"Brushes built for performance."

Langnickel™ Royal SableTek™ is over 20 years in the making. The original Royal Sable™ was a natural hair alternative to pure red sable with more body, snap and strength. Royal SableTek™ is the synthetic alternative made of a proprietary blend of the finest quality synthetic filaments developed to replicate the experience of painting with the original Langnickel™ Royal Sable™. The result is more control and precision in executing brush strokes, added durability in maintaining points, and consistent edges. They allow the artist to lay down the maximum amount of color and follow through with longer strokes. These brushes may be used with any viscosity paint, but work best with acrylics or oils.
