WHO WE ARE

Prime-Line Products has been supplying repair and replacement parts for windows and doors since 1978. Over 35 years of business acumen has led Prime-Line to the top of its trade. The worldwide need for residential maintenance has motivated our company to develop over 18,000 unique items for our customers. We service the professional trades with repair solutions throughout North America and abroad.

We also provide products to the Do-It-Yourself industry through home centers, hardware stores and lumber yards, with a wide variety of specialized repair parts that fit various individual and regional demands. We currently supply many manufacturers with OEM components that are in wide demand.

OUR VALUE PROPOSITION

- Extensive product assortment
- Competitive wholesale pricing
- Largest selection of current and hard-to-find hardware
- In stock, ready to ship inventory
- Nationwide coverage
- Outstanding customer service
- Personalized account management
- State of the art ordering systems

CUSTOMER SERVICE

Prime-Line is ready to fulfill any large capacity order, we can take your order from inception to completion in stride. With customer service available from 6 A.M. to 5 P.M. PST every weekday, you'll get the answers you want, when you want them.

40	Shelf Support Screws and Wing Nuts

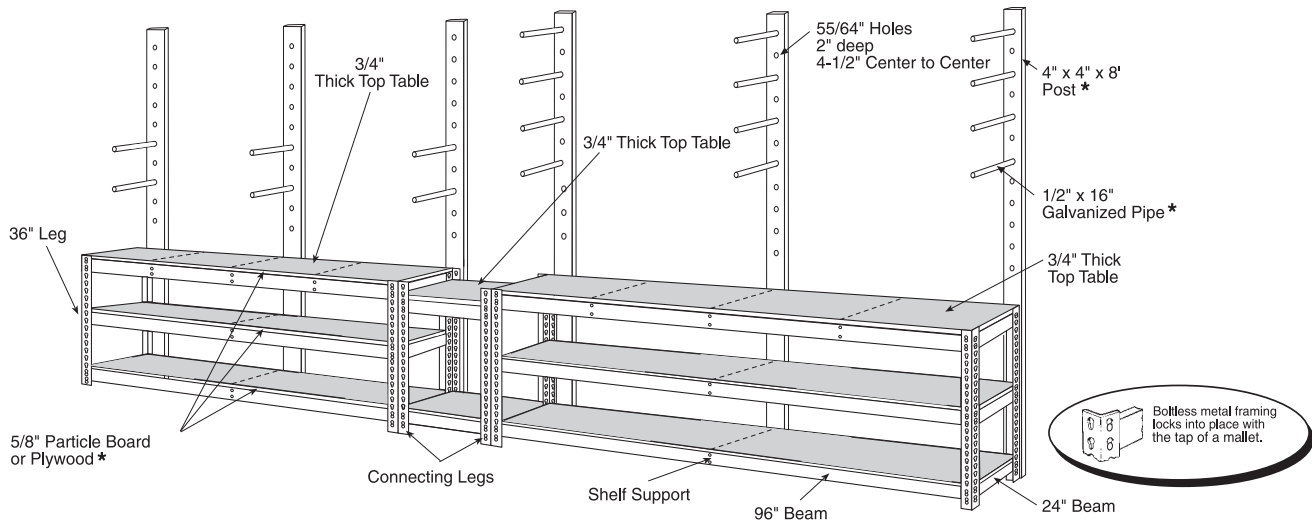

*Materials Not Included in Kit:

4	24" x 96" x 5/8" Thick Particle Board or Plywood
2	24" x 96" x 3/4" Thick Particle Board or Plywood
1	24" x 24" x 5/8" Thick Particle Board or Plywood
1	24" x 24" x 3/4" Thick Plywood
6	4" x 4" x 96" Posts
—	1/2" x 16" Galvanized Pipe
—	Other Fasteners

CUT-OFF SAW TABLE KIT

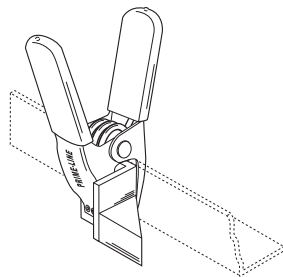

P-8061

- Sturdy 18' painted steel cut-off saw work bench designed for mounting the E-Z Slide Cut-Off Gauge (P-7926).
- Boltless metal framing locks into place with the tap of a mallet.
- Adjustable shelving for screen and glass frame components.
- Designed for 3/4" particle board or plywood (not included).
- We suggest using the Delta MS-250 cut-off saw and our (P-7929 or P-7930) fine toothed 10" saw blades.

FENCE STOP CLAMP

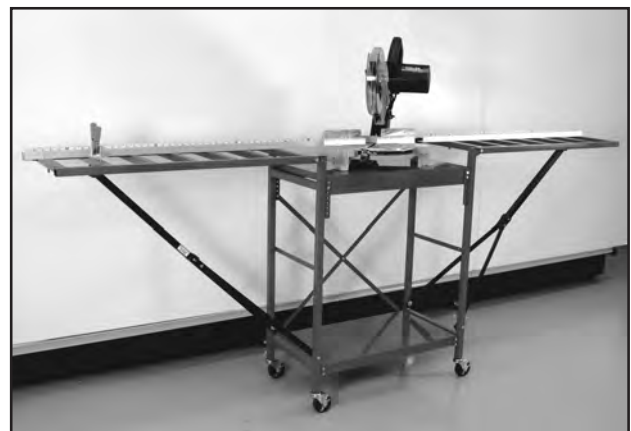

P-8079 (1 per pack)

PORTABLE CHOP-SAW TABLE KIT*

P-8077

- A small facility can now make new window screens and storm window panels.
- Overall dimensions (when hinged arms are extended in up position): 107-3/4" Wide x 15-15/16" Deep x 40-1/4" High.
- Table Kit is partially assembled and ready for immediate use.
- Fence clamp for accurately measuring length of pre-mitered screen frame and built-in adjustable measuring device that allows for extended length measuring, (11" min. to 84" max.).

* Chop Saw is not included.

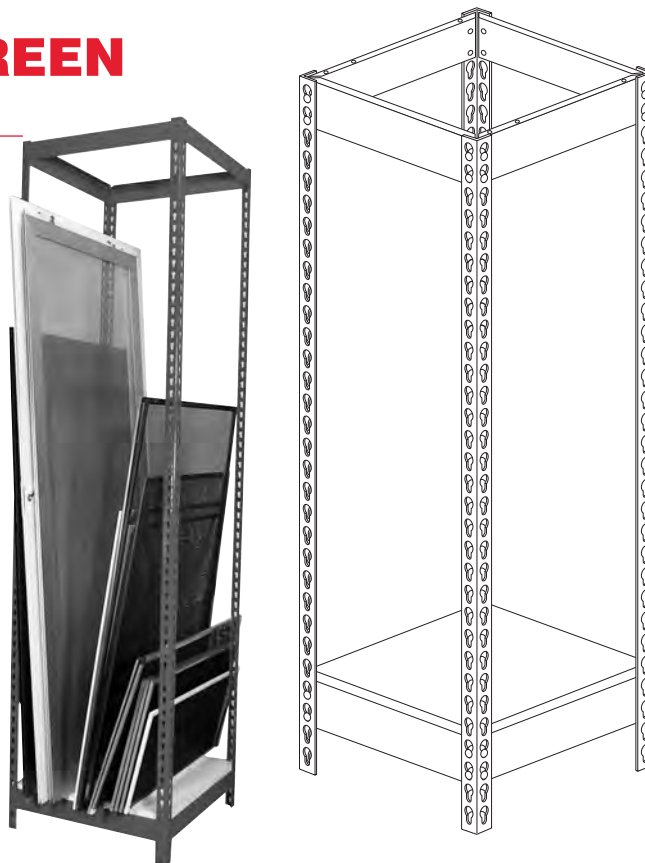

Can be adjusted to accommodate most any brand of saw.

FINISHED WINDOW SCREEN & GLASS REPAIR RACK

P-8115

- Sturdy painted steel rack helps prevent damage to finished goods.
- Overall dimensions 24" wide x 24" deep x 96" high.
- Boltless metal framing locks into place with the tap of a mallet.
- Bottom shelf designed for 3/4" particle board or plywood (not included).

P-8115 SPECIFICATIONS	
4	96" Legs
8	24" Beams
*Materials Not Included in Kit:	
1	24" x 24" x 3/4" Thick Particle Board or Plywood

E-Z SLIDE CUT-OFF GAUGE

1. A unique measuring device for cut-off saws requiring fast and accurate lineal measuring.
2. Ideal for use with Prime-Line's full size chop saw table kit (Part No. P-8061).
3. Accurately measures screen frame lengths from 6" to 108".
4. All measurements are read directly in front of chop saw, for maximum operator efficiency.

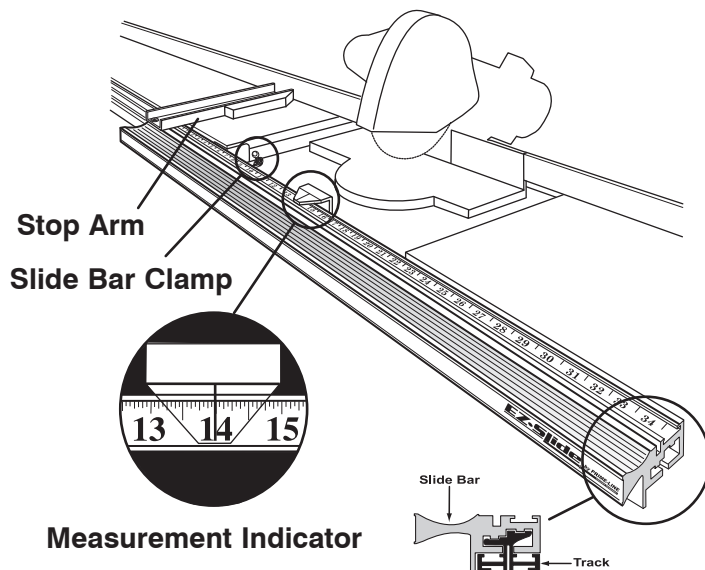

P-7926 (Left Hand Stop Gauge)

P-7927 (Right Hand Stop Replacement Tape For P-7925 measurement starts at zero and increases to the left)

P-7928 (Left Hand Stop Replacement Tape For P-7926 measurement starts at zero and increases to the right)

COLOR MATCHED SPLINE

Make your new Andersen screen a perfect match by using our .165 (for aluminum mesh) or .185 colored spline (for fiberglass mesh)

Color	Spline Size	Length	Part #
Sandstone (Tan)	.165	500 ft.	P-8374
White	.165	500 ft.	P-8283
Sandstone (Tan)	.185	500 ft.	P-8350
White	.185	500 ft.	P-8287
Bronze	.185	500 ft.	P-8352

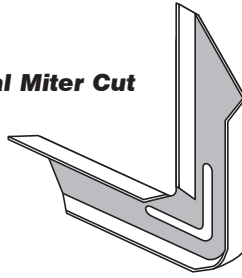

Our generic frame system allows you to color match **Andersen Windows.** Outside miter corners completes the look. To achieve a perfect match, use our color-matched spline below.

To remove worn pile: Using a sharp utility knife, firmly draw the knife down the center of the pile across it's entire length.

Then pull out old pile and debris. Use a screwdriver or scratch awl to pry out old pile if necessary.

To install new pile: Insert one side of the length of pile and use a slot screwdriver to push in the other side

HELPFUL HINTS FOR REPAIRING / REPLACING Corner & Tilt Keys • Slide Bolts

CORNER AND TILT KEYS

1. Removal of corners or tilt keys requires drilling out indentations holding corners into frame. Using a 3/32" drill bit, drill out indentation only. Do not drill all the way through corner (See Photo 1).
2. Secure window frame to work bench and lightly tap frame apart using a block of wood and hammer (See Photo 2).
3. Remove broken corners using a screwdriver or similar tool, drive broken piece out, or back into frame (if piece will not come out).
4. Select proper replacement corner or tilt key and insert into frame and re-assemble.
5. Using a nail set indent frame into corner key. Indent in two places on each leg of key (See Photo 3).ner key (See Photo 3).

SLIDE BOLTS

1. Remove bottom frame, using the same procedure as Step 1 and 2 above.
2. Slide bolt and spring will slide out when corner key is removed.
3. Select proper slide bolt, insert spring and slide bolt into frame (See Photo 4).
4. Assemble frame and using an nail set indent frame into corner key (See Photo 3).

Complete Threshold Replacement Kits Available; Ask Customer Service

Using simple installation instructions, you can replace the glass track or screen track economically and quickly without a complex sill replacement.

SLIDING SCREEN DOOR TRACK

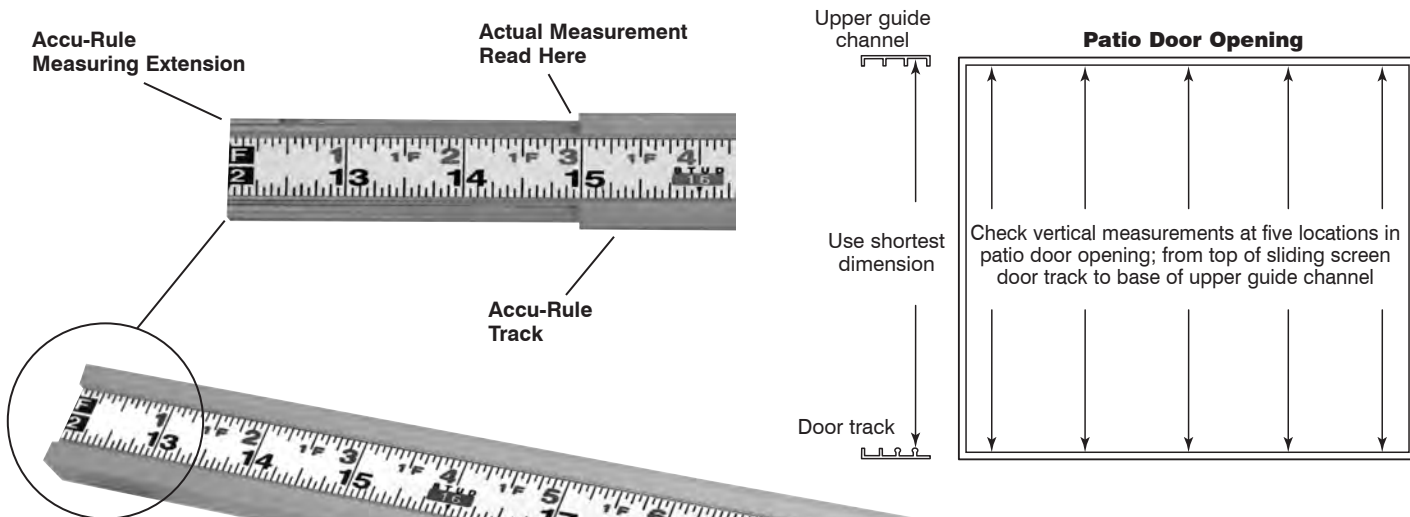

SLIDING PATIO DOOR TRACK

Inside Slider Installation

ACCU-RULE MEASURING STICK (PATENT PENDING)

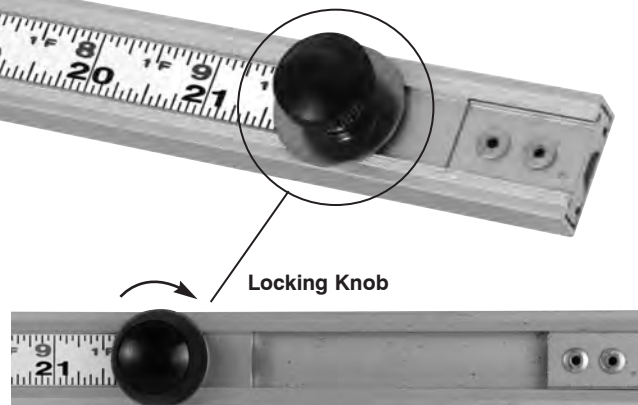

- Quickly and accurately measures vertical sliding screen door dimensions in the patio door opening.
- Two (2) piece (extruded aluminum) adjustable measuring tool.
- Locking knob holds firm while overall measurement is read.
- Multiple vertical dimensions are needed to determine ideal screen door height.

ACCU-RULE MEASURING STICK

- Accurately measures vertical and horizontal window screen openings

	Minimum Dimension	Extended Dimension
P-8067	12"	20"
P-8066	20"	38"
P-8065	32"	62"
P-8064	62"	122"

P-8381 (Set of 3 - P-8064, P-8065 & P-8066)		

HOW TO MAKE NEW SCREENS THE CORRECT SIZE THE FIRST TIME

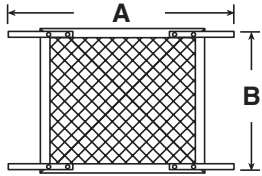

- STEP 1:** Give customer our new "How-To Measure Your Screens" brochure.
- STEP 2:** Secure collateral from customer to take home the "Accu-Rule" measuring stick set and measuring guide brochure.
- STEP 3:** Make customer's new screens to their exact measured sizes.

CHANNEL WINDOW BALANCES

Used On Single Or Double Hung Sash

Balance Shown Installed In Jamb With Vent Removed

Ordering Tips:

1. Check the back side of channel for stamped numbers (i.e.; 1410, 28A, 3620, etc.).
 - a). The first two digits indicate the actual glass height.
 - b). The balance is **1" LONGER** than the part number indicates (i.e.; **#1410 is 15" long**).
 - c). The second two digits or letter designation (A, B, C, D) denote the weight series of the balance (i.e.; #1410 or 14A is for light weight sash, 1420 or 14B is medium, 1430 or 14C is medium to heavy and 1440 or 14D is heavy. Please see the enclosed **Selection Chart** for actual weight variations.
2. **The balance number, by itself, does not include top or bottom guides.**
 - a). Determine the correct guides required from the accessory page. You may use the existing guides from the defective balance, however, this will require drilling out the attaching rivets.
 - b). New guides may be ordered (installed) using the double asterisk (**) part number on page 83. They may also be ordered in bulk (50/bag with rivets or, in individual kits) and installed by the dealer. A "Universal Kit" (EP-3719) is available which includes a popular assortment (2 top guides, 3 bottom guides, 2 rivets and 1 take-out clip).
3. A rivet set tool (EP-3740) is available to expedite installation of guides to balance.

Installation Hints: Vents must be removed in order to replace the balance assemblies.

TO REMOVE VENT: Close vent to expose take-out clips. Open both clips for vent removal. Raise vent until top guide engages take-out clip. Continue to raise vent, 2 to 3 inches more. Move vent right or left as far as possible. Removal is then accomplished by swinging the opposite side of vent inward.

TO REPLACE BALANCE ASSEMBLY: Push down on balance until top guide is clear of take-out clip. Hold firmly and slowly lift up and away from jamb. Remove terminal clip and install new balance assembly using the reverse installation procedure. Be sure that top guide is secured under take-out clip. It is recommended that both balance assemblies be replaced in order to allow for efficient operation.

TO REPLACE VENT: Position right or left side of vent into jamb, 2 to 3 inches above take-out clip and swing opposite side into alignment with frame. Then lower vent to engage balances and on down to clear take-out clips. This will automatically center the vent. Snap take-out clips into jamb to facilitate normal operation.

SPIRAL WINDOW BALANCES

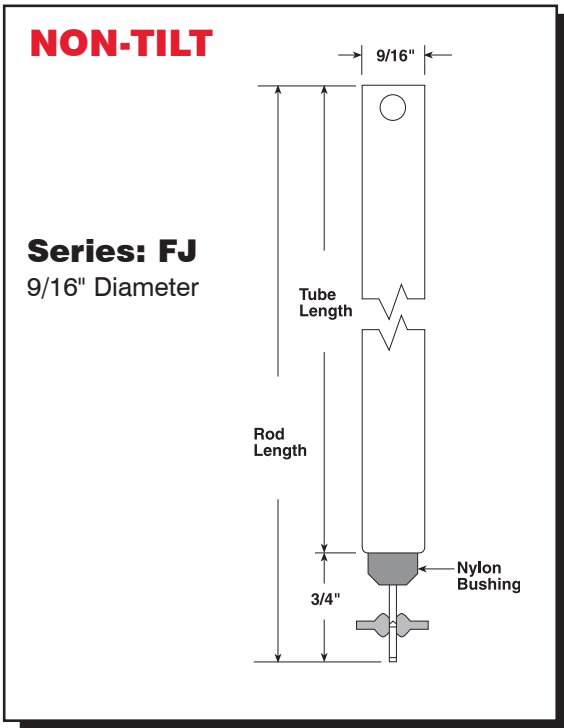

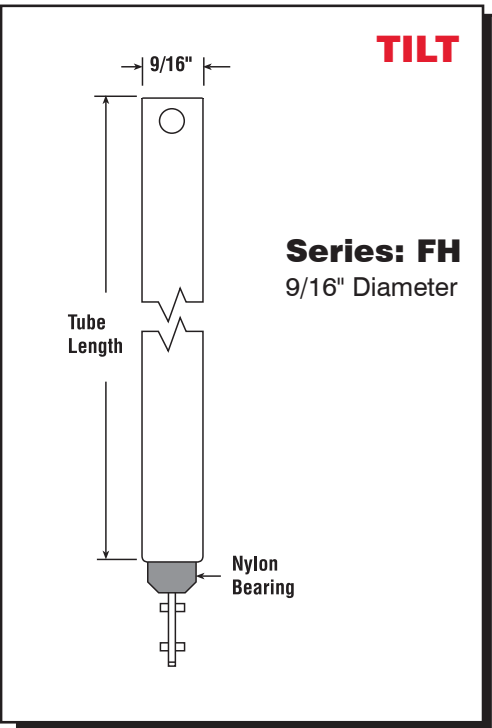

- Great **new category** of replacement items.
- Customer demand is growing steadily.
- **Special order** or **stock** your region's specific needs.

HOW TO ORDER:

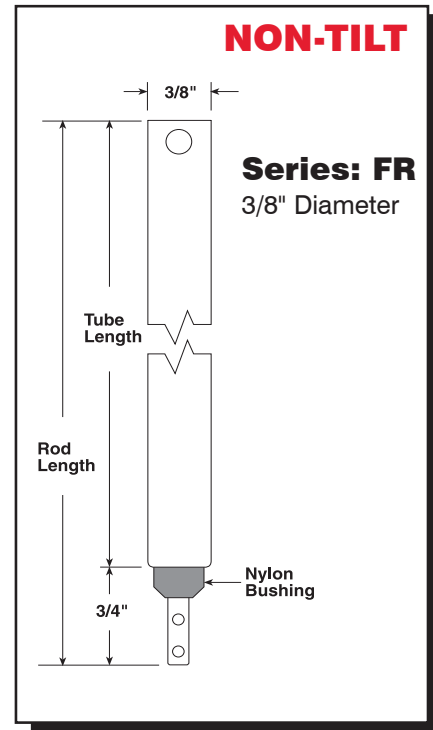

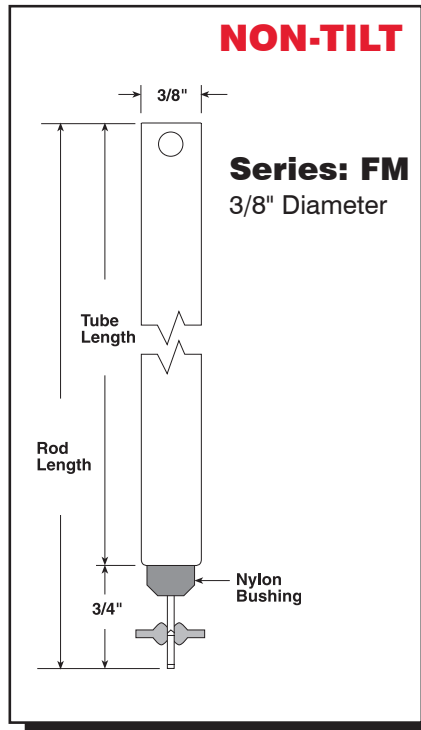

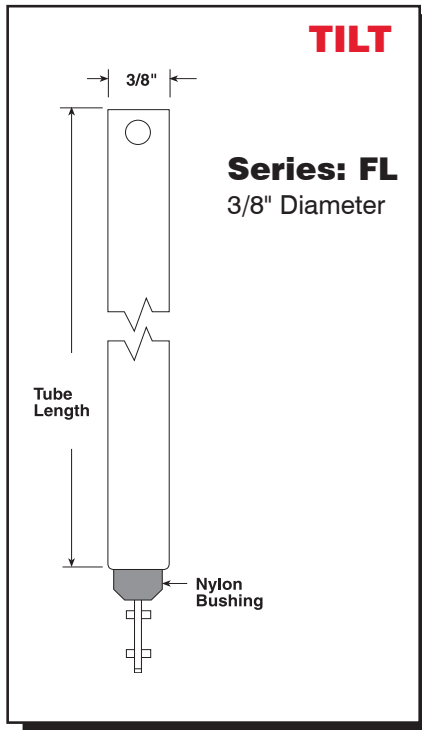

1. Determine series designation.
2. Measure tube length.
3. Specify nylon bearing color to indicate spring weight (**white**-standard, **red**-medium, **blue** or **black**-heavy).
4. These balances are all metal tube. Plastic tube balances available on special request.
5. All balances are sold individually in bulk.
