GEAR THE WAY YOU'D DESIGN IT®

Kevin Lee & Bullet

SPORTDOG® SALES MANAGER

Labrador owner (Cooper), bird hunter, deer hunter, and fisherman

That's not some marketing mumbo-jumbo written by a bunch of suits. We really are just like you and your buddies: Obsessed with dogs and hunting. And, like you, we spend as much time as possible walking the prairie, roaming the woods, or searching the sky from a waterfowl blind. We also respect the hunting tradition and know the importance of conservation. For all those reasons and more, we'll continue to create our products based on the guiding principle of providing *Gear The Way You'd Design It.*®

OUR GEAR LEADS THE FIELD
BECAUSE WE'RE ALWAYS IN THE FIELD

Lance Tracy & Roxy

CCO

English Setter owner (Roxy and Lulu), bird hunter, and big game hunter

In an industry seemingly overcrowded with electronic dog training products, Radio Systems Corporation's renewed venture into the sporting dog market with the creation of SportDOG® Brand in 2003 might have appeared to be driven only by misguided ambition. However, that was far from the case. Our broad line of superior products is the result of focusing on a promise we made to our customers on day one: We will deliver *Gear The Way You'd Design It.*®

We have made good on that promise by literally designing our products in the field. A concept is nothing more than a concept until we analyze it with challenges such as heat, cold, rain, snow, dust, mud, and wind in mind. Every sportsman knows such conditions are just part of the hunt. So, once we've built a prototype product, it's back to the field for rigorous testing with input from everyone on our staff. To us, these field sessions are just another day at the office. And they are the difference between products that look good on paper or in advertisements and those that actually perform the way you demand.

That's how we've been operating from the beginning. It must have been what the industry needed, because today, SportDOG Brand is one of the most recognized brands in the electronic dog training category. Our products are known not only for their quality, but also for being the best value for the dollar out there. Over the years we have added to our product lines, offering more variety. But no matter how fast we grow or how large the SportDOG name becomes, we will never forget our promise to keep making *Gear The Way You'd Design It.*

TEK
::2.0

SportDOG® Brand was first to combine GPS tracking with e-collar training. With TEK 2.0 technology, tracking and training is more reliable and more accurate than ever. Our voice feature, with Bluetooth, sends your dogs' location and direction to your earpiece, not just the Handheld. Enjoy total control of your dog, or even up to 21 dogs (by simply adding TEK-2AD collars), with premium training features, along with feedback on their locations, via preloaded, full-color 1:100,000 topo maps. Simply put, this system lets you hunt and navigate with confidence.

CATEGORY MANAGER

Labrador owner (Skeeter), bird hunter, deer hunter, and fisherman

The waterfowler hunts in unique settings and needs top performance from his most important asset: his retriever. So SportDOG® Brand created a series of remote trainers specifically to meet those demands. The WetlandHunter® Series isn't some old products reintroduced with a new name. It was designed from the ground up by pros like Charlie Jurney, Chris Akin, and Tom Dokken, to name just a few members of the SportDOG team who stake their livelihood on how well their dogs perform. All Transmitters and Collar Receivers are guaranteed waterproof and submersible, and they look outstanding – without standing out – because they are finished in Realtree Max-5® camo.

FIELD
TRAINER®

:::425

Gretchen Goodson & Fern

MARKETING MANAGER

Labrador owner (Tibbs) and bird hunter

The FieldTrainer® 425 Series is loaded with technical breakthroughs in the smallest package available in this price range. Features such as 3-dog capability and waterproof/submersible Transmitters and Receivers are among the most advanced features ever offered in a mid-range training system. The comfortable "soft-coat" Transmitter finish makes these palm-of-the-hand sized units a pleasure to use. And because we know that no two dogs are alike, we've designed the 425S model to provide higher stimulation power for larger or stubborn dogs.

UPLAND
HUNTER®

1875

From the big wide open of the prairie to the thick tangles of northern alder swamps, keeping tabs on hard-running pointing dogs calls for unique gear. Our UplandHunter® System fills that niche. This is the pinnacle of SportDOG® efficiency. A situation-programmable Transmitter controls a compact, waterproof Collar Receiver and at the same time remotely operates a rugged, waterproof, audible Beeper. Control and flexibility are always at your fingertips. Like most SportDOG Brand® systems, the UplandHunter remote trainer is easily expandable to multi-dog use with Add-A-Dog® collars.

NOBARK

SBC-R

The SportDOG Brand® NoBark SBC-R allows you to customize the type of bark control that works best for your dog by allowing you to choose from 3 programmable training modes: Temperament Learning, Progressive Correction, and User-Selected, as well as 10 levels of static stimulation. Unlike anything before it, the SBC-R quickly determines your dog's unique bark using our Silent Partner™ technology, and filters out all the rest, so it'll perform in either a single-dog home, or a kennel full of barkers. Either way, you'll have the most superior bark detection.
