TIPS FOR LAWN CARE SUCCESS

Feed Regularly

Regular feedings provide the nutrients your lawn needs to look its best and withstand the stresses of weeds, heat, drought & family activity. Check with your local Cooperative Extension Agency to obtain specific information on local turf best management practices. Check with your county or city government to determine if there are local regulations for fertilizer use.

Benefits of Multiple Feedings

1 ANNUAL FEEDING

2-3 ANNUAL FEEDINGS

4 ANNUAL FEEDINGS

Mow and Leave the Grass Clippings On Your Lawn

Mowing high allows the grass to develop a deep root system, compete against weeds, & helps your lawn use water more effectively. Grass clippings left on the lawn recycle plant nutrients back into the soil.

Conserve Water

Well-fed lawns are more efficient at using available water. Feeding with Scotts® Lawn Food helps grow a thick lawn with more roots to better absorb water and nutrients than an unfed lawn. This helps protect your lawn against heat, drought and other stresses. Remember, your lawn will begin to wilt when water is needed. As much as possible take advantage of nature's sprinkler and rely on the rain to water your lawn.

SCOTTS® RECOMMENDED FEEDING ROUTINE
Plan your feeding routine with
Scotts® Liquid Turf Builder® Lawn Food

EARLY SPRING

An early spring feeding helps grass green-up after the winter. You should feed around the first time you mow your grass.

LATE SPRING

Feeding now prepares grass for summer stress by thickening the blades on top and building deep roots below.

EARLY FALL

An early fall feeding replenishes the nutrients lost in the harsh summer months for quicker recovery. You should feed your lawn as it recovers from summer stress.

LATE FALL

Late fall is the best feeding time because it builds strong deep roots and prepares grass for winter. You should feed when all the leaves have fallen.

Florida Applications: 4 annual feedings with the following exceptions: On centipedegrass do not exceed 2 lb of Nitrogen per 1000 sq ft in the north and 3 lb of Nitrogen per 1000 sq ft in the central and south. On bahiagrass and zoysiagrass do not exceed 3 lb of Nitrogen per 1000 sq ft in the north.

FOR BEST RESULTS

- If lawn needs watering, water thoroughly 24 hours before application.
- Do not cut grass 1 to 2 days after application.
- Do not apply when temperatures exceed 85°F.
- De necesitarlo, riegue bien el césped 24 horas antes de aplicar el producto.
- No corte el césped sino hasta 1 o 2 días después de la aplicación.
- No aplique el producto cuando la temperatura exceda los 29°C.

HOW TO APPLY

- This bottle applies 1.35 lb of product per 1,000 sq ft.

Connect: 1. Shake well before using. 2. Connect sprayer to hose. 3. Turn on water. 4. Extend hose to farthest area of the measured area to be treated.

Spray: 1. To begin spraying, point nozzle in the direction you want to spray. 2. Slide thumb activation switch forward to ON position. 3. Spray evenly over measured area.

Finish: 1. To STOP spraying, slide thumb activation switch backward to OFF position. 2. Turn off water. 3. Relieve water pressure by sliding thumb switch to WATER position until water slows to a drip. Then, slide switch back to OFF position. 4. Disconnect sprayer from hose.

- Apply only to actively growing turf. Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn.

- Con esta botella se aplican 0.61 kg de producto por cada 93 m².

Conecte: 1. Agite bien el producto antes de usarlo. 2. Conecte el rociador a la manguera. 3. Abra la llave del agua. 4. Extienda la manguera hasta el punto más distante del área medida que se fertilizará.

Rocie: 1. Para empezar rociar apunte la boquilla en la dirección en la que desea rociar. 2. Deslice la palanca de activación con el pulgar hacia adelante a la posición "ON" (encendido). 3. Rocíe uniformemente sobre toda el área.

Finalice: 1. Para TERMINAR de rociar, deslice la palanca de activación con el pulgar hacia atrás a la posición "OFF" (apagado). 2. Cierre el paso de agua. 3. Para disminuir la presión de agua, deslice la palanca con el pulgar a la posición "WATER" (agua) hasta que la salida del agua se convierta en un goteo; luego, deslice nuevamente la palanca a la posición "OFF" (apagado). 4. Desconecte el rociador de la manguera.

- Aplique al césped que esté creciendo de manera activa, únicamente. No aplique cerca del agua, drenajes pluviales o zanjas de desagüe. No aplique si se pronostican lluvias intensas. Aplique este producto al césped, únicamente.
