

21st CENTURY

COLLECTION

EXPORT EDITION VERSION 6.2

Since its foundation in 1921, Sakura Color Products Corporation has been continuously inventing leading edge inspiring color products, writing instruments and industrial products based on the policy – “Contribution to Education and Culture” and “Co-existence and Co-prosperity” .

Our first product, “Cray-pas” , was invented in 1925. “Cray-pas” contributed significantly to the development of art education in schools, while it also enhanced the possibilities of artistic expression by painters. Now “Cray-pas” is preferred by many people from children to adults.

With this remarkable success, we could establish a firm position in the domestic market as a manufacturer of art supplies and continue our growth, thanks to the soaring evaluation of our products.

Meanwhile, we are also engaged in various kinds of researches in the hope of transforming our company from a manufacturer of painting materials to all-round stationery manufacturer. In 1982, we invented the water-based pigmented ink “PIGMA” first in the world. It is more stable ink compared to dye-based ink which was being used in most pens at the time.

Sakura Color Products Corporation is steadily building up its position in the global market as an all-round stationery manufacturer through developing, manufacturing and marketing a variety of stationery supplies.

We aim to keep offering quality products for consumer satisfaction. With a spirit of “The finest in quality” as our policy, our Osaka Factory and Kagoshima Factory acquired certification of worldwide accepted quality management system “ISO9001” in 2013.

Our company is also keenly concerned with the future of the Earth. Thus, we have replaced lead tubes, which are harmful to the environment, with more environmentally-friendly polyethylene tubes. Out of the same concern, we obtained ISO14001 certification in 2000. We consider these to be merely the beginning of our environmental efforts. We are determined to further step up our efforts in tackling various environmental issues, including energy conservation and the prevention of environmental contamination, toward a better future.

Sakura Color Products Corporation will take all appropriate steps for next generation, based on our theme – “We are Coloring the Future” .

Fluoride (F ⁻)	N.D.	N.D.	N.D.	N.D.
Iodide (I ⁻)	N.D.	N.D.	N.D.	N.D.
Iron (Fe)				
Copper (Cu)				
Zinc (Zn)	<300 ppm	<300 ppm	<300 ppm	<300 ppm
Lead (Pb)				
Mercury (Hg)				
Sulfur (S)				

N.D. = Not Detected

- Usable on most surfaces.
- Thermal resistance : 100°C ~ -40°C

Making a mark in industry

LOW HALOGEN MARKER

Made in Japan

When rusting is a problem – the low-halogen solution

- ✓ Less than 200 ppm of halogens (EN14582:2007 by ICI)
- ✓ Writes on wet surfaces - even under water!
- ✓ Writable even on rough surfaces

colors ☐ White ☒ Yellow ☐ Red ☐ Black

SOLID MARKER™

Marks clearly, marks firmly

Ultra-heat resistant

Colors: White, Yellow, Orange, Red, Purple, Green, Blue, Black

Solidified Paint Marker

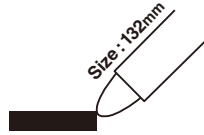

SOLID MARKER™ for High Temperature

Barrel, Cap and Inner cap: PP

The tough marker for the tough job.
