SHOW YOUR TRUE COLORS

TrueSpec™
NAIL IDENTIFICATION SYSTEM

BUILD WITH CONFIDENCE

TrueSpec Nail Identification system improves job site communication and insures that correct fastener is used, reducing confusion and risk.

Easy to identify
TRUE SPEC

NON True Spec

Simple, Easy to Identify
Eliminates Nailing Errors.

The TrueSpec Nailing Identification is compliant with the International Building Code (IBC) the International Residential Code (IRC), the Uniform Building Code (UBC) and certified for use in structural applications by the ICC Evaluation Services (ICC ESR 1798).

Inspectors

Inspectors can quickly confirm that the correct fastener has been employed.

Contractors

Contractors can quickly order the correct fastener and communicate the proper application to their crew.

Builders

Engineers, builders and Specifiers can clearly and easily define the correct fastener.

Proudly Made by North America's Premier Fastener Manufacturer

TrueSpec™
NAIL IDENTIFICATION SYSTEM

Minimize confusion and risk by using and specifying TrueSpec Fasteners.
The embossed number clearly identifies the nail diameter and the color quickly indicates the nail length.
NOW AVAILABLE in a full class D Hot Dip Galvanized. ASK FOR TrueSpec with ZincGard.

Durable, Easy Carry, Re-Closeable cartons reduce waste and include labeling that clearly defines the fastener, protective finish and collation (tool) type. All intended to get the right fastener on the job... for your job!

ZincGard™ HOT DIPPED GALVANIZED

NAIL IDENTIFICATION	
Diameter	Indicator
0.113	1
0.120	2
0.131	3
0.135	3+
0.148	4
0.162	6

Length	Bright Finish	Hot Dip Galv
1 1/2	Purple	A
2 1/8	Pink	B
2 1/4	Brown	C
2 3/8	Green	D
2 1/2	Blue	E
3	White	F
3 1/4	Black	J
3 1/2	Orange	K

Other Indicators
H = HARDWARE NAIL
r = Deformed Shank, Ring/Screw

Color labels make selecting the right nail easy.

ZincGard Hot Dip Galvanized nails include an embossed ALPHA character rather than paint, clearly defining them for use in ACQ treated wood and exterior applications.
