ROLLERLite® ***PAIN*T APPLICATORS**

TRUSTED BY PROFESSIONALS

RollerLite® is the only brand that produces **American Quality** applicators while remaining competitive in the market. Unlike any other brands today, all RollerLite® roller covers are made in one facility which guarantees that we are able to maintain the highest quality standards. Our experience with major industry retailers has allowed us to achieve the pinnacle in craftsmanship, shown in every single one of our products.

Our Products

RollerLite® offers a complete line of roller covers, including a variety of fabrics that optimally perform with today's paints: Shed-resistant Dralon®, Microfiber, Synthetic Mohair, Polyester/Wool Blend and 100% Polyester fabrics provide a complete line to handle any painter's needs. A durable Thermobond core is great for latex and resistant to solvents. Available from 2" to 18" lengths.

Reading the NAP

The Nap size of a roller cover is the length of the fibers that extend from the core and hold the paint. Nap size is chosen based on the texture and surface type that you will be painting on.

Rough surfaces require higher naps whereas the smoother the surface, the shorter the nap required.

Use of NAP according to the surface to be painted

- **Smooth Surfaces (1/4)**

Untextured plaster, drywall, wood and metal.

- **Semi Smooth Surfaces (3/8)**

Light textured drywall, plaster, wood and paneling.

- **Semi Textured Surfaces (1/2)**

Textured plaster, metal, wood and drywall.

- **Textured Surfaces (3/4)**

Heavy textured surfaces. Interior & exterior.

- **Rough Surfaces (1)**

Stucco, wood, brick and concrete.

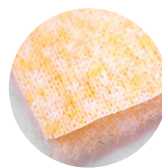

- **Rough Surfaces (1 1/4)**

Masonry, stucco, exteriors and new constructions.

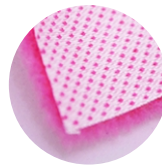

Knit & Woven Fabrics

The majority of paint roller fabrics are manufactured by knitting or weaving the fabric securely onto the backing. Note that there are specialty fabrics such as foam where neither of these processes applies.

Knit Fabrics

Knitted fabrics have a looped backing which results in a more absorbent fabric. These fabrics optimize paint retention and release for increased paint capacity.

Woven Fabric

Woven fabrics are made out of a continuous yarn and tighter cross-section backing. This results in a sturdy fabric with minimal shedding for a lint free application, perfect for interior and delicate surfaces that need the smoothest of finishes.

Standard Roller Covers

1 1/2" diameter core, does not use cap and insert, available in 3", 4", 9", 14" and 18" rollers. Used to paint large spaces, interior and exterior.

All Purpose™

Rollerlite® All Purpose™ Knit Polyester Fabric is designed for any interior or exterior surface and optimizes pick up and release for more paint capacity. Provides a consistent application. Strong and durable core.

- 100% Knit Polyester
- Consistent application
- Optimizes pick-up and release for more paint capacity
- Water based: latex, acrylic and stains
- Strong and durable core
