TENAX COMPANY OVERVIEW

OUR COMPANY

Tenax Corporation is one of the largest manufacturers and distributors of plastic netting, fencing, and geosynthetic products in the USA. Our range of products and their related

uses is vast, from netting and fencing for industrial and civil engineering applications, to gardening and do-it-yourself products for retail applications. Tenax Corporation is part of a world-wide group of companies that operates commercially through its own subsidiaries and authorized distributors in more than 50 countries, spanning 5 continents.

OUR SERVICE

With our 500,000 sq. ft. of warehouse space strategically located in three geographical areas, we stock every product in our line, enabling prompt

delivery. Our teams of professional personnel are trained to the highest standards of shipping logistic and safety to ensure that your order reaches your sales point timely and in perfect condition.

OUR BRAND

We undertake regular product and packaging research to create innovative products and eye catching design. Each product is carefully assessed for its suitability and supported with attractive merchandising.

GARDEN FENCE

HOME FENCE

Home Fence is our strongest garden fence, ideal for flowerbeds, vegetable patches, and gardens. Also great as a long-term fence attached to a wooden frame. The 2 foot height is great as a border fence, or as a trellis for climbing vines of any type.

Actual Mesh Structure

POULTRY FENCE

Poultry Fence is our best selling "garden fence". It can replace traditional chicken wire in many applications, but holds its shape better and will not deform, stretch, rust, rot or corrode. Use it around plants or entire gardens for pest deterrence.

Actual Mesh Structure

GARDEN FENCE

NEW

Tenax Garden Fence is a standard, economical, yet attractive garden barrier that can be used to replace galvanized wire, security for wooden fences or decks, provide visual barriers for pets, and for use around flower or vegetable gardens.

From balconies to gardens, from vegetable patches to aviaries, Tenax plastic mesh is designed for separating, protecting, decorating, and fencing. Products treated to become resistant to time and wear. Strong and easy to install.

UTILITY NETS

MULTI-PURPOSE NET

A great mesh which is often used as a barrier - for bird control in eaves, over ornamental ponds, for fruit and vegetable cages, and in its most popular use, attached to balcony and deck railings for additional safety.

Hardware Net is our best selling utility product. With a small, sturdy mesh it makes great vegetable cages, or can be used as a gutter cover, vent cover, tool shelf liner, or for temporary fence repair. This plastic hardware net is easier to install than metal hardware cloth and will not rust, rot or corrode.

MILLENNIUM FENCE

Millennium combines the strength and versatility of the Multi-Purpose products, with the familiar color of galvanized metal. This silver plastic mesh is great to line fences because it looks like welded wire, but it won't rust, corrode or bend out of shape creating dangerous edges.

Tenax plastic fencing products are affordable alternatives to metallic nets and easier to install. Made from polyuerthene plastic, they maintain their characteristics and color over the years.

DEER FENCE & NETTING

DEER & BIRD STOP

GOOD

Deer & Bird Stop is an economical net for enclosing small areas which need protection from deer damage. Deer & Bird Stop is also ideal for seasonal protection when a fence is not needed year-round. It can be easily installed and removed and is reusable from year to year. It can also be used to cover plants or along the ground as a deer deterrent.

Actual Mesh Structure

DEER NET FOLDED

BETTER

Deer Net Folded is a popular deer net because it is folded when packaged allowing the products to be easier handled and merchandised. This is recommended for enclosing areas with deer traffic and sporadic deer damage.

Actual Mesh Structure

C-FLEX

BEST

C-Flex is our strongest and most popular fence. It is great for enclosing large or small areas which need protection from deer damage. Also, C-FLEX is ideal for seasonal protection when a fence is not needed year-round. It can be easily installed and removed, and is reusable from year to year.

GARDENING SOLUTIONS

VEGETABLE SUPPORT NET

This trellis netting is perfect for climbing vines, vegetables or flowers. When used vertically, its support keeps plants from sprawling on the ground, thereby, increasing yields and decreasing disease and rot. It can be used horizontally to support flowers and vegetables from falling over and breaking at the stems.

Actual Mesh Structure

ALL-PURPOSE NET

This light weight, but versatile net is virtually invisible when installed. It is ideal for keeping birds and deer out, thus protecting ripening fruit and sown seeds.

Actual Mesh Structure

PRO-SEEDER

The Pro-Seeder works by creating a vacuum to pick up and hold seeds on its tip for easy planting. It makes sowing easy and helps reduce seed wastage.

SILT FENCING

SILT FENCE

Tenax Silt Fence is engineered to prevent soil loss at the worksite - be it a home project, special event, construction, or a large scale project. After all, nothing beats silt fence at preventing soil loss. TENAX Silt Fence is a lightweight woven fabric that allows fluids to pass through while trapping soil particles, preventing soil loss from the work area. TENAX silt fence comes conveniently pre-attached to posts, so no expensive machinery is required for installation.

Actual Mesh Structure

SILT FENCE DISCLAIMER

As indicated in the specification TENAX tests per ASTM D435; meeting or exceeding a value of 70% retained after 500 hours of UV exposure.

Although TENAX sources some of the best woven geotextiles using the best available antioxidant packages, please note that strength values indicated in the specification are only 70% retained after 500 hours or 21 days of UV exposure. TENAX Corporation can only warrant those materials for this time period. This recommendation is based on UV performance data published in technical literature indicating geotextile's strength can decrease sharply after prolonged exposure to sunlight.

SAFETY FENCE

Tenax provides a diverse range of high quality safety and snow fencing products. Known for the orange safety fence, Tenax products offer many benefits: long lasting, highly visible, strong, economical, and low maintenance. Tenax offers a variety of fencing products in various strengths, colors, and sizes. Mesh configurations vary from diamond to oval meshes.

With all Tenax safety fences we offer a good, better, best approach. Tenax offers the Guardian Warning Barrier when price is the main factor, and Sentry Secura or Beacon Plus when

strength is a must. The competitive edge of TENAX products is due to the particular care we take in defining the most cost-efficient shipping units. All products are packed in pallets, which

dimensions allow for the optimization of truck and container loads, and thereby, remarkably reducing the freight cost for the customer.

CONSTRUCTION FENCE

GUARDIAN - ECONOMY

Guardian is our best selling safety product. It makes a very economical barrier for any situation. It is great for special events, fairs, festivals, carnivals, parades, and sporting events where areas of temporary fence must be installed and removed quickly.

Actual Mesh Structure

GUARDIAN - WITH STAKES

TENAX Guardian-with Stakes comes conveniently pre-attached to sturdy wooden posts, so installation is quick and easy. The pre-attached wood posts keeps the Guardian fence firmly intact and helps to prevent sagging.

Actual Mesh Structure

KRYPTONIGHT - FLORESCENT

Kryptonight complements the florescent stop signs, vests, and cones, which are now used in many county municipalities, replacing the traditional orange. Its brilliant color is specifically designed for high visibility at night and is FHWA approved.

SAFETY FENCE

CONSTRUCTION FENCE BEACON PLUS

Beacon Plus is a great all-around fence. Use around large areas of construction for perimeter protection, HazMat applications, or where strength is a concern. It is also available in green when the high visibility of orange is not needed.

Actual Mesh Structure

SENTRY SECURA

Sentry Secura is a safe, smooth, and attractive safety fence that will suite any worksite project. Sentry Secura has a diamond mesh and a solid top and bottom edge to resist snagging and sagging over long term use.

Actual Mesh Structure

SENTRY - ECONOMY

Similar to the Sentry Secura in appearance, but more economical. Sentry-Economy has a smooth top and bottom border and is a great alternative to Sentry Secura if price is an issue.

SNOW FENCE

SAF-T-SNO

Saf-T-Sno is a UV stabilized fence with oval mesh openings designed to slow wind and create drifts for snow storage or where they will not interfere with roadways, driveways, or runways. Strong HDPE plastic resists wind damage and remains flexible in freezing temperatures.

Actual Mesh Structure

SNO-GUARD

Sno-Guard is our most popular snow fence and is available in both green and orange. Our most economical snow fence has been used effectively in various commercial applications and settings. Parking lots, airports, and industrial facilities have all benefited from Sno-Guard's efficient snow-control design. Home owners love "green" because it is esthetically pleasing and blends into the scenery.

YARD PROTECTION

YARD PROTECTION

Actual Mesh Structure

DRIVE & PARK ON YOUR LAWN

TENAX Yard Protection is a high density polyethylene mesh designed for protecting and reinforcing grassed areas to be used by lightweight vehicles. Once established, TENAX Yard Protection will protect the grass roots from damage and help prevent wheel rutting. Due to its unique design, TENAX Yard Protection proves to be extremely flexible and provides a visually pleasant and stable surface structure through which grass can be grown.

TENAX Yard Protection Mesh consists of two panels. It is almost invisible after 2-3 months of a grass-growing season. The finished effect is a naturally green environment with a stabilized surface.

INSTALLING YARD PROTECTION

Installation is easy and quickly carried out by simply rolling out the two mesh rolls over the area to be protected or parked on. Once that area is determined, cut the grass short and ensure that the area is as level as possible and clear of any protruding stones. Unroll the two Yard Protection tracks in accordance to the distance between your vehicles left-side and right-side tires. Flip the mesh over so it goes against the grass and pin down with fixing pins. Although it is not necessary, it is best to install TENAX Yard Protection Mesh in the Spring when the grass will grow quickly through the mesh. Also ideal for temporary parking for RVs, boats, tail-gate parties, special events, and yard sells.

FLOORING

INTERLOCKING PAVERS

Tenax combines the natural attractiveness and outstanding durability of eucalyptus and slate with the simplicity of a click-together interlocking system. Designed to be quick and easy to lay in a variety of

colors and patterns, requiring only a flat solid surface for installation. An excellent means of covering unattractive indoor or outdoor expanses of concrete. Also, ideal for balconies, patios and verandas.

Each product comes with eye-catching POP, informative literature, and an energetic marketing campaign.

Solid square natural slate pavers. Perfect for areas of heavy use outdoors such as pathways. If needed, can be cut with wet saw.

Flat strong eucalyptus wood pavers in a rich mid brown flavor. Contemporary interlocking design. If needed, can be cut with a circular saw.

FLOORING

NATURAL STONE CARPETS

Stone Carpets make an ideal alternative to heavy paving slabs and loose gravel. Stone Carpets are created by bonding stones to a flexible extruded mesh allowing each mat to be shaped to suit almost any surface. Designs are only restrictive to your own creativity and installation is simple and effective. Ideal for patios,

pathways, driveways, walls, indoor flooring, conservatories and other garden areas. Also suitable for indoor use.

SCREENING

NATURAL YARD SCREENING

TENAX decorative screens are made from natural products. Perfect for creating secluded and screened areas within the garden without preventing the free circulation of air.

TENAX natural screens can be secured to terraces, balconies, chainlink, or wooden fence to provide shade and protection

against the wind, and for creating areas of privacy. Also, the screens are ideal to hide unattractive equipment in the yard such as air-conditioners, pumps, tanks, and sheds.

TENAX offers three ranges of natural screens in original colors and various sizes.

REED SCREEN

This lightweight screen is a quick and economical fix to an existing area. Available in two sizes.

FERN SCREEN

Natural fern, woven into an attractive rustic-effect screen. Available in two sizes.

COFFEE & CREAM SCREEN

An attractive two-tone natural fern screen. The two-tone contrast offers a bold modern look. Available in two sizes.

THE TENAX ADVANTAGE

CUSTOMER ASSISTANCE

“Thank you. You’ve reached the TENAX Corporation. How may I help you?” That’s the friendly greeting you will get when you reach a TENAX Client Relations Specialist. You’ll get a person who is eager to answer your questions, complete your orders, and assist in any problem-solving needs. To us, the client is king. We go out of our way to make sure that all your request are met. So should you have a question or would like to place an order for any of the products in this catalog, please do not hesitate to give your regional representative a call, or call our direct line.

1-800-356-8495

OUR DISTRIBUTION DEPTH

As part of the Tenax chain of distributors and retailers, you are part of a huge family. You can take comfort in knowing that you are along side distributors and retailers with experience, integrity, and reputation. In short, distributors and retailers who have come to trust and respect the TENAX brand and sell our products with confidence.

DISPLAYS THAT GET NOTICED

Determining how packaging, POP, and displays look are just as critical as the care and attention that goes into creating a product. Truth is, a great product will not get much attention if it doesn’t have a “STOP. LOOK. BUY.” presentation. To help us create such, we gather research from surveys, focus groups, graphic experts, and of course, our customers. In addition, we put careful thought into easy-installation and shipping of our displays and packaging. In the end, you get displays, POP, and packaging that gets attention, which translates into customers that buy.

WE'RE ALWAYS ADDING NEW AND
INNOVATIVE PRODUCTS TO OUR LINE.
PLEASE VISIT OUR WEB SITE TO SEE
WHAT IS THE LATEST AND GREATEST.
