Standard voltage for all models is 240 VAC single phase power. †For complete information consult written warranty. *120 VAC single phase power. **Side water connections. ΔTop inlet/outlet water connections; may be field converted to side inlet/outlet. †Point-of-Use are Reliance® brand products.

Energy Factor ratings shown for Hybrid Electric Heat Pump units are based on operation in the Hybrid mode. Recovery Ratings shown for Hybrid Electric Heat Pump units are based on back up heating element performance.

For models shipped with an insulation blanket, see the "Shipped with Factory Insulation Blanket" section of the table above.

* For propane model change the "N" to "L". ** For Propane model change "N" to "P". ††For Propane model change "NOV" to "PV".

†For complete information consult written warranty.

‡ Some propane gas models have slightly lower inputs than natural gas models, which may reduce First Hour Rating and Recovery by up to 3 gallons on propane models.

†† Atmospheric Direct Vent models DVG62-50T40-NOV and DVG62-40S38-NOV are not available in propane. 40 gallon model requires 67" minimum and 50 gallon model requires 76" minimum vertical clearance for factory provided/required coaxial vent kit. These coaxial vent kits terminate horizontally through a side wall only.

For models shipped with an insulation blanket, see the "Shipped with Factory Insulation Blanket" section of the table above.

Power Vent model PVG62-75T76-NV and Power Direct Vent models PDVG62-75T76-NV and PDVG6250T62NV are factory equipped with side loop water connections for combination domestic hot water and hydronic heating applications where local codes permit.
