This skin assures that the absorbent material will not get into the bilge and possibly foul moving parts. Great way to avoid fines from pumping oil overboard. Help keep our waterways clean. Convenient tie downs keep booms in place.

## PYRAMID ANCHORS

Pyramid anchors provide excellent holding power and work in tidal waters and rocky or sandy bottoms. They are superior to concrete blocks because the anchor rapidly sets itself by presenting a digging edge to penetrate the bottom. The pyramid shape presents a large surface area which creates high suction that increases the deeper it sets. The short shank allows mooring in shallower waters without chain wrap-up, a characteristic of mushroom anchors.

## Understanding Seachoice Part Numbers

The first four digits of our part number refer to the actual part while the last digit refers to the type of packaging.

**Part numbers ending with 1:** The items are packaged in our self-merchandised visual packaging. They are either “Carded”, “Poly-Bagged” with an information header or “Clam Shell” that is free standing and/or has peg hook display capability. All packaged items include barcode.

**Part numbers ending with 0:** The items are in bulk form which may consist of either a hangtag, reel or no packaging whatsoever. Some bulk items include a barcode.  
(**Example:** 11501 = 1150 in Packaged form. 11500 = 1150 in Bulk form).

**Part numbers ending with 2:** The item is a kit, or collection of otherwise individually packaged and/or bulk Seachoice items contained in a single box which is barcoded for sale as a combined unit.
