Scotts® *& Your Environment*

We care. Scotts® products are designed with care to grow a thicker, greener lawn. **A Green Lawn is a Good Lawn** – A healthy lawn cleans the air, produces oxygen and prevents runoff and soil erosion. **You can make a difference** – help keep our water resources clean. Apply this product only to your lawn.

FINISH

- When finished feeding, slide thumb activation switch backward to the OFF position. Turn off water.
- Relieve water pressure by sliding thumb switch to the WATER position until water slows to a drip, then slide switch back to OFF position.

ADDITIONAL INFORMATION

- Apply only to actively growing turf. Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn.

This bottle applies 1.4 lb of product per 1000 SQ FT.

Check with your local cooperative extension agency to obtain specific information on local turf best management practices.

Check with your county or city government to determine if there are local regulations for fertilizer use.

How to Apply

CONNECT

- Connect sprayer to hose.
- Extend hose to farthest point of the area to be fed.

FEED

- Point nozzle in the direction you want to spray.
- Slide thumb activation switch forward to ON position.
- Spread evenly over entire area.

SCOTTS® RECOMMENDED FEEDING ROUTINE
Plan your feeding routine with
Scotts® Liquid Green Max™ Lawn Food

EARLY SPRING

An early spring feeding helps grass green-up after the winter. You should feed around the first time you mow your grass.

LATE SPRING

Feeding now prepares grass for summer stress by thickening the blades on top and building deep roots below.

EARLY FALL

An early fall feeding replenishes the nutrients lost in the harsh summer months for quicker recovery. You should feed when your grass comes out of dormancy.

LATE FALL

Late fall is the best feeding time because it builds strong deep roots and prepares grass for winter. You should feed when all the leaves have fallen.

TIPS FOR LAWN CARE SUCCESS

Feed Regularly

Regular feedings provide the nutrients your lawn needs to look its best and withstand the stresses of weeds, heat, drought & family activity.

Benefits of Multiple Feedings

1 ANNUAL FEEDING 2-3 ANNUAL FEEDINGS 4 ANNUAL FEEDINGS

Mow and Leave the Grass Clippings On Your Lawn

Mowing high allows the grass to develop a deep root system & helps your lawn use water more effectively. Grass clippings recycle the plant nutrients back into the soil.

Conserve Water

Well-fed lawns are more efficient at using available water. Feeding with Scotts® Lawn Food helps grow a thick lawn with more roots to better absorb water and nutrients than an unfed lawn. This helps protect your lawn against heat, drought and other stresses. Remember, your lawn will begin to wilt when water is needed. As much as possible take advantage of nature's sprinkler and rely on the rain to water your lawn.

INFORMACIÓN ADICIONAL

- Aplique al césped que esté creciendo de manera activa, únicamente. No lo aplique cerca de agua, drenajes pluviales o zanjas de drenaje. No lo aplique si se esperan lluvias intensas. Aplique este producto al césped, únicamente.

Con este envase se aplican 0.63 kg del producto por cada 92 metros cuadrados.

Consulte con su organismo de extensión cooperativa local para obtener información específica sobre las prácticas recomendables para el manejo del césped local.

Consulte con el gobierno de su condado o de su ciudad para determinar si existen normas locales que rijan el uso de fertilizantes.

Cómo aplicar

CONECTE

- Conecte el rociador a la manguera.
- Extienda la manguera hasta el punto más distante del área que se fertilizará.

FERTILICE

- Apunte la boquilla en la dirección en la que desea rociar.
- Deslice la palanca de activación con el pulgar hacia adelante a la posición "ON" (encendido).
- Rocíe uniformemente sobre toda el área.

FINALICE

- Cuando termine de fertilizar, deslice la palanca de activación con el pulgar hacia atrás a la posición "OFF" (apagado). Cierre el paso de agua.
- Para disminuir la presión de agua, deslice la palanca con el pulgar a la posición "WATER" (agua) hasta que la salida del agua se convierta en un goteo; luego, deslice nuevamente la palanca a la posición "OFF" (apagado).
