Low Profile Series

Rigid Corner Bead

Creating sharp, crisp corners has just gotten easier, thanks to the Trim-Tex Low Profile Series line of beads. All Trim-Tex vinyl beads are produced with at least 70% recycled content making them a great bead for LEED projects. As always, Trim-Tex beads are dent proof, rust proof, and resistant to mold growth.

Trim-Tex Rigid Vinyl Bullnose beads have long been the industry standard. Mud Set 3/4" Bullnose is the most durable bead in the industry, able to absorb extreme impact without denting or blistering. Bullnose Archway Bead excels at finishing curved surfaces and archways. After undergoing a redesign, 350 Bullnose is easier than ever to sand and finish. Build lasting interiors with Trim-Tex Bullnose Beads.

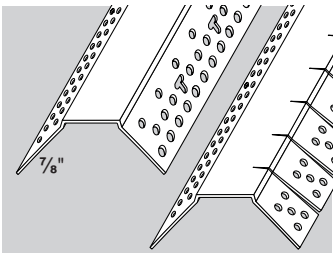

Chamfer Beads

Chamfer Bead is great for commercial projects. Architects have told us how much they love sharp crisp lines. With chamfer bead you get two sharp crisp lines on every corner. Mix the larger, Chamfer bead, and the smaller, 350 Chamfer, while maintaining a consistent look. The chamfer bead line now also includes off angle three ways as well as splayed chamfer adapters.

Bumper Bead System

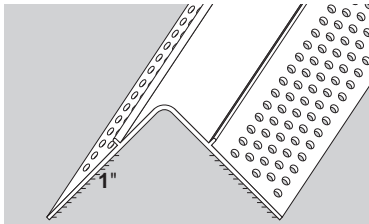

Corner protectors have long been an afterthought in interior finishing. They are often installed last minute, leaving unfinished looking edges, gaps and ugly corners with minimal protection. The **Bumper Bead System** from Trim-Tex is an innovative solution to traditional corner protection. By providing floor-to-ceiling protection and a sleek, flush finish the Trim-Tex Bumper Bead System changes the way corners are protected.

The **Bumper Bead System** consists of a Bumper Corner Bead and a Bumper Guard. The Bumper Corner Bead is made from rigid vinyl and can withstand high impact. It also adheres using our patented mud lock technology, which results in superior bonding.

The second part of the system is the elegant Bumper Guard. The semi-rigid Bumper Guard acts as a blocker, absorbing extreme impact without denting or showing imperfections. Bumper Guard is available in 16 standard colors to match a variety of interior designs.
