	for at least 15 minutes. Get medical attention if irritation develops and persists.
If swallowed	: Do NOT induce vomiting. Give small amounts of water to drink. Call a physician or poison control centre immediately. Never give anything by mouth to an unconscious person.
Most important symptoms and effects, both acute and delayed	: Symptoms may be delayed. May cause damage to organs through prolonged or repeated exposure.
Notes to physician	: The first aid procedure should be established in consultation with the doctor responsible for industrial medicine.

SECTION 5. FIREFIGHTING MEASURES

Suitable extinguishing media	: Extinguishing media - large fires Alcohol-resistant foam (on small fires) Carbon dioxide (CO2) Dry chemical
Unsuitable extinguishing media	: Water spray jet
Specific hazards during fire-fighting	: Burning produces noxious and toxic fumes. Thermal decomposition can lead to release of irritating gases and vapours.
Further information	: Fight fire with normal precautions from a reasonable distance. Keep away from fire, sparks and heated surfaces. Use water spray to cool unopened containers. Prevent fire extinguishing water from contaminating surface water or the ground water system.
Special protective equipment for firefighters	: Body covering protective clothing, full "turn-out" gear. Self-contained breathing apparatus (EN 133)

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures	: Evacuate personnel to safe areas. Ensure adequate ventilation. Avoid contact with skin and eyes. Wear suitable protective clothing, gloves and eye/face protection. Keep in properly labelled containers. Dispose of rinse water as waste water.
Environmental precautions	: Toxic to aquatic life. Do not allow material to contaminate ground water system. Prevent product from entering drains. Avoid release to the environment.

Methods and materials for containment and cleaning up : Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust).
Shovel into suitable container for disposal.
Large spills should be collected mechanically (remove by pumping) for disposal.
Ventilate the area.

SECTION 7. HANDLING AND STORAGE

Advice on safe handling : Handle and open container with care.
Protect from contamination.
Use only in well-ventilated areas.
In case of insufficient ventilation, wear suitable respiratory equipment.
Avoid inhalation, ingestion and contact with skin and eyes.
Wear suitable protective clothing, gloves and eye/face protection.
Wash thoroughly after handling.
Keep container closed when not in use.
Allergic reactions may develop after inhalation of low concentrations, also several hours after exposure. Regular medical checks, including lung function, are recommended for long term and repeated use of isocyanates.

Conditions for safe storage : Keep container tightly closed in a dry and well-ventilated place.
Store at room temperature in the original container.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Components with workplace control parameters

Contains no substances with occupational exposure limit values.

Hazardous components without workplace control parameters

Components	CAS-No.
1H-IMIDAZOLE, 1-(1-((4-CHLORO-2-(TRIFLUO	68694-11-1

Personal protective equipment

Respiratory protection : In case of insufficient ventilation, wear suitable respiratory equipment.
When workers are facing concentrations above the exposure limit they must use appropriate certified respirators.
The filter class for the respirator must be suitable for the maximum expected contaminant concentration (gas/vapour/aerosol/particulates) that may arise when handling the product. If this concentration is exceeded, self-contained breathing apparatus must be used.

Hand protection

Remarks : Chemical resistant protective gloves
