THE ZERO PRESSURE ZONE

Tommyco's Rough Terrain, Flat Terrain Pro and Flat Terrain kneepads are the world's only kneepads with patented pressure dispersing covers.

The outer feet are designed to make contact with the kneeling surface first. This action eliminates pressure from being applied directly to the delicate patella bone of your knee. A bridge is actually created over the kneeling surface, allowing pressure to be absorbed around the outer edges. This unique pressure dispersing action repeats itself over and over again allowing you to kneel in comfort throughout the workday.

PREMIUM TOMMYCO INDUSTRIAL COPPER-INFUSED LINED SI KNEEPADS

Extended top section provides superior comfort improves on straps that may fall behind the knee.

New super impact/cushion T-GEL foam is 20% weight of regular GEL for superior lightweight protection and comfort.

Extra wide breathable, lower lycra strap prevents heat build-up as they secure kneepads in place.

Convenient D-Ring for hanging up after use—easier to find when you need them.

Unique Copper infused liner reduces odour caused by sweat.

Added pull-tab to help fasten/remove strap.

When copper is infused into textiles, the benefits of copper's antimicrobial and heat conducting benefits shine though.

Kneepads absorb a lot of perspiration and bacteria during hours of working on our knees.

The copper-infused lining, unique to the Industrial SI Series of kneepads limits bacterial growth while providing comfort that Tommyco is known for.

TOMMYCO

GEL

GUARD™

HAND PROTECTION

PATENT PENDING

Slip them into any regular work glove...

**YOUR GLOVES
WILL NEVER FEEL
THE SAME!**

Most impact/anti vibration gloves only use thin pieces of EVA foam.

Our injected GEL GUARDS are built with **100% GEL** providing superior protection from constant impact & vibration.

**WORKS GREAT WITH OR
WITHOUT GLOVES**

11002

11003

BUILT WITH 100% INJECTED GEL
