VC1 Chemical Reduction Filter Cartridge

Rainfresh VC1 filter cartridge is a high performance activated carbon filters designed to reduce Volatile Organic Compounds (VOC), Trihalomethanes (THM), and chlorine from potable water. It is also highly effective in improving water taste and odour

VC1 cartridge is made from high quality activated carbon constructed in a proprietary compact style to deliver high adsorption performance and excellent contaminant removal characteristics.

FEATURES

- Made of high quality activated carbon with proprietary media
- Block construction maximizes performance
- Highly effective (> 99%) in reduction of VOC and chlorine, taste/ odour up to 600 US Gal (2,271 litres)
- 1µ nominal particulate reduction
- Universal fit can be used with most standard 10" filter housings^V

& cysts, and to NSF/ANSI 42 for reduction of chlorine, taste and odour.

TESTING AND CERTIFICATION VC1 has been tested and certified by CSA International to NSF/ANSI 53 for reduction of VOC
