a quality brand of

QEP Co., Inc. was founded in 1979 in the New York family garage of Lewis and Susan Gould. The very first QEP branded tiling product was a “Do-It-Yourself” Bathtub Edging Kit. There was nothing like it on the market. As the popularity of tile floors began to rise in the United States, so did the demand for DIY installation tools and accessories. This demand quickly opened the doors of opportunity for the QEP brand throughout the national tile tool market. The QEP brand continued to grow and evolve, eventually expanding into the professional market. In 1984, QEP released the world’s first “dual rail” tile cutter, and in 1989 began manufacturing their own professional tile spacers.

In the late 90’s, QEP Co., Inc. continued to expand its reach and began selling the QEP brand into Canada, Mexico and South America. Over the next decade, the QEP brand made its way into Australia, New Zealand, England, France and China. Today, QEP has become an recognized professional brand, specializing in installation tools and accessories for tile, porcelain and natural stone. QEP products can be found in all 50 States and in countries throughout the world.

QEP continually introduces new and innovative products that address the challenges of today’s market. To establish a stronger presence in the professional tiling industry, QEP has just unveiled their most innovative line of tools yet - The Xtreme Series. Advanced designs have enhanced the professional-grade features of this new tool line that has been *Engineered by the Pro, For the Pro.*

LASH® Tile Leveling System

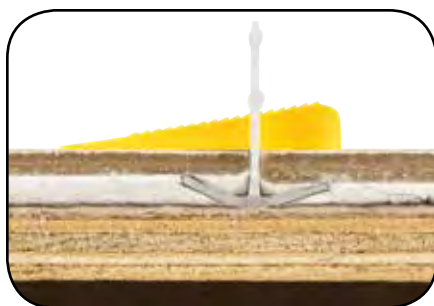

QEP

made in
USA

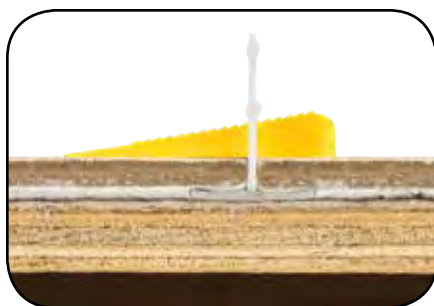

For perfect tile-to-tile leveling

The patented LASH® Tile Leveling Clips system is designed for quick installation and reduces costly call backs by insuring that the finished floor surface is lippage-free. This time-saving system helps adjust the height of the tiles and evenly holds their edges throughout the curing process of the setting material.

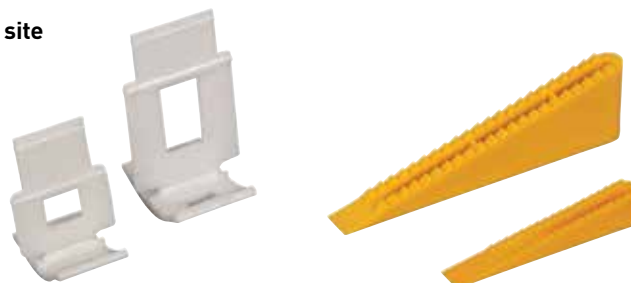

- Durable nylon construction for a secure installation
- High-visibility yellow wedges are easy to distinguish on the job site
- Specially designed break-off point on clips for swift removal
- Produces 1/16" joint spacing
- May be combined with regular tile spacers for wider joints - up to 1/4"
- Wedges are reusable

10068Q

Spacer wings fit perfectly on corner and angle applications!
 Two Spacers In One!

Offers the option of two different grout joint widths

ClearView Spacers are an economical and user-friendly solution for creating evenly spaced grout joints. The unique, patented design keeps the spacers out of the thinset and provides a clear view of grout lines and corners.

One Spacer does the job of four traditional spacers thus reducing the amount of total spacers needed for each job.

Each bag of Spacers comes with 100 spacer rings and 50 mini-wing spacers for use on corners along walls and angles. These spacers are easy to remove, reusable and perfect for floor and wall tile applications.

These spacers provide an unobstructed view of grout lines for dead on accuracy.

- Helps install tiles quickly and precisely
- One replaces four conventional style spacers
- Open center design allows the installer to instantly align tile corners

About California Proposition 65

Proposition 65 is a California regulatory law that requires businesses to notify California consumers about specific chemicals in the products they purchase so they can make informed decisions about protecting themselves from exposure to these chemicals. This law requires companies to properly label products that contain chemical(s) above certain threshold levels.

As part of Q.E.P. Co. Inc.'s continued best business practice and compliance program, we comply with Proposition 65 warning requirements and provide product-associated warnings. We are dedicated to meeting consumer product safety requirements applicable to our products and strive to provide high quality and safe products.

For more information on California Proposition 65, go to www.P65Warnings.ca.gov.

*Prop 65 - 1. **⚠️WARNING:** This product can expose you to chemicals including DEHP, which is known to the State of California to cause cancer, birth defects and other reproductive harm.
