C 13 CONDUIT	3/8 OZ.	2"	G, N

All Lures Are Individually Blister Carded and Packed 12 Per Box

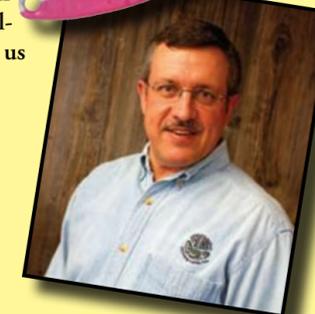

As the popularity of the original designs of Thomas Spinning Lures continues to grow so does the demand for new colors and finishes. We've added smarter eyes, dramatic, vibrant colors and even reflective flecks to some of our already popular selections.

Keeping up with the changes fisherman require takes a lot of work on our part, but when we get the cards and letters from fishermen all over the world telling how Thomas Lures out-fish most of everything they've used before, it makes us work even harder.

Yes, we're still a privately-owned small company with a handful of dedicated employees who are still providing American made, quality fishing lures at reasonable prices. Our operation is still in the same town and same buildings where the company started more than 60 years ago.

Send us your photo of fish caught with a Thomas lure and we may use it on our next brochure. Contact us with questions or comments, and thank you for using Thomas Lures.

Sincerely,   
Peter R. Ridd, President

"We traveled deep into several lakes in Quebec, far from stores, traffic and telephones. Everyone thought they were well-stocked in the lure department. After several days of fishing, very few fish to show for our efforts, and limited time left. I decided to do some experimenting with the many lures in my tackle boxes. The first lure out for use was your E.P. Spinn lure. I tied it on and cast it out to a likely looking spot. WHAM!!! First cast and I tied into the biggest trout of the trip! After the next cast I knew the first wasn't a freak because I caught another beautiful trout. Unbelievable! My friends were going crazy ....luckily I brought plenty of leaders or I may have been drowned on the spot. We all caught many fish those last two days thanks to your fantastic lure. You certainly saved our trip and helped make some lasting memories to boot. ...A loyal fan forever!" G.E.J. New Bloomfield, PA

In the earliest days of America, rods, reels and assorted paraphernalia were imported from Europe as indicated in the letter of August 1737 when William Penn's daughter Margaret Penn Freame wrote to her brother in London, "...my chief Amusement this summer has been Fishing. I therefore request the favor of you when a Leisure Hour will admit, you will buy for me a Rod and Reel with strong good Lines and assortment of hooks the best sort..." While some very early Thomas Lures were fashioned after successful European designs, all Thomas Lures have always been manufactured in the United States. We are proud of our traditions, and we are sure that you will not find a better crafted fishing lure manufactured abroad or in America.
