We Created CleanSeal™ TO STOP MOLD FOR GOOD

Les Burch (Owner & President)
Gale Murphy (Head of R&D)

Many products
claim to stop
mold, so why
are we still
suffering?

Despite products with mildewcides, mold is still growing in people's bathtubs. We wanted to know why, so we studied mold at the molecular level and learned it feeds on things we humans leave behind — body oils, shower products, bacon grease. That gave us an idea... if we can eliminate the oils, then we can stop mold from growing in the first place!

Through our research we discovered the power enzymes can bring to caulking. The same enzymes that breakdown oils in your stomach, can now be used to fight mold in our living spaces. So, we went to work and out of that CleanSeal™ was born.

WHITE 10.5 OZ & 6 OZ. ALMOND 6 OZ.

New CleanSeal™

**No mold.
No mildew.**
No scrubbing needed!

THE FIRST EVER
ACTIVE ENZYME CAULK
FOR KITCHEN & BATH

Why does mold grow so quickly?

BECAUSE YOU'RE FEEDING IT!

Mold feeds on body oils, shower products, cooking oils and bacon grease that collect in the corners of your shower and kitchen.

That's why we created CleanSeal™, the first ever active enzyme caulk that eliminates mold food!

By taking away the food, we literally strip mold of its power to grow.

Plus, unlike mildewcides and repellents that wear out over time, our enzymes are permanently active for long-lasting results!

BIO-BASED ENZYMES

Actively powering your caulk

ELIMINATE BUILD UP

Of natural oils that feed mold

SO MOLD CAN'T GROW

You never have to scrub again

THE SCIENCE BEHIND CLEANSEAL™

When you take a shower with CleanSeal™, enzymes go to work in minutes breaking down mold-feeding oils.

Sashco's promise

PRODUCTS THAT WORK!

Easy to use

With smooth application, quick water cleanup and no offensive smells.

Ultra-elastic, moves with your house

Won't crack, tear or pull away.

Great adhesion

Tile, porcelain, glass, metal, fiberglass, granite, marble and countertops.

Zero Risk

Satisfaction guaranteed, or we'll pay a contractor to fix it!
