a quality brand of

In 1938, the carpet industry had just begun to use liquid latex for carpet seaming and repair. The newly formed Roberts Company developed a new latex formula of its own and labeled it Rubber-edge, laying the groundwork for today's thriving Adhesives Division of Roberts Company Canada, Ltd.

Roberts continued with innovations in the industry and pioneered the Double Bond Carpet Installation method which is now a recognized standard that has stood the test of time. Roberts has been a leader in the manufacturing of adhesives ever since, producing its first solvent free adhesive in the 1980's and continuing to develop environmentally friendly products.

With locations and product lines known and used throughout the world, Roberts has been recognized as the premier brand of adhesives, carpet installation tools and accessories. Worldwide, the Roberts name continues to be the manufacturer of choice for installation professionals who demand quality and reliability.

ADHESIVE SOLUTIONS

Roberts® Moisture Control Adhesives

Enhanced, superior-grade adhesives made to withstand up to 10 lbs. moisture vapor emission rates (MVER) and up to 90% relative humidity (RH), over newly poured concrete with declining values. This improvement simplifies the moisture mitigation process:

SAVE TIME. SAVE STEPS. SAVE MONEY.

UP TO 8 LBS.

UP TO 10 LBS.

Roberts Company Canada actively participates with governing agencies and organizations to establish the highest standards for environmentally conscientious products. We seek continuous improvement in our product development to globally offer the most ecologically responsible products.

GoldGuard® Antimicrobial Technology

Roberts two-tier antimicrobial protection system for both the wet and dry state inhibits the growth of mold, mildew and odor causing bacteria.

CRI Green Label +Plus®

These adhesives have been rigorously tested and meet the most stringent criteria for low chemical emissions and are among the lowest emitting VOC products in the market.

Enviro Friendly

Environmentally conscious products manufactured by a company committed to protect and sustain our environment.

LEED® Canada Green Building Council

Many of our adhesives contribute one or more points in the LEED® rating system. The LEED green building certification program is the nationally accepted benchmark for the design, construction, and operation of green buildings.

The trowel notches shown are those typically recommended for the type of wall/flooring products being installed. They are normally the minimum size recommended. Consult wall/ flooring manufacturer for their specific trowel recommendation. Surface conditions (roughness and porosity of surface/substrate) type of product and backing of product will ultimately determine the required trowel notch size and coverage.
