CONTROL

**KNOW
MORE!**
Rodents

For more than 120 years, Victor® has been dedicated to providing solutions to rodent problems. The first Victor® spring-based mouse trap was invented in 1898, revolutionizing the rodent control market. The story tells us John Mast designed the traps to capture mice coming to his property from a nearby popcorn factory. To this day, Victor® has produced over one billion impressions of the iconic Victor® V. The original Victor® traps are still manufactured in Lancaster County, Pennsylvania.

Victor® offers the broadest line of rodent control products in the market including traps, repellents, and poisons. So, whether you are attempting to prevent a rodent infestation or trying to fight one, there is a product to fit each and every situation. To learn more about the Victor® brand, our story and our products, please visit www.victorpest.com.
