

THOMPSON/CENTER

America's Master Gunmaker®

2016 CATALOG

**YOUR PURSUIT
OF EXCELLENCE
STARTS WITH OURS**

Rob Dunham of The Zone and Moment of Impact

We're as passionate about firearms as the many hunting and shooting enthusiasts we serve and support. Since 1967, Thompson/Center Arms™ has been synonymous with firearms that stand up in the toughest situations and perform when it counts. With features like interchangeable barrels, 5R rifling, uncompromised quality, and innovative design, Thompson/Center is the brand that delivers value and reliability you won't find anywhere else. That's why today's top hunters rely on T/C®. We're proud to offer American-made firearms and back them up with knowledgeable support and a Lifetime Warranty. We know that missed moments can't be refunded, there is no replacement value for the trophy that got away. There are only so many shots of a lifetime out there and we're ready to help you with each one.

Thompson/Center™ Accessories, a proud member of the Smith & Wesson® Family, is operated by Battenfeld Technologies, Inc.®, a subsidiary of the Smith & Wesson Holding Corporation.

Battenfeld Technologies, Inc. is the industry leading manufacturer of shooting, reloading, gunsmithing and gun cleaning supplies. Battenfeld Technologies, Inc. produces innovative, top quality products under Caldwell®, Wheeler Engineering®, Tipton®, Frankford Arsenal®, Hooyman®, Bog-Pod®, Non Typical Wildlife Solutions™, Lockdown®, Golden Rod® Smith & Wesson® Accessories, M&P® Accessories and Thompson/Center™ Accessories.

A FEATURE-RICH HUNTING RIFLE THAT'S EASY ON THE WALLET

NEW

3-LUG BOLT DESIGN

Simple, rugged design lends itself to years of reliable service and top-notch accuracy and reliability.

3 POSITION SAFETY

Provides visible and tactile feedback as to position of the safety. Provides locked, load/unload and fire positions.

MAXIMUM SCOPE CLEARANCE

The 60 degree bolt lift provided by the 3-lug bolt design gives the shooter maximum clearance between the bolt handle and a mounted scope - for fast cycling.

THREADED MUZZLE W/THREAD PROTECTOR

Threaded Muzzle for Compatible Compensators, Muzzle Brakes, and Suppressors

Threaded Muzzle For Suppressor
 $\frac{5}{8}$ - 24 UNEF for 243 & larger
 $\frac{1}{2}$ - 28 UNEF for 204, 223 & 22-250

ADJUSTABLE TRIGGER

Crisp, single-stage trigger is user-adjustable for weight of pull and minimum over-travel.

FLUSH FIT ROTARY MAGAZINE

The detachable, compact rotary magazine fits flush with the stock for easy carrying and no snags. The low-maintenance polymer magazine provides smooth feeding in a rust-proof, durable package. 5-rnd capacity in standard calibers and 4-rnds in magnum calibers.

❑ INTRODUCING THE T/C® COMPASS® - A GREAT CHOICE OF RIFLES FOR SERIOUS HUNTERS ON A BUDGET.

BUILDING ON A HERITAGE OF ACCURATE, AFFORDABLE FIREARMS - FROM A TRUSTED AMERICAN BRAND. FEATURES INCLUDE:

- Trigger offers a crisp release for precision shooting.
- Ergonomic, lightweight stock combines a classic look with modern contours and textured grip panels.
- Soft rubber recoil pad gives maximum felt recoil reduction.
- Three-lug bolt with 60 degree handle lift provides good scope clearance and a smooth, easy cycling action.
- Aluminum pillar bedding with a bedding system that positively locates the receiver and free-floats the barrel for outstanding accuracy.
- Button-rifled barrel, with 5R rifling - that provides outstanding accuracy and easy cleaning.
- Features an easy-to-use 3-position safety (with bolt lock) that provides positive tactile feel, clear visibility and easy accessibility.
- Detachable (5-round std cal., 4 round mag cal.) rotary magazine fits flush with the stock and provides smooth feeding.
- Comes with Weaver-style bases and sling swivel studs.

5R rifling's unique design provides benefits to the shooter by causing less bullet deformation. The edges of each land do not cut into and deform the bullet jacket. When the bullet jacket is less deformed, there will be less jacket fouling in the grooves. This results in accuracy from shot to shot, greater bullet stability over multiple shots, and ultimately, a rifle that's easier to clean thoroughly.

(MOA) Minute Of Angle - T/C's match grade barrels with 5R rifling deliver guaranteed Minute of Angle accuracy... 1" (3 shot) groups at 100 yards with premium ammunition.

THE THOMPSON/CENTER ARMS™ VENTURE™ BOLT-ACTION RIFLE LINE-UP

AFFORDABLE, ACCURATE, AMERICAN-MADE

Gregg Ritz of Hunt Masters TV

THE T/C® VENTURE™ IS A LEADER IN BOTH VALUE & PERFORMANCE

DETACHABLE 3-ROUND MAG

All models come with a reliable, low-maintenance, 3-round nylon magazine

NITRIDE-COATED BOLT

For smooth operation with no "break-in" period required

ADJUSTABLE TRIGGER

User adjustable for weight of pull between 3.5 & 5 lbs.

T-SLOT EXTRACTOR

The bolt face fully surrounds and supports the cartridge head and provides excellent engagement with the cartridge rim without compromising bolt lug engagement. The plunger ejector is both simple and effective

5R rifling's unique design provides benefits to the shooter by causing less bullet deformation. The edges of each land do not cut into and deform the bullet jacket. When the bullet jacket is less deformed, there will be less jacket fouling in the grooves. This results in accuracy from shot to shot, greater bullet stability over multiple shots, and ultimately, a rifle that's easier to clean thoroughly.

(MOA) Minute Of Angle - T/C's match grade barrels with 5R rifling deliver guaranteed Minute of Angle accuracy... 1" (3 shot) groups at 100 yards with premium ammunition.

BLUED STEEL

T/C® VENTURE™ BOLT-ACTION RIFLE with Weaver-style scope bases factory installed

Versatility never looked so good. The T/C® Venture™ bolt-action rifle comes with Hogue® traction panels, a rich blue finish and guaranteed MOA accuracy in all calibers. The best-selling Venture combines high-end features with a remarkably low price tag. With an user-adjustable 3.5 to 5 lbs. trigger, pillar bedding, and accuracy you can count on when you are presented with that shot of a lifetime.

Rifle comes with Weaver-style bases installed

WEATHER SHIELD®

Built with the hardcore all-season hunter in mind, the T/C® Venture™ Weather Shield® bolt-action rifles represent a higher standard of reliable accuracy. Tell more stories about the ones that didn't get away. When you need a rifle that makes the shot rain or shine. The innovative exterior coating is nearly impervious to rust, protecting your investment wherever and whenever the hunt may take you.

The NRA's "2013 Rifle of the Year" The Dimension® rifle brings most big-game animals into play. Instead of buying multiple rifles (each with a new trigger and feel to get used to) you can set out on all your hunts with the Dimension. Simply switch out the barrel to the caliber your next hunt demands. You'll be ready for any game, using the right caliber, at nearly any distance. It's always T/C® Dimension® season.

RIGHT HAND MODEL

T/C® DIMENSION® RIFLE Matte Blue finish, composite stock. Offered in a variety of chamberings that can be changed out to suit the game you're after.

The Dimension® is a technological leap in quality, versatility and value for bolt-action rifles. It has interchangeable components that allow you to change calibers, each one guaranteed to deliver minute-of-angle accuracy. Now you can shoot multiple calibers, from 204 Ruger to 300 Win Mag, in the same bolt-action rifle with just a quick component change. The secret behind Dimension® is our Locking Optimized Components System. See Pages 12 & 13 for details.

A
B
C
D

Interchangeable barrels, bolts, magazine groups (magazine and housing) allow you to change calibers to hunt nearly any game animal in the world. LOC system components listed separately.

ArmorSoft® STOCK COATING

For a secure grip under any weather conditions

5R RIFLING

Less bullet deformation and copper fouling for guaranteed accuracy

60° BOLT LIFT

For maximum scope clearance and fast cycling

STEEL ON STEEL CONTACT SURFACES

3-Lug bolt locks securely into steel barrel extension

THE T/C® DIMENSION® PLATFORM IS THE MOST ADVANCED BOLT-ACTION EVER MADE

Key to the interchangeability of the Dimension® is the Locking Optimized Components (LOC) System. The LOC System consists of a universal stock and receiver that accepts multiple barrels, magazine groups, bolts and bridge scope mounts, and are grouped into four Dimension® Caliber Series (color coded and labeled A, B, C and D). Picking out the right LOC system at the store and assembling it at home is as easy as matching the bolt and magazine group to a barrel of the same series. LOC System stocks, receivers, bridge scope mounts and hand tools can be used with any of the Series components.

Greg Zipadelli of Drop Zone TV

3-LUG, FLUTED BOLT

For lighter weight and a smooth, non-binding action

ALUMINUM PILLAR BEDDING

Helps ensure consistent and repeatable accuracy

MASSIVE RECOIL LUG

Locks against steel barrel extension and receiver for superior accuracy

ADJUSTABLE TRIGGER

User adjustable for weight of pull between 3.5 & 5 lbs.

INTERCHANGEABLE BOLT-ACTION PLATFORM - AND COMPONENTS TO SHOOT MORE CALIBERS.

T/C® DIMENSION® INTERCHANGEABLE COMPONENTS

(MOA) Minute Of Angle - T/C's match grade barrels with 5R rifling deliver guaranteed Minute of Angle accuracy... 1" (3 shot) groups at 100 yards with premium ammunition.

Example: If you already own a Dimension® in 30-06 Springfield and you want to make it a 223 Remington, use your current stock and receiver, then choose a 223 Remington caliber barrel. It comes packaged with the correct magazine group (magazine and housing/spacer). Your new 223 Remington barrel falls under Series A in the table, so choose a right- or left-hand Series A bolt. If your new barrel/caliber is in the same series (A, B, C or D) as the rifle you already have you won't even need a new bolt.

INTERCHANGEABLE DIMENSION® LOC BARRELS

Barrels fit all stocks and receivers, right- or left-hand. They come packaged with the correct magazine group (magazine and housing). Barrels are stamped with Series letter (A, B, C or D) to help you easily identify the correct magazine group (magazine and housing) and bolt required to use it.

T/C® DIMENSION® RIFLE BARREL ONLY SPECIFICATIONS - FITS BOTH RIGHT HAND & LEFT HAND MODELS - COMES WITH CORRECT MAGAZINE & MAGAZINE HOUSING

ITEM #	CALIBER	DESCRIPTION	WEIGHT	BARREL	MAG CAP	TWIST	LOC FAMILY

MUZZLELOADING RIFLES - ACCURACY & EASE OF MAINTENANCE

- ❑ **T/C® STRIKE™ MUZZLELOADING RIFLE** Offering today's shooters and hunters innovative and useful features such as:
- The Adapt™ Breech system, which moves the threads to the outside of the barrel, thus eliminating seized breech plugs and assists in simplifying the cleaning process. The threadless primer adapter holds a 209 primer for fast, reliable ignition.
 - Armornite® corrosion protectant metal finish - a rugged nitride coating that gives protection on the INSIDE (where most corrosion and pitting occurs) and the outside of the barrel. This not only increases accuracy, but extends the useful life of your rifle.
 - The precision 24" barrel has a 1:28" rifling twist for optimal performance with today's sabots and high-performance projectiles.
 - The Stealth Striker™ ambidextrous cocking system is whisper quiet and eliminates scope clearance issues that plague traditional hammer cocking systems.
 - The match-grade trigger, which adds a smooth-breaking, crisp trigger pull that allows the shooter consistency shot after shot.
 - Each T/C® STRIKE™ muzzleloading rifle is proudly made in the USA!

QUICK LOAD ACCURIZOR® MUZZLE

Allows the shooter to quickly and easily load his/her muzzleloader by incorporating a false muzzle design into the end of the barrel.

MATCH GRADE TRIGGER

A crisp, consistent and light trigger pull is crucial and essential to your accuracy. The T/C® Strike's light pull and zero overtravel will make you a better, more confident shooter.

SIMPLE TAKEDOWN

Just remove the front swivel stud/take-down screw and the forend and barrel separate from the receiver assembly. Cleaning made easy.

1 IN 28" TWIST RATE

PRECISION RIFLED BARREL with QLA®
There is no more important part to your rifle than your barrel. Accurate out of the box and our Armornite™ coating keeps it that way.

STEALTH STRIKER™

Hammers can be noisy and hard to reach with a scope. The innovative Stealth Striker™ system is quiet, easy to use and gives the best clearance for scopes. Slide it forward till it locks and shoot, that's it! No more fumbling.

ARMORNITE® CORROSION PROTECTANT

Corrosion is still the biggest issue that any muzzleloader hunter or shooter deals with. This is a protectant that protects every inch of the barrel and critical components.

ADAPT™ BREECH SYSTEM

The primer adapter eliminates the need for threading inside the barrel which is the leading cause of seized breech plugs. Also gives you the ability to change out your primer adapter to different configurations, to optimize ignition performance with your propellant of choice - loose or pellet.

MULTI-TOOL INCLUDED

A wrench, palm saver and range rod handle, all in one easy to carry tool. The light, compact design makes it easy to throw in your pocket for field maintenance & loading.

STRIKE™

THOMPSON/CENTER™ MUZZLELOADING RIFLES

PRECISION, AMERICAN-MADE HUNTING GEAR

Some still consider patience a virtue. T/C® muzzleloader hunters know it's not just the gear you put on, but the time you put in. When you hunt for the moments, and you only get one shot, make it count with T/C® muzzleloading rifles.

Jim Shockey of Jim Shockey's Hunting Adventures

A T/C® technology that all Thompson/Center™ muzzleloading rifles come with is the patented QLA®... Quick Load Accurizer®. QLA® makes loading simple and fast. Unlike other muzzleloaders, QLA® allows the hunter or shooter to quickly and easily load his/her muzzleloader by incorporating a false muzzle design into the end of the barrel. In the midst of the hunt, this will help you save precious time when loading that second shot. **Standard on all T/C® Muzzleloaders.**

T/C® searched the world for the most advanced, tough as nails, corrosion protection system. Weather Shield®, when applied to the barrel and other critical metal parts, makes the gun nearly impervious to rust. In vigorous environmental testing, Weather Shield® proved 50X more corrosion resistant than stainless steel alone. **Offered on select firearms throughout the Thompson/Center™ line.**

The Patented Speed Breech XT® has revolutionized modern muzzleloaders and made T/C® muzzleloaders the easiest to clean. Simply turn 90° by hand and pull it out - it's that fast! Speed Breech XT® eliminates 95% of the fouling thanks to three gas compression rings similar to those found on a piston in a gas engine. The Speed Breech XT® also does not get seized like other breech designs due to its unique opposing series of locking lugs, which are similar to those found on a howitzer (cannon). It's practical innovations like this that help to take the work out of the hunt. **Speed Breech XT® is standard on Triumph® and Triumph® Bone Collector® and Pro Hunter XT™.**

The T/C® Power Rod® is a Patented pivoting handle integrated with a solid aluminum ramrod. With a convenient low profile T-handle, loading your muzzleloader is quicker and less painful than ever. **The Power Rod® comes standard on the Triumph® Bone Collector® and is also available as a T/C® Authentic Accessory.**

.50 CALIBER NON-INTERCHANGEABLE MUZZLELOADING RIFLE

PRO HUNTER FX™ SINGLE SHOT MUZZLELOADING RIFLE - SPECIFICATIONS

PRO HUNTER FX™ .50 CALIBER MUZZLELOADING RIFLE

With all the great looks, quality and accuracy made popular by the original Encore® Pro Hunter XT®, the Pro Hunter FX™ is a fixed barrel (non-interchangeable) muzzleloader you can trust. You'd think FX somehow stood for features with all that comes with this sharp looking muzzleloader.

The Pro Hunter FX™ features a Weather Shield® break-open action and fluted 26" barrel and includes the QLA® Muzzle System for easy loading. The new Speed Breech® 3 hand-removable breech plug makes cleaning just as easy, and adjustable Williams™ Fiber Optics come standard as well.

Michael Waddell

Professional hunter Michael Waddell fills his tags with the muzzleloader coined after his nickname, the T/C® Triumph® Bone Collector. From the accuracy and innovation, to the touch and feel, the American-made Bone Collector meets and exceeds the standards of the most discerning black powder hunters. You're not going to find a better-equipped muzzleloader out there than the T/C® Triumph® Bone Collector with the ultra-light frame, made from aircraft-grade aluminum, and the features you need, but not the bulk you don't. Features ¼-turn breech plug removal, simple-to-use design for ease of use and care. It's the most natural handling muzzleloader you'll find anywhere. The T/C® Triumph® Bone Collector accepts magnum charges of up to 150 grains of FFG black powder, or equivalent black powder substitute. So get a T/C Bone Collector today and "Get in the Brotherhood."

THE FIRST CHOICE FOR SERIOUS HUNTERS

❑ SINCE 1997, THE SLIGHTLY LARGER AND HEAVIER FRAME OF THE ENCORE® SINGLE SHOT SYSTEM (AS COMPARED TO THE G2 CONTENDER®) HAS TAKEN PERFORMANCE & VERSATILITY TO NEW LEVELS OF POWER AND RANGE.

- Break-open (by pulling up and back on the trigger guard spur)
- Outstanding accuracy and reliability
- Blued, stainless & camo components readily interchange
- Wide selection of interchangeable barrels available in many different cartridges, as well as magnum muzzleloader barrels, and 20 gauge or 12 gauge shotgun barrels.

Encore® Pro Hunter™ with
Flextech® Stock Design
© 2009 Smith & Wesson Corp.

Installing a new barrel in a new caliber on the Encore® or G2 Contender® is a snap!

All Encore® & Encore® Pro Hunter™ barrels will interchange on any Encore® or Encore® Pro Hunter™ Frame - stainless steel, camouflage and Weather Shield® included. Check Local, State & Federal laws for rifle/pistol conversion regulations.

Boasting a legacy that began with the original Contender® pistol in 1967, Thompson/Center™ is the leading gunmaker producing switch-barrel firearms and versatile shooting platforms. Offering more variety than any competitors, T/C® interchangeable platforms give shooters unprecedented options to create their ideal gun. A market leader in the Encore® family of products, the Encore® Pro Hunter XT™ is built for the ultimate hunter. You don't need the smoke to clear to know you took the perfect shot, but you do need a muzzleloader that performs on your level. The reliable Encore® Pro Hunter XT™ .50 caliber muzzleloader features a FlexTech® recoil reducing stock, Quick Load Accurizer® with reduced rifling at the tip for easy loading, Weather Shield® coating and a Patented ambidextrous Swing Hammer®.

All Encore® & Encore® Pro Hunter™ barrels will interchange on any Encore® or Encore® Pro Hunter™ Frame - stainless steel, camouflage and Weather Shield® included. Check Local, State & Federal laws for rifle/pistol conversion regulations.

is included.

Sling
swivel
studs

Designed for optimum concealment and accuracy, the Encore® Pro Hunter™ Predator features a Realtree Advantage HD Max-1® camo finish, FlexTech® recoil reduction system and one of the most accurate rifle barrels on the market. Built to help outsmart nature's wariest predators, the T/C® Encore® Pro Hunter™ Predator features break-open action, an ambidextrous Swing Hammer®, and a fluted barrel with match-grade crown for enhanced accuracy. Finished with Realtree Advantage HD Max-1® camo and a sleek design, the Encore® Pro Hunter™ predator is ready for your toughest hunts. After you bag a few coyotes, switch to a different barrel for your next challenge.

*The Hunt Never Ends™ -
When you've scouted
every field and marked
every map.*

*When there's no more
ground to cover and
no more heart-shaped
tracks pointing the way.*

*When your gun has no
place else to point and no
more stories to tell.
Only then will we call
it the off-season.*

Wade Middleton of Yamaha Whitetail Diaries, Americana Outdoors & Cabela's Deer Gear

ACCEPTS ANY ENCORE® OR ENCORE® PRO HUNTER™ BARREL FOR MAXIMUM ADAPTABILITY

The Encore® Pro Hunter™ pistol is the most versatile, high-powered pistol in the world, with long range performance and value unequalled by any other. The Encore® is a single-shot, "break open" style pistol capable of "minute of angle" accuracy and offers interchangeable barrels to match your game. It features a patented (Patent #5680722) automatic hammer block safety with a bolt interlock, is chambered for some of the most popular high performance rifle cartridges in this country and is capable of serious long range shooting. Whether a serious varmint hunter or a big game hunter, if it's the thrill of handgun hunting you're looking for, the Encore® pistol is the handgun that will do it all.

The Encore® Pro Hunter™ model has an engraved frame

THE THOMPSON/CENTER™ G2 CONTENDER® INTERCHANGEABLE FIREARMS SYSTEM

THE FOLLOWING PAGES SHOW SEVERAL COMPLETE FIREARMS &
THE FRAME ASSEMBLIES & BARRELS TO BUILD YOUR OWN PISTOL OR RIFLE COMBINATION

Original Contender Print Ad - circa 1970

**□ SINCE THE FIRST
CONTENDER® PISTOL WAS MADE
IN 1967, IT HAS BEEN THE CHOICE
OF SERIOUS HANDGUN HUNTERS
AROUND THE WORLD.**

From plinking and small game hunting with rimfire cartridges, to varmint and big game hunting with centerfire rifle cartridges, the Thompson/Center™ G2 Contender® continues to be the handgun of choice for those shooters and hunters who pride themselves in wanting only the best, most versatile handgun in the world.

**G2 CONTENDER® COMPATIBILITY WITH OLD-STYLE
CONTENDERS:** The G2 Contender® frame will accept all Contender® barrels and their corresponding forends (except the Herrett forend). Blued or stainless barrels are readily interchangeable.

Barrels for the G2 Contender® can be changed quickly and easily by removing the forend, tipping the barrel open and tapping out the hinge pin. All Contender® barrels will fit; blued and stainless barrels are interchangeable.

SINGLE SHOT PISTOLS

All Barrels are drilled and tapped for scope mount

Adjustable sights

Precision rifled barrels in a variety of calibers

Once you have the grip and frame - any Contender® barrel will fit - blued or stainless steel. The sights or scope stay sighted-in when you change a barrel out for a new one.

Once you have the stock and frame - any Contender® barrel will fit - Blued or Stainless. The sights or scope stay sighted-in when you change a barrel out for a new one.

Check Local, State & Federal laws for rifle/pistol conversion regulations.

G2 CONTENDER® BARRELS

With simple barrel interchangeability, time-proven long range accuracy and adaptability between rimfire and centerfire, the versatility of the G2 Contender® is unmatched by any other interchangeable platform in the world. The second-generation G2 Contender® is even more user-friendly in the field than Thompson/Center's original Contender®. In addition to the 40 barrel choices to match the accuracy and caliber range of any hunt, the G2's grip, frame and forend have been profiled and sculpted for a modern, streamlined appearance.

❑ G2 CONTENDER® 23" RIFLE BARRELS - Drilled & tapped for scope mount

❑ G2 CONTENDER® PISTOL BARRELS All Contender® Barrels will fit on the G2 Frame

SCOPES

No.35008652 Matte Black Finish 3-9x

❑ HAWKEN™ HUNTER SCOPES

Thompson/Center's Hawken™ Hunter scopes are offered in a selection of magnifications to meet the demands of both rifle and muzzleloading hunters. With fully coated lenses to provide maximum light gathering for those early morning or late afternoon shots. Nitrogen-filled to prevent fogging. One inch tube diameter.

- Multi-Coated lens for a bright, clear image even in low-light conditions
- Innovative one-piece main tube design makes this scope more durable
- Durable turret material and precision machining to guarantee a lifetime of accuracy
- Nitrogen purged to prevent fogging
- Large field of view for easy Target acquisition
- Strict assembly control for an accurate adjustment

CASES & SLINGS

SOFT-SIDED GUN CASE

This soft case fits all scoped Encore®, Contender® and muzzleloading rifles. Made of heavy canvas with a molded T/C® Logo, it features rubber end caps for added protection.

No.35007513

ENCORE® RIFLE CASE WITH BARREL POUCH

Full length soft case to accommodate the Encore® rifle with or without scope. Side pouch holds one extra barrel - scoped or not. Great for taking your Encore® system to the range or on your next hunt. Rugged construction and thoroughly padded to provide excellent protection.

No.35007478

ENCORE® RIFLE BARREL CASE

Deluxe padded case accommodates all Encore barrels with forend and scope attached. Outside is polyester material that is wear resistant; inside is soft nylon tricot to protect the barrel's finish. Includes nylon carrying strap and acetate I.D. window.

Inside Dim: 33 ½" L x 4 ½" W x 2" H.

No.35007412

ENCORE® & CONTENDER® RIFLE BARREL CASE

This case fits Encore® and Contender® rifle barrels. Made of vinyl with tricot lining and a velcro closure.

No.35007490

NEW

HUNTER'S BINO STRAP

- Securely holds binoculars close to the chest
- Adjustable elastic straps to guarantee perfect fit
- Built for the active hunter/adventurer
- Helps eliminate neck stress
- Heavy Duty synthetic materials are designed to be scent resistant and won't wear out
- Multiple mounting options for binoculars included

No.35009701

NEW

HP NEO RIFLE SLING

A rugged rifle sling constructed of heavy duty neoprene providing strong but padded shoulder strap. Adjustable for wide range user heights and rifle sizes, this strap is slip resistant so it will stay put and be comfortable for the longest trek. Quick detach swivels included.

No.35009700

LEATHER FACED SLING WITH QUICK REMOVE SWIVELS

High quality leather faced sling with embroidered T/C® logo and included quick detach swivels.

No.35007584

T/C® SLING IN REALTREE AP CAMO WITH EASY SWIVELS

Camo-faced sling with easy screw swivels and neoprene grip design. Quick detach swivels included.

No.35007587

MUZZLELOADING RIFLE SLING WITH SPEED SHOTS

A rugged rifle sling with built-in, quick-detachable swivels that will fit most muzzleloaders. Comes with two accessory Speed Shots. Gives shooter instant access to two reloads. Sling spreads the load over a large area to provide maximum comfort. Embellished with T/C® logo.

No.31007502

STATE OF THE ART MUZZLELOADING PROJECTILES

The Shock Wave® bullet has a harder lead core with thicker walls interlocked for controlled expansion and maximum weight retention. This means deep penetration at extended ranges and maximum down range energy transfer.

THOMPSON/CENTER™
SHOCK WAVE®
Bonded Core Bullets
in Super Glide™ Sabots

A premium spire point projectile for muzzleloaders that will penetrate tough hide and bone with no separation of core and jacket. The bonded Shock Wave® Bullets will deliver deep penetration and a destructive wound channel, no matter what the range, and with expansion that is over twice the original diameter. The bonded core and thicker jacket means this bullet will stay together when driven through the shoulders of deer, and even heavier game like elk, moose or bear. Comes with Super Glide™ Sabots for easy loading.

ITEM #	Caliber	Weight	Construction	Quantity
17008245	.50	250 Grain	Bonded Core	15
17008235	.50	300 Grain	Bonded Core	15

THOMPSON/CENTER™
SHOCK WAVE®
Controlled Expansion Bullets
in Mag Express® Sabots

A precision spire point bullet with a polymer tip specifically designed as a muzzleloading projectile. Shock Wave® incorporates modern technology previously applied only to centerfire rifle bullets. Shock Wave® is as advanced as today's muzzleloaders and their propellants. The polymer tip does double duty; it increases the Ballistic Coefficient for sustained high velocity down range, and it punches into the pocket to open up the nose cone for fast expansion.

The result is 3" less drop at 200 yards, and devastating energy at velocities between 1,000 ft/sec & 2,200 ft/sec. The Shock Wave® has a harder lead core with walls interlocked with the jacket for maximum weight retention and expansion. Pick the bullet that will come up to the standards of your muzzleloader. Comes with the Mag Express® Sabots for top velocity and accuracy.

ITEM #	Caliber	Weight	Qty/Pkg
17008244	.45	200 Grain	15

STATE OF THE ART MUZZLELOADING PROJECTILES

THOMPSON/CENTER™ CHEAP SHOT™ SABOTS With Hollow Point Bullets

Cheap Shot™ Sabot Bullets offer the hunter a more economical alternative to the jacketed bullets that are available. The all-lead 240 grain hollow point bullet provides the shooter with the same basic ballistics and trajectory. A muzzleloader sighted in with 240 grain jacketed bullets will be “right on” with Cheap Shot™ Sabot Bullets. Point of impact will be the same. These bullets are ideal for the hunter who does a lot of pre-season practice, or the hunter who prefers an all lead projectile (or is required by law to use one). The deep hollow point cavity provides maximum expansion and down range energy transfer... at a fraction of the cost.

No.17008296 For .50 cal. rifles, 240 grain HP Bullet, Pkg. of 20

THOMPSON/CENTER™ SUPER 45 XR™ SABOTS With HP XTP™ Bullets

T/C® Super 45 XR™ Sabots provide magnum performance with centerfire weight bullets without the punishing recoil. The 180 grain centerfire weight bullets have a flatter trajectory because of increased velocity while also providing deep penetration and nearly 2 times the expansion of the bullet's original diameter. Super 45 XR™ Sabots provide superior accuracy at both standard and hyper velocities. Devastating at long ranges. Driving penetration on the largest of game animals.

No.17007759 For .45 cal. rifles, 155 grain XTP™ Bullet, Pkg. of 30

THOMPSON/CENTER™ XTP™ BULLETS Jacketed Hollow Point in Mag Express® Sabots

T/C® XTP™ bullets, known for their tremendous expansion, are the choice for any big game animals. They offer superior performance with conventional charges, or magnum charges of up to 150 grains of black powder or Pyrodex equivalent (or three Pyrodex Pellets). Comes with the Mag Express® Sabots for precision accuracy.

ITEM #	Caliber	Weight	Type	Quantity
17008246	.50	240 Grain	XTP™ Bullet	30
17008294	.50	300 Grain	XTP™ Bullet	30
17008287	.54	250 Grain	XTP™ Bullet	30

THOMPSON/CENTER™ SURE FIRE™ Jacketed Hollow Pt. Bullets in Mag Express® Sabots

An economy sabot bullet combination providing shooters with the same ballistics and trajectory offered by the more premium Mag Express® Sabots but at a fraction of the cost. Sure Fire™ sabot bullets feature a 230 grain copper jacketed hollow point bullet. The deep hollow point cavity provides quick expansion and maximum energy transfer on impact.

No.17008206 .50 cal. Sure Fire™ Sabots; 230 grain bullet. Pkg. of 20

THOMPSON/CENTER™ SUPER GLIDE™ SABOTS

Add your own bullets!

❑ SUPER GLIDE™ SABOTS - 50 PK (EMPTY - YOU ADD BULLET)

The Super Glide™ sabot is the first sabot that can be loaded easily with one hand. Space age synthetic material is used to create this easy loading sabot. The two petal design supports the bullet for optimal rotational stability and breaks away when exiting the muzzle for match-grade accuracy.

No.17008252 For .50 cal. rifles - (Uses a .452" diameter bullet)

THOMPSON/CENTER™ MAG EXPRESS® SABOTS

Add your own bullets!

Mag Express® Sabots are designed to be used with jacketed or lead pistol bullets. They load easily and are designed to separate from the projectile quickly. This rapid separation means superior accuracy, as the projectile is influenced less by the “drag” of the sabot, while on its way to the target.

ITEM #	Gun Caliber	Use with	Diameter
17008277	.50	.44 cal. bullets	.429" - .430"
17008281	.50	.45 cal. bullets	.451" - .452"

Quantity: 50 Loose Mag Express® Sabots

TRADITIONAL MUZZLELOADING PROJECTILES

THOMPSON/CENTER®
MAXI-BALL™
SUPERIOR
PENETRATION

The T/C® Original Maxi-Ball® has been used extensively by target shooters and hunters for almost 20 years. Its reputation as an exceptionally accurate bullet is unequalled. The wide lubricating grooves allow generous amounts of lube, the key to easy and consistent loading. Prelubed Maxi-Balls® are lubricated with Natural Lube 1000 Plus Bore Butter eliminating the need to wipe the bore or clean between repeated shots.

Box of 20 Maxi-Ball™ Pre-lubed with Natural Lube 1000 Plus™ Bore Butter		
16007895	.50 caliber	320 Grain
16007795	.50 caliber	370 Grain

❑ PILLOW TICKING ROUNDBALL PATCHES

Shooters learned long ago that the same properties which existed in pillow ticking were conducive to making excellent round ball patches. The tight weave 100% cotton fabric is rugged, resists tearing and prevents burn-through. Prelubricated with Natural Lube 1000 Plus™ Bore Butter. Biodegradable and non toxic. Uniform thickness assures consistent shot to shot velocities. 100/bag.

No.31007135 .32-.36 cal. **No.31007136** .45-.50 cal.
No.31007137 .54-.56 cal. **No.31007138** .58 cal.

THOMPSON/CENTER®
MAXI-HUNTER™
MAXIMUM
EXPANSION

T/C's CAD designed Maxi-Hunter® bullet incorporates all the features of the world famous Maxi-Ball®, superb accuracy and easy loading, with the added benefit of maximum expansion on deer-sized game. The greatly improved terminal ballistics for deer-sized game have made the Maxi-Hunter the primary choice of those who specifically concentrate on hunting the special deer seasons. T/C's newly designed Maxi-Hunters® are pre-lubed with Natural Lube 1000 Plus™ Bore Butter eliminating the need to wipe the bore clean between shots.

Box of 20 Maxi-Hunter® Pre-lubed with Natural Lube 1000 Plus™ Bore Butter		
17007885	.50 caliber	275 Grain
17007785	.50 caliber	350 Grain

❑ SWAGED LEAD ROUND BALLS

For those hunters who prefer (or are required by law) to use patched roundballs in their muzzleloader. These precision swaged, pure lead roundballs are sized properly to work with any rifle or pistol of appropriate caliber. Used with T/C® patches lubricated with Natural Lube 1000 Plus™ Bore Butter these round balls will give superior accuracy. **No.16008276** .50 cal. Round Balls (100/box, 175 grain weight)

❑ 100% COTTON ROUNDBALL PATCHES

Uniform thickness, these economical 100% cotton patches are available prelubricated with T/C® Natural Lube 1000 Plus Bore™ Butter, or unlubricated. Non-toxic, biodegradable. 100/bag

No.31007030 .45-.50 cal. Unlubed
No.31007043 .45-.50 cal. Lubed
No.31007034 .54-.56 cal. Unlubed

SPEED LOADERS

❑ RIP-CORD SPEED LOADER

A unique speed loader with your second charge just a quick pull away. Attach the carabiner to your belt, suspenders, or pack and then pull the tube away from its top and load your charge. The bottom houses a 209 capper for instant priming plus a spare. Made of Bio-Flex, a special medical-grade silicone material which will withstand frigid conditions and still be pliable.

No.35009613

❑ SPEED SHOT™ - 2 PACK

The Speed Shot™ holds a magnum muzzleloader charge for quick follow-up shots. The tubes can be cut to fit your specific loads. Over-sized gripper allows for fast reloading. Speed Shots can be used alone or in conjunction with our sling, belt pouch or stock pouch. 2 per pack.

No.31007498

❑ U-VIEW® FLEX LOADER

A unique loader that contains everything you'll need for three shots, all in a compact carrier. The rugged and flexible carrier holds three loading tubes, each containing the projectile and charge. When the back up charge is needed, the loading tube is pulled out of the holder and "dumped" down the bore pellets first, followed by the projectile. The carrier also holds four 209 shot shell primers and has a lanyard hole to attach it to your bag or pouch. Made of Bio-Flex, a special silicone material which will withstand frigid conditions and still be pliable. Loading in the field doesn't get any easier than this. For .50 cal. or .45 cal. rifles. Accepts magnum charges of three Pyrodex® Pellets with sabot.

No.35008031 U-View® Flex Loader

No.31007238 Pkg. of 3 Replacement Tubes

❑ MUZZLELOADING AMMO TUBES

3 convenient muzzleloading ammo tubes. Use them as a handy way to carry spare sabots or Pyrodex® pellets. These can also be cut or sized to accommodate your specific charge with sabot, converting each tube to a handy and speedy loading tube. Seat your projectile on top with Pyrodex® pellets on the bottom; remove bottom cap and dump. It's that easy.

No.31007232

❑ QUICK SHOT® LOADING TOOL

Holds a pre-measured powder charge, projectile and priming in a waterproof container. Use with patch and ball, Maxi-Ball™ or Sabot, the QuickShot® may be used with either a percussion or flint lock rifle. Simply flip open the waterproof cover (3/pk).

No.31007027 .45 Cal. (Green)

No.31007029 .54 Cal. (Blue)

No.31007104 .50 Caliber Magnum

No.31007109 .54 Caliber Magnum

The Magnum Quick Shot holds a pre-measured powder charge of up to 150 grains of loose Black Powder or Pyrodex® equivalent - or three Pyrodex® 50 grain equivalent pellets.

❑ .50 CAL. MAGNUM QUICKSHOT® VALUE PACK

Here's real value for magnum shooters. The .50 caliber QuickShot® with (3) .50 cal. Mag Express® Sabots & 240 grain XTP bullets. All you have to do is add your favorite black powder or Pyrodex® charge and you're ready for the field.

No.31007004

❑ 4-N-1 QUICKSHOT®

Everything you need for quick loading, all in one handy package. Incorporates all the features and advantages of our famous Quick Shot® with the added features of a bullet starter. Now one tool does it all: (2 per pack).

- Carries your powder
- Carries your projectile
- Carries your cap
- Serves as your bullet starter
- Also holds a 209 Primer in recess on the top.

Holds pre-measured powder charges (up to 150 grains of black powder or Pyrodex® equivalent or three Pyrodex® 50 grain equivalent pellets).

POWDER MEASURES & FLINTLOCK

ADJUSTABLE BLACK POWDER MEASURE

Compact solid brass measures quickly adjust to the required charge for muzzleloading rifle or pistol. Accurate and simple to operate. Positive snap ring "clicks off" each increment of adjustment and holds cavity at desired volume. Measures 50-120 grains in 10 grain increments.

No.31007040

T/C® MAGNUM POWDER MEASURE

Designed specifically for use with any of the in-line T/C muzzleloaders when using magnum charges of up to 150 grains of Black Powder or Pyrodex® equivalent. 10 grain increments.

No.31007102

FIELD POWDER MEASURE

Compact lightweight powder measure with solid brass cup and durable polymer adjusting sleeve marked in 10 grain increments from 20 to 120 grains. Brass locking setscrew can be locked into infinite positions - at graduated marks or between them.

No.31007152

U-VIEW® ACCESSORY

U-VIEW® POWDER MEASURE

Allows you to see the exact level of the powder in the tube. Eliminate the guesswork of loading consistent charges with this handy, lightweight measure. Includes loading spout that swivels out of the way to fill the measure. Locking shaft is a cinch to adjust. Prevents pouring partial charges caused by bridging of powder. Graduated in 5 increments from 15 to 125 grains.

No.31007222

U-VIEW® ACCESSORY

U-VIEW® BLACK POWDER FLASK

At last, a see-through powder flask that makes it easy to monitor your powder supply. This Lexon device is small enough to easily fit in your pocket or possible pouch yet it holds enough powder for about a dozen reloads. Easy to control spring loaded plunger for dispensing powder into a measure.

No.31007224

HUNTER'S BLACK POWDER MEASURE

A lightweight powder measure with knurled collet which locks the cavity at any setting from 20 to 120 grains. Has a sliding funnel and calibrated adjusting sleeve made of durable polymer to reduce weight. Marks indicate 10 grain increments.

No.31007048

FLINTLOCKS

FLINT LOCK RIFLE FIELD KIT

All the basics you will need for flint lock maintenance while in the field. **Contains:** pan brush, jaw tightening rod, stainless steel touch hole pick and small screwdriver with 3 different size blades for a multitude of uses including rear sight adjustment. Lightweight and compact. All tools provided on a handy key ring.

No.31007099

FLINT LOCK PAN CHARGER

The knurled end screws off the solid brass tube for easy filling. Holds approximately 80 grains FFFFG (4F) Black Powder. Dispenses a small amount of priming powder. Each dispensed charge fills the pan of a T/C® rifle one-half full.

No.31007020

*NOTE: The Pan Charger is to be used with black powder only. All implements must be used in accordance with the instructions provided by Thompson/Center.

"BASIC" FLINT LOCK ACCESSORY KIT

The basic essentials for someone who wants to take up the challenge of hunting with a flint lock. Works with any .50 caliber flint lock muzzleloader.

Contains: (1) Pan Charger (1) Touch Hole Pick (2) Flint (1) Leather Pad (2) .50 caliber Quick Shots

No.31007299

FLINT LOCK TOUCH HOLE PICK

Rugged stainless steel touchhole pick with lanyard loop.

No.31007113

FLINT LOCK TOUCH HOLE PICKS

Durable polymer "spark proof". Pkg. of 2.

No.51017093

BULLET STARTERS & RODS

DELUXE BULLET STARTER

Similar to the standard model except that it offers the added feature commonly called a "palm saver". The hole in the knob end of the starter is placed over the end of the ramrod when seating bullets. This feature offers protection to the hand and is particularly helpful when a number of shots are being fired or when a tight fitting ball or bullet is difficult to seat.

No.34007054 For Use With .45-.58 Cal.

STANDARD BULLET STARTER

A properly patched round ball requires the use of a bullet starter. The purpose of this implement is to start a tight fitting ball into the muzzle and to drive it far enough down the barrel so that it can be handled with the ramrod. .45-58 Cal.

No.31007050

1) START ROUND BALL

2) USE SHORT STARTER

3) USE RAMROD

PREMIUM AGATE FLINTS

Cut from Agate, these premium flints will out-perform standard flints by producing at least twice the number of strikes. And their ability to produce more consistent sparks for a longer time is the reason why they are used by top muzzleloading shooters.

No.31007203 Package of three

FLINTS FOR MUZZLELOADERS

These high quality rifle flints are recommended for use with all T/C® flint locks. Pkg. of 4.

No.31007200

T-HANDLE SHORT STARTER & RAMROD EXTENSION

Features a hardwood handle with a 2 piece solid brass rod, coupled with standard 10 x 32 threads. Remove the seating end of the brass rod and screw the T-handle onto a standard ramrod, it extends the length of your ramrod for easier seating of projectiles, especially during continuous shooting at the range. Provides you with extra leverage for firmer, more uniform seating. Converts your ramrod to a range rod.

No.31007079

RUGGED ROD RANGE ROD

A 32" Range Rod made from solid aluminum stock and hard coat anodized. Features a tough polymer palm saver knob for a firm grip when driving down balls, bullets or sabots. The ball seating end of the ramrod is threaded to accept standard 10-32 threaded accessories.

No.31009692

UNIVERSAL RUGGED ROD

Solid aluminum ramrod, 32" long, which can be cut to fit your muzzleloader. The seating end of the ramrod is threaded to accept the standard 10-32 thread ramrod accessories.

No.31009201

UNIVERSAL LIGHTWEIGHT RAMROD

31" universal ramrod that you cut to the length you need. Lightweight, hollow aluminum with do-it-yourself tips that accept standard accessories with 10-32 threads.

No.31009139

PALM SAVER SHORT STARTER

A lightweight, compact short starter with a "palm saver" built right into the end.

No.31007144

BULLET STARTERS

❑ FLEX PRIMING PALM SAVER

Made of soft Bio-Flex®, this handy accessory fits over the end of your ramrod, enabling you to exert steady pressure on your ramrod while seating the projectile. Especially useful in the field when you don't have a long ramrod. Molded over a hard fiber core for superior durability. Houses 4 spare 209 primers, with 2 ready for instant priming.

No.35009611

31007980

❑ POWER ROD® RAMROD

Universal Power Rod® for all styles of muzzleloaders with barrels up to 31" in length. Simply cut it to fit your gun and install the threaded tip. The tip accepts 10-32 thread loading and cleaning tools. Pivoting handle gives maximum grip then folds neatly out of the way while stored.

(Patent # 6,145,235)

No.31007980 Universal Power Rod

(you cut to length - starts at 31" long)

No.31007983 Encore® Pro Hunter™ & Omega™ with 28" Barrel

No.31007979 Encore® Muzzleloader with 26" Barrel

❑ T-HANDLE SHORT STARTER WITH UNIVERSAL LOADING TIPS

Attaches to ramrod to extend the length for easier cleaning and use of ramrod attachments. Rugged composite design with short starter, palm saver and aluminum seating head. By removing the seating end of the rod and screwing the T-handle onto a standard ramrod, it will form a range rod for easier cleaning and loading.

Universal Loading Tips: Knurled, concave brass loading tips for use on your T-Handle and ramrod. 10-32 threads. Fits spire point, conical point & hollow point muzzleloader bullets.

No.54169058

❑ T-HANDLE SHORT STARTER & RAMROD EXTENSION

A lightweight, compact short starter with a "palm saver" built right into the end. Features a removable seating end which allows you to convert your ramrod into a work rod. By removing the seating end of the rod and screwing the T-Handle onto a standard ramrod, it will extend the length of your ramrod for easier seating of projectiles, especially during continuous shooting at the range. It will provide you with extra leverage for firmer more uniform seating. Effectively converts your ramrod to a range rod.

No.31007127 Composite Short Starter

❑ T-HANDLE SHORT STARTER WITH EXTENDED SUPER JAG

A lightweight, compact short starter with a removable seating end which allows you to convert your ramrod into a work rod. Effectively converts your ramrod to a range rod.

EXTENDED SUPER JAG Knurled to provide maximum contact between patch and bore. Long stepped shank prevents patches from binding. Concave tip allows use for loading. Adds 3¼" to ramrod. The Extended Jag is necessary for cleaning all 28" muzzleloader barrels. 10 - 32 threads.

No.31007239 Starter with Extended Jag

BREECH PLUGS

Thompson Center® Breech Plugs are made of the highest quality materials for years of rugged service. As T/C® has evolved so have our muzzleloaders. Advancements in extraction, use, fouling prevention, and cleaning make T/C® Breech Plugs some of the best in the modern muzzleloading market. Below is a chart detailing which Breech Plug works with which model of T/C® Muzzleloader.

Speed Breech®, Speed Breech® 3, Speed Breech XT®, Triumph® Speed Breech XT®, Impact!™ Breech Plug, and Stainless Steel Breech Plugs all have a limited lifetime warranty.

Item #	NAME	Triumph® & Triumph® Bone Collector®	Encore® Pro Hunter XT™ & Encore® Endeavor	Encore® Pro Hunter FX™	Encore® & Pro Hunter™ 1st Gen ONLY	Encore® 209x50 & Omega™	Black Diamond™ Woods Rifle™ & North West Explorer	IMPACT!™

REPLACEMENT PERCUSSION CAP NIPPLES

(For use with No.11 Percussion Caps) Made of stainless steel, these nipples are carefully machined and long lasting. **No.51167070** for most T/C® Cap Lock rifles. (Except Cherokee™ & Seneca™). ¼ x 28 threads. Fits many TC® inlines also (except Encore® 209x50, T/C® Scout™, Omega™ & Triumph® models).

MUSKET CAP NIPPLE

This nipple gives the owner of T/C® muzzleloaders the option of using the much larger musket caps. Musket caps produce ignition fire that is 3 times hotter than standard No.11 percussion caps. Made of stainless steel, these nipples are carefully machined & long lasting. **No.54167252** Fits T/C® Traditional cap locks and T/C® in-lines (except Encore® 209x50, T/C® Scout & Omega).

209 PRIMER ADAPTER FOR BLACK DIAMOND™ & WOODS™ RIFLE

Primer adapter for older model T/C® Muzzleloaders. Must be used with the correct striker. **No.31007805**

MUZZLE GUARDS

Seals the muzzle of your muzzleloader in any weather conditions. Prevents moisture from entering the barrel, and won't harm the surface of the barrel. 20 per package. **No.31007369**

Extractor in Place
Extractor Out Position
Patent #7,257,917

ENCORE® 209X50 "E-Z TIP" EXTRACTOR

The "E-Z Tip" extractor for the Encore 209x50 Magnum muzzleloader is an accessory item that allows the extractor to be tipped out of the way for easy removal of the breech plug for cleaning. Eliminates having to remove the standard extractor prior to removing the breech plug. **No.31007211**

MULTI TOOLS & WRENCHES

❑ T/C® PRO HUNTER™ TOOL

This handy tool can be used to remove & replace the grip cap, the grip, the forend and to adjust the rear sight for elevation and windage. It also allows for removal or replacement of the choke tube in 45 Colt/410 ga. barrels. Weighs 1.5 oz.

No.35007992

❑ DELUXE IN-LINE BREECH PLUG WRENCH

A breech plug wrench that the shooter can carry in the field. Quickly removes 209 Primer Adapter.

No.31007766

❑ ENCORE® BARREL REMOVAL TOOL

This multi-use tool allows you to easily interchange your barrels. Simply unscrew the forend and then knock out the hinge pin.

No.35007503

❑ XT BREECH PLUG WRENCH

This wrench is designed as a backup tool for all Speed Breech XT® models.

No.31007747

❑ NIPPLE WRENCH

Made of hardened steel, this is a high quality tool. One wrench fits all #11 nipples (except the T/C® Scout™) and fits Musket Cap nipples. It supplies the leverage necessary to remove even the most stubborn nipple from your muzzleloader.

No.51017482 For #11 Nipple Only

No.51017112 For Musket Cap Nipple Only

No.51017064 For Both #11 & Musket Nipple (Universal)

❑ WEDGE PIN PULLER

A hardened steel, dual-purpose tool which taps out the forend wedge just enough so that it can be caught and pulled free with the claw end. It's also a nipple wrench that fits all T/C® nipples that take #11 caps, except the T/C® Scout™.

No.31007062

❑ ENCORE® ADJUSTABLE HINGE PIN

The original TC Encore barrel hinge pin rotates and drifts from side to side freely every time you open and close the action. This creates a potential for the lock-up to be slightly different with each shot. Our new Encore Adjustable Hinge Pin locks the position of the hinge pin so that mechanical lock-up of the Encore action is exactly the same from one shot to the next. The Adjustable Hinge Pin replaces your factory hinge pin. It simply tightens into place so there is no rotation nor drifting from side to side. The new pin fits all standard and Pro Hunter Encore barrels.

No.31007010

PRIMING & INLINE CAPPERS

U-VIEW® ACCESSORY

U-VIEW® IN-LINE CAPPER

Designed specifically for use with any of the muzzleloaders that use a musket cap or primer. It holds eight caps or primers ready for instant action.

No.31007233 for Musket caps only

No.31007219 for 209 Primers only

IN-LINE CAPPER FOR #11 CAPS

Solid brass body with steel jaws. This unique design allows the plunger spring to be locked in compressed position for easy loading. American made. Holds seventeen #11 Percussion Caps.

No.31007025

LIGHTWEIGHT POLYMER 209 PRIMING/DEPRIMING TOOL

For use with any of the in-line muzzleloaders that accept 209 primers. (Not for Encore® 209x50 Magnum). 3-pack.

No.31007802

31007221

31007223

POWDER SPOUTS

Makes it easier to pour black powder, or a black powder substitute directly from the container into a powder measure or flask without spilling.

No.31007223 Spout for Pyrodex® or Blackhorn™ Container

No.31007221 Spout for Black Powder Can

BIO-FLEX

209 FLEX CAPPER

Unique, flexible 209 Capper is shaped to accommodate all scoped muzzleloaders for instant and easy priming. Made from Bio-Flex, a silicone material which will stay soft and flexible in the most frigid conditions. The 209 Flex Capper presents two 209 shotshell primers for instant capping (one at each end) while storing six more. Also includes a lanyard hole for thong attachment.

No.35008007

T/C® PRIMER CADDY

This handy little accessory holds a reserve of 209 primers at the ready. Keeps the primers dry and clean and makes it easy to find them in a crowded pouch or pocket. Holds 9 primers and stays flexible in cold weather conditions.

No.31007891

DOG-BONE 209 PRIMING TOOL

A handy & durable polymer 209 priming tool holds two 209 shotshell primers at each end for instant priming. Also holds a "reserve" of six more inserted in the main shaft. Enables you to easily prime most in-lines even when scoped.

No.31007808

NEW

BREECH AND FIRE CHANNEL BRUSH SET

A set of brushes designed specifically to clean the breech area and the fire channel of the T/C® STRIKE™ muzzleloader.
No.3005562

MUZZLELOADER CLEANING JAG

Solid brass cleaning jag holds patches against bore for effective cleaning.

No.51169085 (10-32 Thread) .50 Caliber

No.53169084 (10-32 Thread) .54 & .56 Cal

UNIVERSAL LOADING TIP & CLEANING JAG

A knurled brass loading tip that will handle spire point bullets, hollow point conical bullets or round nose bullets. The contour fits all three types, preventing any possible deformity of the tip during the loading process. Fits 10-32 thread ramrod or short starter.

No.54169071 .45 Cal.

No.54169067 .50 Cal.

EXTENDED POLYMER CLEANING JAG

Rugged steel shank with polymer over-molding protects bore during cleaning. Fits .50 caliber muzzleloaders, 10-32 threads fits most ramrods. Durable design will not bend or break.

No.54169083

RAMROD ACCESSORY KIT WITH PRO HUNTER™ BULLET PULLER

A combination of the most popular ramrod accessories in one handy pack. Includes: worm, bronze bore brush, super jag, pro-hunter™ ball & bullet puller with aluminum alignment tool and cotton bore swab.

No.31007240 .50 Caliber

RAMROD ACCESSORY KIT WITH STANDARD BULLET PULLER

A combination of the most popular ramrod accessories in one handy pack. Includes: worm, bronze bore brush, super jag, standard ball & bullet puller and cotton bore swab.

No.31007234 .45 Caliber

No.31007298 .50 Caliber

EXTENDED SUPER JAG

Knurled to provide maximum contact between patch and bore. Long stepped shank prevents patches from binding. Concave tip allows use for loading. Adds 3 3/4" to ramrod. The Extended Jag is necessary for cleaning all 28" muzzleloader barrels. 10 - 32 threads.

No.54167227 .45 Caliber

No.54169087 .50 Caliber

SUPER JAG

Knurled to provide maximum contact between patch and bore. Long stepped shank prevents patches from binding. Concave tip allows use for loading with spire point bullets. (10 - 32 threads).

No.54169241 .45 Caliber

No.54169243 .50 Caliber

No.54169245 .54 Caliber

PRO HUNTER™ BULLET PULLER

Specially designed for removing spire point and polymer tipped bullets from the bore of a muzzleloader.

No.51169009 (10 - 32 threads) .50 cal.

BALL, BULLET & WAD PULLER

Threads onto ramrod and successfully removes stuck balls, bullets or shotgun wads from the bore of a muzzleloader.

No.51169013 (10 - 32 threads) .45 Cal.

No.51169014 (10 - 32 threads) .45&.50 Cal.

WORM (PATCH PULLER)

A small but extremely important tool for the muzzleloading buff, the worm is used for field cleaning or to retrieve a cleaning patch which is lost in the bore. Solid brass with strong spring steel fingers, fits all T/C® muzzleloading calibers.

No.51169010

BRONZE BORE BRUSHES

For scrubbing out lead deposits.

Available with 2 thread sizes:

5/16 - 27 which fits shotgun cleaning rods and 10/32 which fits muzzleloading ramrods.

Caliber	5/16 - 27	10 - 32
.45	N/A	35009500
.50	31009405	35009502
.54	N/A	35009504

COTTON BORE CLEANING SWABS

Used to clean & oil the bore of a muzzleloader or to apply Natural Lube 1000 Plus™ Bore Butter as a seasoning agent.

Caliber	10 - 32
.50	35009514
.54	35009516

BRUSH & SWAB SET

A bronze bore brush and cotton bore swab to handle your muzzleloader cleaning chores. Standard 10-32 threads, for .50 Caliber firearms.

No.35007484

SPEED BREECH® & SPEED BREECH XT® THREAD CLEANER

Thoroughly cleans the breech threads in your barrel with the thread cleaner. Simply screw the thread cleaner in place of your breech plug and remove and the three grooves captures the fouling.

No.31007496

BREECH THREAD CLEANER FOR ENCORE® & OMEGA™

Cleans the breech threads in your barrel with the thread cleaner. Simply screw the thread cleaner in place of your breech plug and remove and the three grooves captures the fouling. The thread cleaner eliminates the need to brush or patch the breech of your barrel. (Does Not fit Speed Breech®)

No.31007499

BREECH PLUG CLEANING TOOL

Spin the breech plug through the stainless steel bristles to thoroughly clean the threads of your breech plug.

No.31007465

BREECH PLUG CLEANING BRUSH

Makes cleaning the removable breech plug in your T/C® in-line a snap. It's long enough to reach into the threads in the barrel/receiver as well.

No.35009507

BREECH BRUSH & FIRE CHANNEL BRUSHES

Includes the Breech Plug Cleaning Brush and Fire Channel Brush for cleaning your T/C® muzzleloader.

No.35009508

IN-LINE NIPPLE PICK

The perfect tool for ensuring that the ignition channel in your in-line muzzleloader's breech plug is cleared of residue or moisture. Brass housing with extended bent arm houses a fine wire. Pushing the button forward extends the wire. Fits all in-lines and is easy to use even when rifle is scoped. Lanyard bail lets you attach it securely.

No.31007244

CLEANING & MAINTENANCE PRODUCTS TO COMPLEMENT YOUR T/C® MUZZLELOADER

□ T17® BREECH PLUG GREASE

A synthetic-based lubricant that withstands the high operating temperatures of muzzleloaders to prevent fouling residue from binding breech plugs. Also works well on nipples and shotgun choke tubes. ½ oz. Tube with Applicator Tip.

No.31007491

□ T17® NATURAL LUBE 1000 PLUS™

Using the forty years of experience of shooting Natural Lube 1000 Plus™ Bore Butter, T/C® has enhanced this formula to work with Hodgdon's Triple Seven™ powder. An all natural lubricant which reduces fouling, improves accuracy and prevents rust. It is the first lubricant specially formulated to work with sabot bullets. Makes loading sabot bullets easy. 3 oz. Tube.

No.31007479

□ T17® BREECH PLUG CLEANER/JAR

A hard working cleaner specially formulated to clean black powder substitutes including the popular Triple Seven powder. No brushing or scrubbing required. Simply drop your breech plug in the handy container and shake for 30 seconds and then wipe clean. This cleaner thoroughly penetrates and cleans the flash hole of your breech plug for improved ignition.

No.31007433

□ T17® FIREARM WIPES

A handy wipe that coats your firearm with a micro thin layer of protectant that withstands the corrosive effects of black powder fouling. Use these wipes prior to hunting in foul weather. Keeps your firearm in factory condition. 50 / Pkg.

No.31007493

□ T17® MUZZLELOADER BREECH PLUG WIPES

Designed specifically to quickly wipe off caked on fouling and grease from breech plugs that can lead to corrosion if ignored. Effectively cleans the fouling from between the breech plug threads. Works great for traditional black powder and most black powder substitutes.

No.31007541 50 /Pkg.

□ T17® FOAMING BORE CLEANER

T17® bore cleaner in a foaming agent. Effectively cleans and neutralizes the harmful fouling in the bore from black powder and black powder substitutes. Also helps to remove plastic, copper and lead deposits that could affect the accuracy of your rifle. A micro-thin layer of protectant is left in the bore to prevent rust and corrosion. The foam penetrates even the most caked on fouling and eliminates the need to brush your barrel. Simply spray into your barrel and let stand for one hour. The foaming agent does all of the work for you. Wipe your barrel clean and treat your barrel with T17® Seasoning patches to prevent rust. 7 oz. Can.

No.31007495

□ T17® BLACK POWDER BORE CLEANER

This solvent is specially formulated to effectively clean and neutralize the harmful fouling left in the bore from Triple Seven® and other black powder substitutes. T17® also helps to remove plastic, copper and lead deposits that could affect the accuracy of your rifle. A micro thin layer of protectant is left in the bore to prevent rust and corrosion and aid in easy loading. The active ingredients of this solvent penetrate even the most caked on fouling and helps to restore the bore of your rifle to factory condition.

No.31007488 8 oz. Bottle

□ T17® PRO HUNTER™ ACCESSORY KIT

- 2 oz. T17® Bore Cleaning Solvent
- ½ oz. T17® Breech Plug Anti-Seize Grease
- 2 ½" Dia. Dry Cotton Patches
- 40 Cleaning & 25 Seasoning Patches
- Breech Thread Cleaning Brush
- T-handle Short Starter
- Ten .50 caliber Shockwave® Super Glide™ Sabots
- 2 Speed Shots™
- Extended Polymer Cleaning Jag

No.31007480

T-17® PRODUCTS ARE SPECIALLY FORMULATED FOR USE IN CLEANING AWAY FOULING FROM PYRODEX®, BLACKHORN 209® & TRIPLE SEVEN®

❑ T17® MUZZLELOADER CLEANING KIT

For thoroughly cleaning and conditioning your muzzleloading firearm and keeping it in top shape. T17® products are specifically formulated to clean and protect your valuable muzzleloader. Includes:

- 2 oz. bottle T17® Bore Cleaner
- ¾ oz. T17® Natural Lube
- ½ oz. T17® Breech Plug Anti-Seize Grease
- (20) 2 ½" Dry Cotton Cleaning Patches
- .50 cal. Extended Cleaning Jag
- .50 cal. Bronze Bore Brush
- Breech Thread Cleaning Brush

No.31007473

❑ T17® BASIC MUZZLELOADER CLEANING KIT

Everything you need for cleaning and conditioning your muzzleloading firearm. T-17® products are specifically formulated to clean and protect your prized muzzleloader.

Includes:

- 2 oz. bottle T17® Bore Cleaning Solvent
- ¾ oz. T-17® Natural Lube
- ½ oz. T-17® Breech Plug Anti-Seize Grease
- (40) 2 ½" Dry Patches

No.31007471

❑ T17® MUZZLELOADER CLEANING KIT

Works With Barrels Up To 32" Long.
Contents:

- 3 Piece Aluminum Rod with Molded Handle
- ¾ oz. T17® Natural Lube 1000 Plus
- 2 oz. of T17® Bore Cleaner/Powder Solvent
- T17® Breech Plug Grease
- Bore Brush - .50 Caliber
- Bore Swab - .50 Caliber
- Jag - .50 Cal. - to hold patches in the bore
- Cleaning Patches (20)

No.31007530

Eva Shockey of Jim Shockey's Hunting Adventures

❑ T17® OILED PATCHES

Muzzleloading cleaning patches saturated with oil formulated to prevent rust and corrosion and displace moisture. Lubricates and protects the bore during storage. 2 ½" diameter works with most bore sizes.

No.31007372 50 per Jar

❑ T17® PRE-SATURATED CLEANING PATCHES

100% double knapped cotton patches are saturated with T17® bore cleaner. Specially formulated to clean and neutralize the corrosive effects of black powder and black powder substitutes. These patches are convenient to use and makes loading your muzzleloader easier. 2 ½" (works well with .45 & .50 cal.).

No.31007483 100 per Jar

❑ T17® CLEANING & SEASONING PATCHES

An all-natural lubricant specially formulated to clean black powder substitutes like the popular Triple Seven powder. This lubricant reduces fouling, improves accuracy and prevents rust. It is the first lubricant specially formulated to work with sabot bullets. 2 ½" diameter (works well with .45 & .50 cal. muzzleloaders). 50 Per Jar.

No.31007477

CLEANING & MAINTENANCE PRODUCTS TO COMPLEMENT YOUR T/C® MUZZLELOADER

❑ NATURAL LUBE 1000 PLUS™ BORE BUTTER IN A TUBE

A biodegradable all natural lubricant which contains no petroleum-based oil or additives. Reacts differently (chemically) to the combustion of black powder, producing far less "tar-like" fouling. 5 oz. tube ideally suited for easy application on patches. Can also be used to lube bullets. Excellent rust preventative on external surfaces of any firearm.

No.31007309 5 oz. Tube Natural Scent

No.31007409 5 oz. Tube Pine Scent

No.31007411 2 oz. Tube Natural Scent

INDUSTRY STANDARD FOR MUZZLELOADER CLEANING!

LOW-ODOR FORMULA

❑ NUMBER 13® BORE CLEANER

Thompson Center's No. 13® Bore cleaner is the industry standard for muzzleloader cleaning and has been the trusted bore cleaner for years. It features an all-natural formula which contains no petroleum based additives and is compatible with the Natural Lube 1000 Plus™ Bore Butter. It quickly and easily removes all residue and powder fouling in barrels making the task of cleaning a muzzleloader a lot more enjoyable.

No.31009065 8 oz. Spray Bottle

No.31009041 8 oz. Pour Bottle

❑ NATURAL LUBE 1000 PLUS™ BORE BUTTER SEASONING PATCHES

2½" 100% cotton cleaning patches saturated in Natural Lube 1000 Plus™ Bore Butter. Great for use after cleaning your muzzleloader or for easy field cleaning. Seasons the bore with repeated use. (works well with .45 - .58 cal. muzzleloaders).

No.31007147 25 Per Bag

No.31007141 50 Per Jar

No.31007003 100 Per Jar

❑ PRESATURATED CLEANING PATCHES

Number 13® Bore Cleaner and 100% cotton patches combined, they work to clean fouling from muzzleloaders. By offsetting their position on the jag, centering them or doubling the patch thickness, a variety of calibers and gauges can be accommodated with one size. 2½" dia. (works well with .45-.58 cal.) 100/Jar. **No.31007143**

❑ GENERAL-PURPOSE CLEANING PATCHES

100% cotton, these patches work with rifles, shotguns or pistols. By offsetting their position on the jag, centering them or doubling the patch thickness, a variety of calibers and gauges can be accommodated with this one size. 2½" diameter, works well with .45-.54 black powder & .375-.45 centerfire.

No.31007037 100/Bag

No.31007178 250/Bag

❑ T/C® ESSENTIAL MUZZLELOADER CLEANING PACK

The essential elements every hunter/shooter needs to keep his muzzleloader in top working order after a hunt or a day at the range. Contains:

- A Silicone Gun Cloth.
- Natural Lube 1000 Plus™ Bore Butter, .75 oz.
- Super Lube Anti-Seize Lubricant, .23 oz.

No.31007357

❑ GORILLA GREASE

An all-natural, anti-seize lubricant formulated for use on the threads of removable breech plugs and nipples. This heavy duty lube will withstand the rigors of extensive firing, allowing the shooter to then remove the breech plug with little effort. Works with any removable breech plug or nipple. ¼ oz. Tub.

No.31007356

❑ T/C® BASIC MUZZLELOADER CLEANING KIT

Here are the basic "ingredients" that you will need in the field to clean your muzzleloading rifle in keeping with the all-natural approach of maintaining a "seasoned" bore. Includes: 4 oz. of Number 13® Bore Cleaner, 2½" Cleaning Patches, as well as patches treated with all-purpose Natural Lube 1000 Plus Bore Butter, a phosphor bronze bore brush and a knurled brass extended Super Jag™. A handy and compact addition to your hunting gear.

No.31007333

❑ ALL-PURPOSE ANTI-SEIZE SUPER LUBE

A hard working synthetic lubricant. It protects the threads of muzzleloading breech plugs as well as shotgun choke tubes. Withstands high operating temperatures and prevents fouling or powder residue from binding the parts. Also protects threads and other metal surfaces from corrosion. Handy ½ oz. tube for easy carry.

No.31007362 ½ oz. Tube of Super Lube

❑ BREECH PLUG LUBE APPLICATOR WITH SUPER LUBE

Uniformly and conveniently applies lube to the breech threads in your barrel. Super Lube contains Teflon to seal the threads in the breech to prevent your plug from getting seized. Works on all break open and pivoting breech muzzleloaders. Applicator with 1.44 oz. Super Lube. (Does Not fit Encore Pro Hunter).
