

# New Product Alert From Van Mark

Center-wheel system is the perfect support for your Van Mark tools providing effortless maneuverability on virtually any job site terrain.

UniStand EZ-Go™ USA1EZ and USA2EZ work with Van Mark tools including brakes and saw tables. UniStand EZ-Go™ promises to be the best all-around tool stand you have ever used. The centrally located wheels provide balanced load/weight distribution and allows easy single user setup and use over virtually any job site terrain.

## Features

- EZ Wheel Engagement
- Center Balanced
- Maneuverability
- Heavy-Duty Wheels

## Benefits

- Quickly and easily engage/disengage center roller wheels.
- All weight is centered on heavy-duty wheels. Moving around is effortless.
- Pivot on a dime while making maneuvering around job site a breeze.
- Large diameter wheels with bearings provide superior load carrying ability.

Mark II TrimMaster® TM10HD shown with optional UniStand EZ-Go™ USA1EZ

Mark I Series™ M10 shown with optional UniStand EZ-Go™ USA1EZ

Metal Master® 20 MMI050 shown with optional UniStand EZ-Go™ USA2EZ

**I**dle Position. When not engaged, wheels stay retracted and out of the way allowing 4-point support for unmatched stability.

**T**o engage wheels, simply lift carrying handle at end of brake and let gravity pull axle to bottom of slot.

**W**hen the axle comes to rest against end of the brake, lower brake to capture axle in fixed position. You can now easily maneuver tool as needed.

**T**o disengage, lift opposite end and let axle travel back. As you lower the brake, the axle will float within the slot until you engage it again.

# Other Quality Accessories by Van Mark

## TrimCutter

Model 3017

"cuts alum, copper, galv steel, zinc & stainless steel"

TrimCutter™ uses a unique 4 point track bearing system to ensure tool doesn't ride off the brake during cut. Low profile grip area allows you to direct power along the plane of the cut resulting in one smooth motion that leaves factory edges every time.

Does Not Ride Off Tracks During Cut

This tool pays for itself after just one job!

## Coil Dispenser

Model CD24

Shown with optional TrimCutter™

Coil not included

Saves Time & Money!

Coil Dispenser™ is one tool that keeps paying for itself time and again. No unravelling coils and no wind-blown damage are just two features that make this accessory a must have for anyone in the trade. Coil Dispenser™ saves time and money allowing materials to be fed directly into most brakes and slitters. Unit also works with QuickScore™ and TrimCutter™ for fast cutting of materials.

Coil Dispenser™ feeds materials into most brakes and slitters, preventing wind-blown damage and waste.

## TrimFormer

Model 3015

Patent No's. 6,000,268  
6,233,995

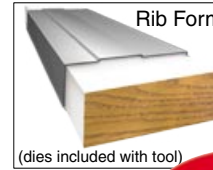

Brick Mold & Rib Dies Come Standard

NEW!

Optional Rain Stop Dies & Crown Mold Dies

TrimFormer™ gives you the ability to strengthen and beautify ordinary trim work into designs that will distinguish your workmanship from all others. Brick Mold and Rib Forming dies come standard, while Rain Stop & Crown Mold dies are optional.

- Effortlessly integrate profiles into trim work
- Only TrimFormer™ forms true brick-mold profiles
- Affordable unit pays for itself after one job
- Comes standard with brick-mold & rib dies
