MOTOMCO

THE WORLD LEADER IN RODENT CONTROL TECHNOLOGY®

Controlling rodents is a constant battle that has been fought for centuries. Rats and mice pose a major threat by carrying and transmitting potentially deadly diseases to man and animals. Likewise, their presence results in great economic loss from contaminated or consumed feed, and damage to property. Motomco is dedicated to attacking these problems by developing the highest quality rodent control products in the world.

Motomco is the world's largest manufacturer of rodent control products, and the only rodenticide company to directly manufacture a complete line of baits, bait stations, mechanical traps and adhesive traps. Motomco's modern facility in Madison, Wisconsin houses its manufacturing operation, biological and chemical laboratories, and warehouse. All production is done at this facility, which allows for complete control over the entire manufacturing process. From the synthesizing of all active ingredients in the rodent bait, to the technologically advanced injection molders and robotics used for bait stations and mechanical traps, Motomco offers better quality products and faster turnaround times.

Motomco builds quality into every aspect of its operation from strict sanitation practices in its laboratories and manufacturing facility to the high standards placed on vendors of raw materials and packaging. The result is your assurance that Motomco customers are using the most effective rodent control products on the market today.

TOMCAT Baits in disposable and refillable consumer bait stations contain Bromethalin. Bromethalin is an acute active proven to kill rats and mice faster than anticoagulant baits.

The EPA limits the amount of bait in consumer rodenticides to 1 lb. or less. Two types of bait stations are allowed:

1 REFILLABLE

A supply of block bait is sold along with a refillable station. Station can be refilled until bait supply is gone.

2 DISPOSABLE

Block bait is preloaded and sealed inside station. When bait is gone, station is discarded.

ALL TOMCAT BAITS & BAIT STATIONS ARE COMPLIANT WITH THE EPA'S RISK MITIGATION DECISION (RMD)

TIER 1

Stations bearing this logo are Tier 1 compliant and meet the EPA's highest level of bait station security. They have been tested with both children and dogs and are proven to be weatherable, allowing both indoor and outdoor use.

TIER 3

Stations bearing this logo are Tier 3 compliant and have been thoroughly tested with children to ensure tamper-resistance.

MERCHANDISERS

TOMCAT with Bromethalin

DESCRIPTION	CASE PACK	ORDER CODE
20 x 4lb. Pail Display	1	39904

- Each mini pallet contains 20 4# pails of Tomcat with Bromethalin Chunx
- Small 1/4 pallet foot print for use in main aisles, runways and high-traffic areas

TOMCAT Power Wing

DESCRIPTION	CASE PACK	ORDER CODE
16 x 16 x 1oz. Bag	16	39816

- Each display comes pre-loaded with 16 bags (2 cases) of our top-selling Tomcat Consumer product
- Displays save valuable floor space and can be conveniently hung on sides of endcaps, main aisles or checkout

FOR USE IN AND AROUND THE HOME

TIER 1 HIGHEST LEVEL OF STATION SECURITY & QUALITY

► Kid & dog tested ► For use indoors & outdoors

DESCRIPTION	CASE PACK	ORDER CODE
1pk Box	24	22610

- Contains 1 disposable bait station preloaded with a 1oz block
- Clear lid for easy bait monitoring
- When the bait is gone, discard the station

Each 1 oz. Block Kills Up To 12 Mice*

MOUSE REFILLABLE

DESCRIPTION	CASE PACK	ORDER CODE
8 x 1oz Bag	8	22778
16 x 1oz Bag	8	22786

- Contains 1 refillable bait station with 8 or 16 – 1oz bait refills
- Clear lid for easy bait monitoring
- Merchandises well in resealable bags

RAT DISPOSABLE

DESCRIPTION	CASE PACK	ORDER CODE
1pk Box	4	22880

- Contains a 4oz bait block
- Kills mice, as well as rats
- Clear lid for easy bait monitoring

Each 4 oz. Block Kills Up To 10 Rats*

RAT REFILLABLE

DESCRIPTION	CASE PACK	ORDER CODE
15 x 30g Box	4	22814

- Contains 1 refillable bait station with 15 - 30g bait refills (16oz. of bait total)
- Kills mice, as well as rats

Each 30g Block Kills Up To 3 Rats*

TIER 3 BEST COMBINATION OF VALUE & SECURITY

► Kid tested ► For use indoors

MOUSE DISPOSABLE

DESCRIPTION	CASE PACK	ORDER CODE
2pk Box	12	23620
4pk Box	12	23640

- Available in 2pk & 4pk sizes
- Each station is preloaded with a 1oz block
- Clear lid for easy bait monitoring
- When the bait is gone, discard the station

MOUSE REFILLABLE

DESCRIPTION	CASE PACK	ORDER CODE
4 x 1oz Box	12	23704

- Contains 1 refillable bait station with 4 – 1oz bait refills
- Clear lid for easy bait monitoring

Each 1 oz. Block Kills Up To 12 Mice*

*Based on No-Choice Laboratory Testing

LARGER SIZES FOR USE IN A VARIETY OF APPLICATIONS

A multiple-feed anticoagulant for economical control of rats and mice

ACTIVE INGREDIENT: Diphacinone

ALL-WEATHER BAIT CHUNX

- Mold & moisture resistant
- Unique gnawing edges
- Can be secured in a bait station

PELLETED BAIT

- Ready-to-use pelleted bait
- Place pacs protect bait & fit in tight areas

LIQUID CONCENTRATE

- Liquid concentrate mixes with one quart of water
- Ideal for use in areas with competing food sources

DESCRIPTION	CASE PACK	ORDER CODE
4 x 1 lb. Rodent Block	4	32465

*3 oz. Place Pac

DESCRIPTION	CASE PACK	ORDER CODE
1.7oz Pouches 8pk box	12	32708
1.7oz Pouches 50ct bulk	1	32701

TOMCAT baits provide economical control of rats and mice, with proven results for more than 25 years.

Acute active kills faster than anticoagulant baits

ACTIVE INGREDIENT: Bromethalin

BAIT CHUNX

- Each block kills up to 12 mice*
- Rodents cease feeding after consuming a toxic dose, leading to reduced bait consumption
- Gnawing edges for enhanced acceptance
- Weatherable, mold & moisture resistant
- Can be secured in a bait station
- *based on no-choice laboratory testing

PELLETED BAIT

- Can be used for burrow baiting
- Rodents cease feeding after consuming a toxic dose, leading to reduced bait consumption

MEAL BAIT

- Proven bait acceptance due to palatable meal formulation
- Single feed non-anticoagulant
- For difficult situations and when competing food sources are present

TOMCAT with Bromethalin has a proven combination of palatability and speed of kill to effectively knockdown rat and mouse infestations.

FOR USE IN AND AROUND AGRICULTURAL BUILDINGS

Our most palatable single-feed anticoagulant

ACTIVE INGREDIENT: Bromadiolone

ALL-WEATHER BAIT CHUNX

- Single feed anticoagulant
- Unique gnawing edges
- Weatherable & mold resistant
- Can be secured in a bait station

PELETED BAIT

- Palatable pellet formula
- Single feed anticoagulant
- Premeasured place pacs
- Loose pellets for burrow baiting

MEAL BAIT

- Proven bait acceptance due to palatable meal formulation
- Single feed anticoagulant
- For difficult situations and when competing food sources are present

SOFT BAIT

- Bait won't freeze, melt or mold
- Formulated with a blend of oils for superior palatability

HAWK baits have been an industry standard for many years, combining proven palatability and rodent acceptance with its single-feeding active ingredient, Bromadiolone.

BAIT STATIONS

Motomco's comprehensive line of TOMCAT tamper-resistant bait stations incorporate a variety of features & benefits that can help ensure proper application, ease of use & security for your particular situation.

RAT-SIZED STATIONS

- Tamper-resistant station keeps bait away from children, pets and non-target species
- Use indoors and out
- Heavy-duty construction will last for years
- Can be used for rats or mice

TITAN WEIGHTED BAIT STATION

- Ready to go and requires no additional securing thanks to a pre-installed custom brick
- Removable tray for faster servicing
- Can be used keyed or keyless
- Holds up to 8 x 1oz Bait Chunx, 2 Rat Traps or 2 Heavy Duty Mouse Traps

DESCRIPTION	ORDER CODE
Bulk	33496

VERTICAL Rat Bait Station

- Station positioned vertically to take up less floor space
- Can be easily fastened to walls
- Locking bait rods won't fall out during cleaning
- Meets EPA Tier 1 standard for child, dog, and weather resistance

DESCRIPTION	CASE PACK	ORDER CODE
Bulk	6	33446

BULLET Rat Bait Station

- Removable tray for easy cleaning
- Station can be used keyed or keyless
- Low profile
- Meets EPA Tier 1 standard for child, dog, and weather resistance

DESCRIPTION	CASE PACK	ORDER CODE
Bulk	6	33432

LOW-PROFILE RAT BAIT STATION

- Fits into tight baiting locations other stations can't
- Locks when closed and unlocks with a special 2-prong key
- Meets EPA Tier 1 standard for child, dog, and weather resistance

DESCRIPTION	CASE PACK	ORDER CODE
Bulk	6	33470

BAIT STATIONS

RAT-SIZED STATIONS

RAT BAIT STATION

- Our best selling station
- Keyless design, but can be secured with an allen screw, zip tie, etc.

The EPA requires the use of bait stations for ALL outdoor, above ground applications. If the bait is exposed to children & non-targets, these stations must be tamper-resistant.

- Non-poisonous, disposable glue trap
- Powerful adhesive covered with special release paper
- Easy-to-use
- Use as a flat or covered trap

DESCRIPTION	CASE PACK	ORDER CODE
Glue Trap 4 Pk	26	32509

TOMCAT TRAPS

TOMCAT mechanical traps are easy to use & work well along walls, in corners, or wherever rodents travel.

REUSABLE RAT TRAP

- Proven effective
- Patented interlocking teeth
- Easy to set by hand or foot
- Removable bait cup

DESCRIPTION	CASE PACK	ORDER CODE
1 Pack	8	33521

REUSABLE MOUSE TRAP

- Designed for use around children & pets
- Patented interlocking teeth make escapes virtually impossible
- Clean "no-touch" disposal

DESCRIPTION	CASE PACK	ORDER CODE
2 Pack	12	33500

HEAVY DUTY MOUSE TRAP

- Powerful, aggressive design
- Removable bait cup for easy baiting
- Easy, no-touch disposal of mice

DESCRIPTION	CASE PACK	ORDER CODE
2 Pack	6	33536

LIVE CATCH MOUSE TRAP

- Catches up to 10 mice at a time
- Safe around children & pets
- Great catch & release option
- Easy-to-use

DESCRIPTION	CASE PACK	ORDER CODE
1 Pack	4	33511

SPIN TRAP MOUSE TRAP

- Covered portico encourages rodent entry for improved effectiveness
- Kills quickly, no mess
- Once triggered, simply toss out the entire trap
- Integrated bait cup for easy baiting

DESCRIPTION	CASE PACK	ORDER CODE
2 Pack	8	33549

KILL & CONTAIN MOUSE TRAP

- Kills mice in a fully enclosed capture area for no-see, no-touch disposal
- Great for tight spaces like garages, cabinets or around appliances
- Safe to use indoors

DESCRIPTION	CASE PACK	ORDER CODE
2 Pack	8	33582

MOLE TRAP

- Innovative & effective design
- Easy to set, easy to use
- Rugged, all-weather construction
- Can be used again and again

DESCRIPTION	CASE PACK	ORDER CODE
1 Pack	4	34160

MOLE KILLER

NOT FOR SALE IN AK, HI or NY

- First bait proven to kill moles
- Designed and manufactured to mimic a mole's natural food source; earthworms and grubs
- The only mole bait registered with the EPA utilizing proven laboratory and field test results with moles
- Moles may consume a lethal dose in a single feeding

DESCRIPTION	CASE PACK	ORDER CODE
Display Box Worms (12)	4	34310

REGISTERED FOR SALE IN:
WA, OR, NV, MI, PA, MA, VA, NC, GA

- Versatile pelleted formula can be used in bait stations or spot baiting for ground squirrels
- Applications for vole control in and around Fruit Tree Orchards (Dormant)
- Contains the proven active ingredient Diphacinone

DESCRIPTION	CASE PACK	ORDER CODE
25 lb. Pail Loose Pellets	1	32325
50lb. Bag Loose Pellets	1	32351

PELLETED RODENT BAIT

CALIFORNIA SPECIAL LOCAL NEEDS,
LABELED FOR GROUND SQUIRRELS

- For sale in CA only
- Contains a double strength dose of Diphacinone
- Preferred brand for Ground Squirrel Control in California

DESCRIPTION	CASE PACK	ORDER CODE
25 lb. Pail Loose Pellets	1	32570
50lb. Bag Loose Pellets	1	32579

MOTOMCO RODENT CONTROL SYSTEM (MRCS)

TOOLS & RESOURCES

► BIOSECURITY

► MOTOMCO RODENT CONTROL SYSTEM

► RECORD KEEPING

► MSDS & LABELS

RODENT CONTROL IS AN INTEGRAL PART OF ANY BIOSECURITY PROGRAM

Why Control Rodents?

Rodents Are A Biosecurity Risk

- ▶ Rodents can be reservoirs for disease agents, which can live inside the rodents body and be excreted in their urine & feces
- ▶ Rodents are well adapted to living with, or in close proximity to, humans and farm animals. This co-existence increases the likelihood of transmission
- ▶ Rodents are prolific breeders, which can result in a large rodent population in a short period of time. If disease organisms are present within these populations, they can be widely and rapidly distributed to uninfected areas and animals

Diseases include...

- ▶ Salmonellosis
- ▶ Cholera
- ▶ Leptospirosis
- ▶ Bordetellosis
- ▶ Hanta
- ▶ LCMV (Lymphocytic Choriomeningitis Virus)

Rodents Cause Feed Contamination & Facility Damage

Feed Cost

- ▶ Rats consume 25g/day, Mice consume 3g/day but they contaminate many times that amount with droppings and urine
- ▶ A 1 point increase in feed conversion could cost a million bird complex \$10,000 per week

Damage Cost

- ▶ Curtain & insulation damage increases energy costs and repairs are expensive
- ▶ Structural Damage: Wood/Framework
 - Rodents gnaw at least 30 minutes of every day
 - Foundation - Rodent burrows can cause foundations to lose integrity

Our MRCS is comprised of 3 processes

Most agricultural producers use the Motomco Rodent Control System on their farms

1 Inspection & Identification

- ▶ Identify rodent species involved
- ▶ Determine severity of location of the problem
- ▶ Identify where sanitation and rodent proofing are needed

2 Sanitation & Harborage Reduction

- ▶ Remove rodents food & water source
- ▶ Eliminate material rodents can use for shelter

3 Baiting Strategies

- ▶ 3 Lines of defense
 - 1) Perimeter of property
 - 2) Exterior of building
 - 3) Interior of building
- ▶ Bait selection & rotation

1 Inspection & Identification

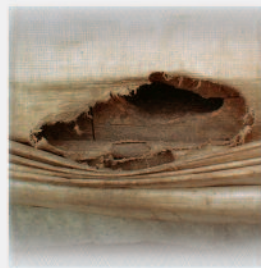

Rodent signs help determine the size of the infestation and where the rodents are traveling and feeding

Droppings

Burrows

Gnaw Marks

- 1. Mice:**
 - a. 1/4 inch in width
 - b. Holes are small, clear cut
- 2. Rats:**
 - a. 1/2 inch in width
 - b. Holes are big with rough torn edges

Rub Marks

When dirt in the environment combines with oils in their skin, rub marks are left when rodents travel along walls.

Identification

	Norway Rats	Roof Rats	House Mice
Scientific Name:	Rattus Norvegicus	Rattus Rattus	Mus Musculus
Color:	Brownish Red	Dark Gray	Black, Dusty Gray
Weight:	10-17 oz.	8 oz.	3/4 oz.
Length: (including tail)	12-18 inches	13-17 inches	6-7 inches
Body:	Thick body, blunt nose	Thin body, pointed nose	Small head & body
Sexual Maturity:	2-3 months	2-3 months	1 month
Gestation Period:	23 days	22 days	19 days
No. of Young:	6-12 per litter	6-8 per litter	5-6 per litter
No. of Litters:	Avg. 4-7 per year	Avg. 4-6 per year	Avg. 8 per year
Diet:	Meats, fish, grains, almost anything	Fruits, vegetables, seeds, grains	Grains, cereals, meats, fish, etc.
Daily Food:	1 oz. food	1 oz. food	1/10 oz. food
Water Consumption:	1 oz. water	1 oz. water	1/20 oz. water
Length of Adult Life:	18 months	18 months	15-18 months
Feces:	Blunt ends	Pointed ends	Pointed ends
Nests:	Burrows, 100-150 ft. from food & water	Trees/Rooftops 100-150 ft. from food & water	Corners 10-30 ft. from food & water

2 Sanitation & Harborage

Eliminate all spilled feed

Keep a 3-foot sterile zone around buildings mowed or sprayed

Remove debris from around buildings

Harborage Reduction

- ▶ Eliminate the rodents' food and water source.
- ▶ Identify harborage areas and recommend to the customer how to eliminate them indoors and outdoors.
- ▶ Keep grass and vegetation cut short. Tall grass protects rodent(s) from predators.
- ▶ Keep overhanging trees cut back. Overhanging trees provide dark shadowy areas where rodents feel safe and protected.
- ▶ Piles of debris should be removed from the exterior of the structure. Garbage and clutter around the perimeter provide food harborage areas for rodents.
- ▶ A 3-foot wide barrier of cement or crushed rock should be established around the structure.

3 Baiting Strategies

Perimeter of the Property:

- ▶ Place tamper resistant bait stations along the perimeter of the property
- ▶ Use BAIT CHUNX® as they can be secured inside bait stations on vertical or horizontal securing rods

Exterior Baiting:

- ▶ Rodents tend to gravitate to warm air currents or where food odors emerge
- ▶ Tamper-resistant bait stations or traps should be placed every 30-50 ft depending on the severity of the infestation
- ▶ Place bait or traps around all entry doors
- ▶ Burrow baiting – place loose pellets deep into the burrows

Interior Baiting:

- ▶ Rodent device placement depends on the type of infestation you are dealing with:

MICE: Space placements at 8-12 foot intervals depending on the severity of the infestation

RATS: Space placements at 15-30 foot intervals depending on the severity of the infestation

The Best Meal (and the Last) Rats & Mice Will Ever Eat

Made of an exclusive oat and grain formula that's extremely attractive to rodents, Meal Bait is a palatable, versatile choice for rodent control. Use it in difficult situations with heavy infestations, or when competing food sources are present.

With multiple active ingredients available, it can easily be incorporated into any BAIT ROTATION PROGRAM.

HAWK MEAL BAIT

- ▶ Active Ingredient: Bromadiolone
- ▶ 2nd generation, single-feed anti-coagulant
- ▶ Industry standard anticoagulant bait for over 25 years

RAMPAGE MEAL BAIT

- ▶ Active ingredient: Bromethalin
- ▶ Works quickly: Bromethalin is a non-anticoagulant active that kills rodents faster than anti-coagulant baits
- ▶ Rodents will cease feeding after consuming a toxic dose, leading to reduced bait consumption
- ▶ Available in 12# Pails

Using Meal Bait

A versatile choice for many different applications

- ▶ Can be placed in a Bait Station for outdoor, above-ground applications
- ▶ Bait Stations are not required when using Meal Bait Indoors, provided there is no risk to non-target species

Excellent palatability even when competing food sources are present

- ▶ In and around feed mills
- ▶ Feed and grain storage areas

Ideal for cleanout

- ▶ The best time to lower infestations is when all animals are out of a facility
- ▶ During quick transitions, Rampage® meal can work quickly to knock down rodent populations

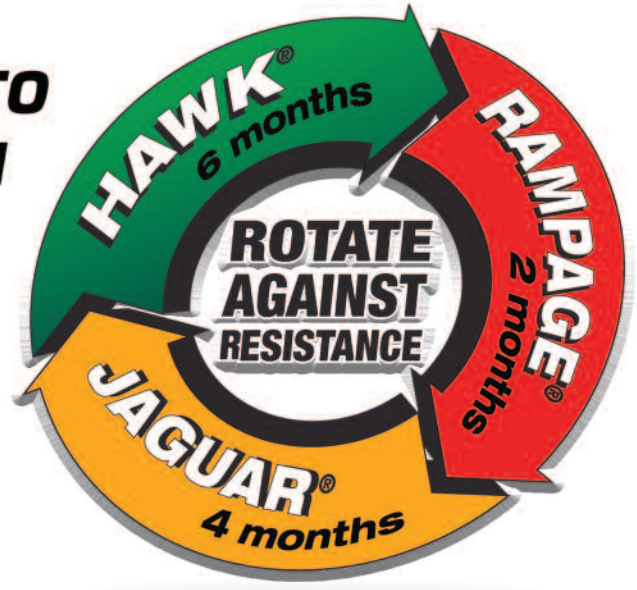

Use egg flats or other containers for indoor baiting during clean out

Securing bait stations is recommended for all outdoor use

BAIT ROTATION IS VITAL TO SUCCESSFUL, LONG-TERM RODENT CONTROL

Rodents may develop tolerances to baits if they are constantly exposed to the same active ingredient. To avoid this, implement a bait rotation program that utilizes baits with multiple active ingredients, including at least one non-anticoagulant rodenticide.

Hawk can be used throughout the year for up to 6 months to maintain control. Its palatable formula is attractive to rodents regardless of the competitive food sources that may be available.

Jaguar should be used as your second anticoagulant formulation. Its powerful active ingredient (Brodifacoum) ensures that even the most finicky rodents are taken out. Plan to include in your rotation for at least 4 months.

Use Rampage during peak rodent pressures and/or when you see populations spike. This acute, non-anticoagulant rodenticide will knockdown populations and take out any potentially anticoagulant resistant Norway rats. Use for at least 2 months at a time.

MISSION STATEMENT

To be the market leader by developing, producing and marketing innovative rodent control products of uncompromising quality.

To commit to excellence in customer service and to conduct our business with the highest integrity.

Motomco's mission can only be achieved in a stimulating work environment that supports personal growth, individual contribution and teamwork.

MOTOMCO

THE WORLD LEADER IN RODENT CONTROL TECHNOLOGY®
