

**Safety is
all we do.**

Product Catalog

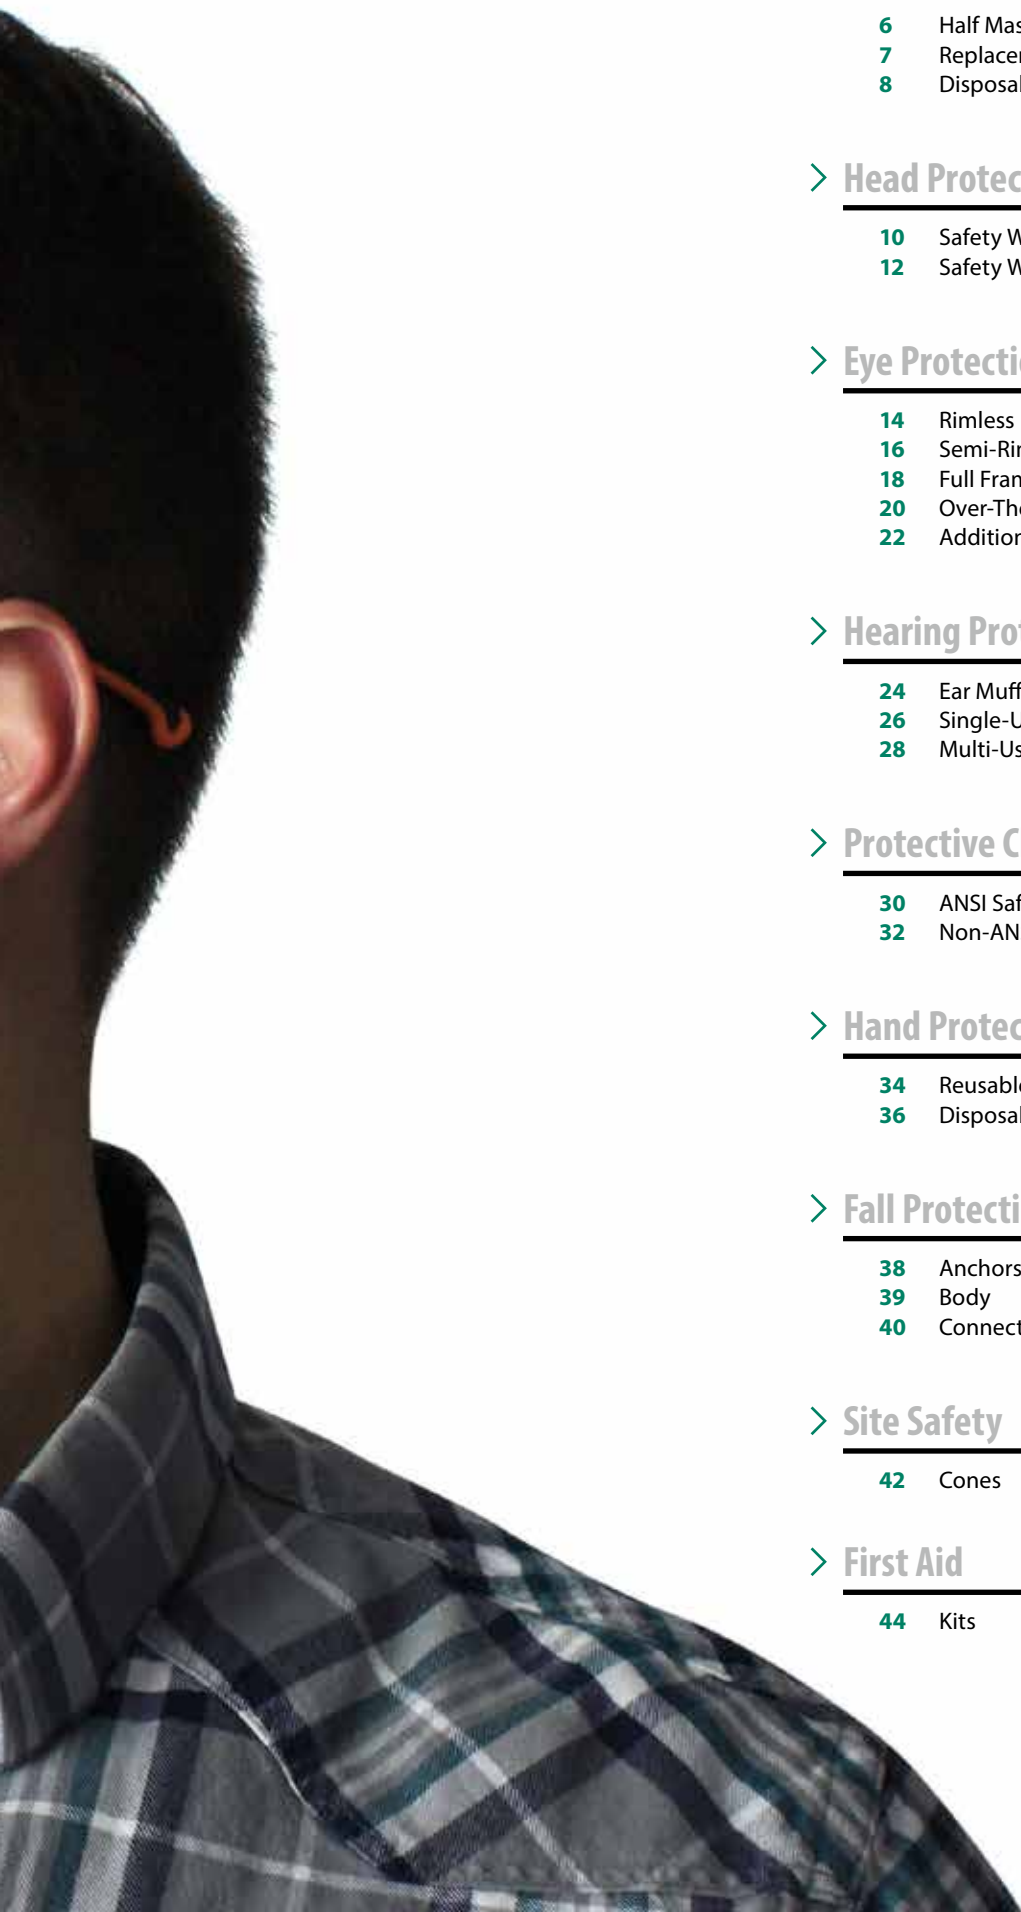

Safety Works®

Safety Works® was first founded in 1998. Since then we've built longstanding and trusted relationships with leading retailers and wholesalers in the retail-focused DIY and contractor market. Our success has been in providing customers with safety products that are priced-right, performance tested and packaged to enhance the shopping experience and sales.

Today, we are part of Protective Industrial Products, Inc., a U.S.-based leader in General Safety products with more than 15 locations across the world and globally integrated logistics and sourcing operations based in the U.S.A. and Hong Kong. With over 80 people in Asia overseeing partner factories, we're able to deliver quality, value and compliance in safety products that is above any of our competitors.

Our focus is exclusively on personal safety. It's all we do, so we're best positioned to assist retail professionals in selecting the best safety products for specific market needs.

> Respiratory Protection

- 6 Half Mask & Full Facepiece Respirators
- 7 Replacement Cartridges & Filters
- 8 Disposable Masks

Driving Value for You & Your Customers

All We Do is Safety

We focus exclusively on personal safety. It's all we do, so we're best-positioned to assist you and your customers in selecting the best safety products for you and their needs. We're never distracted by unrelated product lines; our singular mission is to produce the highest quality personal safety products on the market.

Increasing DIY Sales

We believe in the mission of bringing safety and security to both DIYers and pros. With more people tackling projects around the home and more injuries occurring at home than any other place, we're out to transform safety from a haphazard afterthought to an essential part of every project.

Building Contractor Business

We offer professional quality safety products, previously available only in specialty stores. Contractors are time conscious and brand loyal. The more high quality products they can buy in one place, the more likely they are to shop there regularly.

Respiratory Protection

Safety Works® is a full line supplier of respiratory protection. We offer an assortment of Non-Toxic Dust Masks, Harmful-Dust Respirators and Twin-Cartridge Respirators, as well as a wide variety of replacement cartridges, to provide the right level of protection for every type of project—and with our extensive database of user facial dimensions and our patented design features, our respirators simply fit and feel better than others.

RESPIRATORY RATINGS

Letter Class	Description	Number Class	Description
N	Not oil resistant	95	Removes 95% of all particles that are at least 0.3 microns in diameter
R	Resistant to oil	99	Removes 99% of particles that are at least 0.3 microns in diameter
P	Oil proof	100	Removes 99.97% of all particles that are 0.3 microns in diameter or larger. HE or HEPA quality filter.

Half-Masks

- > Soft facepiece for enhanced comfort
- > Unique hygiene guard keeps mask clean during storage
- > Easy-to-adjust, comfortable head strap

Head Protection

Safety Works® offers you the most complete line of hard hats. Our new Safety Works® Pro line is the most feature rich line and offers up to 10% more coverage protection than traditional-style hard hats. Exceptional style, fit, balance and comfort make it the preferred hard hat of professionals.

We also offer a newly restyled Safety Works® line of affordable hard hats. Proven for heavy-duty on the job performance and offers a secure comfortable fit at a very affordable price. Safety Works® is now the most trusted supplier of exceptional hard hats that includes cap style and full brim as well as vented models that all meet the rigorous ANSI Z89.1.

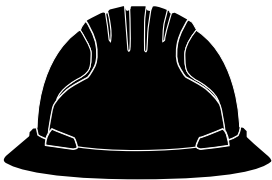

Hard Hats Safety Works® Pro

CAP STYLE

Traditional styling with enhanced strength & protection

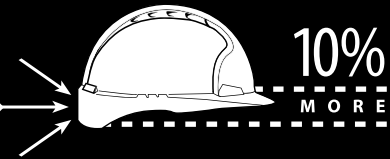

FULL BRIM

Additional protection against sun, glare, rain & falling debris

Deep nape strap design enables firm retention, keeping the hard hat in place even when fully inverted.

EXTRA PROTECTION ZONE

Provides 10% more coverage at the back/sides of the head and neck for extra deflection protection.

PRE-ASSEMBLED

All hard hats are packed ready-to-wear with no assembly of the 6-point suspensions required.

5 RAISED CHANNELS

Deliver enhanced strength and improved balance for a more comfortable user experience.

VENTILATION OPTIONS

Allows air movement inside the shell. This can reduce the inside hat temperature by an average of 4-6°F.

Wheel Ratchet

> Easy-to-use wheel ratchet adjustment system creates a secure, comfortable fit

Eye Protection

Our safety glasses and goggles protect millions of eyes each year. While meeting ANSI and CSA impact and performance requirements, we offer fashion and function within a huge selection of safety glasses and safety goggles for every type of project and price point.

Safety Glasses

- › **Readers** are available in different diopters and help magnify text so it becomes easier to read.
- › **Foam-Lined Safety Glasses** seal better against the wearer's face, helping better protect against dust and other small debris.
- › **Over-The-Glass Safety Glasses** can be worn over prescription eyewear to provide the required protection.

Goggles and Faceshields

- › **Direct Vented** goggles should be used when there is no liquid splash risk. Direct vented goggles have straight-line perforations that allow direct airflow from the work environment.
- › **Indirect Vented** goggles help minimize fogging and should be used when there is liquid splash risk. Indirect vented goggles have hooded vents to allow indirect airflow from the work environment.

Face shields do just that – they protect the face from debris, such as sparks, or certain impacts. Face shields should not be used as a replacement for safety eyewear, as they are designed to be used in conjunction with eye protection products.

Safety Glasses Rimless

Packaging

RETAIL PACKAGED

Glasses packaged ready to be hung on a peg hook.

DISPLAY PACKAGED

Glasses that come tagged and ready to be put onto your eyewear point of sale display.

Lens Treatments

ANTI-FOG

Surface coating that reduces fogging.

Benefit: Maintains clear vision

ANTI-SCRATCH

Hardcoat treatment toughens lens surface.

Benefit: Longer product life

POLARIZED

Built into lens, blocks horizontally angled light.

Benefit: Ultimate glare reduction

I/O

Light mirror coating on clear lens.

Benefit: Reduces pupil adjustment time; unique treatment optimized for indoor/outdoor applications

- > Pressure washing
- > Pesticide spraying
- > Food service production

Hearing Protection

Ear Muffs provide a more secure form of hearing protection, especially because they are easier to use and allow the user to gain maximum protection from the product. There are two types of ear muffs: passive and active.

Ear plugs are the most popular choice because they are seen as the most economical solution and they can easily be worn with other PPE.

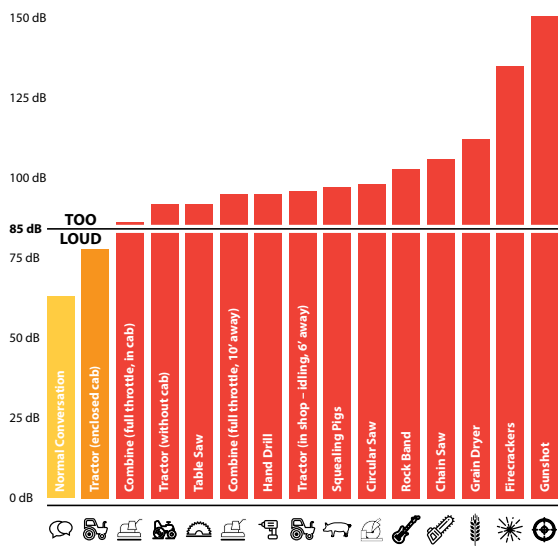

- › **Single Use Ear Plugs** are ideal for use in high-contamination environments and by work-site visitors.
- › **Multiple Use Ear Plugs** are reusable and easy to clean, making them ideal for use in manufacturing, construction and MRO.
- › **Corded** and **Uncorded** options are available in both families. Uncorded is more economical, while the corded plugs are easier to keep track of by allowing the user to wear the ear plugs around their neck when they are not in use.

The correct use of ear plugs is critical to ensuring optimal performance, and we encourage proper training and practice to achieve this. Improper use can minimize or negate the hearing protection properties of the ear plug and expose the wearer to potential hearing loss.

Ear Muffs

Safety Work®s digital ear muffs help limit sound to below OSHA dangerous threshold levels – even when connected to digital music device by wire or Bluetooth®.
