ONLY THE BEST - GENUINE CHAMOIS

Chamois is the inner split of a sheepskin or alpine antelope 100% fish oil tanned. This is the industry standard as described in Standard CS99 of The Sponge and Chamois Institute and for many years by the FTC. The Chamois is used for drying, for washing windows and mirrors and when dry for polishing surfaces to a high shine.

Chamois' unique qualities and characteristics vary significantly from other leathers. The inner split of the sheepskin, when 100% fish oil tanned, is soft with a relatively open fiber structure that readily absorbs liquids and residual dirt particles and is able to easily release liquids and dirt for superior long-lasting use and repeat performance. Other leathers, such as goat skin, are dense and tough and will not perform in the same manner even when tanned. As a result, goat skin leathers are unable to release dirt particles, which become compacted in the skin interfering with performance.

Chamois' distinctive yellow lustrous color is created during the fish oil tanning process. In order to duplicate that color in non-Chamois leathers, such as goat or pig skin, dyes are frequently used. Dyes may be released on the vehicle or material on which it is used. Dyes are not used with Chamois.

S.M. Arnold, Inc. offers genuine Chamois based on a variation of three important criteria - SIZE, WEIGHT, and most importantly QUALITY - Since 1928!

PREMIUM PAPER FLOOR MATS

Made of matte finish 82# PE (polyethylene) coated on one side of the paper. The heavy amount of PE coating makes this mat one of the best water barrier products while the ridged construction helps to better absorb moisture and resist slipping.

The material's unique durability rivals the heavier photo paper mats on the market while additionally providing an absorbent top surface. PE coating is more durable and superior to the standard glossy "poly-back" which is normally a water resistant acrylic coating that breaks down sooner than the PE coating.

- Useful design: "Footprint" graphic with the words "YOUR BUSINESS IS APPRECIATED" and "Please Drive Safely!"
- Very strong and absorbent - designed to outlast acrylic poly-back and photo paper mats.
- Absorbent top layer of 60# paper laminated to a thick 22# layer of durable polyethylene.
- Ridged profile for better water absorption and to minimize slipping.
