SENCO Covers All of the Connections

CINCINNATI (March 3, 2016) – The movement and containment of air from the compressor to pneumatic tools is essential to maintaining effective operating pressure. To improve efficiency Senco has introduced its premium Hybrid Hose and an assortment of swivel couplers and plugs.

The hybrid air hose combines the two best features of existing air hoses in the market today. Rubber air hoses offer the best flexibility but, rubber breaks down and will eventually crack and rupture. In contrast, PVC air hoses offer a greater durability, their primary drawback is the lack of flexibility and has a significant memory that will retain the coiled shape especially in cold temperatures. The new hybrid polymer hoses have the flexibility of a rubber air hose but the long life of a PVC air hose.

FEATURES AND BENEFITS

- Ultra flexible even in extreme temperatures (-40° to 150°)
- Lays flat and will not kink when under pressure
- A maximum working pressure of 300-PSI
- Reinforced bend restrictors
- 40% lighter weight than most rubber hoses
- Smooth non-marring finish makes it ideal for indoor trim work where scratching surfaces could create damage

These ¼" hoses come in 50 ft. or 100 ft. lengths and for more demanding applications, Senco offers field repairable hose ends made with aircraft grade aluminum for easy on-site repair without hose clamps.

Quick connect couplers have been around for a long time. They allow a user the ability to quickly and easily attach and disconnect tools from an air hose. Senco's new swivel coupler allows better flexibility of the tool by rotating 360-degrees at a 45-degree angle. This will reduce fatigue and allow the tool to be utilized in tighter work spaces.

Swivel plugs have this same benefit, but they can be difficult to connect to a standard coupler. The small plug tends to swivel as the user tries to make the connection and often times they have to chase the plug as it moves. The swivel coupler still provides the same benefits, but they are much easier to connect. The coupler is held in the hand thus eliminating the chasing effect caused by the swivel coupler.

Both deliver the same air flow as normal coupler and plug and are available in both MPT and FPT styles.

Premium Hybrid Polymer Air Hose with Field Repairable Ends

Hose size	Length	Item #
1/4"	50 ft.	PC1321
1/4"	100 ft.	PC1322

Premium Hybrid Polymer Air Hose with Fixed Ends

Hose size	Length	Item #
1/4"	50 ft.	PC1319
1/4"	100 ft.	PC1320

MSRP - \$30 - \$50

Swivel Couplers — Industrial interchange

Type	Body Size	NPT Size	Pack Qty	Item #
Male	1/4"	1/4" MPT	1	PC1326
Male	1/4"	1/4" MPT	10	PC1327
Female	1/4"	1/4" FPT	1	PC1328
Female	1/4"	1/4" FPT	10	PC1329

Swivel Couplers — Universal

Type	Body Size	NPT Size	Pack Qty	Item #
Female	1/4"	1/4" FPT	1	PC1330
Female	1/4"	1/4" FPT	10	PC1331

MSRP - \$2 - \$8

For more than 60 years, SENCO has helped generations of hardworking professionals get the job done right by delivering innovative fastening solutions that make hard work easier.

As a leader in creating fasteners and power fastening tools for use residential, commercial, manufacturing and industrial applications, SENCO's comprehensive line of air- and battery-powered nailers, staplers and screwdrivers provide exceptional results and let you take pride in a job well done.

Offering a complete line of accessories, compressors, repair kits and parts along with a certified warranty repair network, SENCO is accessible across the globe and distributes a wide product offering through professional distribution outlets in more than 40 countries.

Committed to its heritage and pioneering of this industry, the company proudly manufactures more than eighty percent of its fasteners in its Cincinnati, Ohio facility.
