level in the tank. When the level drops below a certain level, the pump will automatically shut off, preventing over heating and protecting your investment.

PRODUCTS ARE JUST THE BEGINNING.

At Portacool, LLC, we believe in our products and we want you to as well. That is why we have established the Portacool Protect™ program. Not only do we want to protect you from high temperatures by providing cooling comfort wherever you need it most, we also want to help protect your investment. We stand behind our craftsmanship and we're here to help you. For more than 27 years, Portacool has been a customer-focused company. The Portacool Protect program — which comes standard with your Portacool portable evaporative cooler — represents quality.

FREQUENTLY ASKED QUESTIONS

How do I clean my Portacool evaporative cooler?

Start by draining the evaporative cooler. All Portacool evaporative coolers come with a large 2" drain on the bottom. Locate the drain, unscrew the cap and allow water to drain. Ensure the Kuul evaporative media is completely dry, then remove and wipe down the inside of the evaporative cooler - use a shop vac to remove any remaining water. Replace the evaporative media.

Can the fan and pump operate separately?

Yes, the fan and pump motors are separate systems. You can run one without the other with no damage to the product.

What happens if my evaporative cooler runs out of water?

All Portacool Cyclone evaporative coolers come with an automatic low water shut off. When the evaporative cooler is out of water, a red light will illuminate on the control panel and the pump will shut off.

Will I need a special plug for my Portacool evaporative cooler?

All Portacool Cyclone evaporative coolers require a standard three-prong 115v electrical outlet.
