

Razor Neck Worn Passive Earbuds

Product Description

The Razor Passive Neckband with retractable earplugs provides passive ear protection to the user from loud noises such as construction equipment and industrial noises, in a comfortable neck worn design.

This passive protection reduces outside sound, providing a linear reduction of loud noises, making it perfect for use in areas with persistent or intermittent loud sounds such as gun job sites and flight lines.

The neck material is super flexible to provide a comfortable, light-weight experience and the earbuds retract when not in use for the ultimate convenience.
